weeks will show even a greater amount than that.

Mr. MANN. Mr. Chairman, I move to strike out the last word. I do not know whether it is the intention of the gentleman in charge of the bill to permit discussion out of order or

Mr. SISSON. I will state, for the benefit of the gentleman from Illinois, that after the gentleman from Indiana [Mr. ADAIR] had started it was understood by the subcommittee that any gentleman on that side of the House might have five minutes, and that we would be fair about it; but that after that no speeches on the currency question should be injected into the bowels of this bill.

Mr. MANN. I do not desire to consume even the five minutes, but I suggest to the gentleman that if he is going to conduct the bill on that basis, when some gentleman on that side of the House happens to desire recognition to discuss a matter out of order he ought not to invoke the rules when some gentleman on this side of the House desires to do the same thing.

Mr. SISSON. I will say that that will not be done, gentleman wants five minutes, we will be fair about it. If any

Mr. MANN. But your proposition to be fair is to let it commence on that side. I want to know whether you are going to do it or not.

Mr. SISSON. The subcommittee did not know exactly what the gentleman from Indiana [Mr. ADAIR] was going to say until he got started.

Mr. MANN. I am very sure that the subcommittee did not know what the gentleman from Indiana was going to say, or they would not have let him say it. The gentleman from Indiana [Mr. Adair] pleads guilty to the charges which I made yesterday. He admits the condition of the country, and says it is because the banks are holding money. The banks are holding money because they are frightened. People are selling their stocks because they are frightened. There is no market to buy them. Industries are closed up because they are frightened. And the gentleman from Indiana, in the banking business himself, probably read something about it because he is frightened.

Mr. ADAIR. Not at all; not at all.
Mr. MANN. Oh, no, no; the gentleman is different from all the other bankers.

Mr. ADAIR. Not exactly.
Mr. MANN. It may be that the gentleman does not appreciate the situation enough to be frightened. The gentleman admits that the bankers are frightened. I will except the gentleman from Indiana, but he will learn better later.

Mr. GOULDEN. Mr. Chairman, I move to strike out the paragraph for the purpose of saying a few words on the subject under consideration.

The special committee are to be congratulated on bringing in a bill free from the usual objections of legislative riders. have always opposed this method of attempting to put something through that will not, as a rule, stand alone on its merits. The House yesterday was treated to good party speeches by two of the political giants. Personally, I do not wish to add a word, but simply to have read in my time an editorial from the Saturday Evening Post, a widely circulated journal published in that rock-ribbed Republican city of Philadelphia, under date of December 20, 1913, entitled "The business situation," which commends itself to the patriotic people of the country.

Mr. SISSON. Mr. Chairman, I object. We can not have this

bill sidetracked for political speeches.

Mr. GOULDEN. It will not take more than three minutes.

Mr. SISSON. I object.

The Clerk read as follows:

The Clerk read as follows:

Free Public Library, including Takoma Park branch: Librarian, \$4,000; assistant librarian, \$1,500; chief circulating department, \$1,200; children's librarian, \$1,000; assistant in charge of school work, \$900; librarian's secretary, \$900; reference librarian, \$1,000; assistants—one \$1,000, one in charge of periodicals \$1,000, one \$900, six (including one in charge of Takoma Park branch) at \$720 each, six (including one for the Takoma Park branch) at \$720 each, six (including one for the Takoma Park branch) at \$480 each; copyist, \$480; classifier, \$900; cataloguers—one \$720, one \$600, two at \$540 each; six enographer and typewriter, \$720; attendants—six at \$540 each, five at \$480 each; collator, \$480; three messengers, at \$480 each; ten pages, at \$360 each; two janifors at \$480 each one of whom shall act as night watchman; janitor of Takoma Park branch, \$360; engineer, \$1,080; freman, \$720; workman, \$600; library guard, \$720; two cloak-room attendants, at \$360 each; six charwomen, at \$240 each; in all, \$46,640.

Mr. FOWLER. Mr. Chairman, I reserve a point of order against the paragraph. I desire to ask the gentleman in charge of the bill if there is not an increase of salary for the librarian from \$3,500 to \$4,000?

Mr. PAGE of North Carolina. Yes; and it is specifically stated in the report.

Mr. FOWLER. And the assistant in charge of the school work, in line 11?

Mr. PAGE of North Carolina. That is an entirely new position.

Mr. FOWLER. On line 14, page 11, is one for \$900.

Mr. PAGE of North Carolina. That is also a new employment and is stated in the report.

Mr. FOWLER. There is an increase in the next item from \$500 to \$600 each.

Mr. PAGE of North Carolina. Charwomen?

Mr. FOWLER. Page 11, line 15.

Mr. PAGE of North Carolina. That increase is for one messenger over current law, and is set forth in the report. Mr. FOWLER. Now, going back to these increases, what rea-

sons have you for such increases?

Mr. PAGE of North Carolina. The reason for the increase is that in the estimates made by the District Commissioners they ask for an increase of more than \$18,000 in new positions and increases of salary

Mr. FOWLER. And the committe made an increase of how

much?

Mr. PAGE of North Carolina. Between \$3,000 and \$3;500. Mr. FOWLER. Oh, the committee has made an increase of more than \$4,000.

Mr. PAGE of North Carolina. I think not. I have not recently computed it, but I think the gentleman will find that it is about \$3,500.

Mr. FOWLER. It amounts to \$4,460. Mr. PAGE of North Carolina. I have not the time to go into the arithmetic of the matter, but every item is set out in the

Mr. FOWLER. It is not a large increase. Mr. PAGE of North Carolina. It is a small increase in view of the demand made by the commissioners and in the light of what the subcommittee deems reasonable.

Mr. FOWLER. You have made an increase for the charwomen from \$180 to \$240 a year—that is annual.

Mr. PAGE of North Carolina. Yes; that is annual, and I hope the gentleman from Illinois will not make a point of order against that,

Mr. FOWLER. Never on earth; but I would like to make it

not less than \$600.

Mr. PAGE of North Carolina. We put them on a par with the charwomen in other departments of the Government, believing that it was right not to discriminate.

Mr. FOWLER. What was the reason for the increase of the

salary of the librarian?

Mr. PAGE of North Carolina. In the judgment of the committee, the responsibilities of and the ability required to fill the position demanded a salary of \$4,000. In the estimates it was asked to be put at \$5,000.

Mr. FOWLER. He gets more than double the salary of the

assistant librarian.

Mr. PAGE of North Carolina. Yes; the assistant gets less than half; but of course he does not have that responsibility which the librarian has and does not have the work.

Mr. FOWLER. Mr. Chairman, I make a point of order

against the increase of the librarian's salary.

Mr. PAGE of North Carolina. Mr. Chairman, I presume the gentleman makes the point of order based on the increase above that provided by law. Is that the gentleman's point of order?

Mr. FOWLER. Mr. Chairman, there is no authority for it,

either in current or permanent law.

Mr. PAGE of North Carolina. Mr. Chairman, I desire to say in connection with the fixing of the salary of librarian of the city that in the act creating the personnel of this library there is no statutory sum mentioned for the service of any employee, but the law says:

The said board of trustees shall appoint a librarian to have the care and superintendence of said library, who shall be responsible to the board of trustees for the impartial enforcement of all rules and regulations lawfully established in relation to said library. The said librarian shall appoint such assistants as the board shall deem necessary to the proper conduct of the library. The said board of library trustees shall make an annual report to the Commissioners of the District of Columbia relative to the management of the said library.

This is the language used in the creation of the force for this city library.

Mr. FOWLER. Will the gentleman yield? Mr. PAGE of North Carolina. Certainly.

Mr. FOWLER. Is it not the rule that where a salary is not fixed by permanent law, but is fixed by current law, the cur-

rent law prevails until changed by law?

Mr. PAGE of North Carolina. In that connection, Mr. Chairman, I desire to say that since the establishment of this library under the law, which I have just cited, the services of a librarian have been constant there at varying salaries. One thousand six hundred dollars, I believe, was the first provision made, and in the appropriation bills from time to time that salary has been increased until in the current law it is carried at \$3,500, and in the bill now presented and now under consideration it is recommended at \$4,000. In other words, the salary of this librarian has been fixed in this appropriation bill reported to this House and has not been in any other way. It has not been permanently established.

The CHAIRMAN (Mr. GARRETT of Tennessee). Chair understand the gentleman's contention to be that there

has never been any statute fixing the salary?

Mr. PAGE of North Carolina. There has not been any statute fixing the salary. It has been fixed in the appropriation bill from time to time at varying amounts. In the current law it is fixed at \$3,500, and in the proposed law we put it at

Mr. FOWLER. It has never been \$4,000 heretofore?

Mr. PAGE of North Carolina. No; it has not been \$4,000. It has been \$3,500 and we propose to make it \$4,000.

Mr. FOWLER. That is an increase of \$500?

Mr. PAGE of North Carolina. An increase over the current

Mr. FOWLER. Over the highest salary that he has ever

Mr. PAGE of North Carolina. That is correct.

The CHAIRMAN. Will the gentleman from Illinois permit an inquiry from the Chair?

Mr. FOWLER. Yes.

The CHAIRMAN. Suppose the salary were fixed at \$1,000 or \$1,500 or any amount, would it not be subject to the same objection, if subject to objection at all, that the gentleman now

Mr. FOWLER. Yes; if the salary had ever been fixed by current law and then a proposition were offered to increase it above what had been heretofore carried, it would be subject to a point of order just the same as though it had been fixed by permanent law

The CHAIRMAN. Has the gentleman any authority for the

statement that the current law controls?

Mr. FOWLER. Yes. This matter was up last year during the consideration of a like bill. We had some decisions bearing directly upon that point, as I recollect, but I have not the rules

with me to-day. It is so hard to get places to keep things here.

Mr. MANN: Mr. Chairman, the question of points of order
on these salaries arises every Congress before every new chairman who presides over the Committee of the Whole in the consideration of an appropriation bill. I had supposed that the rule was perfectly familiar to the present occupant of the chair, though I am not sure that that is the case, in view of

the question that he has submitted to my colleague.

The CHAIRMAN. The present occupant of the chair had the honor of presiding over one of these District bills, but he does not remember now whether this particular question was

raised at that time.

Mr. MANN. These rules and rulings are well grounded in my system through a series of years of watching appropriation bills. The rule is consistently maintained, as it has been for many years as an arbitrary ruling, that where current law carries a provision for an office not authorized by law the provision for the office itself is subject to the point of order, but where the current law carries a salary for an office, where the office is authorized by law, the salary in the current law is a basis for the bill before the committee, unless the salary be fixed by permanent law. That is a purely arbitrary ruling made many years ago, because without it there was no basis for a salary at all. The Chair will see where the law creates an office and provides a fixed salary for it; that is the guide, because that is the law, but where there is no salary provided by permanent law for the offices there is no guide at all and no authorization for any salary, and the Chair many years ago took the position which has been followed ever sincesalary fixed in the current law where there is no permanent authorization for the salary is to be taken for the guide in making up the new appropriation bills. While I hope very much that my colleague from Illinois [Mr. Fowler] will not insist upon the point of order, yet under all of the rulings of all of the chairman for many years, the salary of the librarian being fixed in the current law at \$3,500, it is not in order over a point of order to increase it in the pending bill to \$4,000.

Now, there are a number of these arbitrary rulings that have been followed for years, and unless they are followed there is no end to the confusion which results. The Chair asked some time ago whether the salary could not be reduced. Of course it is quite within the power of the committee at any time, or the House, to reduce a salary to the extent of not making the appropriation. That can be done where the salary is fixed by law. If the salary here is fixed at \$5,000 by permanent law, we [Mr. TOWNER].

are not required to appropriate the full salary. That is not subject to the point of order, because we have authority to appropriate anything less than the full salary if we wish to do The rulings have been consistent; they are set out in the manual, if the Chair desires to hear them.

Mr. TOWNER. Mr. Chairman, I want to call attention to what I think is a misapprehension regarding the legal proposition involved. Members here have spoken of permanent law and If there was any law enacted which stated that a salary should be fixed, it would be neither permanent nor temporary; it would be a law. Certainly we could not increase; or, if there was an increase reported, it would be subject to a point of order. But there is no current law nor any law of any kind when merely after the creation of an office an appropriation is made for it. That does not fix the salary at all. The salary is not fixed now if this should become a law at \$4,000. The provision of the bill is merely that \$4,000 shall be paid to the librarian for his services this year. There is a very different state of facts in existence between passing an appropriation for services that would be rendered and fixing the salary of an officer, either permanently or temporarily. There has never been, as I understand it, any law anywhere that ever stated, either permanent or current, that the salary of the librarian should be so much. There have been from time to time, after the passage of the law created, or rather giving the board of directors the power to create, this position, various appropriation bills passed each year and they have been increased from time to time; but it certainly can not be said now that there is any current law, or any other kind of a law, fixing the salary of the librarian.

Mr. MANN. Mr. Chairman, the rule is very well established as I stated it before. I had supposed it unnecessary to argue to Members of the House, but if the Chair will permit me to read from the manual, I read from Rule XXI, paragraph 818:

The mere appropriation for a salary does not create an office so as to justify appropriations in succeeding years, it being a general rule that propositions to appropriate for salaries not established by law, or to increase salaries fixed by law, are out of order. But an exception to these general principles is found in the established practice that, in the absence of a general law fixing a salary, the amount appropriated in the last appropriation bill has been held to be the legal salary.

The CHAIRMAN. It refers to Hinds' Precedents?

Mr. MANN. It refers to Hinds' Precedents. There has been no variation from that rule since I have been a Member of the

The CHAIRMAN. The Chair has before him now the reference made in the manual to section 3687, volume 4, of Hinds' Precedents. There is no doubt, and the Chair sustains the point

Mr. TOWNER. I understood, Mr. Chairman, the point of

order was reserved, or was it made?

The CHAIRMAN. The Chair will say it was reserved at first. but the gentleman from Illinois subsequently made the point of

Mr. TOWNER. I desire to submit some amendments.

The CHAIRMAN. The gentleman from Iowa offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 11, line 10, strike out "\$1,500" and insert in lieu thereof the following: "\$1,800."

Mr. SISSON. Mr. Chairman, I make a point of order.

The CHAIRMAN. Fifteen hundred is the amount of the current law?

Mr. SISSON. Yes, sir.
The CHAIRMAN. The Chair sustains the point of order.
Mr. TOWNER. Will the gentleman reserve the point of

Mr. SISSON. I will reserve the point of order if the gentleman wants to argue this point of order.

Mr. TOWNER. I simply desire to make an inquiry. Was that item carried last year at \$1,500?

Mr. SISSON. Yes. Mr. TOWNER. And it is now carried at the same? It is

not any new office created?

Mr. SISSON. No, sir.

The CHAIRMAN. The gentleman from Iowa offers a further amendment, which the Clerk will report. The Chair sustains the point of order.

Mr. TOWNER. I do not care, Mr. Chairman, to offer these amendments separately if they are all subject to points of order,

but I will ask the Clerk to read them seriatim.

Mr. SISSON. I have no objection to their being there, but I reserve the point of order.

The CHAIRMAN. Without objection, the Clerk will read

the several amendments proposed by the gentleman from Iowa

The Clerk read as follows:

Page 11, line 19, strike out "\$720" and insert "\$1,200."

Mr. SISSON. Mr. Chairman, I make a point of order against that.

Mr. TOWNER. Is that carried at \$720 now? Mr. SISSON. Seven hundred and twenty dollars; yes.

The CHAIRMAN. The Chair sustains the point of order. The Clerk will read the next amendment.

The Clerk read as follows:

Page 11, line 19, strike out "\$600" and insert "\$900."

Mr. SISSON. Mr. Chairman, I make a point of order against that.

The CHAIRMAN. The Chair sustains the point of order. Mr. TOWNER. Is that also carried in the present bill?

Mr. PAGE of North Carolina. It is carried in the present bill at \$600.

The CHAIRMAN. The Clerk will report the next amendment.

The Clerk read as follows:

Page 11, line 20, strike out the word "two" and insert in lieu thereof the word "three."

Mr. PAGE of North Carolina. To what does that refer?

Mr. TOWNER. That refers to a new cataloguer.

That is not subject to a point of order.

Mr. TOWNER. I think that can hardly be subject to a point of order, Mr. Chairman.

The CHAIRMAN. Is that in line 19?

Mr. FOWLER. In line 20.
The CHAIRMAN. It is the word "two"?
Mr. MANN. The word "two." It is not subject to a point of

Mr. SISSON. It is not authorized by law.

Mr. MANN. If the Committee on Appropriations should ever get a ruling from a chairman about a new employee, subject to a point of order, they would be lost. The Chair just overruled a point of order made by the gentleman from Wisconsin on that identical point.

Mr. SISSON. I withdraw the point of order.

The CHAIRMAN. The point of order is withdrawn. The question is on the amendment offered by the gentleman from Iowa [Mr. Towner]. Mr. TOWNER. I want to be heard.

The CHAIRMAN. The gentleman from Iowa is recognized. Mr. TOWNER. Under the circumstances I can only call attention to the conditions existing in the public service in the library. I am quite sure if the gentleman from Illinois and the Members of the House realize the real conditions that exist in regard to the public library in Washington they would thank the committee for doing what it has toward increasing a very little the appropriation and the number of employees, and would ask them to go much further in their increases. The truth is, Mr. Chairman, that this public library in the city of Washington has been for some reason sadly neglected. I want to call attention to what is said by the chairman of the Board of Commissioners of the District of Columbia, on page 60 of the hearings, as follows:

Mr. PAGE. Now, in connection with that item on page 36, is there any additional statement that you, as commissioners, care to make about this library matter, or shall we take it up in detail with the

about this library matter, or shall we take it up in detail with the librarian?

Mr. Newman. The only additional statement I would care to make would be to emphasize my very strong feeling that this institution has never gotten a fair start. It was launched on a very small basis. It was launched with what you might call a capital investment insufficient to enable it ever to make a decent start, and since then there have been some slight increases from time to time, but such slight normal increases as you would expect in a growing concern have not by any means met the demands of the institution, because it received such an ineffectual start. I have personal knowledge of the very excellent work that the library is doing under the direction of its librarian, and I have a very strong feeling that he ought to have more and better facilities with which to do the service to the people of the District that he is trying to do.

The hearings before the subcommittee show that in cities of this class in other parts of the country librarians and other employees are receiving much more salary than the librarian and employees here. The salaries that are paid to all of the employees here in the library are very much smaller than paid to the same class of employees in other departments of the District of Columbia, and the same class of employees in the departments of the Government itself. For instance, the chief of the circulating department, the chief executive officer of the library, is to receive a salary of only \$1,200 a year, when the chief clerk in the auditor's office here in the District of Columbia receives a salary of \$2,250. Assistants, who serve the people, advise them regarding the books and bring the books to them, attend them in the library-a high class of efficient work-receive but \$900, when the bookkeepers in the auditor's office feceive \$1,800. The reference librarian, who must be a

skilled expert in that department, receives \$1,000, when the accountants in the auditor's office receive \$1,500 and \$1,600.

The cataloguer receives only \$720, when the clerks in the auditor's office receive from \$1,400 to \$1,600. The stenographers and typewriters receive only \$720 in the library department and receive from \$720 to \$1,200 in the other departments of the District government. The attendants receive \$540, when in other places they receive \$600. Messengers here receive \$480, but in other departments of the District they receive \$600.

Not only are the salaries not up to the standard of other departments in the District government, but the help is very insufficient. The library is doing a fine work under the superintendency of the splendid librarian, Dr. Bowerman, who, I am almost certain, will be compelled to resign his position if he is paid only the salary that is now given him. The public library is an efficient instrument in the elevation and education of the people of the District of Columbia. The librarian, other officers, and employees are doing good work and rendering effective service of a high class for the people.

It is a great mistake for Congress to treat this particular department of the work in the District of Columbia as it is doing. It makes Congress liable to some of the charges that are leveled against it. The library reaches a class of people who should be helped and influenced in the best way by the best and most competent labor that can be secured. We are unjust to them and to the people whom they serve if we overwork and underpay them. At least we ought to bring this great department up to the standard of the best libraries in cities of this

class throughout the United States. [Applause.]
Mr. PAGE of North Carolina. Mr. Chairman, I can only say that in the consideration of the increases asked for in connection with this item your subcommittee allowed those that in their judgment were most urgent and most needed and those as to which we could reach a reasonable agreement; and I, therefore, hope that the amendment offered by the gentleman from Iowa [Mr. Towner] will be voted down. I ask for a vote.

The CHAIRMAN. The question is on agreeing to the amend-

ment offered by the gentleman from Iowa [Mr. Towner].

Mr. GREEN of Iowa. Mr. Chairman, although I know that no word that I can say will have any effect upon this matter,

I wish to speak very briefly upon this subject.

The situation with reference to the public library in this city is little short of a disgrace, and it is a prominent example of the incompetency and inefficiency of this Congress to deal with matters that relate solely to the people of this city. Congress for some reason or other has discriminated against the employees of the public library—one of the most important subjects that can come before this body. The salaries are insuffi-cient and lower than they are in the other departments, and the discriminations against the institution itself are of such a nature that Congress ought to take immediate cognizance of How long this situation is to obtain, I know not; but I hope that if my voice and the voices of others are raised here long enough and continuously enough, eventually it will be remedied.

Mr. PAGE of North Carolina. Mr. Chairman, will the gen-

tleman allow me to interrupt him?

Mr. GREEN of Iowa. Certainly. Mr. PAGE of North Carolina. I desire to say that the increase for the library carried in this bill, amounting to \$4,060, is a greater increase than has been given to this institution during the last six years on the annual appropriation bills.

Mr. GREEN of Iowa. So much the worse for Congress in the past, and so much the better for the committee that has at last concluded that there ought to be some increase, however

slight it may be.

That is the situation exactly. Here is an educational institution, the most important that can exist in the city, and Congress is deaf, stone deaf, to its necessities, to its complaints, and to the complaints of the people of this city in regard to it. How long, O Lord, how long!

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Iowa [Mr. Towner].

The question was taken, and the amendment was rejected. Mr. JOHNSON of South Carolina. Mr. Chairman, I move to strike out the last word.

gentleman from South Carolina The CHAIRMAN. The

moves to strike out the last word.

Mr. JOHNSON of South Carolina. Mr. Chairman, there is an item on page 6 of this bill which provides for the coroner's office. It is to it that I desire to address my remarks. I remember last fall that one person was killed each day for three successive days by automobiles. There have been a dozen persons killed in the city of Washington during the present year by automobiles.

Mr. ROBERTS of Massachusetts. Thirteen.

Mr. JOHNSON of South Carolina. In every instance the coroner has called a jury and they have rendered a verdict

that it was an unavoidable accident.

I do not know the coroner of this District, but I presume he is a man of some force, and that he must dominate and influence his juries. He certainly does not understand the commonlaw duties of a coroner's jury. It is not the business of a coroner's jury, when there has been a sudden death, to inquire into the merits of the killing. It is the duty of the coroner's jury to present the fact that a human being has been suddenly killed. It is for a grand jury and a petit jury in a court of competent jurisdiction to pass upon the degree of guilt or innocence involved in the killing. It is no part of the province of a coroner's jury to prejudge the defendant in the criminal courts or to prejudge damage suits in civil courts where a person may be killed by a street car or other vehicle. I do not believe that these people have been killed as the result of unavoidable accidents. I believe that they have met their deaths as the result of reckless driving by people who were not mindful of the rights of other men. If any man were to go into a crowded street and discharge firearms and kill some person whom he did not know and against whom he had no personal ill will, the law says that it is a malicious killing. The law declares that it was done with malice, because it was done without regard to the rights of other people and that the conduct was reckless. I do not believe that any man who has a proper regard for human life and the rights of other people will drive these powerful cars through crowded streets at such speed as to kill men at the crossings. The pedestrian ought to have the right of way at street crossings, and the man who comes with a powerful engine at such a rate of speed that he can not control his car is guilty of violating the criminal law, and he ought to be carried before a grand jury, and if a prima facie case is made out, he ought to be tried by a petit jury. And I will tell you, gentlemen, if somebody in this town is convicted of murder or manslaughter, you will find that these accidents are avoidable.

Mr. GREEN of Iowa. Will the gentleman yield? The CHAIRMAN. The time of the gentleman has expired.

Mr. FOWLER. I ask unanimous consent that the gentleman's time may be extended five minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. JOHNSON of South Carolina. I will yield to the gentle-

Mr. GREEN of Iowa. I quite agree with what the gentleman has said as to the rights of pedestrians, but does he know of any street where the pedestrians get their rights, as matters stand now?

Mr. JOHNSON of South Carolina. I do not.

Mr. GREEN of Iowa. And is it not strange, considering the way that automobiles are driven in this town, that more than 13 persons have not been killed in the last year?

Mr. JOHNSON of South Carolina. It is, Mr. FOWLER. Will the gentleman yield? Mr. JOHNSON of South Carolina. I will yield to the gentle-

man from Illinois.

Mr. FOWLER. I call the attention of the gentleman from South Carolina to the fact that the coroner's verdict in a trial for a personal injury may be introduced as evidence for the purpose of proving the death, and that the onus of such a verdict of a coroner's jury comes in against the poor plaintiff who

seeks to recover for the redress of a wrong.

Mr. JOHNSON of South Carolina. Mr. Chairman, during the time I have been here I have noticed that when people were killed either by automobiles or street cars the verdict was almost invariably that the person came to his death by his own negligence and that the accident was unavoidable. believe that the coroner and his jury have any right to pre-judge the merits of a damage suit on the civil side of the court or to judge of the merits of a criminal case in a court having the jurisdiction to inquire into it. I myself believe that all of these accidents could have been avoided. I do not believe that any man who has the proper regard for the rights of other people will drive one of these powerful cars at such a rate of speed that he can not stop it if some woman or child suddenly darts in front of him. [Applause.]
Mr. J. I. NOLAN. Mr. Chairman, I ask unanimous consent

to insert in the RECORD the statement made by the President of the United States upon signing the Hetch Hetchy bill.

The CHAIRMAN. The gentleman from California [Mr. J. I. NOLAN] asks unanimous consent to insert in the RECORD at this time the statement indicated. Is there objection?

Mr. FOSTER. I do not believe these matters ought to be

injected into the debate on the District appropriation bill.

Mr. MANN. This statement is very short.

Mr. FOSTER. I have no objection to printing it in the Record if it is printed in the back part of the Record.

Mr. MANN. The trouble is, it is very short.

Mr. J. I. NOLAN. Members of the House have been called

to account for their votes on this bill.

Mr. FOSTER. I suggest that the gentleman read it, if he wishes to have it appear in the RECORD.

Mr. J. I. NOLAN. I will ask the Clerk to read it. Mr. SISSON. I should like to have it read.

The CHAIRMAN. If there be no objection, the Clerk will read.

The Clerk read as follows:

STATEMENT MADE BY THE PRESIDENT WHEN SIGNING THE HETCH HETCHY BILL,

I have signed this bill because it seemed to serve the pressing public needs of the region concerned better than they could be served in any other way and yet did not impair the usefulness or materially detract from the beauty of the public domain. The bill was opposed by so many public-spirited men, thoughtful of the interests of the people and of fine conscience in every matter of public concern, that I have naturally sought to scrutinize it very closely. I take the liberty of thinking that their fears and objections were not well founded. I believe the bill to be, on the whole, in the public interest, and I am the less uncertain in that judgment because I find it concurred in by men whose best energies have been devoted to conservation and the safeguarding of the people's interests, and many of whom have, besides, had a long experience in the public service, which has made them circumspect in forming an opinion upon such matters.

The CHAIRMAN. If there be no objection, the pro forma amendment proposed by the gentleman from South Carolina [Mr. Johnson] will be withdrawn, and the Clerk will read.

The Clerk read as follows:

Miscellaneous, including Takoma Park Branch: For books, periodicals, and newspapers, including payment in advance for subscriptions to periodicals, newspapers, subscription books, and society publications, \$8,500;

\$8,500;
For binding, by contract or otherwise, including necessary personal services, \$4,500;
For maintenance, repairs, fuel, lighting, fitting up buildings, lunchroom equipment, purchase, exchange, and maintenance of bicycles and motor delivery vehicles, and other contingent expenses, \$8,000.

In all, \$21,000.

Mr. FOWLER. Mr. Chairman, I move to strike out the last word. I desire to ask the gentleman in charge of the bill why the provision for the blind in relation to the library was omitted from this section? At the last session we carried an appropriation of \$5,000 for this purpose.

Mr. PAGE of North Carolina. I call the gentleman's attention to the fact that the item was placed in the bill last year in the Senate. It was not in the bill when it passed the House. This year it was not estimated for or brought to the attention of the committee of the House in making up this appropriation bill. In the absence of an estimate, in the absence of any testimony, in the absence of any knowledge, this committee did not include it.

Mr. FOWLER. And there has been no demand for it? Mr. PAGE of North Carolina. Absolutely none to this subcommittee. It was never included in the estimates by the District Commissioners.

Mr. FOWLER. Does the gentleman know how many blind

people there are in the city?

Mr. PAGE of North Carolina. The \$5,000 was appropriated for a private institution last year, and while I have no definite information I have had people talk to me about the institution; I have some knowledge, but not definite enough to state numbers or details of that sort.

Mr. FOWLER. My only anxiety is that these unfortunate people shall be looked after as carefully as any other class of

Mr. PAGE of North Carolina. I share the anxiety of the gentleman, but there are other appropriations in this bill for the care of the blind.

Mr. FOWLER. I see that there is an increase in the amount for binding above that of the current law.

Mr. PAGE of North Carolina. For the library? That was done because representation was made to the committee that as years go by the number of books to be rebound are increasing, and it is necessary in order to preserve them to have this appropriation increased.

Mr. FOWLER. Mr. Chairman, I withdraw the pro forma amendment.

Mr. MANN. May I ask the gentleman from North Carolina question?

Mr. PAGE of North Carolina. Certainly.

Mr. MANN. Was there any inquiry made in the committee about this item for the blind?

Mr. PAGE of North Carolina. There was no investigation.

Mr. MANN. The committee made no investigation about it?

Mr. PAGE of North Carolina. No; there was no estimate forwarded to us. It was put in the bill last year in the Senate, and it has no standing whatever in the Appropriations Committee room of the House.

Mr. MANN. Why does the gentleman say that it has no standing in the House when the House agreed to it in the last

Mr. PAGE of North Carolina. The gentleman from Illinois understands that in making up the bill, under the rules of the House, the Appropriations Committee is supposed to act upon the estimates coming to it through the Treasury Department. There are rules of the House that prevent their considering

Mr. MANN. There are no laws or rules of the House that

prohibit it.

items not estimated for.

Mr. PAGE of North Carolina. Well, a rule of the committee. Mr. MANN. But it is frequently violated. A considerable number of appropriations in the bill are for private enterprises, which originated in the Senate and are constantly carried by the House.

Mr. PAGE of North Carolina. I want to say to the gentleman that when the item was reached, having the current law before us, the chairman of the commissioners made this observation: "There is an estimate that comes out on page 42, according to your suggestion." I said, "The item of library for the blind." Mr. Newman said, "Yes, this has no connection with the public library; that is a private institution." I then said to Commissioner Newman, "Your recommendation is that it be stricken out?" and Mr. Newman replied, "Yes," and we did it.

Mr. MANN. So far as its being a private institution, I want to say that a majority of the appropriations in this bill for

charitable purposes go to private institutions.

Mr. PAGE of North Carolina. I understand that.

Mr. MANN. I can not criticize the committee for following the recommendation of the commissioners. It is on the recommendation of the new commissioners that the appropriation for the blind was left out.

Mr. PAGE of North Carolina. It would have been left out just the same if it had not been recommended by the commis-

sioners.

Mr. MANN. The gentleman and the committee having made

no investigation, how can he make that statement?

Mr. PAGE of North Carolina. Nobody asked for it; there was nothing in the estimates calling our attention to it and asking us to appropriate for it. I call attention to the fact that no appropriation for private purpose is carried in the bill, except those made upon contracts for the performance of specific service, and there is no such contract here.

Mr. MANN. The gentleman is mistaken about that.

Mr. PAGE of North Carolina. I may be in some one instance, but as a general proposition it is true.

Mr. MANN. In some cases the appropriation is for all the

salaries and expenses.

Mr. PAGE of North Carolina. Mr. Chairman, I would like to have the gentleman call the attention of the chairman of the subcommittee to an item of that sort.

Mr. MANN. It may be that you have corrected it in this

bill. I hope so

The CHAIRMAN. The time of the gentleman has expired.

MESSAGE FROM THE PRESIDENT OF THE UNITED STATES.

The committee informally rose; and Mr. Adamson having taken the chair as Speaker pro tempore, a message in writing from the President of the United States was communicated to the House of Representatives by Mr. Latta, one of his secretaries, who also informed the House of Representatives that the President had approved and signed joint resolution and bills of the following titles:

On December 15, 1913: H. J. Res. 164. Joint resolution authorizing the Secretary of the Senate and the Clerk of the House to pay the officers and employees of the Senate and House, including the Capitol police, their respective salaries for the month of December, 1913, on the 20th day of said month.

On December 19, 1913:

H, R. 10081. An act to make the tenure of the office of the major general commandant of the Marine Corps for a term of

four years: and

H. R. 7207. An act granting to the city and county of San Francisco certain rights of way in, over, and through certain public lands, the Yosemite National Park, and Stanislaus National Forest, and certain lands in the Yosemite National Park, the Stanislaus National Forest, and the public lands in the State of California, and for other purposes.

DISTRICT OF COLUMBIA APPROPRIATION BILL,

The committee resumed its session. The Clerk read as follows:

CONTINGENT AND MISCELLANEOUS EXPENSES.

For printing, checks, books, law books, books of reference, and periodicals, stationery; detection of frauds on the revenue; surveying instruments and implements; drawing materials; binding, rebinding, repairing, and preservation of records; maintaining and keeping in good order the laboratory and apparatus in the office of the inspector of asphalt and cement; damages; livery, purchase, and care of horses and carriages or buggies and bicycles not otherwise provided for; horse-shoeing; ice; repairs to pound and vehicles; use of bicycles by inspectors in the engineer department not to exceed \$800; and other general necessary expenses of District offices, including the sinking-fund office, Board of Charities, including an allowance to the purchasing officer and to the secretary of the Board of Charities of not exceeding \$360 each per annum for maintenance of vehicle for use in the discharge of their official duties, excise board, personal-tax board, harbor master, health department, surveyor's office, superintendent of weights, measures, and markets office, and department of insurance, and purchase of new apparatus and laboratory equipment in office of inspector of asphalt and cement, \$36,925; and the commissioners shall so apportion this sum as to prevent a deficiency therein.

Mr. COX. Mr. Chairman, I move to strike out the last word.

Mr. COX. Mr. Chairman, I move to strike out the last word. Beginning in line 11, you say, "including an allowance to the purchasing officer and to the secretary of the Board of Charities of not exceeding \$360 each per annum for maintenance of vehicle for use in the discharge of their official duties.' query is this: Is that a lump sum of \$360 turned over to them, or can they only use so much as may be necessary?

Mr. PAGE of North Carolina. The lump sum is turned over to them for the maintenance of the vehicle. That amount is furnished him for the maintenance of his horse and vehicle.

Mr. COX. Does the gentleman know, or did his committee make any inquiries whether or not it requires that amount of money !

Mr. PAGE of North Carolina, The committee did make inquiry touching allowances of this kind running through the bill, and in every instance they were asking for a greater allowance and saying they could not maintain their horse and vehicle on the allowance made in the bill; but the committee did not increase in any instance.

Mr. COX. The gentleman feels from his answer, I take it,

that it requires this amount of money?

Mr. PAGE of North Carolina. I think, undoubtedly, under present conditions it is not a very liberal allowance

Mr. COX. I am not sure, but at least I would like to see a

limitation put upon that appropriation.

Mr. PAGE of North Carolina. It is the minimum amount, The minimum amount allowed by the Government in other departments is \$400. The committee felt that it was not exorbitant and possibly not an adequate sum.

The CHAIRMAN. Without objection, the pro forma amend-

ment will be withdrawn? There was no objection.

The Clerk read as follows:

For maintenance, care, and repair of automobiles, motor cycles, and motor trucks, acquired for the government of the District of Columbia, that are not otherwise herein provided for, including such personal services in connection therewith not otherwise herein authorized, as the commissioners shall in writing specially order, and for the purchase of one additional motor vehicle herein specified; namely.

Mr. MANN. Mr. Chairman, I move to strike out in lines 3 and 4 the words "and for the purchase of one additional motor vehicle herein specified."

The CHAIRMAN. The gentleman from Illinois offers an amendment which the Clerk will report.

The Clerk read as follows:

Amend, page 14, in lines 3 and 4, by striking out after the word "order" the words "and for the purchase of one additional motor vehicle herein specified."

Mr. MANN. Mr. Chairman, this motor vehicle referred to is therein specified as follows:

Including one to be purchased hereunder for the service of the civilian commissioners.

Mr. Chairman, I have no objection, so far as I am concerned, to purchasing one automobile, or two automobiles, for the two commissioners. I do not believe that Congress ought to provide automobiles for the District Commissioners before they provide one for the Vice President, one for the Speaker, and one each for the Cabinet officers. The Vice President now uses an old automobile, fortunately purchased many years ago, and maintains it and repairs it out of the Senate contingent fund, and it does very well when it runs, though it frequently stops when in service. The House refuses to give the Speaker an automobile, although he now lives where he ought to have one, and we give to the Cabinet officers little dinky carriages and refuse to give them automobiles. The only people for whom we now provide automobiles are the President and his secretary, both of whom ought to have them. Here is a proposition to give to the District Commissioners automobiles that you will not give to the Speaker or to the Cabinet officers. I am willing to give them all automobiles, but I am very much opposed to placing the District Commissioners above the Cabinet officers or the Speaker of the House of Representatives and the Vice

President of the United States.

Mr. PAGE of North Carolina. Mr. Chairman, in reply to what the gentleman from Illinois [Mr. Mann] has said, I will say that yesterday, in my remarks before the House, I made some reference to this item, and possibly gentlemen who are present to-day were not present then. In my judgment, comparison can be instituted as to the necessity for furnishing a means of transportation to either the Vice President of the United States or the honorable Speaker of this body, with the necessity for furnishing one to the gentlemen who occupy the position of District Commissioners, to be used in the discharge of their official duties. I want to say to this House, as I said yesterday, that the automobiles that the gentleman would furnish to the Vice President of the United States, the Speaker of this body, or the Cabinet officers-and I do not know that I would vote differently from him in that respect-would be entirely for social purposes. Their duties do not require that they should cover any distance in this city except from the Capitol to their homes. If they do make other trips, it is done for the pleasure of the gentlemen who occupy the offices. want to appeal to the membership of this House in behalf of the item carried in this bill for the purchase of an automobile for the civilian Commissioners of the District of Columbia. is the necessity from the point of view of your subcommittee. Here are gentlemen who are charged with the duty of familiarizing themselves with the conditions of the streets, the conditions of the police department, the conditions of the fire departmentevery physical condition connected with the city of Washington.

Mr. COX. Have they had any automobiles heretofore? Mr. PAGE of North Carolina. There has been and is now one automobile, provided a few years ago for the engineer com-missioner and his assistant, and it has been in use for some time. Mr. COX. Then, as I understand the gentleman, there never

has been one provided for the civilian commissioners?

Mr. PAGE of North Carolina. There has not been, and I do not hesitate to say to the gentleman that I think in the discharge of their duties those gentlemen who have held these offices have not done their work as efficiently and as fully and as carefully as they ought to have or would have done had they been provided with these modern, quick means of transportation. Mr. CARY. Mr. Chairman, will the gentleman yield?

Mr. PAGE of North Carolina. I yield.

Mr. CARY. I do not know that the gentleman is aware of the fact that the automobile referred to as belonging to the engineer commissioner was never authorized for the engineer commissioner, but for the superintendent of street sweeping-

Mr. PAGE of North Carolina. I think the gentleman is entirely mistaken. This automobile was purchased by provision of law for the Engineer Commissioner of the District of Columbia and his assistants in the discharge of their duties, in specific terms.

Mr. CARY. And the amount was \$2,000.

Mr. PAGE of North Carolina. And the amount, as my recollection is, was more than that—\$3,000.

Mr. CARY. Well, the amount, as I remember it, is \$2,000, but they paid \$2,800 for it.

Mr. PAGE of North Carolina. I have no idea what they paid for it. I want to call attention to the fact that in the purchase of these automobiles and all other automobiles in the future needed by the officials of the District of Columbia this committee has provided a limitation of \$2,000.

Mr. CARY. May I ask the gentleman another question? Mr. PAGE of North Carolina. Certainly.

Mr. CARY. How many automobiles have they in the street

sweeping department now?

Mr. PAGE of North Carolina. The investigation by this committee resulted in the information that now there were 11 passenger automobiles in the service of the District in the street cleaning department and various other supervisors of streets and various other subofficials of the District of Columbia, including the one for the engineer commissioner.

Mr. CARY. Five automobiles and the one for the engineer

commissioner makes six and four motor cycles.

Mr. PAGE of North Carolina. Mr. Chairman, I believe, and I want to say in connection with the amendment offered by the gentleman from Illinois [Mr. Mann], that it goes without saying that as chairman of this subcommittee I believe this automobile ought to have been provided or I would not have stood for

its being written into this provision; it takes the place of two carriages and horses now provided for these commissioners. I am not going to maintain that it will not cost more to maintain this motor vehicle than possibly for the carriages and horses. It is not a matter I care to discuss at this instant, but it is not a charge upon the funds of the District for the amount that would show on its face here because that reduction comes.

Mr. WILLIAMS. Will the gentleman yield?

Mr. PAGE of North Carolina. Certainly. Mr. WILLIAMS. Is it true persons for whom these automobiles are furnished have Maryland and Virginia licenses?

Mr. PAGE of North Carolina. That inquiry was directed at me yesterday, and at that time I was not prepared to answer, but since then I am informed that the officials of the District operating these machines in the discharge of their official duties have at times to go both into Virginia and into Maryland in the inspection of various materials and other things that are used in the District and have to have those tags.

Mr. MANN. And they are needed for joy rides.

Mr. PAGE of North Carolina. They could use them for joy rides; but this committee has made a provision making it rather dangerous to joy ride.

Mr. WILLIAMS. Is it true that they are used for pleasure

Mr. PAGE of North Carolina. I have no information and I can not answer the gentleman's question, but the law provides they shall not. If they do it they do it in violation of the law.

Mr. GARNER. Will the gentleman yield for a question?

Mr. PAGE of North Carolina. I will.

Mr. GARNER. Does the gentleman know of any other city of the size of Washington that has the number of passenger automobiles in service they have here?

Mr. PAGE of North Carolina. To be frank with the gentleman, I have not investigated that, and I do not know, but I imagine that other cities do have them.

Mr. GARNER. The gentleman has suggested that a full investigation into the matter justified him in reporting in favor of the automobile for the civilian commissioners. Did the committee look into the question of the necessity of owning the

11 now in use?

Mr. PAGE of North Carolina. Well, to some degree, yes; we did in the hearings, and, as a result, I will say to the gentleman from Texas, of that investigation on the part of the committee we found that these automobiles now were assigned to a certain officer-for illustration we will say, the assessor of the District, the superintendent of street cleaning—and under this provision the Commissioners of the District had not assumed they had authority or control over these automobiles to the extent of assigning them to some other officials, and as a result of that investigation your committee has written into this bill a clause which provides the commissioners shall have direct control of all these passenger automobiles.

They can assign them and interchange them among the various officials of the District and limit their use to absolutely

official business.

Mr. COX. Mr. Chairman, I move to strike out the last word.

Mr. MANN. Mr Chairman— Mr. COX. Mr. Chairman, I want to ask the gentleman from Illinois [Mr. Mann] a question. I did not quite get his amendment. Will he please state it again?

Mr. MANN. There is an item in two paragraphs on page 14.

The first occurs in lines 3 and 4 of the first paragraph, as

follows:

And for the purchase of one additional motor vehicle herein specified. I move to strike that out. And then there is the next one,

to which there will be another amendment offered.

Mr. COX. I want to support the amendment offered by the gentleman from Illinois. I do not base my support of it, however, on the ground upon which he places it, namely, that because Congress refuses to give the Vice President and the Speaker of the House an automobile there is no reason why we should give these commissioners automobiles. I put my support of his amendment on entirely different grounds, and whether it be called the ground of economy or not, I do not care. But I have observed, gentlemen, for the last number of years the constant attempt and determination, as it were, on the part of the departments to get Congress to buy automo-The Post Office Department for the last number of years has been doing its best to get the Government to buy automo-Last year, I think it was, a provision was inserted in the Post Office bill which gave to the Postmaster General the power to spend a part of the money that went to the screen-wagon service in the purchase of automobiles. Under that power

given to them they purchased something like 40 automobiles in the last year or so. The proof shows, as anyone will find who will read the hearings before the Committee on the Post Office and Post Roads, that because of the fact that they have abandoned the collection and distribution of mail under the mail and screen-wagon service, heretofore done by horses and now done by automobiles, it has actually increased the cost all the way from 30 to 100 per cent. And yet when they were before the committee trying to get the right to buy automobiles the ground on which it was put was that of economy, of efficiency, and good administration. Yet after they got the automobiles, although it increased the cost all the way from 30 to 100 per cent, the Post Office Department before the committee the other day was forced to admit it did not increase the facilities of the mail to exceed 15 minutes. I am now quoting in a brief and summary way the testimony before the Post Office Committee.

Now, with all due deference to my friend from North Carolina [Mr. Page], who, I think, has held this bill down clearly within proper reserve, we are told again that on the ground of efficiency these men ought to have automobiles. Will they do any more work? Does anyone believe for a moment that if we give them \$2,000 with which to buy automobiles they will be any

more diligent in pursuit of their daily avocations?

Mr. PAGE of North Carolina. Will the gentleman permit an

interruption?

Mr. COX.

Mr. PAGE of North Carolina. I want to say to the gentleman that if these added facilities did not make it so I would not be for the appropriation.

Mr. COX. I think the gentleman is conscientious in that statement.

Mr. PAGE of North Carolina. And I will repeat to the gentleman the statement I made on the floor of the House yester-I do not believe that any man, however diligent he may be, however industrious he may be as a Commissioner of the District of Columbia, can get information that he needs and ought to have for the proper discharge of the duties of his office without these facilities.

Mr. COX. And I will go further than that and say that I do not believe for a moment that the gentleman would stand for a dollar in this bill, no matter who is getting it, unless he conscientiously believed that that dollar would be 100 cents in the way of service to the people. But in my way of looking at it I do not believe the public would get one penny more good out of these automobiles. And instead of it being a matter of economy, in my candid judgment it is going to be a matter of expense without any increased profit whatever.

Mr. PAGE of North Carolina. Let me inquire of the gentle-

man. In the last few years, not only in Washington but elsewhere, there has been a gradual change from horse-drawn firefighting apparatus to motor apparatus. Does the gentleman ap-

prove of that?

Mr. COX. I might approve of it.

Mr. PAGE of North Carolina. On what ground?

Mr. COX. When you are approaching a conflagration you want to get there as quickly as possible.

Mr. PAGE of North Carolina. And when there is a condition that requires quick action.

Mr. COX. But when you work under emergency— Mr. PAGE of North Carolina. If they work under emergen-cies, they should have the facilities to do it.

Mr. COX. They would not do it if they had facilities for

Mr. SISSON. Mr. Chairman, I move to strike out the last word. I want to correct a statement of the gentleman from Wisconsin [Mr. CARY].

If the gentleman from Wisconsin [Mr. CARY] will look in the appropriation bill of 1911, he will find the specific authorization for the purchase and maintenance of an automobile for the official use only of the engineer commissioner and the assistant engineer commissioner in inspection work, \$2,400, or so much thereof as may be necessary; so that there is no doubt about the specific authorization.

Mr. CARY. I will say to the gentleman that I think he is perhaps correct.

Mr. SISSON. That is the language of the bill. There are a few items in this bill, Mr. Chairman, upon which the members of the subcommittee differed. I differed with the subcommittee with respect to this item. My information was that with the 11 passenger automobiles that they already have we could put in this bill a provision requiring that they could assign those automobiles. They could do all the official work that would be required of them by a proper assignment of the automobiles for the maintenance of the machines provided at the they now have, because it is not conceivable that all these 11 time. It is not for the purchase of any new machines.

passenger automobiles would be engaged in that sort of service at the same time.

If the Committee of the Whole desires to furnish them with an additional machine to be used for social or quasi-social purposes, it can give them this machine. Your subcommittee, how-ever, has endeavored to safeguard that by providing that it shall be used for official purposes only.

Mr. CARY. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Mississippi vield? Mr. SISSON. In a moment, My reason for opposing this item is that I do not believe the proviso will do what our chairman says it will do, because if you want to go to a place quickly, as happens frequently, those commissioners can go together in one machine, and that would leave 10 machines remaining unused around the District Building. My judgment is that at least a third or a half of these machines will be standing constantly idle about the District Building. I admit that my statement is not susceptible of proof; but if these commissioners do any work at all, they can certainly so arrange matters that it will not be necessary for each commissioner to be especially provided with a separate machine.

The item that I read to the gentleman from Wisconsin [Mr. Carr] a moment ago, authorizing the purchase of a vehicle for the engineer commissioner, provides specifically that it shall be used for inspection work, under the theory that the three commissioners could use the one automobile for that purpose. I agree fully with the chairman of the subcommittee [Mr. Page of North Carolina] in the opinion that they could do perhaps as much inspection work in a day if they were equipped with an automobile as they could do in a week if equipped with a horse and carriage or if they had to travel on street cars, and I think they could not get to many of these places on the cars. I think it is essential that they should have modern means of transportation in order that they may discharge their official duties properly, but I do not believe that the three commissioners should each keep three automobiles at that office. For that reason I reserved the right not only in the subcommittee but also on the floor of the House to vote for an amendment, and for that reason I am constrained to support the amendment offered by the gentleman from Illinois [Mr. MANN]

Mr. CARY. Mr. Chairman, will the gentleman yield? Mr. SISSON. Yes.

Yes.

The gentleman has there the law authorizing Mr. CARY. that automobile. Has the gentleman found any authority of law there authorizing the purchase of five automobiles for the street-cleaning department?

I have not looked that up, but I am informed by the clerk of the committee that there is a general law and a general authorization for that purpose. I do not know that of my own knowledge, as I have not looked it up.

Mr. CARY. I understand the way they got those machines was by laying off these so-called "white angels" and accumu-

lating a fund out of which to make the purchase.

Mr. SISSON. I have heard that statement made repeatedly, but the record shows that the contrary is true. The statement was made that those machines were bought out of a lump sum for street-cleaning purposes. But when this machine was authorized it was specifically authorized for the engineer commissioner for inspection work, and so on.

Mr. CARY. I wish to say, Mr. Chairman, that I do not

think

Mr. SISSON. One moment. I was just yielding for a ques-Nor do I think, Mr. Chairman, that any of the officials tion. of the District government should be given means of transportation by automobiles for social purposes. I understand that many gentlemen disagree with me about this, but I do feel that that is not a function of the Government to furnish men and their families with the means of transportation to social functions.

Mr. CARY. I move to strike out the last two words. Mr. PAGE of North Carolina. Before the gentleman from Wisconsin proceeds will be allow me to call his attention to the fact, in connection with the automobiles purchased for the street-cleaning department, that the law provides for the purchase, maintenance, and repair of motor-propelled vehicles necessary in operation and supervision, and necessary incidental expenses, out of a lump sum of \$260,000 carried in the bill, and they were purchased under that provision. In the present bill we have stricken that out and have carried this to another item.

Mr. CARY. This sum of \$9,150 for motor vehicles, is that for new machines or is it a return to the street-cleaning department

of money paid out for these five machines?

Mr. PAGE of North Carolina. It says on its face that it is for the maintenance of the machines provided at the present Mr. CARY. Mr. Chairman, about three years ago the local street-cleaning department was transferred to the engineer department. Theretofore it had always been in charge of one of the civil commissioners. At the time of the transfer, and while under the civil commissioner, the office force consisted of four clerks and one stenographer, their salaries amounting to \$5,700 per annum, as shown by the law. One-half of that sum, \$2,850, was paid by the local taxpayers and a like sum by the United

There are now employed in that office 12 men, and the cost of operating it is substantially as follows:

Per	annum.
1 stenographer, at a salary of 1 assistant superintendent (not authorized by law) 10 clerks, whose salaries amount to	\$1,000 1,600 9,640
Total	12, 240

So that the present annual cost is \$840 more than double what it was when the office was under a civil commissioner.

They have also purchased some automobiles and motor cycles-six of the former at a cost of \$7,550 and four of the latter at a cost of \$1,040. The annual cost of operating these machines, according to the published hearings before the comwas \$2,100 per annum, the cost and operating expense amounting to \$10,690, making the total present cost \$22,930 per annum, or considerably more than four times what it was

three years ago under the civil commissioner.

In the District of Columbia estimates for the fiscal year 1913 the superintendent of street cleaning, through the commissioners, asked for one automobile at an estimated cost not to exceed \$2,000, which was urged by Engineer Commissioner Judson and allowed by Congress. Col. Judson then bought an automobile at a cost of \$2,350 out of the street-cleaning fund and appropriated it to his own use. It has never been used by the

superintendent of street cleaning.

A recapitulation shows that the present cost of the office force is \$12,240 per annum; former cost, \$5,700; excess in present cost over former cost, \$6,540 per annum. One-half of the former cost paid by the United States is \$2,850; District of Columbia taxpayers paid a like sum. One-half of present cost—\$12,240—paid by the United States is \$6,120; District of Columbia taxpayers pay a like sum.

The present total cost, including autos, is \$22,930; the former cost was \$5,700; excess in present cost over former cost, \$17,230. One-half of present total cost paid by the United States is \$11,465; former cost, \$2,850; the excess paid by the United States is \$8,615, or more than three times as much, and the same excess is paid by District of Columbia taxpayers. The present operating expense is \$17,230 per annum greater than it was during the previous administration. This excess cost is more than three times the entire cost when a civil commissioner had charge of the office. The whole cost is now more than four times what it formerly was. This is one of several of Col. Judson's so-called "economies."

Mr. PAGE of North Carolina. At this point I wish to state, so that it may go into the RECORD, that the amount carried in this bill is for the maintenance of all the passenger vehicles under the charge of the District Commissioners, not only automobiles, but motor cycles and the trucks owned by the District; everything not exempted in the provision, namely, the fire, police, and health departments and the board of charities; that \$9,000 is the total for the maintenance of all those vehicles.

Mr. Chairman, a few years ago, when the proposition was made here to buy automobiles for the President of the United States, I opposed it, and I have opposed such purchases ever since. I predicted then what it would lead to. When we bought an automobile for the President, who receives a salary of \$75,000 a year, and receives a house to live in free, a house that we would all be very glad to exchange for the ones we have, it seems to me we made a bad precedent, and we are now reaping the fruits of having taken the first wrong step.

I can not, for the life of me, see why the engineer commissioner should have an automobile and the civil commissioners should not, unless it is upon the theory that when a man gets into the Army or Navy and lives on taxes from the day he first begins to be educated at West Point until he is buried it must be at public expense. I can not see why a seven-passenger car should be furnished the engineer commissioner, while a civil commissioner must look after what the engineer commissioner has done, traveling behind a mule or a Texas pony or some other kind of an animal. I do not see why the major of police in this city should go hiking about over the city in a little one-horse shay that can not get anywhere, while mere subordinates of some departments are riding around in fine automobiles.

Now, I do not know what an official use is. I suppose that in going from your hotel or your home to your office, if you are an official, is official business; but is it official business to ride back to the same place? Anyone who will go around over this city may see a big Government automobile standing in front of an apartment house or private dwelling waiting for one of these assistants to come out and be driven down in royal state to an office, where he will stay for a certain number of hours and then That is said to be official use. Why should such a man as that need an automobile at all with street cars and broad streets and avenues to walk upon?

Having been on the District Committee for 10 years, I know that the commissioners have occasion to go about the city to view proposed street openings and extensions and other pro-

posed improvements.

We commenced with the President, and the Lord only knows where it will end. I want to say to my friend from Indiana [Mr. Cox], who spoke of the automobiles being used in the Post Office Department, that I have received one benefit out of those automobiles. They are so much larger and so much more dangerous that dodging is more necessary, and I have lost several pounds dodging them since they came into use that I had not lost in dodging the lighter vehicles. [Laughter.] Another thing, they are painted red, and you can see them farther and have more time in which to dodge them than you can in dodging others. In this city it is necessary to dodge automobiles in order to preserve life, and I think the gentleman ought to see that there is some indirect benefit derived out of these red devils used in the postal service. They make more noise, and it gives you more time to dodge, and then, gentlemen, who had not rather have a postal card delivered by an automobile than one delivered by a mere wagon drawn by an Indiana horse or a mule? The gentleman from Indiana is not progressive. Who wants to read a paper not delivered by the most modern facilities that you can get?

Mr. Cox. I think Indiana will stand by the horse and the

[Laughter.] mule.

Mr. SIMS. I want to say that this committee is acting consistently. Why should you make fish of one and fowl of another when one needs it as much as the other? Of course we are never going to vote these things for ourselves; we do not belong to the executive departments, nor to the Army or the Navy, and never will, as far as I am concerned. But if you are going to carry this thing out, in a little while the policemen will have to have aviation facilities furnished them so that they may be able to ride around in the air, as they can see offenders better with a flying machine than they can in one of these red devils, and then, again, they never can catch a criminal with one of these red devils because they make so much noise; he can hear them and run away.

So in this modern day, when they want these red devils to be paid for by your constituents at home, why not let them

have them? [Laughter.]

Mr. MANN. Mr. Chairman, I feel almost ready to depart from public life. I feel perfectly satisfied that I have remained long enough when I have lived to hear the gentleman from Tennessee advocate the purchase of automobiles for anybody or anything. He has fought the idea for so many years, so consistently and so persistently and with such vigor, that I feel that we have accomplished a great step forward when he deliberately advocates and urges that the people of his district pay for automobiles for one of the commissioners in the District of Columbia.

Mr. SIMS. I would be glad to vote to sell all we have al-

ready instead of getting more.

Mr. MANN. I thought I could get a rise out of the gentle-I listened to his entire speech to learn his position, and I could not discover it. I do not know now that he is in favor No; he will not answer. Now, I wonder if he would vote. He will vote, but he will not let it get into the RECORD

that he is in favor of it. [Laughter.]

I do not care whether the District Commissioners have automobiles or not. The civilian commissioners have no great need of an automobile except to go from their homes to their offices and on other occasions when they have members of their

families with them.

Mr. SIMS. Will the ge Mr. MANN. Certainly. Will the gentleman yield?

I have seen an engineer commissioner running Mr. SIMS. around this Capitol in a Government automobile lobbying, and so has the gentleman.

Mr. MANN. The engineer commissioner does need an automobile. His business is not in the office but out in the District. I have no doubt that one of the new commissioners recently appointed is so unfamiliar with the District of Columbia and its boundary lines, because he never lived here, that he has to spend a little time to run around and locate the plants in the District. But I have never seen a man yet who rode in an automobile, unless he drove it, who could tell the points of the compass when he turned around. You do not learn that The best way to learn this town is the way the gentleman from Tennessee and I have learned it, by riding in the street cars and walking.

Mr. SIMS. Will the gentleman yield? Mr. MANN. Yes.

Mr. SIMS. Does the gentleman approve of a lot of assistants to the heads of departments riding back and forward in fine

Government automobiles-

Mr. MANN. There are no assistants to the heads of departments who ride in fine automobiles unless they own them. The Government does not provide automobiles for the heads of departments, much less for their assistants. It provides an automobile for the Secretary of the President, which is entirely

Mr. SIMS. What does the gentleman say about the Quartermaster's Department-perhaps that comes under the War De-

partment?

Mr. CARY. Will the gentleman yield?

Mr. MANN. Yes. Mr. CARY. I do not know what you consider the superintendent of streets, or whether he is the head of a department.

Mr. MANN. I supposed the gentleman was referring to the Government. The officials of the District of Columbia, in the work they perform, where they have to travel around, are furnished with some kind of a vehicle, sometimes a motor vehicle and sometimes an automobile. I see them on the streets every once in a while, but that is not the kind that the civilian com-missioners will have. If the automobile is needed, very well. If the gentleman from Tennessee [Mr. Sims] desires to place the civilian commissioners of the District above the heads of the Government, then vote for this proposition. It is a matter largely of social precedence, and you know just now the whole Government has ceased working, nearly, in order to find out who shall walk first into the dining room or who shall go ahead of the fellow behind him.

Mr. SIMS. Has the gentleman not seen where some subordinates of the State Department have already settled that

Mr. MANN. No; I have not. I saw at one time a statement which came from the State Department, and I have read since that time in the RECORD a statement, put into the RECORD in the distinguished body at the other end of the Capitol, and I have discovered that there is more agitation just now on the part of many of my friends who belong to the party of simplicity to find out who leads into the dining room than there is to find out who leads in legislation.

The CHAIRMAN. The time of the gentleman from Illinois has expired. The pro forma amendment will be withdrawn.

Mr. FITZGERALD. Mr. Chairman, I move to strike out the last word. In the last administration there was so much consideration given to the wealthy and the idle rich that it was not necessary to determine the question of official precedence, because no official ever got much chance to participate in the functions conducted under that administration.

Mr. MADDEN. I suppose the gentleman from New York is leading now in the social affairs of the District and of the

administration.

Mr. FITZGERALD. No; I am attending strictly to business. Mr. MANN. Did I understand the gentleman to say that during the last administration we were busy taking care of the

Mr. FITZGERALD. Yes.

Mr. MANN. I desire to state to the gentleman that it will keep the gentleman and his party exceedingly busy to take care

of the idle poor during this administration. [Laughter.]
Mr. FITZGERALD. The only idle poor I have come across so far have been the incompetent Republicans who have been turned out of office by this administration and who are so lacking in capacity that they have not been able to obtain employ-

ment in civil life. [Laughter.]

But it was not to discuss these matters that I rose. It was to discuss the question of whether there should be provided, at an expenditure of \$2,000, an automobile for the use of the two civilian commissioners of the District. I am in favor of placing such a vehicle at their disposal, because if there is any one thing that characterizes the officials of the District of Columbia more perhaps than anything else it is their utter lack of familiarity with the affairs of the District government. The District commissioners are placed at the head of the various departments of the District government, and if anything will induce

them to spend a considerable portion of their time in familiarizing themselves with the actual conditions in the District away from the District Bullding, of obtaining information about the character of the buildings and the service rendered in them, and the necessity for improvements in the various parts of the District, nothing will be more conducive to the improvement of the administration in the District of Columbia. All Members of Congress know that very considerable time must necessarily be taken by men at the heads of these various services, and if some speedy method of going from their office in the District Building to the various portions of the District in their performance of their duties is provided it will be a very desirable

If some such means of transportation were furnished when complaints would reach the District Building about conditions in different parts of the District, it would be an easy and simple matter for the commissioner charged with the responsibility for the particular service about which complaint is made to visit at once the place where the conditions are complained of, ascertain the exact situation, and then return to his office. It is a mistake to believe that they do their most effective work by confining themselves entirely to their offices. If they could give a reasonable amount of their time to ascertaining and to informing themselves of the exact conditions of the public service throughout the District, it would be of great value not only to the service itself, but it would enable them to be sufficiently well informed to give intelligent information to the various committees of Congress when information is requested. I do not believe that it is extravagant or that it is unwise or improvident to provide a motor vehicle at an expenditure of not exceeding \$2,000 to enable these men to have some ready, quick means of transportation about the District in the discharge of their official duties, but I am convinced that it is imperative if they are to be given a reasonable opportunity to acquire such information about the District and its affairs.

Mr. JOHNSON of Kentucky. Mr. Chairman, I move to strike

out the last word.

The CHAIRMAN. The Chair would suggest to the gentleman from Kentucky that debate is exhausted under the rule.

Mr. PAGE of North Carolina. Mr. Chairman, I ask unanimous consent that the gentleman from Kentucky may proceed for five minutes

The CHAIRMAN. The gentleman from North Carolina asks unanimous consent that the gentleman from Kentucky may proceed for five minutes. Is there objection? [After a pause.]

The Chair hears none.

Mr. JOHNSON of Kentucky. Mr. Chairman, with one exception I have opposed the purchase of every automobile that is owned by the District of Columbia. I not only did not oppose but I was ready, if it needed my voice or my vote, to help pass the measure by which the automobile for the engineer commissioner was purchased a few years ago. I believed then, and I believe now, that the other Commissioners of the District should have automobiles. The work of the Commissioners of the District of Columbia begins very early in the morning. It is a very seldom thing indeed that I am at my office in the House Office Building later than 8.30 or 9 o'clock in the morning. When I get to my office at 8.30 o'clock in the morning I frequently see the civilian commissioners on their way to the District Building. I think I can see how, when they get there in the morning, they go into their correspondence. We all know that at 10 o'clock they have hearings, and there are very few days when they do not have hearings, and the greater part of the day is taken up in that kind of work until in the afternoon, when they go about the District, and I think I have seen several instances where their becoming familiar with conditions as to streets, knowing that applications are going to be made for money with which to build streets, that upon these trips they find them unnecessary, and in that way they fail to make recommendations they are asked to make and the price of an automobile is more than paid. In addition to that, I happen to know that the present commissioners are at work at night. But recently the commissioner who has charge of the police force and the police stations made a trip of inspection, in so far as he could with a horse and buggy, to the police stations at night. At one of those police stations he found a man imprisoned. The man beckoned the commissioner to the door of his cell and asked him if it were possible for him to be released. The commissioner asked him with what offense he was charged. The man said he did not know. of the station house was then asked by the commissioner what the charge was against that man. The keeper of the station house said he did not know. Then the chief of police was asked what charge there was against the man. He not only said he did not know, but he said, in so far as he could ascertain,

there was none. This man had been locked up in prison for more than two weeks, according to my recollection of the time, and except for the visit of the commissioner upon this occasion he might have rotted there when absolutely there was no charge against him. The commissioner finally ascertained that the man had been detained as a witness for some case which the police authorities thought might arise and which never arose, and so this man stayed in jail, as he could not reach anybody who would have him turned out. He did not have money with which to employ a lawyer, so he might have stayed except for this visit of the commissioner. Trips like that are being made by the commissioners, and I think that they should be encouraged instead of discouraged; and I believe that the purchase price and cost of maintenance of an automobile by the civilian Commissioners of the District of Columbia will save three or four times its value every year.

In addition to that, I believe that these automobiles will improve the service not only of the police force and fire department, but all the rest of the administrative and executive offices and stations about the town. I believe this is the first time I have ever found myself during the last six or seven years disagreeing with the gentleman from Indiana [Mr. Cox] with

reference to the purchase of an automobile.

The CHAIRMAN. The time of the gentleman has expired. The question is on agreeing to the amendment offered by the gentleman from Illinois.

The question was taken, and the Chair announced the noes

seemed to have it.

Mr. MANN. Mr. Chairman, I ask for a division.

The committee divided; and there were-ayes 24, noes 34.

So the amendment was rejected.

The Clerk read as follows:

For advertising notice of taxes in arrears July 1, 1914, as required to be given by act of March 19, 1890, \$2,500, to be reimbursed by a charge of 50 cents for each lot or piece of property advertised.

Mr. CARY. Mr. Chairman, I would like to offer an amendment at this point.

The CHAIRMAN. The Clerk will report the amendment. The Clerk read as follows:

On page 17, line 7, after the figures \$4,700, insert the words: "Protided, That hereafter all general advertising, including tax and school notices and notices of changes in regulations, shall be published in one daily newspaper of wide circulation published in the District of Columbia and be let to the lowest bidder: Provided further, That the Commissioners of the District of Columbia are hereby authorized and directed to invite proposals to carry out the provisions of this amendment: And provided further, That all laws and parts of laws inconsistent with the provisions of this act are hereby repealed."

Mr. SISSON. I make a point of order against that, Mr. Chairman. In the first place, it was new legislation, and, in the second place, we have passed the clause to which the amendment is offered

The CHAIRMAN. The Chair is inclined to sustain the point of order.

Mr. CARY. I acknowledge the point of order is well taken.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

For carrying out the provisions of the act approved March 1, 1899, entitled "An act to authorize the Commissioners of the District of Columbia to remove dangerous or unsafe buildings and parts thereof, and for other purposes," to pay members of the board of survey provided for therein, other than the inspector of buildings, at a compensation of not to exceed \$10 for each survey, and to pay the cost of making safe or removing such buildings upon the refusal or neglect of the owners so to do, the unexpended balance of the appropriation made for this purpose for the fiscal year 1913 is reappropriated for the fiscal year 1915.

Mr. MANN. Mr. Chairman, on page 18 I move to strike out the word "thirteen," in line 2, and insert in lieu thereof the word "fourteen," if that is satisfactory to the gentleman in charge of the bill. It should be the unexpended balance for the year 1914.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 18, line 1, strike out the word "thirteen" and insert in lieu thereof the word "fourteen."

Mr. MANN. Last year's bill carried the reappropriation for the fiscal year 1913.

Mr. PAGE of North Carolina. If that is true, of course the gentleman's amendment will be accepted.
Mr. MANN. It is no "if that is true."

The CHAIRMAN. Without objection, the amendment will be

There was no objection.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

For purchase of enamel metal or other metal identification number tags for horse-drawn vehicles used for business purposes and motor ve-hicles in the District of Columbia, \$1,350.

Mr. PAGE of North Carolina. Mr. Chairman, for the purpose of calling attention to the matter to which the gentleman from Illinois made a correction a few moments ago, by reference to the current law I find there was no appropriation carried in the current law for this item at all.

Mr. MANN. Why, the balance of the appropriation for 1913

was reappropriated.

Mr. PAGE of North Carolina. It is still a 1913 appropriation. Mr. MANN. No; it is reappropriated for the fiscal year I do not care how the gentleman fixes it.

Mr. PAGE of North Carolina. Mr. Chairman, I still think the "thirteen" should remain in the bill, because that was the year for which the appropriation was made, and reference was made in this item to that appropriation and not to the reappropriation.

Mr. SISSON. If the gentleman from North Carolina [Mr. Page] will permit-

The CHAIRMAN. Does the gentleman from North Carolina ask unanimous consent to return to the item?

Mr. PAGE of North Carolina. I ask unanimous consent to

return to it. Mr. SISSON. This is carried on the books of the Treasury Department as a 1913 appropriation. So, when these matters are reappropriated, that account is still kept on the books of the Treasury Department as a 1913 appropriation, and for that

reason they go back to 1913.

Mr. MANN. I do not care how the gentleman fixes it. This sort of thing comes up constantly. This balance of appropriation for 1913 was reappropriated and now is an appropriation for 1914. If the other is sufficient identification, it is absolutely immaterial to me.

Mr. PAGE of North Carolina. If the gentleman will permit me, I think it is sufficient identification and is in accordance with the accounts as kept in the Treasury Department, and for that reason is a matter of some little importance. They would

have to transfer it and open another account.

Mr. MANN. They would not; but I do not care how it is. Mr. PAGE of North Carolina. Mr. Chairman, I ask unanimous consent that the action of the House in adopting the

amendment be rescinded.

The CHAIRMAN. The gentleman asks unanimous consent that the amendment of the gentleman from Illinois, adopted by the committee, be rescinded. Is there objection? [After a pause.] The Chair hears none. Mr. PAGE of North Carolina.

Now, Mr. Chairman, I move

that the original language be restored to the bill.

The CHAIRMAN. The gentleman moves that the language of the original bill be restored. Is there objection? [After a pause.] The Chair hears none.

The Clerk read as follows:

For maintenance and repair of fish wharf and market, \$500.

Mr. MONDELL. Mr. Chairman, I desire to offer the following amendment.

The CHAIRMAN. The gentleman from Wyoming offers an amendment, which the Clerk will report. The Clerk read as follows:

On page 19, line 5, strike out "\$500" and insert in lieu thereof "\$50,000."

Mr. JOHNSON of Kentucky. Mr. Chairman, I make a point of order against that.

The gentleman from Kentucky [Mr. John-The CHAIRMAN. son] makes a point of order against the amendment.

Mr. MONDELL. Mr. Chairman, it is clearly not subject to the point of order. If the Chair desires to hear that point discussed

The CHAIRMAN. The Chair is of the impression it is not subject to a point of order, and the point of order is overruled.

Mr. MONDELL. Mr. Chairman, the amendment which I

offered yesterday, a part of which was intended to be used for the purpose of improving the fish wharf, went out on the point of order, but the amerdment which I now offer for the same purpose is in order.

Now, there is no question as to the necessity for the improve ment of the fish market. All of us are proud of the city of Washington; we take pride in comparing it with the other beautiful cities in the world. Who can imagine, for instance, in Paris, in London, in Berlin, or, in our own country, in New York, Chicago, or Boston, a fish market like the one that we have

here in the city of Washington?

It is a disgrace. It has been constituted by law the only place for landing fish in the District. It is the market at which all the fish for Washington coming up the river and the bay are landed. It is the point where a large portion of the produce coming up the river and the bay is landed. It is in an absolute state of dilapidation. The buildings are tumble-down and insanitary to the last degree. If you had a friend visiting you who was conversant with the reputation of Washington as a fish and oyster market, and he asked you to take him to the place where those products are landed, you would certainly try to find some excuse for not doing so, because you would be ashamed to take him down there on the river to this disreputable institution which the District now maintains.

This bill has been trimmed to the limit. Not a dollar of the \$175,000 that the commissioners asked for this purpose has been allowed, and I am simply asking \$50,000 for the purpose of putting the wharf in some sort of presentable and usable condition.

The CHAIRMAN. The question is on agreeing to the amend-

ment offered by the gentleman from Wyoming.

Mr. JOHNSON of Kentucky. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Kentucky [Mr. Johnson | moves to strike out the last word.

Mr. JOHNSON of Kentucky. Mr. Chairman, this same proposition in another form and in a larger amount was before the House yesterday. I stated then-and for the information of those Members who are present now who were not present then I repeat—that this wharf is the property of the United States. Under an amendment put on the appropriation bill last year by the Senate, which passed without any consideration at all, this property of the United States was turned over to the District of Columbia last year. Accompanying that gift was a provision that one-half of the receipts derived from it should go to the United States and one-half to the District of Columbia. Those receipts this year have been treated by the District of Columbia as revenue against which the United States Government has been required to put, and has put up, an equal amount, so that the United States has been penalized for this piece of generosity to the District of Columbia.

Now they ask an expenditure of \$50,000 more there, with a view to increasing the receipts of that place, in order that the United States may be further penalized along the same line.

Yesterday the gentleman from Wyoming [Mr. Mondell] spoke of its being a great melon market. I said then, and repeat now, that an officer of the District of Columbia went down there and required the people who brought in their melons there to sell them in quantities of not less than 25 in one sale. When directed by the Commissioners of the District of Columbia to revoke that order, he, with some hesitation about revoking it, said that to revoke that order might not suit the people down at the Center Market.

Now, I have no objection to all the markets that they can get. In fact, I am anxious for an open competitive market in the District of Columbia. But I do not think that public property ought to be confiscated in this way and the United States penalized for every little extension that is given for a market pur-

The United States holds a valuable piece of property down here on Pennsylvania Avenue which it has unwisely leased for 99 years at a nominal rent. There is a bill pending to repeal that and take back that property that belongs to the United States and have there a competitive market opened up instead of the Cold-Storage Trust that exists at that place now. I believe that this proposed amendment ought to be beaten by this House, and when it comes to taking property that should be used for market purposes it should be opened up to the public.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Wyoming.

The question was taken, and the amendment was rejected. The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

For repairing retaining walls and copings and for work incidental thereto at the K Street Market, \$1,000.

Mr. MONDELL. Mr. Chairman, I move to strike out the last

The CHAIRMAN. The gentleman from Wyoming moves to strike out the last word.

Mr. MONDELL. Mr. Chairman, the gentleman from Kentucky [Mr. Johnson], speaking to my amendment in regard to the fish market to-day, made the same speech that he made yesterday. He has nothing to say as to the necessity of this market, as to the wisdom or advisability of there being a market there; but he does not want the appropriation made, because he says the Government owns the land and the District is getting a few measly dollars out of it. Therefore we must do nothing. That is his argument. Unfortunately, this attitude of faultfinding and inaction has been that of a certain number of gentlemen toward this District for a good long time. If this land belongs to the Government, and it ought to belong to the District, why does not the committee having charge of these matters bring in a bill under which it will be sold to the District and under which the District shall pay for it? If, with all the conditions in the District that they could not give

on the other hand, it should remain the property of the Government and the District is securing and may secure revenues that it ought not to secure from this source, why does not the committee having charge of those matters remedy it? Must we forever hear that the District shall continue to be disgraced by this miserable, tumble-down, insanitary fish market because there is some question about who owns the land, some question about a few measly dollars of revenue to be derived from it? It seems to me that instead of a constant and never-ending reiteration of excuses for not doing things, it is about time that we have some constructive legislation under which things can be done. I, for one, have taken great pride in Washington, but it is jarring to that pride to have the city disgraced in the character of the landing place of some of its most famous products-a landing place and distributing point of the character of that tumble-down, insanitary proposition down there on the river front. If there is any question about the ownership of it, let us settle it. If there is any question about where the revenue shall go, let us have that question settled; but in the name of humanity, in the name of our pride in this great Capital, let us do something constructive, and not constantly complain and find fault and criticize and give excuses for not doing things.

Mr. LLOYD. How does it happen that during the 16 years last past your party, which you claim is a party of constructive legislation, did not fix the fish market?

Mr. MONDELL. Your party has had quite a bit to do with destructive legislation up to this time. We want to give you an opportunity to do a little constructive legislation.

Mr. LLOYD. But your party is responsible for this condition you are talking about, which has existed during these 16 years that you were in power.

Mr. MONDELL. Here is your opportunity to remedy it. Mr. LLOYD. Why did you not remedy it? You are now talking to a party that you say has no constructive ability, and asking that party to do that which you would not do.

Mr. MONDELL. If we wanted any illustration of the lack of constructive ability on that side, it is to be found in the fact that you refuse to do anything to remedy the situation to which I have called your attention. The District only took over the property recently, a year ago, in fact. Up to that time it did not have complete jurisdiction, and therefore could not well make the improvements now proposed.

Mr. SISSON. Mr. Chairman, I move to strike out the last two words. I want to say to the gentleman from Wyoming that the commissioners themselves, according to the testimony in the hearings, have not fully decided this question as to what ought to be done. I do not believe you would be able to find, unless in that immediate neighborhood, 12 intelligent men who would want to put the principal fish market of this city down on these wharves. What ought to be done is to have a distributing depot there and have fish markets scattered over the city where they will be convenient to the people.

When these propositions were presented to the commissioners, Commissioner Siddons, in answer to a question asked by the gentleman from North Carolina [Mr. Page], made this state-

ment:

Of course, if the committee should come to the conclusion that they will recommend an appropriation for beginning the building of a municipal market, what you say would be perfectly sound. We had to present to this committee, however, a proposal to deal with the space we have down there and which for many years has been used as a fish market, and which was conducted by a single lessee. The District government undertook to lease the space itself to the individual dealers in fish, and that was done with astonishingly satisfactory results. Now, if you will give us a municipal market in the course of time and make a start now, it may be that this further appropriation can be laid aside for the time being. But even then, in the consideration of the question of the establishment of a municipal market, I think we want to seriously consider what we are going to do with that property on the river front, which for many years the dealers in fish have utilized for the purpose of getting their fish distributed. for many years the dealers ting their fish distributed.

Mr. MONDELL. Now will the gentleman yield?

Mr. SISSON. In one moment. The commissioners themselves say that a better arrangement could be made, and not put the market down there. My friend the gentleman from Minnesofa [Mr. Davis] and the gentleman from Illinois [Mr. Hine-BAUGH] and all of us were interested in knowing whether or not it was the proper place to put the fish market, and make it the only fish market.

Now, another thing: These wharves there are not in a good condition; they are not in such a horrible condition as he pictures. On the contrary, the committee felt that small repairs could keep them in condition and in statu que until the matter could be thoroughly investigated. These commissioners themselves admit that since they have been inducted into office they have been so very busy endeavoring to familiarize themselves

us information about many things we asked them about, and they did not have the time and opportunity to consider any other scheme than that of putting the fish market at this place, and Commissioner Siddons was not willing to say that was what ought to be done.

The gentleman from Wyoming [Mr. Mondell] is a Member of this House, and he knows that if we undertook a new proposition, it would be subject to a point of order and would require legislation. For that reason your committee did not feel that they were justified in going into this new departure.

Mr. MONDELL. Now will the gentleman yield? Mr. SISSON. I will yield to the gentleman.

Mr. MONDELL. The gentleman knows that my amendment provides simply for the improvement of the wharves. The gentleman admits that they must be improved without regard to whether you make it a retail market or a wholesale market.

Mr. SISSON. The improvement ought to be made as a whole and not by piecemeal. The commissioners know it. You ought

not to spend \$50,000 on an immature project.

Mr. JOHNSON of Kentucky. Mr. Chairman, the description given by the gentleman from Wyoming of these wharves is very "fishy," indeed. [Laughter.] He charges, indirectly, that the House District Committee is destructive. proudly plead guilty. I plead guilty to being willing and anxious to destroy the system that has prevailed here for 16 long years of giving away real estate that the United States owned in and around the District of Columbia.

Year after year some of the property of the United States has been taken without compensation for District purposes. You have now the plans for the construction of the Q Street bridge appropriated for at the last session. There United States property is taken without compensation. At the last session Lovers Lane was widened and lengthened. There, again, a great portion of United States real property was taken and given

to the District of Columbia without compensation.

I wish to destroy that practice. During the last few sessions of Congress there have been attempts to confiscate some of the most valuable pieces of water front in the District of Columbia belonging to the United States and give them as a present to the District of Columbia upon which to build an asphalt plant. At the last session of Congress you turned over this wharf or water front to the District of Columbia, and the United States not only received no compensation for it, but, as I said a few moments ago, is being in this very bill penalized

because it made that present.

I say again that I proudly plead guilty to the charge of destroying these things. A few years ago when the Republican Party was in charge of this House they passed bills conveying lands lying along the Eastern Branch of the river to various and divers persons, one being Sidney Bieber, who got it for a song. Now the Government needs that very land, and the Department of Justice undertook a few weeks ago to acquire it by purchase. He asked more than they were willing to give. Then they He asked more than they were willing to give. Then they sought to condemn it. Then was brought in one of these obnoxious condemnation juries, and they would not award to the United States a piece of property at the price which the owner had fixed upon it; but, instead, this condemnation jury went beyond, to the extent of thousands of dollars, the price made by the owner for it.
"Destroy?" Yes; that is my mission—to "destroy" this

kind of thing, and as long as I have a voice upon this floor that shall be my theme. The man who wants to "construct" more of that stuff is a man who ought not to be upon the floor of this House. The United States is every day being robbed by schemes just like this, and I say that nobody here ought to countenance such a thing, and party lines should not be drawn

in their consideration. [Applause.]
Mr. TRIBBLE. Mr. Chairman, I rise to protest against this unjust legislation. Since 1878 one-half of the taxes of the city of Washington have been paid out of the National Treasury. This is one of the largest and richest cities in the United States. It has a population of 350,000. There is no more reason for the Government to pay the taxes of Washington than there is to pay the taxes of Baltimore or Atlanta. The Government bears the expense of the Government buildings and property here as it should

Mr. Chairman, this bill carries an appropriation of the people's money in the sum of about six millions to defray the expenses of a rich city of rich people. The enormous sum exceeds the annual expenses of the State of Georgia, including our pension fund, public-school fund, college fund, agricultural fund, and all purposes for which taxes are raised. Gentlemen complain that we are not doing enough for Washington. While we are considering street and suburban roads, let me illustrate. Go with me to many sections of the country and let me show

you a man with the discomforts of a bad road. He leaves home in the early morning for market 10 miles away. He is gone all day. His wagon carries a small load, but often he walks by the side of his faithful horse to lighten the load when the wheels go down in the mud and threaten injury to his wagon and horse. Come, go with me again to the suburban roads outside of Washington, for the improvement and construction of which this bill carries \$230.500, and let me show you another picture. There upon the beautiful, wide, paved roads and magnificent oilpolished boulevards you will see all kinds of automobiles and carriages. In the touring cars you will see the millionaires and rich of Washington City. The display of wealth staggers you. Now, Mr. Chairman, look upon the two scenes. The man with the wagon pays for his own road, and, although his income is small and his work is hard, he must also furnish the road for the man who lives in luxury untaxed.

Mr. MONDELL. We do not have any of that kind of roads. Mr. TRIBBLE. Oh, the gentleman is mistaken; every State in this Union has just such roads. I desire to call attention to the school appropriation in this bill. While there is much improvement in all the States in schoolhouses, still one must notice the lack of school facilities in many sections. The buildings are inadequate and very uncomfortable for school purposes, especially during the winter months. The people of the communities are struggling to improve their schoolhouses. I have seen buildings very inadequate, and sometimes schools are suspended for lack of funds. Many children of good parents are deprived of sufficient school advantages because the school funds are far below the needs of the people. What do you see here in the city of Washington? You see these magnificent buildings that have been built by our constituents many of whom have not schoolroom facilities at home. What else will he see? You see provided in this bill an item of \$123,390 for janitors to take charge of these magnificent buildings -223 of them. Who is paying for these janitors? The people of my district are paying part of it. Many men in my district who are deprived of proper school facilities are paying their part to support these 223 janitors.

Mr. PAGE of North Carolina. Mr. Chairman, will the gentle-

man yield?

Mr. TRIBBLE. Yes. Mr. PAGE of North Carolina. Mr. Chairman, I was utterly amazed that the gentleman from Georgia [Mr. TRIBBLE] should make the statement he has upon this floor regarding the condition of the district which he represents here, admitting that such a condition exists in Georgia. I want to assure him that no such condition exists in Georgia. I want to assure him that no such condition exists in the school districts in the district that I represent, or in the State that I come from.

Mr. TRIBBLE. Mr. Chairman, I have seen some bad roads and poor schoolhouses in the gentleman's State.

Mr. PAGE of North Carolina. Will the gentleman name the town?

Mr. TRIBBLE. Yes. Near Furman University-no; Wake Forest?

Mr. PAGE of North Carolina. There is no Furman University that I know of.

Mr. TRIBBLE. Wake Forest is in the gentleman's district,

is it not?

Mr. PAGE of North Carolina. No.

Mr. TRIBBLE. It is in North Carolina, and it is in the gentleman's State.
Mr. PAGE of North Carolina. Mr. Chairman, I ask unani-

mous consent to proceed for three minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. PAGE of North Carolina. Mr. Chairman, I have no purpose to consume one moment of time of this committee in the discussion of a matter that does not relate directly to the bill itself, nor have I had any purpose to depart from the resolution that I made in the beginning, as I am anxious that the bill should be hastened to a conclusion; but in view of the statements just made by the gentleman from Georgia [Mr. TRIBBLE] I feel that I must make a statement to this committee.

As I said to him a moment ago, I am amazed that any gentleman representing a State or a district on this floor should place in the Record, to go back to his own people, a state-ment in criticism of conditions that exist in his State, such as he has pictured. He makes reference to my own State. I do not know, of course, what he saw. He admits that he was passing through on a train, and says that at some point near a college in my State he saw some indefinitely bad conditions touching a school building. I am not here to deny that, nor to say any-thing about it, but rather to reply to the assault that he has made on the appropriation carried in this bill for janitor service for school buildings in the city of Washington. There are in the city of Washington somewhere in the neighborhood of 200

school buildings erected at considerable cost out of the money of the taxpayers of the District of Columbia and the taxpayers of the United States as a whole. I would like to inquire of the gentleman from Georgia if he, after expending this money for the construction of these schoolhouses for the teaching of these children in the District of Columbia, would let them stand without the proper care from janitor service; if he would let them stay without the fires being built in the furnaces for the comfort of the children; if he would allow filth to accumulate in the rooms and around the desks, with the floors unswept, and a general condition of dilapidation to exist, such as he has described exists in the district that he has the honor to represent? For one, I have no apology to make for these appropriations, and I want to call his attention to the fact that the price fixed in this bill for services of these men who do this necessary and important work for the care of the public buildings and the schools of the District of Columbia are, in some instances, in my judgment, very inadequate.

The amount paid is only \$40 a month, and I know that the

gentleman upon reconsideration, when he takes into account the magnitude of the schools in the District of Columbia, will withdraw the criticism of the appropriations made by this committee for the care and maintenance of these buildings in order that they may be comfortable and that the children may attend the schools under the most favorable circumstances.

The CHAIRMAN. The time of the gentleman from North

Carolina has expired.

Mr. MONDELL. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

On page 19, after line 7, insert the following: "For the erection of a municipal warehouse, \$50,000."

Mr. SISSON. On that I make the point of order. Mr. MONDELL. Will the gentleman withhold the point of order for just a moment and allow me to offer another amendment, to be pending, so that I might discuss both of them together?

The amendment just offered is subject to a point of order, undoubtedly

Mr. SISSON. Mr. Chairman, I reserve the point of order. Mr. MONDELL. Mr. Chairman, I desire to offer the two Mr. SISSON. amendments together so as to have them pending at the same

The CHAIRMAN. The Clerk will read the second amendment for information.

The Clerk read as follows:

On page 19, after line 7, insert: "For the purchase of supplies and material to continue available and to be reimbursed from appropriations using supplies and material purchased thereunder, \$100,000."

Mr. SISSON. Mr. Chairman, I reserve the point of order. Mr. MONDELL. In regard to the items I have just offered; first, for the municipal warehouse, subject to the point of order; second, for a lump sum for the purchase of supplies, I think not subject to the point of order. The two items were asked for by the commissioners, and in the hearings there is quite an extended statement with regard to the necessity for these betterments. The commissioners believe they ought to have a central warehouse and that they should buy supplies in considerable quantities, so that they may be bought more cheaply. It is their opinion there should be an organization in the city chargeable with the care of all the city property, which will keep a check on all city property, will distribute supplies as they are needed, will receive and care for supplies temporarily not needed for use in the different departments. In my opinion these expenditures would be useful and beneficial. I do not claim that they are items as urgent as some of those asked for, but I do believe that it would be well for Washington to have a central warehouse and to have a fund with which lump-sum purchases can be made. The city has such a fund now in the sum of \$50,000, and this work is being carried on. That is why my second amendment is not subject to a point of order. I believe it is in the interest of economy and of good government to have a central warehouse and to have a system of lump-sum purchase of city supplies.

Mr. PAGE of North Carolina. Mr. Chairman, I make the

point of order against the amendments submitted by the gentle-man from Wyoming. The first one, of course, is clearly out of

Mr. MONDELL. I do not desire to take up the time of the committee, but I think after consideration the gentleman will admit the second item is not subject to the point of order.

Mr. PAGE of North Carolina. Mr. Chairman, I believe I had the floor. I merely want to say in regard to the second item that without the warehouse the gentleman's amendment is

clearly, as he admits, subject to the point of order and without these facilities certainly it is new legislation.

The CHAIRMAN. The Chair is ready to rule. Mr. STAFFORD. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. STAFFORD. Is there more than one amendment pending before the committee at the present time?

The CHAIRMAN. By unanimous consent, the second amendment-

Mr. STAFFORD. I beg the pardon of the Chair; there was no unanimous consent. The Chair only allowed the amendment to be read for information, not to be considered, because it would be clearly out of order to have two amendments diamet-

rically opposed pending at the same time.

The CHAIRMAN. The gentleman is right as to the second amendment. The point of order is sustained as to the first

amendment.

Mr. MONDELL. Now, Mr. Chairman, I offer the second amendment.

The CHAIRMAN. The Clerk will report the amendment. Mr. SISSON. Mr. Chairman, the amendment has already een reported. I make a point of order on it.

been reported. Mr. JOHNSON of Kentucky. Let it be reported again.

The amendment was again reported.

Mr. SISSON. Mr. Chairman, I make a point of order against the amendment.

The CHAIRMAN. The gentleman from Mississippi [Mr. Sisson] makes a point of order against the amendment.

Mr. MONDELL. Mr. Chairman, that amendment is in identical language with the provisions of the law of 1912, with the exception that the amount carried is \$100,000, while the amount carried by the bill of 1912 was \$50,000. It is clearly in order to move an amendment on the floor providing for the purchase of such material as the city may need in the continuation of its work in progress. That is all this is.

Mr. SISSON. Mr. Chairman, it is a great deal more than

It goes on and makes provision as to how this money

shall be reimbursed. It is new legislation entirely.

The CHAIRMAN. The Chair thinks this is new legislation, and therefore sustains the point of order. The Clerk will read. The Clerk read as follows:

IMPROVEMENTS AND REPAIRS.

Assessment and permit work: For assessment and permit work, \$220,000.

Mr. TRIBBLE. Mr. Chairman, I did not describe the condition that exists in my district; my remarks apply to all sections of the country alike. I simply illustrated by saying that there were certain roads in all congressional districts such as I described. And I am here to reaffirm it. The point I make is this: That we have been standing here for years and years, knocking at the Treasury of this Government, asking for improvement of roads, and we have appointed a Committee on Roads, and we are turned aside when we ask for improvement of roads with the response that there is no money in the Treasury for that purpose.

Now, Mr. Chairman, the point I call your attention to is this, that there is \$1,444,950 appropriated by this committee out of the Treasury for the streets and suburban roads of Washington, whereas we who are fighting for roads for the rural districts are told that there is no money in the Treasury of the United States with which to improve roads. Are they not just as able to pay for roads as we are, and more able than we are? This city is rich and able to build roads. I do not object to this city having roads; the point I make is that they should pay for them. We pay for our roads, and they should pay for

Something was said about educational conditions in my State. Now, Mr. Chairman, I want to say to you that the educational conditions in my State are just as good as they are in any other State in the Union, but I do want to call your attention to this fact, by comparison, that this bill carries more appropriation for the District of Columbia to educate the people out of the pockets of my people-the pockets of my constituents-than the whole State of Georgia appropriates for education. The bill gives Washington \$3,201,740 for educational

Mr. PAGE of North Carolina. Mr. Chairman-

The CHAIRMAN. Does the gentleman from Georgia [Mr. Tribble] yield to the gentleman from North Carolina [Mr. PAGE]?

Mr. TRIBBLE. No, sir; I decline to yield unless my time can be extended. The State of Georgia appropriates some two and one-half millions of dollars for educational purposes all told, and we have as good public schools, normal schools, agricultural schools, and various colleges as there are in any

other State of the Union. I will say, further, we have janitors in those colleges and we have janitors in some of our country schools and in our village schools, but, sir, we pay for them, and the city of Washington should do the same thing.

and the city of Washington should do the same thing.

Mr. Chairman, permit me to mention some of the items contained in this bill: Engineer Commissioner's office, \$175,010; salaries of architects, \$26,250; surveyors' salaries, \$25,925; purchase new automobiles for officers, \$9,150; textbooks and supplies, \$66,000; school buildings, \$753,300; school salaries, \$915,201.53; police force, \$986,781.53; health department salaries, \$64,540; municipal courts, \$198,280. I point out these items that the attention of the people who pay the taxes may know how this appropriation is to be applied.

Now Mr. Chairman, if Georgia could receive its propor-

Now, Mr. Chairman, if Georgia could receive its proportionate part of the money that is appropriated out of their pockets by this bill we would have \$175,000.

Ah, yes; we could then pay for our textbooks and our schoolbooks for the children in Georgia and make them free, instead of paying for the textbooks and the schoolbooks of the children of the District of Columbia out of the pockets of my constituents, thus giving them free books with our money while our children must buy them. I will not vote for it, and I know that every man in my district will applaud my vote. not have to answer for it. I want to put you on notice of that fact.

Ah, Mr. Chairman, there is no limit to what the people of the District of Columbia want. Why, they are even asking for lunches for the schools. They not only get their textbooks free; they not only get their buildings free, out of the pockets of the people of my district and the pockets of every other district represented in this House; they not only get their janitors free and their colleges free and everything free, but now they are asking for lunches for the children. I suppose after a while you will vote to feed the people of the District. I will never do it.

The CHAIRMAN. The time of the gentleman from Georgia

has expired.

Mr. MANN. You will have to feed everybody pretty soon at public expense if this keeps on. [Laughter on the Republican

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Southeast section schedule (except I Street from Eleventh Street to Thirteenth Street, and Thirteenth Street from Pennsylvania Avenue to Potomac Avenue): \$45,500.

Mr. TRIBBLE. Mr. Chairman, I ask unanimous consent to extend my remarks.

The CHAIRMAN. The gentleman from Georgia [Mr. TRIB-BLE] asks unanimous consent to extend his remarks. Is there objection?

Mr. MANN. On this bill?
Mr. TRIBBLE. Yes; on this bill.
The CHAIRMAN. Is there objection.

There was no objection.
The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Northeast section schedule (except K Street from Seventh Street to Tenth Street): \$30,000.

Mr. BORLAND. Mr. Chairman, I offer an amendment. The CHAIRMAN. The gentleman from Missouri [Mr. Borland] offers an amendment, which the Clerk will report.

Mr. PAGE of North Carolina. Mr. Chairman, will the gentle-man from Missouri yield for a moment? Mr. BORLAND. Yes.

Mr. PAGE of North Carolina. I will say to the gentleman, Mr. Chairman, that his amendment ought to come in at line 11. In other words, you make a paragraph there.

Mr. BORLAND. Mr. Chairman, I want to say to the chairman of the subcommittee that all of that item, from line 11, on page 19, to the bottom of page 20, is practically one paragraph, relating to paving the streets.

Mr. PAGE of North Carolina. Yes.

Mr. BORLAND. If that may be treated as one paragraph, so that I will not lose any right of amendment, I would be perfectly willing to adopt the gentleman's suggestion.

Mr. PAGE of North Carolina. It is a matter for the Chair to

decide.

Mr. Chairman, I will ask that it be considered as one paragraph from line 11 of page 19 to the bottom of page 20, for the purpose of permitting the gentleman from Missouri [Mr. Bor-

LAND] to offer his amendment.

The CHAIRMAN. Without objection, that will be done.

There was no objection.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

The Clerk read as follows:

Provided, That streets and avenues named in said schedules already paved with Belgian block or granite, except P Street NW. from Rock Creek to Twenty-eighth Street, shall not be paved or otherwise improved under this appropriation, and the remaining streets and avenues, except as herein specified, shall be contracted for in the order in which they appear in said schedules, and be completed in such order as nearly as practicable, and shall be paved, in the discretion of the commissioners, instead of being graded and regulated.

Mr. BORLAND. Now, Mr. Chairman, at that point, at the end of line 11, I offer the amendment which I send to the Clerk's desk

Mr. MANN. Mr. Chairman, I reserve a point of order upon the proviso to the paragraph read.

The CHAIRMAN. The gentleman from Illinois [Mr. MANN] reserves the point of order upon the proviso to the paragraph. The Clerk will read.

The Clerk read as follows:

Page 20, line 11-

Mr. PAGE of North Carolina. Mr. Chairman, I suggest that we dispose of the point of order raised by the gentleman from Illinois [Mr. Mann] before we take up the amendment to the

Mr. MANN. I will say frankly to the gentleman that I do not know what the amendment is, but if it is proposed to hang an amendment to this paragraph on the ground that the proviso is subject to a point of order, I will make the point of order. If the amendment is a separate proposition, that is another

Mr. BORLAND. The object now is to dispose of the gentle-

man's point of order.

Mr. MANN. Very well. I will make the point of order on

That is clearly legislation. the proviso.

Mr. JOHNSON of Kentucky. Mr. Chairman, I make the point of order that the point of order raised by the gentleman from Illinois is not made in time. He made it after the gentle-

man from Missouri [Mr. Borland] offered his amendment.

The CHAIRMAN. The Chair recalls that the gentleman from Illinois [Mr. Mann] reserved the point of order on this proviso

immediately after the Clerk had read the paragraph. Mr. JOHNSON of Kentucky. Then I withdraw my point of

Mr. SISSON. Mr. Chairman, I do not think that is subject to a point of order. It is simply a limitation upon the expenditure of a sum of money. Another thing: The effect of the proviso is to retrench expenditures, to prevent the tearing up of Belgian block or granite, except on certain streets which have been looked at by the committee and have been found to need repairs, because they are very old and in very bad condition.

There is a lump-sum appropriation with which the gentleman from Illinois [Mr. MANN] is familiar, carried in this bill for street improvement, and unless there is some limitation upon that, it might be used in tearing up these Belgian block or granite pavements, which the committee were unanimous in be-

lieving ought not to be torn up.

Mr. MANN. If the gentleman will permit, I have not the slightest opposition to the proviso in the bill, but I am inclined to think it is subject to the point of order, although I am perfectly willing that the Chair should rule otherwise. The gentleman from Missouri [Mr. Borland], having arranged with the chairman of the committee to pass over various items, proposed to offer an amendment. I did not know what the

Mr. BORLAND. The amendment has not been offered yet.

Mr. MANN. I did not know whether it was intended to hang the amendment onto a provision of the bill that was subject to a point of order and thereby escape the point of order. I did not know, and could not learn the fact about that, and therefore I made the point of order as a precautionary measure until I could ascertain the facts.

Mr. SISSON. I have not seen the amendment offered by the gentleman from Missouri.

Mr. MANN. Neither have I. Mr. SISSON. I do not know what it contains.

Mr. JOHNSON of Kentucky. As to the point of order made by the gentleman from Illinois [Mr. Mann], a reading of the proviso shows that it is a limitation placed upon the appropria-tion made in this bill. If it had said, "Provided, That no money herein appropriated shall be expended upon these streets," would have been equivalent in meaning to the language which is herein used. This proviso places a negative limitation upon the money herein appropriated, and therefore under the Holman rule it is not subject to a point of order.

Mr. MANN. If I may call the attention of the Chair to the paragraph, in lines 10 and 11-

And shall be paved, in the discretion of the commissioners, instead of being graded and regulated—

I do not quite see how a thing can be a mere limitation which leaves it to the discretion of the commissioners. That is pure legislation.

Mr. PAGE of North Carolina. Mr. Chairman, it seems to me perfectly clear that this proviso is a mere limitation upon the expenditure of this money, and for that reason alone is not subject to the point of order, in addition to the reason advanced by the gentleman from Kentucky [Mr. Johnson], that it comes within what is known as the Holman rule reducing or restricting the expenditure under the appropriation. I call the attention of the Chairman to a ruling—I can not give the Chairman the citation to the section, because I do not have it before memade by the gentleman from Virginia [Mr. SAUNDERS] that I think is on all fours with the contention now being made by the committee as to this matter. If the parliamentary clerk will look it up, I think he will find that there has been a ruling that is on all fours with the contention of the committee.

Mr. MANN. Clearly this does not come within the Holman rule. It is a matter of imagination to put it there, and it takes a very vivid imagination to conceive the idea that this is within the Holman rule.

Mr. SISSON. Mr. Chairman, does the Chair want to hear anything further?

The CHAIRMAN. The Chair will hear the gentleman if he

desires to be heard.

Mr. SISSON. If the Chair should hold that the proviso does not come within the Holman rule, this proposition is sound: If we have the right to appropriate the money, we certainly have the right to direct the manner in which it shall be expended. Now, that is all this clause is intended to do. It is the purpose of the clause.

In order that the Chair may understand perfectly the intent of the language, there are certain business streets now paved with Belgian block, which is conceded by the commissioners and engineers to be a very lasting pavement, but out in the residential section they have laid down a different kind of pave-

The expenditure of this lump sum for street improvement is left largely in the discretion of those expending the money, and if this limitation is not placed upon it, they might use practically all of the lump sum to tear up the Belgian block pave-ment, rather than expend it on streets which need the improve-

ment more than those streets so paved appear to need it.

The sole purpose of this proviso is to put a limitation upon the appropriation of the money which the Congress unquestionably has the right to appropriate; and having the right to ap-

propriate, it has the right to control the expenditure.

I call the attention of the Chair to another thing—

The CHAIRMAN. The Chair is of the opinion that under the rules relating to limitations on appropriation bills, this proviso is permissible, and the Chair overrules the point of order. Mr. BORLAND. Mr. Chairman, I offer the amendment which

I send to the Clerk's desk.

The CHAIRMAN. The gentleman from Missouri offers an amendment, which the Clerk will report.

The Clerk read as follows:

The Clerk read as follows:

Page 20, line 11, insert, after the word "regulate," the following:

"Provided, That no portion of this appropriation shall be expended except in accordance with the following limitation: That whenever, under appropriations made by Congress, the roadway of any street, avenue, or road in the District of Columbia is improved by laying a new pavement thereon or by resurfacing an existing pavement from curb to curb or from gutter to gutter, where no curb exists, where the material used is sheet asphalt, asphalt block, asphaltic or bituminous macadam, concrete, or other fixed roadway pavement, such proportion of the total cost of the work, including all the expenses of the assessment, to be made as hereinafter prescribed, shall be charged against and become a lien upon the abutting property, and assessments therefor shall be levied pro rata according to the linear frontage of said property on the street, avenue, or road, or portion thereof upon the roadway of which said new pavement is laid or the existing roadway of which is resurfaced: Provided, however, That there shall be excepted from such assessment the cost of paving or resurfacing the roadway space included within the intersections of streets, avenues, and roads, as said intersections are included within building lines projected, and also the cost of paving the space within such roadways for which street rallway companies are responsible under their charters or under law on streets, avenues, or roads where such railways have been or shall be constructed.

"The assessments herein provided for shall be levied and paid for in the following manner, namely: Where the width of the roadway setually to be paved is 40 feet or less between the curbs, or between the gutters, where no curbs exist, after deducting the amount required to be paved by the street railway companies, shall be assessed against the abutting property owners, one-half to each side; where the width of the street thus to be paved, after deducting the amount required to be

lows: The cost of constructing 20 feet on each side of said street shall be assessed against the abutting property owner, and the cost of paving the remaining portion of said street, including the cost of intersections, shall be paid for by the government of the District of Columbia out of funds available for that purpose.

"Assessments levied under the provisions hereof shall be payable and collectible in the same manner and under the same penalty for non-payment as is provided for assessments for improving sidewalks and alleys in the District of Columbia, as now provided by law: Provided, That the cost of publication of the notice of such assessment upon the failure to obtain personal service upon the owner of the property to be assessed therein provided for and of the services of such notices shall be paid out of the appropriation for the work, and such assessments, when collected, shall be deposited in the Treasury of the United States to the credit of the fund available for similar public work."

Mr. MANN. Mr. Chairman, I make a point of order against the amendment.

Mr. BORLAND. Mr. Chairman, I would like to have the

gentleman state his grounds for his point of order.

Mr. MANN. The amendment purports to be a limitation on the appropriation, but it is not. It is substantive legislation, not the appropriation, but it is not. It is substantive legislation, not in order on an appropriation bill. It has been frequently ruled that, although you commence a paragraph with "No part of this appropriation shall be expended unless," and then you provide substantive legislation in that something, that renders it not a limitation on an appropriation, but renders it subject to a point of order, because it is substantive legislation. In other words, you can provide money in an appropriation or refuse to provide it, and hence between these two you can provide how it shall be expended on condition, but you can not in the condition insert a lot of substantive legislation which violates the change of existing law. That is exactly what this amendment proposes to do. That is what the rule provided against, that propositions of this sort should not be presented to the House without the report of a committee and without some chance to have knowledge of it. No one in the House, probably, unless by some connivance, knows what is in the amendment except as they have just heard it read. It is a long amendment, undertaking to change the law and providing a new law in regard to the construction of streets by special assessment. Hence I think it is subject to a point of order, and I make the point of

Mr. BORLAND. Mr. Chairman, the length of the proviso is no controlling feature as to whether or not it contains new legislation. The controlling feature after all is the purpose, whether it be a limitation in fact upon expenditure upon the appropriation to which it is attached.

What the gentleman from Illinois is discussing would be a proposition where, under the guise of a limitation in an appropriation bill, you attach some legislation utterly nongermane to the purpose for which the money was to be used. He will find the books full of precedents of that kind, where men have undertaken to take concrete propositions to legislate which were not germane to the purpose of the expenditure of money by the Government and attached it in the shape of a rider or a limitation by some appropriate words turning it into a limitation. That is the proposition to which he has made his criticism.

But where the purpose of the amendment or proviso is germane to the expenditure of the money which is being appropriated, then the gentleman's criticism fails of its basis. this money is being appropriated for the purpose of improving the streets of the District of Columbia with the relaying of asphalt pavement, among other things. It embraces the repaving of the streets, and a part of the repaving would be with sheet asphalt and a part by block asphalt.

Mr. COX. Will the gentleman yield?

Mr. BORLAND. Certainly.

Mr. COX. Does this amendment reduce the appropriation, the expenditure of money?

Mr. BORLAND. I am coming to that. I am discussing the sole objection raised by the gentleman from Illinois. This says any expenditure of money for this purpose-laying sheet asphalt and block asphalt-shall be expended in certain specified manner. So it is a limitation on the power of the commissioners to expend money, and not a general piece of legislation applying to their action in other directions. It is not a piece of legislation that is not germane to this appropriation, but relates to the expenditure of this particular appropriation.

Mr. MANN. Will the gentleman yield?

Mr. BORLAND. Certainly.

Mr. MANN. Does the gentleman's amendment give to the commissioners power in regard to the assessment, or anything of that sort, which they do not now have?

Mr. BORLAND. No; and that is the point I want to make.

Mr. MANN. I only heard the gentleman's amendment read,

and it seemed to me that it did.

Mr. BORLAND. It does not enlarge the powers of the commissioners; it simply says that the existing law now applying

to the expenditure of money for sidewalk work shall be a limitation on the expenditure of the street work.

Mr. MANN. They have not that power now over street work?

Mr. BORLAND. No.

Mr. MANN. Then it proposes to give that power over street work which they do not now have.

Mr. BORLAND. That is the purpose of the limitation.

Mr. MANN. That is conferring a power upon them which

they do not now have.

Mr. BORLAND. A limitation is something that takes away from them the power, and their power is taken away to use Government money in a certain way.

Mr. MANN. A limitation is to take away power. This is

giving power to them.

Mr. BORLAND. No; it is not; it is a limitation.

Mr. MANN. I understood it to be to give the commissioners power to levy an assessment for this street improvement which they do not now have. Is not that the purpose of the amend-

Mr. BORLAND. Mr. Chairman, that power does not arise in the District Commissioners; it arises under the law. It says that the assessments shall be levied and collected as now collected, but that they shall be collected as to this work. They are now collected, and the commissioners do not have any power or discretion in the matter. This simply says that that method of reclaiming to the United States and the District a part of the fund unexpended shall apply to this limitation, shall apply to this particular fund. That is exactly the point that I want to make next in regard to the gentleman's criticism. His criticism is that if the limitation carries that appropriate reference to the statute or other machinery by which that limitation can be made effective, then he has the objection that it is in that way additional legislation. But the fact that the limitation is workable, that the limitation actually articulates with existing law, is not an objection to the limitation.

Another point that I desire to make about the validity of the amendment is that in any aspect of it, it can not be denied that it comes within the Holman rule. Its whole purpose, its whole

spirit and operation will be to retrench expenditures.

The CHAIRMAN. In what particular, will the gentleman

Mr. BORLAND. Because it provides this fund shall be reimbursed to the Treasury of the United States and the District of Columbia in the way specified. Therefore the fund is used primarily for the construction work.

Mr. JOHNSON of Kentucky. Mr. Chairman, if the gentle-man will permit me to interrupt, it also on its face shows that it is a reduction of the amount the District of Columbia pays, and also a reduction of the amount that the United States will

Mr. BORLAND. Yes. There is one way where it is a clear reduction, and that is where it charges up against the property owner the cost of the assessment and the machinery for doing the work—not only the cost of the actual laying of the asphalt, but the assessment and advertisement, and so on. That is a clear reduction, because that takes out of the expense of the District of Columbia and the United States an expense which now, under that appropriation, would rest upon the District; but to the extent also of the actual laying of the work if is a reduction, because it provides that the cost of doing that shall come back into the District treasury or into the Treasury of the United States, but the provision specifically is into the District treasury

The CHAIRMAN. The fact that it comes back into the Treasury would not necessarily mean a reduction in the ex-

penses, would it?

Mr. BORLAND. It seems so to me. If the appropriation instead of being paid out at a loss to the Government was paid out only on the condition that it be returned by the persons for whose benefit it was paid out, then it is a reduction in expenditures. If I give a man \$10, it is an outgo. If I lend him \$10 and get it back and have the machinery provided for getting it back, that is a retrenchment of my expenditures, because I get the \$10 back, or if I get back any portion of it. If I am under the expense of paying for the machinery for doing this work, and that charge is taken off the District, as it is by this amendment, that, of course, is a clear reduction, but the whole purpose and spirit, which is the thing in which the Chair is interested, is toward a retrenchment of expenditures. It is toward putting these special assessments which are now included in the general expenses of the District in the category where they ought to be put, as special expenses of the property owners, and in pretty nearly every city in the United States and in pretty nearly every court in the Union these special

assessments have been held not a part of the general expenses of the city, and not included within its general taxes, but special assessments for the benefit of particular property owners, and that condition has prevailed in this city as a unique condition—that they were considered as part of the general taxes of the District and paid out of the general funds. That change brought about is a retrenchment, and a very marked retrenchment.

Mr. JOHNSON of Kentucky. Mr. Chairman, I feel satisfied that under the Holman rule a point of order does not lie against this amendment. In the first place, the committee having legislative jurisdiction of the subject has reported to this House a bill of which this is an exact copy, and the subject of that bill is germane to the appropriation which is now under consideration.

Mr. MANN. Will the gentleman yield?

Mr. JOHNSON of Kentucky. Certainly. Mr. MANN. When was that bill reported?

Mr. JOHNSON of Kentucky. It was reported December 11.
Mr. MANN. I have just got a copy of the bill. That is correct.

Mr. JOHNSON of Kentucky. In addition to that, the bill clearly shows on its face that it is a reduction of expenses in It reduces the proportionate part of these improvetwo ways. ments which the District must pay as well as that which the Federal Government must pay. Therefore it is clearly a reduction of expenses. And, in the next place, it requires a return of this money under certain circumstances which it is now proposed to advance. Money "advanced" can not be more than a loan; and the same money, when returned, repays. the account balances. That is the effect of this amendment. Under present law there is no future payment. I say, in my opinion at least, it is no difficult matter to see that in three different aspects under the Holman rule this amendment is not subject to the point of order.

Mr. BORLAND. Mr. Chairman, I want to suggest in that connection what has just been suggested to me by my colleague [Mr. Sims], that this point or a very similar point was passed upon by Judge Saunders when he was Chairman of the Committee of the Whole House on the state of the Union on the military appropriation bill a year ago in which he held that an amendment reducing the number of regiments from 15 to 10 showed on its face it was a retrenchment, although no reduction in the amount was there specified, but that the necessary effect of the amendment was the controlling feature in the judg-

ment of the Chair.

Mr. PROUTY. Mr. Chairman, I wish especially to call the attention of the Chair to the last paragraph of Rule XXI; that is, to the last part of division No. 2. After providing under what circumstances appropriation bills may be amended or may not be amended it provides:

Provided, That it shall be in order further to amend such bill upon the report of the committee or any joint commission authorized by law or the House Members of any such commission having jurisdiction of the subject matter of such amendment, which amendment, being germane to the subject matter of the bill, shall retrench expenditures.

On the 11th of this month the Committee on the District of Columbia reported this bill favorably, in identical words with the amendment that has been offered, which is the bill H. R. 10234, and I had the honor to report the matter to this House, which you will find in the report made on the 11th day of December, 1913. I have examined quite carefully the authorities upon this subject, and it seems to me that it leaves no question, unless it can be said it is not germane, which no one, I presume, will insist upon, or that it does not retrench. Now, it will be noticed that the last provision is not the same as the one contained in the earlier part. If it simply re-trenches—although it may not retrench the exact amount of appropriations contained in the bill-if it retrenches, then it comes within the provisions of this proviso. Now, under this appropriation bill to which it is offered as an amendment there are several hundred thousand dollars appropriated for improvements, which will come out of either the treasury of the District of Columbia or the Federal Treasury if passed as it is reported here. If it is passed as amended by the gentleman from Missouri, it will save whatever the amount is from being paid out of the District of Columbia treasury or the Federal Treasury

The CHAIRMAN. The Chair would request the gentleman to point out specifically the clauses in the amendment which he

claims will result in retrenchment.

Mr. MANN. Mr. Chairman, while the gentleman is looking to it, let us see if we can not get down to a basis of some sort, if the gentleman will permit.

Mr. PROUTY. Certainly.

Mr. MANN. When the amendment was read I did not recognize it as the bill that had been reported, although I am familiar with that bill. This would be the fact under the bill: The money is appropriated and expended out of the fund, and after being expended for street pavements it is assessed upon the property owners and collected from the property owners. That is a fair statement.

Mr. SIMS. Covered back into the Treasury?

Mr. MANN. So the question would be as to the subject of retrenchment of expenditure, whether expending money and then collecting it from some other source is a retrenchment of

Mr. PROUTY. I do not believe, Mr. Chairman, the gentleman means to imply it means a saving of expenses to anybody except from out of the Public Treasury in using the word "retrench-Retrenchment of expenditure means a retrenchment of public expenditure.

Mr. MANN. I wish to be heard in argument a little later, but I wished to get the facts while the gentleman was looking

at the bill.

Mr. PROUTY. First, answering the question that has just now been raised, and then applying it to the question asked by the Chair, I wish specifically again to call attention to the difference between the language contained in No. 2 of Rule XXI and the proviso. In the body of the provision it says:

By the reduction of the compensation of any person paid out of the Treasury of the United States, or by the reduction of the amounts of money covered by the bill.

That is in the first one. In the second it says:

Provided, That it shall be in order further to amend such bill upon the report of the committee or any joint commission authorized by law or the House members of any such commission having jurisdiction of the subject matter of such amendment, which amendment, being germane to the subject matter of the bill, shall retrench expenditures.

Now, with that clear distinction kept in mind, I shall be glad to answer the interrogation of the Chair. This bill to which the amendment is offered by the gentleman from Missouri, appearing first upon page 19, provides for \$220,000 for assessment work, and then goes on and provides for the improvement of certain streets, and provides for the amounts that may be expended, all of which under that provision would not only come out of the Public Treasury, but would forever remain out of the Public Treasury, and would be an expenditure that would in no manner diminish by subsequent years. But the amendment offered by the gentleman from Missouri [Mr. Borland] takes that amount out of the expenditure of the Public Treasury and makes it a charge upon the property abutting upon these streets or improvements. I do not know that there is anything I can say that would make it any clearer. I have gone through the decisions, so far as I have been able to do so, and it seems to me that that second proviso means nothing if it does not create a different situation from what it does if the committee had not reported.

Mr. CAMPBELL. Mr. Chairman, may I ask the gentleman

from Iowa [Mr. Prouty] a question?

The CHAIRMAN. Does the gentleman yield? Mr. PROUTY. With pleasure.

Mr. CAMPBELL. Is not the bill that has been read here as an amendment substantive legislation that does not diminish the amount of the expenditure, but changes the amount of that expenditure from the Treasury to somebody else? Is not that the real substantive legislation that will be effected if the amendment is agreed to?

Mr. PROUTY. The gentleman's analysis is substantially

correct

Mr. CAMPBELL. Then, is it either a retrenchment or a limi-

tation upon expenditure?

Mr. PROUTY. Answering that question, I would say yes. If you take a bill that has got to be paid by somebody and provide that the Federal Government and the District of Columbia shall not pay it in the one case and that they shall pay it in the other, it seems to me the former is a retrenchment of the expenditures of the Federal Government. In other words, to make it perfectly plain, here will be \$220,000 that will be paid for—\$110,000 by the District of Columbia, \$110,000 by the Federal Government—as the bill is now reported.

Mr. COX. Mr. Chairman, as I understand the gentleman, it is simply this: It will retrench expenditures to that extent, whatever it may be, that might be assessed upon or against

abutting property owners? Mr. PROUTY. Yes, sir.

Mr. COX. And that is the whole meat in the coconut?

Mr. PROUTY. In this proposition, when you can find some-body else to pay it besides the Treasury, out of which you have a right to appropriate, and save it that much, it certainly reduces that much expenditure.

Mr. CAMPBELL. I do not understand from the answer of the gentleman from Iowa [Mr. PROUTY] that the amendment offered is in the nature of a retrenchment. It proposes to change the method and the person by which the expenditure is to be paid. That is all I can see that the legislation accomplishes. It does not reduce expenses, does it? Does the amendment purport to reduce the expense that shall be made in the contemplated improvement? If not, then it can not be a retrenchment.

Mr. PROUTY. The gentleman seems to indulge in a strange-I was going to say hallucination, but I will say a strange legal interpretation. He seems to think that when we get money to do a certain work out of something other than the Federal or District Treasury we are not retrenching, because we get the money from somebody else. Now, by retrenchment, everybody must concede, it was the intent of this rule to provide retrenchment of the amount that was to come out of the Public Treasury. It was not intended as a protection to somebody that might have to put something into the Public Treasury. 'It meant that it would reduce the amount. That was the whole purpose of the Holman rule, namely, that anyone upon the floor of the House might offer amendments to appropriation bills that would reduce the amount of expenditure by the Federal Government and not, as the gentleman seems to indicate by his question, reduce the amount that somebody might have to pay into the Federal Treasury

Mr. MANN, Mr. Chairman— Mr. SISSON, Mr. Chairman—

The CHAIRMAN. The gentleman from Illinois [Mr. MANN]

recognized.

Mr. MANN. Mr. Chairman, I doubt very much, in the first place, whether this amendment is germane. Here is a provision in the bill in reference to the improvement of certain streets or a certain amount to be expended for streets, with an amendment offered covering the improvement of all streets for all time hereafter. I do not believe that that is germane.

Mr. BORLAND. Mr. Chairman, the gentleman is wrong

about that.

Possibly. Mr. MANN.

The CHAIRMAN. Does the gentleman yield?

Mr. MANN. Certainly. Mr. BORLAND. I call the gentleman's attention to the amendment. It does not say "hereafter."

Mr. MANN. It relates to the streets improved under this appropriation.

Mr. BORLAND. Yes.

Mr. MANN. That is one trouble about this way of offering amendments. First I tried to listen to it, and then the gentleman from Missouri [Mr. BORLAND] gave me a copy of it, and neither is correct. They have abandoned, as far as I can learn and judge, the idea that this is a limitation, and they now propose to sustain it under the Holman rule; and the gentleman from Iowa [Mr. Prouty], my distinguished friend, who believes that everybody who does not agree with him about District matters has hallucinations, endeavors to defend it under clause 2 of the Holman rule.

Does it reduce expenditures? Let us see. Suppose that instead of raising this money by special assessments they would propose to raise it by an increase of the tax on the sale of liquor. Would that be in order?

Mr. BORLAND. That would not be germane.

Mr. MANN. Why not? You are raising the money.

Mr. BORLAND. That is the very criticism the gentleman has been raising all along. That would not be germane.

Oh, the proposition is to raise the money, to

Mr. MANN. raise it some other way.

Now, the gentleman from Iowa [Mr. Prouty] in his speech seemed to assume that the Government just printed the money and that that was all there is to it. There is no money paid out of the Treasury, Mr. Chairman, that is not first paid iato the Treasury, and when it comes to the saving of expenditures it means saving the amount just expended, and not providing a method of reimbursement, because all the money which we pay out this year will have to be reimbursed to take care of the appropriations next year by some form of taxation. This is only a special form of taxation. It is not saving expenditures; it is not retrenching expenditures; it is only providing a method of reimbursement in the form of taxes levied upon specific property instead of levied at large.

Mr. COOPER. After the expenditure is made? Mr. MANN. Yes; after the expenditure is made. Will anyone hold that if a gentleman here desires to offer a new revenue measure of any kind he can propose that the money to be raised shall not be expended unless the Secretary of the Treasury or the proper officials raise the money by another form of taxation or add to the taxes which are now being collected under the law? The phrase "retrenchment of expenditures' means what it purports to mean on its face. It means to reduce expenditures, not to introduce a new method of collecting

the money over again.

Mr. BORLAND. Mr. Chairman, the same criticism lies to the present line of argument of the gentleman from Illinois [Mr. MANN] that lay originally to his line of argument. His illus--the last one that he gave-discloses the weakness of his position. If we were to undertake to attach to an appropriation bill a substantive piece of legislation which was not germane to the expenditure of that money, but was a foreign or nongermane proposition to raise revenue, the gentleman's position would be right. That is the case he has used as the illustration of his doctrine that we attach to an appropriation a proviso that the money shall not be spent unless the Secretary of the Treasury goes out and raises it by taxation in a certain way, by a tax on liquors, or in some way of that kind. Unquestionably that is a good illustration of the reason for the rule that limits legislation on appropriation bills. That is the scope of that limitation. But the gentleman's illustration fails alto-

Mr. CAMPBELL. Mr. Chairman, will the gentleman yield?
The CHAIRMAN. Does the gentleman yield?
Mr. BORLAND. Yes.

Mr. CAMPBELL. In what respect of principle does the proposition of the gentleman from Illinois [Mr. Mann] to raise this money from a tax on liquor differ from the proposition that the gentleman from Missouri [Mr. Borland] has made to raise it

from a tax on certain real estate?

Mr. BORLAND. Mr. Chairman, I am glad the gentlemen have gotten together on that position. That is their position, and I am glad they have stated it so particularly. If this amendment provided that this money should be expended for the improvement of streets, but should not be expended unless the commissioners went out and increased the saloon licenses of the District of Columbia, it would be a clear illustration of the cases of the gentleman from Kansas and the gentleman from Illinois.

Why? Because saloon licenses in the District of Columbia are not germane to the improvement of the streets; but if it says that the improvement of the streets in the District of Columbia shall be carried on as certain other improvements in the District of Columbia are carried on-for instance, the improvement of sidewalks-then it is a limitation upon the expenditure of the money for the improvement of the streets, and provides that the money appropriated for the improvement of the streets shall be expended solely under the limitation.

Mr. CAMPBELL. Will the gentleman yield further. Mr. BORLAND. Yes.

Mr. CAMPBELL. Applying the Holman rule, in what way does this differ from the raising of the revenue as a tax on cigarettes or liquors'

Mr. BORLAND. Ah, the gentleman is right back to his same

proposition.

Mr. PROUTY This is not a revenue measure.

Mr. BORLAND. The gentleman wants to assume that the Holman rule may be construed to allow us to go out and raise taxes on liquor and cigarettes and get the money into the Treasury first before it can be expended. Now, that is not the Holman rule and never was.

Mr. CAMPBELL. That is what you are trying to make it

do in this case.

Mr. COOPER. Will the gentleman yield for a question?

Mr. BORLAND. Yes.

Mr. COOPER. The only expenditure referred to in the Holman amendment to the rules, as I understand it, is the expenditure by the Government. I do not know what is the amount of the expenditure proposed by the pending bill and amendment. Let us assume that it is \$100,000. Now, is not expenditure one thing and reimbursement an absolutely different thing? The original expenditure out of the Government Treasury is a separate, isolated fact, and it will not be lessened at all. The whole amount of \$100,000 will have to be paid out of the Treasury. Subsequently, perhaps a year or two or three years afterwards because you can make it any time you please-there is to be a reimbursement, a contingent reimbursement, of a part or of the whole amount.

But the original expenditure, which is a separate fact, is not lessened at all. The whole amount will go out of the Treasury in any event. Therefore there is not on the face of the pending amendment any such proposed reduction in the amount of the original expenditure as there was in the case mentioned by the gentleman from Kentucky when he referred to the ruling made

amendment proposing a reduction in the number of regiments of soldiers. Of course that showed on its face that it proposed to lessen the initial expenditure out of the Treasury.

But by the pending amendment there is to be no reduction in the amount of the original expenditure out of the Treasury, but at some subsequent time there is to be a contingent paying back into the Treasury; and the two things are, in my judg-ment, absolutely separate transactions.

Mr. BORLAND. I will ask the gentleman does he see no difference between providing that the expenditure shall not be made unless provision is made for its reimbursement and a provision such as the gentleman from Kansas [Mr. Campbell] has spoken of, that before the expenditure is made you shall go out and levy a tax on saloons and cigarettes? Does not the gentleman, as a parliamentary lawyer, see any distinction between the

Mr. COOPER. I see a distinction that possibly could be drawn, but the word "expenditure" has a definite meaning, and the expenditure out of the Public Treasury is not to be lessened at all, because the whole amount is to go out in any event. Subsequently, at a time to be fixed, there is to be a contingent reim-

Mr. BORLAND. Now the gentleman sees that there is a dis-

tinction, and the gentleman agrees with me, no doubt.

Mr. COOPER. Not at all.

Mr. BORLAND. The gentleman agrees with me that a provision for the raising of money and then its expenditure is not this case at all.

Mr. COOPER. But that is not the point. Is the amount of the expenditure to be made in the first instance by the Government of the United States out of its Treasury to be lessened? Not; not at all. It must all be paid. Subsequently, at some indefinite time, there is to be contingent reimbursement.

Mr. BORLAND. Now the gentleman gets down to the proposition that a provision for the reimbursement of expenditures is not a retrenchment, and on that I am going to take issue with him directly. If he were to take the position of the gentleman from Kansas, I would take issue with him on that. He has not

taken that position-

Mr. CAMPBELL. The gentleman from Missouri has taken the position for me. But take the position as an illustration that a levy should first be made upon liquors or on cigarettes. I simply used the illustration of liquors and cigarettes instead of the property upon which the gentleman proposes to make the levy-make it afterwards, if you please

Mr. BORLAND. Now, get down to the proposition-

Mr. CAMPBELL. The whole question, I contend, is that this is not a retrenchment, but changing a tax from one person to another

Mr. BORLAND. From the Federal Government to the pri-

vate property owner, and that is exactly the purpose of it.

Mr. CAMPBELL. Then do you—

Mr. BORLAND. There is a great distinction between providing how the money shall be raised for the purpose of making a particular expenditure and providing that money which has been expended shall be reimbursed in a particular way-a very broad distinction.

Mr. CAMPBELL. It is a substantive limitation and not a

retrenchment.

Mr. BORLAND. It is a limitation which provides that money expended under that particular appropriation shall be reimbursed, shall not be parted with by the Treasury, but that the Treasury shall have a lien for its reimbursement, which is a matter of retrenchment.

Mr. COX. There is nothing in the Holman rule that requires the retrenchment to take place at the time the amend-

ment was adopted; it may follow later on.

Mr. BORLAND. Of course not, the Holman rule is not a technical proposition, but is to be construed in accordance with the spirit of it. If the effect of the amendment is retrenchment, if it shows on its face that the result will be a saving or reimbursement of money advanced or expended of the funds of the Government, it is purely within the spirit of the rule.

Mr. COX. If it shows on its face when the proposed legislation is enacted into law that at some time further on it will

have a tendency to retrench, that is within the rule.

Mr. BORLAND. Yes; the method in which the money is retained or kept in the Treasury is not important, but the reduction of the appropriation is important.

Mr. COOPER. Will the gentleman yield?

Mr. BORLAND. Yes.

Mr. COOPER. Suppose it were proposed to make an expenditure in respect to personal property, and that if necessary such property should be sold to reimburse the Government. The iniby the gentleman from Virginia [Mr. Saunders] on a bill and I tial expenditure by the Government would be a specific amount, and there would be a contingent reimbursement dependent upon the continued existence of the personal property. true that the reimbursement would be more uncertain, but in principle the case would be the same as the one now under discussion.

Mr. BORLAND. Oh, the gentleman is getting more technical than ever

Mr. COOPER. The point that I make is that the expenditure of money is one thing and the reimbursement is another, and the reimbursement is contingent in either case.

Mr. BORLAND. If the reimbursement follows from the method followed, that is one proposition clear-cut. If the reimbursement depends upon the levy of a tax on somebody else or some other class of property, of course that would be a non-germane piece of legislation. How we get the money that we expend is a different thing. That is one proposition; that is a legislative process. How we recover or redeem or save the money we are expending is the main thing that is embraced in the original proposition, and is not a separate proposition.

Mr. JOHNSON of Kentucky. Mr. Chairman, the main sub ject seems to have been somewhat clouded by whisky and cigarettes. [Laughter.] The question is whether or not this is a retrenchment of expenditure. The Chair will take judicial notice of what the law is, and the Chair therefore knows that the present law requires these payments to be made out of public funds. The amendment which is now offered relieves the public fund from the payment of the expense, and says in plain words that it shall be paid by the abutting property.

The CHAIRMAN. Does the gentleman contend that the amendment would reduce the expenditures generally, or does he confine it to the provisions of the bill?

Mr. JOHNSON of Kentucky. I submit that if the Chair was at the head of a banking institution, and the proposition was put up to him to furnish money for the construction of streets, and that money was not to be returned to the bank, he would call that an expense; but if the money was to be gotten from his bank for any purpose, say for building streets, with a solvent promise for its return, then it ceases to be an expense, and, instead, becomes a loan. If this amendment were not a retrenchment of expenses, there would be no voice lifted against it on this occasion. That is as certain as we stand here. But because it is a retrenchment of the public expense it brings this fight upon it.

The CHAIRMAN. The Chair would like to ask the gentleman's views with respect to the provision or rule, whether he predicates his position on the ground that it would reduce the amount of money covered by the bill or whether it is on the proviso which relates to this particular fund?

Mr. JOHNSON of Kentucky. I think it does both. As I have said, I believe it is so relieved of being subject to a point of order that the Chair could overrule the point of order from three different provisions in the Holman rule—those that I have just stated

Mr. SISSON. Mr. Chairman, this discussion seems to hinge around the last two words in the proviso-whether or not this amendment retrenches expenditures. I am sure the Chair is familiar with the ruling made by Judge Saunders, and I am going to read a short extract from that ruling:

going to read a short extract from that ruling:

The Chair will further say that it is not enough for the Chair to think that an amendment may reduce expenses, or that it is likely to reduce expenditures.

The precedents say in this connection that the amendment, being in itself a complete piece of legislation, must operate ex proprio vigore, to effect a reduction of expenditures. The reduction must appear as a necessary result; that is, it must be apparent to the Chair that the amendment will operate of its own force to effect a reduction. (Manual and Digest, p. 409; Hinds, vol. 4, p. 595.) But it is not necessary for this conclusion of reduction to be established with the rigor and severity of a mathematical demonstration. It is enough if the amendment, in the opinion of the Chair, will fairly operate by its own force to retrench expenditures in one of the three ways indicated. This result must be a necessary result, not a conjectural result or a problematical result. It is true that, having reference to the difference of minds, one Chairman might hold that retrenchment would be the necessary result of an amendment, while another Chairman or the committee on appeal might be of a different opinion. But this is inevitable. The law is clear, for instance, that at times a court upon the facts can hold as a matter of law that there was no negligence. Still upon the same facts on a court will derive this conclusion, while another court on appeal will reach a different conclusion. The ruling of the Chair on these points is subject to appeal to the committee.

In other words, the decision of Judge Saunders is this, that

In other words, the decision of Judge Saunders is this, that if the effect of the amendment is to reduce expenditures, retrench expenditures, then the amendment is in order. The reduction of expenditures means necessarily the reduction of money covered into the Treasury under existing law, under the methods of present collection by the Federal Government of a tax. It is nowhere contended, nor will it ever be, that the Holman rule was ever intended to do otherwise than to protect the money in the Treasury of the United States Government.

The CHAIRMAN. Is it the contention of the gentleman that the effect of the amendment is to reduce the amount covered by

Mr. SISSON. It does not reduce the amount covered by this bill on the face of it.

Mr. JOHNSON of Kentucky. Mr. Chairman, if the gentleman will permit, there is no money expended by this amendment. It is simply an advancement; it is not an expenditure.

Mr. SISSON. The amount carried in the bill will be identical with the amount that is here when the amendment is added: but if Judge SAUNDERS's ruling means anything, it is that the effect and the certain mathematical effect is that it will retrench expenditures. It will retrench expenditures where? Out of the Federal Treasury.

Mr. JOHNSON of Kentucky. Mr. Chairman, I wish the gentleman would pardon me for a moment, in order that I may correct a slip of the tongue. I think I said that the bill did not expend. What I meant to say was that the amendment did not expend money, but that it simply advanced it and provided for its return, which the original bill does not do, and therefore this is a saving.

Mr. SISSON. Mr. Chairman, as I understand the amendment, the effect of it will be that the final charge on the Treasury, of both the District of Columbia and also under the system of taxation by the Federal Government, means that expenses will be retrenched. Why? Because you must take into consideration the effect and result. And what is that? That this amendment makes these improvements private improvements, a benefit to the private citizen, makes the improvements a benefit to the property, and this is a method of assessing each individual's private property with that which he ought to pay.

The Chair, under all the rulings, will take into consideration existing law. If you do not take into consideration existing law, it is utterly impossible for the Chair to tell whether it will ever apply or not; but the proviso means that the effect of the amendment will retrench expenditures, and the retrenchment of expenditures will find lodgment in the fact that the private citizen pays for the improvement, and if the Chair takes the amendment as it is intended it means that the Federal Government simply advances this money for the improvement of the streets, and then the retrenchment comes when the private property owner pays it back into the Treasury for the improvement of his property. In some cities they reach the result from an opposite direction. They will not permit the improvement to be made until a petition has been filed, and after the petition is filed with the proper authorities the tax is levied and the improvement made at once, but the tax is levied then upon the property specifically. But here in this case the improvement is one which originates with the District Commissioners. Of course it may be upon the request of citizens who want their property improved, but the improvement of private property is not a proper cause for taxation, nor is the method of recovering it a method of taxation; it is simply a method of getting from that property benefits which necessarily follow and accrue to the property by virtue of the improvement.

Mr. COOPER. Mr. Chairman, will the gentleman yield? Mr. SISSON. Yes.

Mr. COOPER. Suppose that the Government has paid for an improvement in front of a piece of property and that the owner refuses to pay the assessment because, on account of a nuisance or for some other reason, the property has become unsalable, perhaps valueless; how would the Government be reimbursed?

Mr. SISSON. If all the property that is to be improved in the District of Columbia should be worthless

Mr. COOPER. That does not answer the question. The gentleman can not presume that every piece of property will always be salable.

Mr. SISSON. I would presume that a lot of gentlemen were miserable idiots who would improve a piece of property

Mr. BORLAND. If we get back \$1, that is retrenchment. Mr. COOPER. The whole matter turns on this: The gentleman from Mississippi proposes to construe the expression "retrenchment of expenditures" as being equivalent to the expression, "The net result of a transaction, which transaction is, first, the expenditure out of the Public Treasury, and, second, a contingent reimbursement." But the two are not equivalent at all. The expenditure from the Treasury is an act complete in itself and absolutely separate and distinct from a reimbursement.

Mr. SISSON. I decline to yield further. I do not accord with the gentleman at all, because the Chair must take into consideration the method of taxation and the manner in which taxes are collected now and paid into the Treasury. Now, if

the manifest and certain result is to retrench expenditures of that money that is now collected under the present method of taxation, both in the District and in the United States Treasury, the result is that it does retrench expenditures out of the Treasury as a result, and if Judge Saunders's ruling means anything it means that that certain effect follows that the Chair held was in order, and that is what Judge Saunders's opinion meant, a very carefully written opinion and one in which he goes at length into a number of precedents that have been

decided in the past.

Mr. PAGE of North Carolina. Mr. Chairman, thinking it will possibly expedite this matter, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. HULL, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 10523, the District appropriation bill, and had directed him to report that they had come to no resolution thereon.

INTERNATIONAL COMMISSION OF PHYTOPATHOLOGY (H. DOC. NO. 504).

The SPEAKER laid before the House the following message from the President, which was read, and, with the accompanying documents, referred to the Committee on Foreign Affairs and ordered to be printed.

The Clerk read as follows:

To the Senate and House of Representatives:

In view of the provision contained in the deficiency act ap-

proved March 4, 1913, that—
Hereafter the Executive shall not extend or accept any invitation to participate in any international congress, conference, without first having specific authority of law to do soor like event

I transmit herewith, for the consideration of Congress and for its determination whether it will authorize the acceptance of the invitation, a report from the Secretary of State, with accompanying papers, being an invitation from the Government of the French Republic to that of the United States to send delegates to an international commission of phytopathology to meet at Rome on February 24, 1914, and a letter from the Secretary of Agriculture showing the favor with which the Department of Agriculture views the proposed gathering.

It will be observed that the acceptance of the invitation will involve no special appropriation of money by the Government.

Woodbow Wilson.

THE WHITE HOUSE, December 19, 1913.

SENATE BILL REFERRED.

Under clause 2, Rule XXIV, Senate bill of the following title was taken from the Speaker's table and referred to its appropriate committee, as indicated below:

S. 3588. An act releasing the owners of all lode and placer mining claims in the basin of Dan Creek, in the Chitina mining district, in the Territory of Alaska, for the year 1913; to the Committee on the Public Lands.

HOUR OF MEETING.

Mr. PAGE of North Carolina. Mr. Speaker, I ask unanimous consent that when the House adjourns to-day it adjourn to meet

at 10 o'clock to-morrow morning.

The SPEAKER. The gentleman from North Carolina asks unanimous consent that when the House adjourns to-day it adjourn to meet at 10 o'clock to-morrow morning. Is there objection?

Mr. MANN. Mr. Speaker, reserving the right to object, I do not know how far Members may know, but I understand the currency bill has passed the Senate and probably will be asked to go to conference immediately upon the meeting of the House.

Mr. PAGE of North Carolina. I had that in mind when I made the motion, in order that the currency bill might go to

conference as early as possible.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none, and it is so ordered.

ADDRESS OF HON. M. CLYDE KELLY.

Mr. RUPLEY. Mr. Speaker, I ask unanimous consent to have inserted in the RECORD an address by a Member of Congress delivered before the Rivers and Harbors Congress a few days

The SPEAKER. The gentleman from Pennsylvania asks unanimous consent to have printed in the Congressional Rec-ORD a speech made by a Member of the House recently on the subject of rivers and harbors. Is there objection?

Mr. BORLAND. Mr. Speaker, reserving the right to object, I want to ask the gentleman what speech it is?

Mr. RUPLEY. It is an address delivered by M. CLYDE KELLY

of Pennsylvania on inland waterways.

Mr. BORLAND. Well, I want to call the attention of the gentleman to this, I do not believe I would object to Mr. Kelly's speech, but a large number of fine addresses have been delivered before that convention and they are going to be published. The convention publishes its proceedings, and those speeches will be all printed and circulated.

Will the gentleman yield? Mr. MANN.

Mr. BORLAND. Yes.

Mr. MANN. We have already ordered printed in the Record speeches delivered by Democratic Members of the House.

Mr. BORLAND. And one by Mr. Moore.

Mr. MANN. And Republican Members, and we ought not to discriminate against the Progressive Members.

Mr. BORLAND. I do not want to discriminate, but I think we ought not to print in the Congressional Record things that are printed elsewhere.

Mr. RUPLEY. I desire to say to the gentleman, we have a Commonwealth national in size, and seven and a half million people are very much interested in this subject.

Mr. BORLAND. I am going to withdraw my objection in this

case. I do not want to object to this. The SPEAKER. Is there objection? [After a pause.] The Chair hears none, and it is so ordered.

ADJOURNMENT.

Mr. PAGE of North Carolina. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 10 minutes p. m.) the House, under its previous order, adjourned until 10 o'clock a. m., Saturday, December 20, 1913.

EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of Commerce, transmitting part 2 of the Annual Report of the Commissioner of Lighthouses, containing a list of purchases made by private contract or in the open market, with the reasons for such method of purchase, during the fiscal year 1913 (H. Doc. No. 485); to the Committee on Expenditures in the Department of Commerce and ordered

2. A letter from the Secretary of the Treasury, transmitting copy of a communication from the Acting Secretary of Commerce, reporting the following claim for damages, which has been considered, adjusted, and determined to be due the Dennis-Simmons Lumber Co., of Williamston, N. C., for damage to the barge Thomas P. Stran by collision with the lighthouse tender Juniper, September 1, 1913 (H. Doc. No. 486); to the Committee on Appropriations and ordered to be printed.

3. A letter from the Secretary of War, transmitting a report of the annual inspection of the several branches of the National Home for Disabled Volunteer Soldiers (H. Doc. No. 502); to the Committee on Military Affairs and ordered to be printed.

4. A letter from the Secretary of the Treasury, transmitting copy of communication from the Postmaster General submitting a revised estimate of appropriation for the postal service for transportation of foreign mails for the fiscal year ending June 30, 1915 (H. Doc. No. 487); to the Committee on the Post Office and Post Roads and ordered to be printed.

5. A letter from the Secretary of the Treasury, transmitting a copy of a communication from the Postmaster General submitting a revised estimate of appropriation for the postal service, for inland transportation by star routes in Alaska, for the fiscal year ending June 30, 1915 (H. Doc. No. 489); to the Committee on the Post Office and Post Roads and ordered to be

6. A letter from the Secretary of the Treasury, transmitting a copy of a communication from the Postmaster General submitting a revised estimate of appropriation for the postal service for railway post-office car service, for the fiscal year ending June 30, 1915 (H. Doc. No. 488); to the Committee on the Post Office and Post Roads and ordered to be printed.

7. A letter from the Secretary of the Treasury, transmitting a copy of a communication from the Postmaster General submitting a revised estimate of appropriation for the postal service, for inland transportation of mail by electric and cable cars, for the fiscal year ending June 30, 1915 (H. Doc. No. 490); to the Committee on the Post Office and Post Roads and ordered to be printed.

8. A letter from the Secretary of the Treasury, transmitting a copy of a communication from the Postmaster General submitting a revised estimate of appropriation for the postal service, for inland transportation by steamboat or other powerboat routes, for the fiscal year ending June 30, 1915 (H. Doc. No. 491); to the Committee on the Post Office and Post Roads and ordered to be printed.

9. A letter from the Secretary of the Treasury, transmitting a copy of a communication from the Postmaster General submitting a revised estimate of appropriation for the postal service, for the manufacture of postal cards, for the fiscal year ending June 30, 1915 (H. Doc. No. 492); to the Committee on the Post Office and Post Roads and ordered to be printed.

10. A letter from the Secretary of the Treasury, transmitting a copy of a communication from the Postmaster General submitting a revised estimate of appropriation for the postal service, for regulation screen or other wagon service, for the fiscal year ending June 30, 1915 (H. Doc. No. 493); to the Committee on the Post Office and Post Roads and ordered to be printed.

11. A letter from the Secretary of the Treasury, transmitting a copy of a communication from the Postmaster General submitting a revised estimate of appropriation for the postal service, for inland transportation by railroad routes, for the fiscal year ending June 30, 1915 (H. Doc. No. 494); to the Committee on the Post Office and Post Roads and ordered to be printed.

12. A letter from the Secretary of the Treasury, transmitting a copy of a communication from the Postmaster General sub-mitting a revised estimate of appropriation for the postal service, for mail messenger service, for the fiscal year ending June 30, 1915 (H. Doc. No. 495); to the Committee on the Post Office and Post Roads and ordered to be printed.

13. A letter from the Secretary of the Treasury, transmitting a copy of a communication from the Postmaster General requesting that of the appropriation for mail bags, etc., for the fiscal year ending June 30, 1915, the sum of \$100,000 be made immediately available to meet the special demand for equipment due to the holiday rush in handling parcel-post packages (H. Doc. No. 496); to the Committee on Appropriations and ordered to be printed.

14. A letter from the Secretary of the Treasury, transmitting a copy of a communication from the Postmaster General submitting urgent estimates of deficiencies in appropriations for the postal service, payable from the postal revenues, for the fiscal year ending June 30, 1914 (H. Doc. No. 497); to the Committee on Appropriations and ordered to be printed.

15. A letter from the Secretary of the Treasury, transmitting a communication from the Secretary of Commerce submitting urgent deficiencies in appropriations required for the service for the fiscal year ending June 30, 1914 (H. Doc. No. 498); to the Committee on Appropriations and ordered to be printed.

16. A letter from the Secretary of War, transmitting the draft of a bill to prevent the wearing of the uniforms of the Army, Navy, and Marine Corps by persons not entitled to wear such uniforms and to prevent discrimination by common carriers and by managers of hotels, theaters, and other like places affected with the public interest against officers or enlisted men of the Army, Navy, and Marine Corps (H. Doc. No. 499); to the Committee on the Judiciary and ordered to be printed.

17. A letter from the Secretary of War, transmitting report of expenditures on account of appropriation for contingencies of the Army for the fiscal year ended June 30, 1913 (H. Doc. No. 500); to the Committee on Expenditures in the War Department and ordered to be printed.

18. A letter from the Secretary of War, transmitting report of expenditures on account of appropriation for contingent expenses of the War Department for the fiscal year ended June 30, 1913 (H. Doc. No. 501); to the Committee on Expenditures in the War Department and ordered to be printed.

19. A letter from the chairman of the Interstate Commerce Commission, transmitting its Twenty-seventh Annual Report (H. Doc. No. 503); to the Committee on Interstate and Foreign Commerce and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. DECKER, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (H. R. S142) to authorize the construction, maintenance, and operation of a bridge across the Bayou Bartholomew at or near Wilmot, Ark., reported the same without amendment, accompanied by a report (No. 156), which said bill and report were referred to the House

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

A bill (H. R. 849) granting an increase of pension to William H. Watson; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 9967) granting a pension to Mary K. Munoz; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 10324) for the relief of Spencer D. Gleason; Committee on Invalid Pensions discharged, and referred to the

Committee on Military Affairs.

A bill (H. R. 10376) granting an increase of pension to Jay B. Foote; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. KETTNER: A bill (H. R. 11004) to provide for the

survey of San Diego Harbor, Cal.; to the Committee on Rivers and Harbors.

By Mr. HARDY: A bill (H. R. 11005) to provide for the erection of a public building at Mexia, Tex.; to the Committee on

Public Buildings and Grounds,

By Mr. RAINEY: Resolution (H. Res. 353) providing for an investigation of the Keokuk & Hamilton Water Power Co. and companies operating with said company; to the Committee on

By Mr. LLOYD: Resolution (H. Res. 354) authorizing the appointment of a messenger to the Journal clerk; to the Committee on Accounts.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions

were introduced and severally referred as follows: By Mr. ADAIR: A bill (H. R. 11026) granting an increase of pension to David Nihart; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11027) granting an increase of pension to Charles C. Studiey; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11028) granting an increase of pension to George Brock; to the Committee on Invalid Pensions.

By Mr. ADAIR; ADAIR; ADAIR; to the Committee on Invalid Pensions.

By C. ADAIR; ADAIR;

Invalid Pensions.

By Mr. BALTZ: A bill (H. R. 11030) granting a pension to James F. Sims; to the Committee on Pensions.

Also, a bill (H. R. 11031) granting a pension to Gertrude Samstag; to the Committee on Pensions.

Also, a bill (H. R. 11032) granting a pension to Julius A. Schneider; to the Committee on Pensions.

By Mr. BARTHOLDT: A bill (H. R. 11033) granting a pension to James H. Ross; to the Committee on Invalid Pensions. By Mr. BELL of California: A bill (H. R. 11034) to change the military record of Henry Clay Anderson from corporal to captain of staff, without pay; to the Committee on Military Affairs.

By Mr. BOOHER: A bill (H. R. 11035) granting an increase of pension to Horace Dean; to the Committee on Invalid Pensions.

By Mr. BROWNE of Wisconsin: A bill (H. R. 11036) granting an increase of pension to Mary Hanson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11037) to correct the military record of John P. Chesley; to the Committee on Military Affairs.

By Mr. BURNETT: A bill (H. R. 11038) granting a pension to Wilburn Doyle; to the Committee on Pensions.

Also, a bill (H. R. 11039) for the relief of the heirs of Eli A.

Campbell; to the Committee on War Claims.

By Mr. CANTRILL: A bill (H. R. 11040) to carry out the findings of the Court of Claims in the case of James Harvey Dennis; to the Committee on Claims.

By Mr. CARLIN: A bill (H. R. 11041) for the relief of L. C. Reid and Fannie B. Betts, heirs at law of George G. Barton; to the Committee on War Claims.

Also, a bill (H. R. 11042) granting an increase of pension to Charles P. Galpin; to the Committee on Pensions.

By Mr. DILLON: A bill (H. R. 11043) granting an increase of pension to James Mecham; to the Committee on Invalid

By Mr. EAGAN: A bill (H. R. 11044) granting a pension to Jennie L. Parker; to the Committee on Invalid Pensions.

By Mr. EDWARDS: A bill (H. R. 11045) for the relief of Bridget Zeigler, sole heir of John C. Zeigler, deceased; to the Committee on War Claims,

By Mr. FERRIS: A bill (H. R. 11046) granting an increase of pension to William Sanner; to the Committee on Invalid

By Mr. FIELDS: A bill (H. R. 11047) granting an increase of pension to James K. Jackson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11048) for the relief of Robert Craig; to the Committee on Military Affairs.

Also, a bill (H. R. 11049) granting an increase of pension to William Thompson; to the Committee on Invalid Pensions.

By Mr. GARDNER: A bill (H. R. 11050) reimbursing Francis Norwood, of Beverly, Mass., for money turned into the United

States Treasury by mistake; to the Committee on Claims.

By Mr. GITTINS: A bill (H. R. 11051) to promote Robert Andrew Abernathy, lieutenant commander, United States Navy; to the Committee on Naval Affairs.

Also, a bill (H. R. 11054) granting a pension to Rebecca Rice; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11055) granting a pension to Daniel A. Kanipe; to the Committee on Pensions.

Also, a bill (H. R. 11055) for the relief of Stanley Mitchell; to the Committee on Naval Affairs.

By Mr. HART: A bill (H. R. 11057) granting a pension to Addison B. Burroughs; to the Committee on Invalid Pensions.

By Mr. HAYES: A bill H. R. 11058) granting a pension to Mary C. Chapin; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11059) granting an increase of pension to Sallie E. Van Vrankin; to the Committee on Pensions.

Also, a bill (H. R. 11060) granting an increase of pension to Thaddues W. Bradley; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11061) granting an increase of pension to William Cassidy; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11062) for the relief of William E. Campbell; to the Committee on Claims.

Also, a bill (H. R. 11063) to place the name of Capt. Marshall

Also, a bill (H. R. 11063) to place the name of Capt. Marshall P. Thatcher upon the unlimited retired list of the Army; to the Committee on Military Affairs, By Mr. KENNEDY of Rhode Island: A bill (H. R. 11064)

granting an increase of pension to Caroline M. Aldrich; to the Committee on Invalid Pensions.

By Mr. KETTNER: A bill (H. R. 11065) granting an increase of pension to Rosa B. Ord; to the Committee on Pensions.

By Mr. KEY of Ohio: A bill (H. R. 11066) granting an increase of pension to William H. Chaney; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11067) granting an increase of pension to Thomas A. Cupps; to the Committee on Pensions.

Also, a bill (H. R. 11068) granting an increase of pension to

Amelia C. Doty; to the Committee on Invalid Pensions.

By Mr. J. R. KNOWLAND: A bill (H. R. 11069) granting a

pension to Augusta Ascher; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11070) granting an increase of pension to Evalyn N. Conant; to the Committee on Pensions.

Also, a bill (H. R. 11071) granting an increase of pension to

Mary H. Trimble; to the Committee on Invalid Pensions.

By Mr. LESHER: A bill (H. R. 11072) granting an increase of pension to William Spotts; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11073) granting a pension to Luther L. Kauffman; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11074) granting a pension to Edward Aldrich; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11075) granting a pension to Benjamin E. Kneibler; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11076) granting a pension to Luther L.

Kauffman; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11077) granting a pension to Charles C. Diehl; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11078) granting a pension to Mary A. Adams; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11079) for the relief of Samuel J. Pealer;

to the Committee on Military Affairs.

By Mr. MOON: A bill (H. R. 11080) to remove the charge of desertion against W. E. Cross; to the Committee on Military Affairs.

Also, a bill (H. R. 11081) to remove the charge of desertion against S. J. Garren; to the Committee on Military Affairs.

By Mr. PADGETT: A bill (H. R. 11082) for relief of estate

of T. W. Powers; to the Committee on War Claims.

Also, a bill (H. R. 11083) granting an increase of pension to

Frank Fuqua; to the Committee on Invalid Pensions.

By Mr. RAYBURN: A bill (H. R. 11084) for the relief of

Nancy M. Cockerham, heir of Cirley Fairchilds, deceased; to the Committee on War Claims.

By Mr. RUPLEY: A bill (H. R. 11085) granting an increase of pension to Mina A. Pilcher; to the Committee on Invalid

Pensions.

By Mr. RUSSELL: A bill (H. R. 11086) granting a pension to Elizabeth Adams; to the Committee on Pensions.
By Mr. SPARKMAN: A bill (H. R. 11087) granting an in-

crease of pension to Michael Eck; to the Committee on Invalid Pensions.

By Mr. STONE: A bill (H. R. 11088) granting an increase of pension to James T. Jones; to the Committee on Invalid Pensions.

By Mr. SWITZER: A bill (H. R. 11089) granting a pension to Nancy Bachor; to the Committee on Invalid Pensions.

By Mr. THOMAS: A bill (H. R. 11090) granting an increase of pension to Sarah J. Wootton; to the Committee on Invalid Pensions.

By Mr. WEBB: A bill (H. R. 11091) granting a pension to Mary N. Nichols; to the Committee on Invalid Pensions.

By Mr. WHALEY: A bill (H. R. 11092) for the relief of the legal representatives of Henry D. Geddings; to the Committee on Claims.

By Mr. EDWARDS: Resolution (H. Res. 352) authorizing the Clerk of the House to pay to the legal representatives of the late John A. Barnes six months' salary and funeral expenses: to the Committee on Accounts.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Memorial of the American Manufacturers' Export Association, favoring the plan of reorganization of the Bureau of Foreign and Domestic Commerce; to the Committee on Interstate and Foreign Commerce.

By Mr. AUSTIN: Petition of merchants of Jefferson City, La Follette, and seven other towns in Tennessee, favoring the passage of House bill 5308, to compel concerns selling goods direct to the consumer by mail to contribute their portion of the funds for the development of the local community, county, and State; to the Committee on Ways and Means.

By Mr. BARTHOLDT: Petition of Phineas Towne, of St. Louis, Mo., favoring the passage of House bill 1672, providing pensions for Indian war veterans; to the Committee on Pen-

Also, petition of the Implement, Vehicle & Hardware Association, St. Louis, Mo., favoring the passage of the Ransdell-Humphreys bill providing for flood prevention on the Mississippi

River; to the Committee on Rivers and Harbors.

By Mr. PADGETT: Papers to accompany bill for the relief of the estate of T. W. Powers; to the Committee on War Claims.

Also, papers to accompany bill granting an increase of pension to Frank Ferguson; to the Committee on Invalid Pensions.

By Mr. PLUMLEY: Petition of Louise Stone and 15 others of the State of Vermont and sundry citizens of the State of Illinois, asking that complete separation of church and state be assured and protesting against the passage of Senate bill 752; to the Committee on the District of Columbia.

By Mr. RAKER: Petition of miners' unions at Jackson, French Gulch, and Kennett, Cal., favoring the resolution calling for an investigation of the recent strikes in Colorado and Mich-

igan; to the Committee on Labor.

By Mr. SCULLY: Petitions of citizens of South Amboy, Point Pleasant, Freehold, Jersey City, Somerville, Bayonne, Manasquan, Newark, Elizabeth, Orange, and Allentown, of the State of New Jersey, protesting against the passage of the seamen's bill in its present form; to the Committee on the Merchant Marine and Fisheries.

Also, petition of the Maritime Association of the Port of New York, protesting against the passage of the seamen's bill in its

present form; to the Committee on the Merchant Marine and Fisheries.

Also, petition of the Employees' Association, Philadelphia Navy Yard, favoring the Philadelphia Navy Yard for the location of the new dry dock; to the Committee on Naval Affairs.

By Mr. SELLS: Petition of citizens of the first congressional

district of the State of Tennessee, favoring the passage of the Lindquist pure-fabric law; to the Committee on Interstate and Foreign Commerce.

Also, petition of citizens of Greenville, Elizabethtown, Johnson City, Erwin, Bristol, and Jonesboro, of the State of Tennessee, favoring the passage of House bill 5308, relative to mail-

order houses; to the Committee on Ways and Means.

By Mr. J. M. C. SMITH: Petition of White Pine Lumber Co., of Detroit; Detroit Passenger Club; Grand Rapids Association, of Grand Rapids; Transportation Club of Detroit; J. R. Russell, of Detroit; council of the city of Benton Harbor; Benton Harbor Development Co., all in the State of Michigan; and the Maritime Association of the Port of New York, protesting against the La Follette seamen's bill (S. 136); to the Committee on the Merchant Marine and Fisheries.

Also, petition of citizens of the third district of Michigan, favoring the passing of the pure fabric and leather bill introduced by Mr. Francis O. Lindquist; to the Committee on In-

terstate and Foreign Commerce.

Also, petition of National German-American Alliance of the State of New York, protesting against the passage of the Burnett immigration bill; to the Committee on Immigration.

By Mr. STEPHENS of California: Memorial of the San Francisco Labor Council, favoring the passage of House bill 1873 and Senate bill 927, relative to antitrust and injunction measure: to the Committee on the Judiciary.

Also, memorial of the council of the city of Richmond, Cal., favoring legislation by Congress of flood control; to the Com-

mittee on Rivers and Harbors.

By Mr. STEVENS of Minnesota: Petition of the South St. Paul (Minn.) Branch of National Association of Employees, Bureau of Animal Industry, favoring the passage of House bill 9292 to classify the salaries of veterinary inspectors, meat inspectors, etc.; to the Committee on Agriculture.

Also, petition of the Minneapolis Civic and Commerce Association of Minneapolis, Minn., favoring the passage of legisla-tion to employ consulting architects by the Treasury Department by waiving civil-service rules and regulations; to the

Committee on Public Buildings and Grounds.

SENATE.

SATURDAY, December 20, 1913.

The Senate met at 12 o'clock m.

Prayer by the Chaplain, Rev. Forrest J. Prettyman, D. D. The Journal of yesterday's proceedings was read and approved.

ANNUAL REPORT OF INTERSTATE COMMERCE COMMISSION (H. DOC. NO. 503).

The VICE PRESIDENT laid before the Senate the twentyseventh annual report of the Interstate Commerce Commission for the fiscal year ended December 15, 1913, which was referred to the Committee on Interstate Commerce.

INDIAN TUBERCULOSIS SANITARIUM AND YAKIMA INDIAN RESERVATION.

Mr. ROBINSON. Mr. President, on behalf of the joint commission created pursuant to a provision of the act making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1914, approved June 30, 1913, "for the purpose of investigating the necessity and feasibility of establishing, equipping, and maintaining a tuberculosis sanitarium in New Mexico for the treatment of tuberculous Indians, and to also investigate the necessity and feasibility of procuring impounded waters for the Yakima Indian Reservation or the construction of an irrigation system upon said reservation, to impound the waters of the Yakima River, Wash., for the reclamation of the lands on said reservation, and for the use and benefit of the Indians of said reservation," I submit a report.

The Indian appropriation act approved June 30, 1913, created two joint commissions to investigate Indian affairs. One of these commissions, composed of three Members of the Senate and three Members of the House of Representatives, was charged with the very important and arduous duty of probing into the condition of the Indian service with a view to reforming existing abuses in its administrative methods and policies. The other joint commission was directed to investigate and submit

before the 1st of January, 1914, its findings and recommenda-tions touching two radically different but highly important details connected with the Indian service. Undoubtedly the entire work of both commissions could have been intrusted to one, and the creation of two commissions instead of one is probably the result of a legislative entanglement which arose during the consideration by the respective Houses of Congress of the Indian appropriation act referred to.

The Indian Affairs Committee of the Senate, to whom were presented many complaints of fraud and maladministration in the Indian service, finding itself unable, for lack of time and funds, to thoroughly look into all of these complaints, inserted an amendment in the bill providing for the creation of a joint commission of Congress, composed of three Members of each House, to investigate the Indian service generally, and provided an appropriation of \$50,000 for that purpose. In conference this amendment was modified and the appropriation re-

duced to \$25,000.

While the said Indian appropriation bill was under consideration in the Senate an amendment contemplating the establishment of a tuberculosis sanitarium in New Mexico for the benefit of Indians generally throughout the United States, and carrying \$100,000 for that purpose, was inserted. A controversy, extending over many years, having arisen in the State of Washington concerning disputed water rights of water users in the Yakima Basin, Wash., claiming adversely to water users on the Yakima Indian Reservation within said basin, an amendment was inserted by the Senate appropriating \$1,800,000, asserted to be the proportionate share of costs properly assessable against the Government to provide storage waters sufficient to meet the requirements of said reservation.

In lieu of these two amendments the conference inserted a paragraph providing for a joint commission of Congress, to be composed of four Members, two from each House, to investigate and report upon these two important subjects. Considering the far-reaching importance of the two subjects and the extension and modification of policies prevailing in the Indian service implied by the adoption of these two amendments, it was deemed wise to first obtain full information concerning them before committing Congress to the expenditures which their adoption

would make necessary.

The Senator from Arkansas [Mr. Robinson], the Senator from Michigan [Mr. Townsend], and Representatives Stephens of Texas and Burke of South Dakota were appointed to constitute the joint commission to determine the two subjects mentioned. Probably for convenience and purposes of economy these four were also made members of the commission of six to investigate Indian affairs generally, Senator Lane, of Oregon, and Representative CARTER, of Texas, being the other two members.

Both commissions have been actively engaged in performing their duties. So far as consistent with the nature and the character of the same, the work of the two commissions has proceeded concurrently. The task assigned the commission to investigate Indian affairs generally is comprehensive; its powers and authority to inquire into the Indian service and recommend reforms is limited only by the funds available for its uses is not contemplated that this work shall be completed within a short time. It will be carried forward just as rapidly and zealously as circumstances may permit. The smaller commission, however, whose jurisdiction is limited to the two subjects already referred to, has completed its labors and submitted its findings and recommendations. These, together with the testi-mony taken by the commission, will be available for the use of Congress when it assumes to determine the respective matters comprehended in the report of this commission.

Let me now submit to the Senate, in conjunction with the report, a brief statement and explanation of the work and findings of this commission, pursuing the subject inversely to the order observed in the report.

THE YAKIMA IRRIGATION CONTROVERSY.

The commission believe that grave injustice has been done the Yakima and associated Indians by the Government of the United States in depriving them of waters and water privileges necessary in the cultivation of the irrigable lands on the Yakima Indian Reservation and to which the Indians equitably and in good faith are entitled. We also believe that it is the duty of Congress to set a precedent for justice and fair dealing by promptly and completely righting this wrong. We have worked out with some care the means and methods by which, in our

judgment, this may be accomplished.

The subject is not without difficulty. The inquiry has involved many disputed facts, some of doubtful materiality, complicated principles of law, and policies of far-reaching public

THE TREATY OF 1855.

The treaty of 1855, ratified in 1859, under which the Government acquired a vast area of land in the State of Washington from these Indians, and under which the Indians reserved an area nearly 200,000 acres in extent, known as the Yakima Indian Reservation, contains no express reference to irrigation or to water rights. When this treaty was entered into little progress had been made in any part of the United States in the irrigation of arid lands. Probably neither the representatives of the Government nor the Indians making the treaty then regarded water privileges as of controlling importance. This probably accounts for the fact that the treaty contains no express stipulation concerning water rights and privileges

Certain exclusive rights were, however, reserved in the treaty

to the Indians:

The exclusive right of taking fish in all the streams running through or bordering said reservation is further secured to said confederated tribes and bands of Indians, as also the right of taking fish at all usual and accustomed places, in common with citizens of the territory, and of erecting temporary buildings for curing them, together with the privilege of hunting, gathering roots and berries, and pasturing their horses and cattle upon open and unclaimed land.

Fishing and hunting were the principal occupations of these Indians when the treaty was made. But it was the desire and policy of the Government to convert them from a nomadic into an agricultural people. This seems to be generally admitted to be the paramount purpose of the Government in entering into the treaty with the Indians. This is the opinion of ex-Secretary of the Interior Fisher, under date of January 23, 1913, expressed in the following language:

The Indian treaty negotiated in 1855 and ratified in 1859 was to make possible the permanent settlement of the Yakima Indians and their transformation into an agricultural people; to reserve an abundance of land and of water rights out of which the real needs of the Indians for farms and for irrigation water for such farms could be satisfied as such needs might be determined by Congress or its duly authorized executive seems. authorized executive agents.

None of the lands-that is, no considerable area thereofwere then or are now, susceptible of farming without irrigation. If this interpretation of the treaty be indorsed, namely, that its primary design was to convert the Indians into an agricultural people, it is difficult to escape the conclusion that it was the duty of the Government to reserve sufficient water for the use of the Indians on the reservation to carry out this purpose; and, failing to reserve such water flowing in the streams, to provide an adequate supply by storage and without cost to the Indians. This construction is somewhat strengthened by the fact that the Indians began to irrigate lands on the reservation about the time the treaty was made. The area of irrigated lands on the reservation were gradually extended until by 1897 the reservation system, according to the report made by William Redman, June 30, 1897, a Government engineer, the system was capable of irrigating about 50,000 acres by the construction of more lateral ditches.

CONTROVERSY CONCERNING WATER RIGHTS IN THE TAKIMA BASIN.

While the Indians began the construction of crude irrigation works on the reservation about the time of the ratification of the treaty, 1859, in the course of time white settlers began to locate upon and cultivate land on the opposite side of the Yakima River and to take water from the river for irrigation purposes. These appropriations were made for lands, some of which were located above the reservation, while the greater portion of the same were on what is now known as the Sunnyside irrigation project, which has an irrigable area of 102,000 acres, and on which approximately 75,000 acres are now irrigated. With the development of these irrigation works controversies began to arise as to the priority of rights. The reservation irrigation projects proceeded slowly, embarrassed by the fact that the Indians were not disposed to engage in agriculture, and on the whole were inclined to adhere to their traditional characteristics and occupations. The superintendent of the Yakima Indian Reservation, February 19, 1903, filed on 1,000 cubic feet of water per second of time for the use and benefit of water users on the reservation. In 1896 work was begun by the Irrigation Division of the United States Indian Service on the reservation. A main canal with the capacity of 210 cubic feet of water per second and about 121 miles in length, with five laterals aggregating approximately 12 miles, was reported by Engineer Redman in 1897; also the Toppenish Canal, with the capacity of 104 cubic feet of water per second, 3.2 miles long, with four laterals, in all about 2 miles in length, making a total carrying capacity of about 315 cubic feet of water per second, with laterals about 14 miles in all for the distribution of water. This does not include the provision made near the head of the main canal for diverting from the Yakima River about 200 cubic feet of water per second into a natural

slough which runs in a southeasterly direction about 12 miles and empties into the Toppenish Creek.

It appears to have been generally believed in that locality that priority of water rights from the Yakima River depended entirely on priority of appropriations to actual use. Accordingly when the superintendent of the reservation filed on the 1,000 cubic feet per second of water for the reservation, the white settlers, having appropriated to actual use almost the entire low-water flow of the river, instituted injunction suits in the State courts contesting the rights and claims of water users on the reservation. These suits occasioned great disturbance and anxiety among the water users, both on and off the reservation, stopped development, and gave promise of a prolonged controversy. The Secretary of the Interior, Mr. Hitchcock, undertook to effect a compromise of all the disputed water rights in the Yakima Basin. He arbitrarily allowed the Yakima Indian Reservation 147 second-feet, which was less than the amount required to irrigate the land then in cultivation on the reservation from the system actually in operation. The injunctions against the reservation water users were in force, and the lands actually in cultivation were limited and reduced thereby. While the Indians and water users on the reservation do not appear to have been agreed as to the amount of water to which the reservation was entitled, or even to have been unanimous in their contention as to the proper basis upon which such rights could be determined, this adjustment by former Secretary Hitchcock was so manifestly insufficient to afford the reservation lands then in cultivation a sufficient water supply, to say nothing of the very large irrigable area on the reservation still unreclaimed, that universal discontent and dissatisfaction arose. The subject was agitated. Complaints increased and gathered volume during succeeding years, until August 24, 1912, when the Indian appropriation act for that year was approved and the following provision of law adopted:

That the Secretary of the Interior be, and he is hereby, authorized and directed to investigate the conditions on the Yakima Indian Reservation in the State of Washington with a view to determine the best, most practicable, and most feasible plan for providing water for such lands of said reservation as may be irrigated and to cause surveys, plans, and reports to be made thereon, together with an estimated limit of cost of such irrigation project, and to submit his report thereon to Congress on the first Monday in December, 1912, together with such facts and reasons in support of the same as may be necessary to advise Congress fully in regard thereto.

Under the above authorization and requirement extended investigations were made and a report submited as House Document No. 1299, being a communication from the Secretary of the Interior, transmitting a joint report of the supervising engineer of the Reclamation Service, superintendent, and supervising irrigation engineer of the Indian service, on the condition of the Yakima Indian Reservation with reference to irrigation. This report is valuable, exhaustive, and in many respects comprehensive of the entire subject. It is available for the use of Members of Congress, and we have not seen fit to embody the same in the report of the commission.

Secretary Fisher, in submitting this report, made the following statement:

Secretary Fisher, in submitting this report, made the following statement:

Secretary Hitchcock had lawful authority to limit the rights of the Indians in the low-water flow of the Yakima River and the limitation thereof to 147 cubic feet per second, which was a part of the general settlement of water rights in the valley, is valid and binding. Any other conclusion would involve the acceptance of the doctrine that the Indians, by virtue of the treaty of 1855, ratified in 1859, then acquired a vested right in the water flowing in the Yakima River, which is undetermined, and must forever remain undeterminable as to quantity; for it is contended that it is to be measured at any given time by what then appears to be the duty of water for that area, of which, from the economic and engineering standpoint, it is then feasible to irrigate; that it must be measured 50 years hence by what then appears the duty of water for the area which it then appears feasible to irrigate, and so for any point of time in the future. This would make it impossible to measure the future water rights of the Indians at any future time; would prevent all irrigation development outside of the Indian reservation; and would amount to a reservation of the total flow of the river, without any obligation on the part of the Indians to utilize the water, which might thus flow forever unused to the sea. The Indian treaty negotiated in 1855 and ratified in 1859 was to make possible the permanent settlement of the Yakima Indians and their transformation into an agricultural people; to reserve an abundance of land and of water rights out of which the real need of the Indians for farms and for irrigation water for such farms could be satisfied as such needs might be determined by Congress or its duly authorized executive agents. It was not intended to reserve either lands or water rights above that measure, or to restrict the authority of Congress, to determine the measure of the water rights needed by the Indians.

Nevertheless it now appears that such

The joint commission of Congress does not acquiesce in, but repudiates, the compromise made by Secretary Hitchcock, awarding 147 second-feet of water from the low-water flow of the Yakima River to the reservation as inadequate, unjust, and unfair to the Indians. The attempt by former Secretary Fisher to justify it, while at the same time declaring the necessity for a more liberal allowance of water, is difficult to comprehend. Analyzed and condensed, it can not mean anything more than that Secretary Hitchcock had legal authority to determine the question, but in the exercise of this authority abused his discretion and rendered a decision grossly unfair.

The case of Winters v. The United States (207 U. S., 564) had not then been decided. That case is in some respects analogous to the one under consideration. It supports the theory that there was an implied reservation in the treaty of 1855 of sufficient water from the Yakima River for the purpose of irrigating the lands reserved, and in connection with Winans v. United States (198 U. S., 381) supports strongly the proposition that inasmuch as the treaty of 1855 was a grant of rights by the Indians and not a grant of rights to them, all rights not expressly or impliedly granted are reserved.

In Winters v. United States the court says:

In Winters v. United States the court says:

The Indians had command of the lands and the waters—command of all their beneficial use, whether kept for hunting, "and grazing roving herds of stock," or turn to agriculture and the arts of civilization. Did they give up all this? Did they reduce the area of their occupation and give up the waters which made it valuable or adequate? And, even regarding the allegation of the answer as true, that there are springs and streams on the reservation flowing about 2,900 inches of water, the inquiries are pertinent. If it were possible to believe affirmative answers, we might also believe that the Indians were awed by the power of the Government or deceived by its negotiators. Neither view is possible. The Government is asserting the rights of the Indians. * * * On account of their relations to the Government, it can not be supposed that the Indians were able to exclude by formal words every inference which might militate against or defeat the declared purpose of themselves and the Government, * * *.

The commission undertook to find the basis upon which former Secretary Hitchcock's decision was grounded. It was asserted by some professing familiarity with the subject that the award of 147 second-feet of water for the reservation and 650 secondfeet for nonreservation water users was based on the actual amount of water then appropriated. According to the best information obtainable, Secretary Hitchcock, in fact, allowed for the reservation less water than was then required to irrigate the lands actually in cultivation, while the allowance of 650 second-feet was sufficient to irrigate probably 20,000 acres more than the total area of nonreservation lands then under cultivation and irrigated from the Yakima River.

Mr. SMITH of Arizona. In reference to the statement of the Senator from Arkansas relative to the cubic feet per second allowed under Secretary Hitchcock's order, I wish to ask whether he allowed a less amount than was in actual use by

the Indians at the time?

Mr. ROBINSON. Yes; the commission so finds.

Mr. SMITH of Arizona. That the order allowed less than

the Indians were actually using?

Mr. ROBINSON. Yes; and in addition to that, as I have already said, at the time of this finding injunction suits were in force which had reduced the amount of the water that was bring used on the reservation. I shall conclude my discussion of this feature of the subject in just a few moments.

The half-hearted efforts of former Secretary Fisher to justify

this unfair decision is shocking to an unprejudiced and fair

mind.

Whatever complicated issues of law may be involved in this controversy, our Government should carry out in good faith its treaty with the Indians, and if the United States refuses to abrogate it this may not be done through mere executive agents but only by express legislation.

At another time when legislation affecting this subject is under consideration, it may become necessary to present the

matter more in detail.

The findings of the commission and their recommendations are self-explanatory and are as follows:

self-explanatory and are as follows:

1. That the allowance by the former Secretary of the Interior, Mr. Hitchcock, of 147 second-feet of water of the low-water flow of the Yakima River for the use and benefit of the Irrigable lands on the Yakima Indian Reservation was when made, and now is, inadequate, inequitable, and unfair to said Indian reservation.

2. From a consideration of the whole subject, we believe that vested rights have accrued to water users other than those on said reservation, and that the low-water flow of the Yakima River is insufficient to supply their needs and the requirements of said reservation. We therefore believe that the United States should provide for the use and benefit of the irrigable portion of said reservation, free from storage cost and storage maintenance cost, sufficient water to equal the amount to which said reservation was equitably entitled when the finding of Secretary Hitchcock was made.

While it is difficult to determine what this amount should be, we are convinced that it should not be less than one-half of the natural flow of the Yakima River, and should be sufficient to irrigate one-half of

each allotment of irrigable land on said reservation. That this will cost approximately \$500,000, and we recommend that an appropriation of said amount for this purpose be authorized, payable in five annual installments, as the needs of irrigation on said reservation may demand, and on estimates to be submitted; said \$500,000 being the amount we believe necessary to purchase such free water in addition to the amount now available for the irrigable land on said reservation, from the Reclamation Service, as will be required for this purpose.

3. As to the portion of the irrigable allotments in excess of the area to be furnished water free, the allottees may be permitted, but should not be required, to sell the same or any portion thereof under such terms and conditions as the Secretary of the Interior may prescribe. The cost of furnishing water for such area not to be furnished water free shall be apportioned equitably according to benefits.

4. As to all allottees on the said Yakima Indian Reservation the equitable proportionate cost, both as to storage water, in addition to such amount as shall be furnished free, and as to the cost of maintenance and distribution of all water furnished for said irrigable lands on said reservation, shall be charged to the allottees respectively, and payable from their proportionate individual shares of tribal funds when distributed.

distributed.

5. In the event any allottee shall receive a patent in fee to an allotment of Irrigable land before the amount so charged against him has been repaid to the United States, then such amount remaining unpaid shall become a first lien on his allotment, and the fact of such lien and the amount thereof shall be recited on the face of each patent in fee issued.

As to all grantees of allottees to whom patents have been issued the cost, which would be charged against the proportionate individual shares of allottees if the lands were not patented, shall be fixed as a lien upon the lands patented.

Nothing can be cleaved them that tribel funds should not be

Nothing can be clearer than that tribal funds should not be used to reclaim individual allotments. On this reservation many of the allotments can not be irrigated, and it is grossly unjust to use the funds belonging to all for the benefit of some members of the tribe. Whatever of precedent for such action may be cited, we think the correct principle is recognized by this commission in requiring that such expenses as are not to be paid by the Government in the reclamation of the irrigable lands on the Yakima Indian Reservation shall be charged to the individual allottees benefited and paid out of their proportionate shares of the tribal funds. In the event any allottee tionate shares of the tribal funds. receives a patent in fee, the balance remaining due the Government should of course become a lien upon his allotment.

It is believed that if the recommendations herein made are pursued by the Congress this much-disputed question will be

satisfactorily settled.

Mr. WARREN. Mr. President, may I ask the Senator a question at that point?

Mr. ROBINSON. Yes; I yield to the Senator.

Mr. WARREN. Is it the recommendation of the report that

the United States shall buy from itself through the Reclama-

tion Service the right to some reservoir?

Mr. ROBINSON. No; no right in a reservoir. I will say to the Senator that the amendment inserted in the act by the Senate contemplated an appropriation of \$1,800,000 as the proportionate share chargeable against the reservation for the reservoirs necessary to be constructed. Now, we do not think that the Indian service ought to go into the construction of reservoirs or ought to have anything to do with such matters. think that whatever reservoirs are constructed should be constructed under the Reclamation Service, and the Indian service furnished water as in the nature of a private water user.

Mr. WARREN. What is in my mind is this: Whether the money shall be appropriated directly for the purpose of erecting those reservoirs, and perhaps be expended under the supervision of the Reclamation Service, or whether the Reclamation Service money shall be taken to build the reservoirs, and then the

money may be reimbursed to that fund?

Mr. ROBINSON. Nothing is taken from the Reclamation Service fund under this proposed legislation. The appropriation is in the nature of a restitution by Congress for a mistake that was made in permitting the appropriation of waters which rightfully belong to the Indians. That is the theory upon which we have proceeded.

Mr. JONES. Mr. President-

Mr. ROBINSON. I yield to the Senator.
Mr. JONES. I simply want to suggest that the manner in which it would be worked out would be that the purchase would be made of stored water under what is known as the Warren Act. That was really what was contemplated by the amendment that was inserted in the Indian bill—that the Government would purchase of the water that was actually stored by the Reclamation Service such water as would be necessary to water all the irrigable lands.

Mr. ROBINSON. The amendment to the Indian appropriation act contemplated the appropriation of \$1,800,000 at the reservation's proportionate share of the cost of constructing reser-

voirs.

Mr. JONES. It contemplated the purchase of water sufficient to irrigate all of the lands of the reservation that would be capable of irrigation?

Mr. ROBINSON.

Mr. JONES. Now, your proposition here is to appropriate enough money to furnish to the lands of the Indians alone the quantity of water which you think ought to be furnished to them free, without taking into account-

Mr. ROBINSON. No; it is not limited to the Indians. The water is to be furnished to such portions of each allotment as should have water free. We think that is not less than one-half.

Mr. JONES. You contemplate that, but you do not contemplate the appropriation of any money for securing water for the additional half of the allotment?

Mr. ROBINSON. Oh, no; we contemplate that that shall be furnished by the Reclamation Service just as to a private user. Mr. JONES. But in the other bill the \$1,800,000 contemplated furnishing water for all the lands, reimbursement to be made to the Treasury under the Warren Act for water for lands not getting free water.

Mr. WARREN. In any case the Reclamation Service will spend no money that is not returned to it, but the money actually expended will be a direct appropriation in whatever manner it may come from the United States to put the Indians on the basis on which they ought to be put—that is, as to a certain number of them, will they be furnished water free of charge?

Mr. ROBINSON. Yes; there is no suggestion of taking anything out of the reclamation fund. The appropriation is a direct appropriation, so far as the suggestions contained in this report are concerned.

TUBERCULOSIS AND TRACHOMA AMONG THE INDIANS.

Mr. President, the second branch of duty assigned the commission, namely, to investigate and report upon the feasibility of establishing and maintaining a sanitarium in New Mexico for the treatment of tuberculous Indians, involves one of the large problems confronting the Indian service.

Investigations into the health of the Indians, on a somewhat comprehensive plan, were commenced about the year 1909. The funds and the force then available for this work were inadequate. Nevertheless, much valuable but in some respects in-accurate information was collected.

August 10, 1912, the President of the United States laid before Congress, in a special message, the substance of this information. That message is as follows:
To the Senate and House of Representatives:

Congress, in a special message, the substance of this information. That message is as follows:

To the Senate and House of Representatives:

The present conditions of health on Indian reservations and in Indian schools are, broadly speaking, very unsatisfactory. In many parts of the Indian country infant mortality, tuberculosis, and disastrous diseases generally prevail to an extent exceeded only in some of the most insanitary of our white rural districts and in the worst slums of our large cities.

The death rate in the Indian country is 35 per thousand, as compared with 15 per thousand—the average death rate for the United States as a whole. The average death rate in some of the healthliest of our cities is as low as 12 per thousand. No exact figures are yet available for Infant mortality among Indians, but field studies now being made show that while proportionately more Indian bables and while proportionately more Indian bables have not always and the proportionately more Indian bables are born, very many more Indian bables die.

Last year, of over 42,000 Indians examined for disease, over 16 per cent of them had trachoma, a contagious disease of the eye, frequently resulting in bilundness, and so easily spread that it threatens both the Indian communities and all their white neighbors. It is a disease so serious that at no port of entry in this country is the immigrant with trachoma allowed to land. On the Klowa, Comanche, and Apache Reservations 71 per cent of the school children have trachoma. The curing of this disease frequently requires years of constant care. Of the 40,000 Indians examined, 6,800 had tuberculosis. On the White Earth Reservation, in Minnesota, a house-to-house canvass in 1910 and 1911 revealed that of 3,300 Indians 600 had tuberculosis. An examination of half the Indians on the Blackfeet Reservation, Mont., shows that one-third of that number have tuberculosis. Of the total population of the school of the Mescalero Reservation, in New Mexico, where climate conditions are ideal, 5 per

The Indian service has under its general supervision 206,000 Indians, and of these it is a conservative estimate to say that 160,000 are still entirely dependent on the Federal medical service. This service has 160 physicians, over a third of whom, under their terms of employment, devote only a part of their time to Indians. When it is remembered that Indians are so scattered that a physician frequently has to drive a day or more out and a day or more back to reach one family, the inadequacy of such service is plain. While there are many efficient and self-sacrificing physicians in the service, the smallness of the salaries, which average only \$1,186 a year, necessarily affects the qualification and ability of the physicians engaged. In spite of adverse conditions, thousands of cases of tuberculosis and trachoma are being systematically treated, and serious epidemics of diphtheria, measles, cerebrospinal meningitis, and other infectious diseases have been checked. Hundreds of lives have been saved, and a distinct start has been made in getting fresh air and generally better sanitary conditions into the homes.

The Indian medical service should therefore be substantially increased in size and should be lifted into efficiency through the better men whom, as a rule, only better salaries can command. Of course this change should take place along carefully planned business lines and without extrawagance and after a comparative study of other medical services—National, State, and local.

Through the proper channels is now submitted to Congress an estimate for the Indian medical service for \$253,350, accompanied by a detailed statement of the expenditures required. This sum, together with an addition to the amounts which will probably be available in the Indian appropriation bill for the current year, and which were asked for in that bill before all the data now available were at hand, will enable the Indian service to make a complete medical and sanitary survey of the whole field, with a view to curing existing troub

THE WHITE HOUSE, August 10, 1912.

The estimates submitted were as follows:
For the construction of a tuberculesis hospital for the treatment of adult tuberculesis cases, and cases past the incipient stage of the disease, for the use of Indian patients from all sections of the country, \$100,000; for the employment of two additional medical inspectors, including salary and expenses, \$8,400; for the employment and expenses of an assistant supervisor for the developing to greater efficiency the teaching of home sanitation by field matrons and teachers of house-keeping, \$4,200; for increasing the number of and salaries of physicians, \$85,000; for increasing the salaries of nurses, \$2,750; for increasing the salaries of nurses, \$2,750; for increasing the salaries of certain field matrons, \$4,000; Provided, That the amounts paid to physicians, nurses, and matrons out of the funds hereby appropriated shall not be included within the limitation on salaries and compensation of employees contained in the act of June 7, 1897.

To establish a central pathological laboratory, \$1,000; for the remainder of the salaries of the salaries of the salaries of the salaries and compensation of employees contained in the act of June 7, 1897.

hereby appropriated shall not be included within the limitation on salaries and compensation of employees contained in the act of June 7, 1897.

To establish a central pathological laboratory, \$1,000; for the purchase of transportation equipment for physicians, field marrons, and field nurses, \$10,000; for the correction of sanitary defects in Indian homes, \$10,000; for the building of screened sleeping porches on schools and hospitals, \$10,000; for equipping schools with playground apparatus, \$15,000; for the purchase of standard medical literature for physicians, \$2,000; for the purchase or publication of pamphlets, postcards, placards, and other literature on health subjects for distribution among Indians, \$1,000; in all (submitted), \$253,550.

Note: To defray the expenses of a special health campaign planned for the fiscal year 1912 Congress was asked for an appropriation of \$250,000. At the present date the Senate has allowed \$150,000 only, and if the work is to be carried out as planned additional funds must be apropriated.

If the bill for \$150,000, mentioned above, is enacted, the money will be used to defray expenses of the field campaign against the two diseases, trachoma and tuberculosis, and would not be available for use in increasing the efficiency of the work on the reservations where it is proposed to inaugurate separate campaigns for the betterment of the local sanitary conditions.

Of 42,645 Indians examined for disease 16.11 per cent, or 6,870, were found to be suffering from tuberculosis. There is no sanatorium in the United States for the treatment of adult tubercular Indians, and there is provision for only 175 incipient tubercular indians, and there is provision for only 175 incipient tubercular indians, and there is provision for only 175 incipient tubercular will an expertion as may be made by the medical supervisor and a physician expert who is engaged in special tuberculosis work. Systematic inspection is absolutely necessary, and can not be carried out unless additional inspectors ar

are constantly requiring such help as is afforded by a laboratory of this kind.

There is at present only one supervisor of schools employed in the work of developing to greater efficiency the teaching of home sanitation by field matrons and teachers of housekeeping, and the field has not yet been covered by her, although constantly engaged in it for the past three years. This subject is one of the most important of all those to be taught in the Indian schools, and has not yet received the attention which it deserves.

The medical force as it now stands is inadequate to cope with the present health situation, and material improvement must come through substantial increase in number and salaries of the medical corps. Indian service physicians are the poorest paid in the Government service,

and yet their work is fully as difficult and, in many instances, involves greater hardship than any other service except during times of war. There are at present 52 contract physicians and 86 regular physicians. The contract physicians receive an average of \$5.75 per year and the regular physicians an average of \$1.186 per year. The contract physicians do not have the time, nor do they receive sufficient compensation, to enable them to render the amount of medical work required, and it is impossible, also, to obtain efficient and satisfactory regular physicians at the salaries now paid as is desired. There is very little chance for promotion of physicians, and no annual leave is allowed them unless a substitute is furnished and paid for. Instead of the present low salaries and practical impossibility of receiving promotion, physicians should be graded and allowed increased compensation commensurate with their services. Comparing the salaries received by physicians in the Indian service with those of any other branch of the Government, it is at once apparent that the class of men attracted by the Navy, Army, and Marine-Hospital Service is of much higher grade than that entering the Indian service. The following is a comparative table of pay and list of medical officers of the United States Navy, United States Army, the Public Health and Marine-Hospital Service, and the Indian service:

United States Navy.	United States Army.	United States Pub- lie Health and Marine-Hospital Service.	United States Indian service.
Surgeon General, \$6,000. Medical director, \$5,000. Medical inspector, \$4,500. Surgeon, \$4,000.	Surgeon Genoral, \$6,090. Colonel, \$5,000. Lieutenant colonel, \$4,500. Major, \$4,000.	Surgeon General, \$5,000. Assistant Surgeon General, \$4,060. Senior surgeon, \$3,500. Surgeon, \$3,500.	Medical supervisor, \$3,000. Assistant medical supervisor, \$2,200. Ophthalmologist, \$1,800. Physicians, from \$900 to \$1,400, average, \$1,168.
Passed assistant surgeon, \$2,640. Assistant surgeon, \$2,200.	Captain, \$2,400. First lieutenant, \$2,000.	Passed assistant surgeon, \$2,000. Assistant surgeon, \$1,600.	Entrance salary,

It is proposed to increase the compensation and number of Indian service physicians in accordance with the following scheme, which shows the medical positions authorized at present and the new positions

The entrance salary for nurses in the Indian service is below that for any other branch of the Government service, and the average compensation and allowances given them is also smaller. The civil-service register for nurses is constantly depleted and vacancies remain unfilled. There is great demend for more and more competent nurses, and it is proposed to increase their average salary \$60 per year.

Many of the field matrons have rendered faithful service for years at a fixed salary, have earned promotion, and should receive it. The above sum will permit the slight increase desired. It is proposed also to raise the standard of requirements for eligibility and to secure applicants better trained to teach sanitation. Unless the entrance salary is raised it will be impossible to secure the employees desired. The apportionment of the present appropriation for industrial work and care of timber, from which field matrons are paid, does not permit any increase in the salaries this year.

Better transportation facilities are needed in many places and should be supplied. Other funds are not available for this purpose.

It is proposed to increase the efficiency of the Medical Corps by sending them a few carefully selected journals and books on the diseases most common among Indians.

There are on certain reservations hundreds of Indian homes without either openable windows, floors, or provision for ventilation; and it is on these very reservations that tuberculosis is rife. This is a house disease and thrives best under the conditions found in such homes. It is proposed to use this fund to relieve such situations by rendering these homes sanitary, giving special attention to those where tuberculosis is, present, making them not only comfortable to the patient or patients but also preventing them from becoming foct of infection.

In every Indian school there are pupils predisposed to tuberculosis, many of whom develop the disease and are sent home. Most of these children could be saved if at these schools facilities were

a marked decrease in the morbidity from this disease among Indian pupils.

Play in the open air is now universally recognized as essential to the development of normal, healthy children. Indian schools should be thoroughly equipped this year with simple apparatus to stimulate pupils to spend their leisure in outdoor exercise. This measure alone will prevent the development of many cases of tubercular and other infectious diseases among Indian pupils. This fund will only be used in such schools where other funds are not available.

A wide dissemination among Indians of educational literature containing the essential facts of sanitation and the prevention of the spread of disease is absolutely necessary if the Indians are to be educated to live more sanitary lives.

The above estimates include only those items which are not provided for in the appropriation for the "Relief of distress and prevention of disease, 1913," it being assumed that \$150,000 will be allowed.

The Indian appropriation act approved August 24, 1912, making appropriations for the fiscal year ending June 30, 1913, contained the following provision for an examination as to the prevalence of tuberculosis and other contagious and infectious diseases among the Indians:

Provided, That the sum of \$10,000, or so much thereof as may be necessary, is hereby appropriated, out of any money in the Treasury not otherwise appropriated, to enable the Public Health and Marine-Hospital Service to make a thorough examination as to the prevalence of tuberculosis, trachoma, smallpox, and other contagious and infectious diseases among the Indians of the United States, full report to be made to Congress not later than February 1, 1913, with such recommendations as may be deemed advisable.

Pursuant to the foregoing provision, in order that the very large area to be investigated might be covered within the limited time allowed, the Indian country was divided into districts and representatives of the Public Health and Marine-Hospital Service, assigned as follows:

Passed Asst. Surg. B. J. Lloyd, Washington, Idaho.
Passed Asst. Surg. W. C. Billings, northern California, Oregon, Novada.
Passed Asst. Surg. L. D. Fricks, Arizona, North Carolina.
Passed Asst. Surg. F. C. Smith, Colorado, New Mexico.
Passed Asst. Surg. R. C. Guthrie, Oklahoma.
Passed Asst. Surg. R. A. Herring, Kansas, Nebraska, Wyoming, Utah, sonthern California.
Surg. M. J. White, Iowa, Montana.
Passed Asst. Surg. J. W. Schereschewsky, North Dakota, part of South Dakota.

Passed Asst. Surg. J. W. Schereschewsky, North Dakota, part 61 South Dakota.
Passed Asst. Surg. Paul Preble, South Dakota.
Surg. Tailaferro Clark, Mianesota, Michigan, Wisconsin, Pennsylvania.
Asst. Surg. J. P. Leake, New York.
Surg. H. S. Cummings, Virginia.
Asst. Surg. Gen. W. C. Rucker, Florida.

These investigations embraced all contagious and infectious diseases common among the Indians, and especially trachoma. tuberculosis, and smallpox.

While this commission has no express jurisdiction to make investigations of trachoma, that disease is unquestionably among the important subjects to be dealt with by the "commission to investigate Indian affairs" generally.

Liberty is therefore here taken to present and review briefly

important information concerning the prevalence of this disease among the Indians, and a summary of the results of the investi-gations made pursuant to the aforesaid provision in the Indian appropriation act of 1912.

It is quite probable from all the evidence obtainable that approximately one-half of the entire Indian population has trachoma. The percentage varies in the different States where Indians reside, the highest found being approximately 40 per cent in Utah, 41 per cent in Nebraska, 51 per cent in Wyoming, and 70 per cent in Oklahoma,

Trachoma is a disease of the membrane of the eyelids, chronic in character, characterized by inflammation and followed by a thickening of the eyelids. The disease is contagious, is generally believed to be the result of a bacillus, and is transmitted through the medium of the secretion by direct contact. It is promoted by personal uncleanliness and insanitary habits of living, such as overcrowding in poorly lighted houses, and the use of common washbasins and towels. The disease occasions a contraction of the eyelids and a clouding of the transparent corneal surface, frequently resulting in blindness. Undoubtedly trachoma is spreading, and unless vigorous precautions are enforced and adequate remedies applied, there will be added to the miseries of the Indian race blindness.

A simple statement of the nature of trachoma, its cause, and the usual method of its transmission suggests the only practical method of relief, which is summed up in the words "sanitation" and "precaution." The disease is easily preventable. It is almost incurable. The Indian boarding schools and day schools have afforded opportunity for the spread of this loathsome disease which is preseded as a loading to the spread of this loathsome disease which is preseded to the spread of this loathsome disease. ease, which is exceedingly prevalent among Indian pupils. Washes and minor surgical operations, consisting of the removal of the affected membrane, afford only temporary relief. Permanent results can only be accomplished by improving the sanitary habits of the Indians, giving them instructions in percentage and in affecting precenting against a percentage of the indians. sonal and domestic hygiene, and in enforcing precautions against contagion and infection.

There is presented herewith an instructive and interesting discussion of the subject contained in Senate Document No. 1038, Sixty-second Congress, third session, compiled under the authorization of the Indian appropriation act of August 24, 1912. This is published in the RECORD for the convenience of Senators who may desire to pursue the subject in detail.

THE NATURE OF TRACHOMA AND ITS EFFECTS ON THE INDIVIDUAL.

Before presenting the data collected bearing upon the prevalence of trachoma it is pertinent to describe briefly the disease and the degree to which it may impair the physical and economic efficiency of any race suffering from its ravages.

DEFINITION OF TRACHOMA.

Trachoma, or granular lids, is a disease of the conjunctiva or lining membrane of the eyelids, chronic in character and prone to remissions and exacerbations. The disease is characterized by an inflammatory onset, which is followed by an inflammatory deposit or thickening of the structures of the eyelid. The inflammation cause of extruction more or less complete of the conjunctival tissues, so that scar tissue is formed, which has a marked tendency to contraction.

HISTORICAL NOTE REGARDING TRACHOMA.

which has a marked tendency to contraction.

HISTORICAL NOTE REGARDING TRACHOMA.

Trachoma is regarded as a disease of oriental origin. Our knowledge of its existence extends far into the past, references to it having been found in the writings of the ancient Greeks and Egyptians. Originally endemic in the Far East, the disease extended to the Mediterranean littoral and later spread over Europe. It is particularly prevalent in Russia, parts of Austro-Hungary, eastern Germany, and along the shores of the Baltic and North Seas, especially in Finland and Holland. In southern Europe, Italy, Greece, and Spain are most affected in the order named.

It has been observed that, generally speaking, trachoma is most prevalent in those countries having an extensive seaboard, and it spreads usually from the littoral to the interior along travel routes. It has been regarded in the United States as an exotic disease, and, alithough cases were undoubtedly imported from time to time prior to its rigid exclusion under the immigration laws, the disease has not as yet become general in its distribution. While it has been known to exist in some of the large urban centers in the Eastern States, there is evidence that here a decrease has followed local preventive measures, and the systematic exclusion of arriving allens so afflicted.

Trachoma has been endemic for years in certain restricted areas of southern Illinois and in the mountainous regions of West Virginia and Kentucky. In the latter State an investigation recently conducted by Surg. John McMullen of the United States Public-Health Service showed a prevalence of the disease of 121 per cent among 3,974 people examined in seven counties. Since these mountain people are among the purest types of Anglo-Saxons in the United States and little associated in recent years with arriving immigrants, and since evidences were found of many long-standing cases, it would appear that the period of endemicity of the disease in the section referred to extends over generations.

over generations.

As will be shown later, the Indians are severely afflicted with the disorder, and among them also it has long prevailed, but the time and manner of its introduction is problematical.

AGE INCIDENCE OF TRACHOMA.

Trachoma is a disease which may be contracted at any age, with the exception that infants are less prone to contract the infection. It has previously been supposed that very young children escape owing to the lack of certain tissue elements in the eyelids which subsequently develop. During the investigations here reported upon, however, a few cases were observed among infants under 1 year of age, which indicates that the infection can occur very early in life, and it is known that it can persist in an active form among the very aged.

THE CAUSE OF TRACHOMA.

The discharges from the trachomatous eye have long been the object of patient bacteriological research, as well as the trachomatous tissue itself. As a result, claims have frequently been made of the finding of a specific organism of infection, but one after another of these claims

of patient bacteriological research, as well as the trachomatous tissue itself. As a result, claims have frequently been made of the finding of a specific organism of infection, but one after another of these claims were refuted.

In 1907, however, Greef and Von Prowachek independently discovered certain small bodies in tissue cells from trachomatous eyes which they supposed bore a casual relation to the disease, and lately Dr. Anna Williams, of the research laboratories of the city of New York, has exhaustively studied an extremely small, hemoglobinophilic

bacillus which she isolated from cases of papillary trachoma in which these trachoma bodies or inclusions were present. She concludes that bacillus and inclusion are probably identical in papillary trachoma, and hence that the bacillus is probably the cause of the disease. This announcement, if confirmed, will be of the greatest value in subsequent studies of trachoma and in devising measures for its prevention.

FACTORS CONTRIBUTING TO THE DISSEMINATION OF TRACHOMA.

FACTORS CONTRIBUTING TO THE DISSEMINATION OF TRACHOMA.

The medium of contagion is the secretion of the trachomatous eye. The transmission of the contagion may be by direct contact or the infection may adhere to articles of common use, such as clothing, bed clothing, handkerchiefs, towels, etc. The walls and floors of dwellings occupied by trachomatous patients and the furniture used by them may presumably become contaminated, assuming such places to be in filthy condition and the persons themselves uncleanly in their habits. The factors which facilitate the dissemination of trachoma are, therefore, the conditions which prevail wherever human beings are closely crowded together, as in tenement houses, hovels, schools, and insanitary institutions. The careless personal habits and unhygienic conditions characteristic of ignorance and poverty, the use of the common towel and washbasin, and the agency of the fly create conditions which could obviously favor the spread of trachoma as they would that of any infectious disease.

SYMPTOMS AND COURSE OF TRACHOMA.

SYMPTOMS AND COURSE OF TRACHOMA.

The changes in the tissues of the eyelids and eyeball, which take place as the result of trachoma, give rise to many and long-continued symptoms. It is not pertinent here to describe them in detail, but it is necessary to state that they are oftentimes painful, interfere with the patient's bodily comfort, and reduce his working efficiency.

The amount of discomfort depends on the stage of the disease, During the acute onset and at times of exacerbations, there is the usual sensation of a foreign body in the eye. When the cornea becomes involved, and especially when corneal ulcers develop, the pain is intense, the eyes are extremely sensitive to light, and there is spasm of the muscles of the eyelids (photophobia), with profuse discharge of water and, oftentimes, pus.

The disease may continue for years, the membrane of the cyclid gradually becoming destroyed and its place taken by scar tissue. As previously stated, also, the cornea of the cycleid eventually becomes involved. Its normal transparent appearance is lost, and a cloudy condition develops which seriously interferes with vision.

THE DANGERS OF TRACHOMA.

THE DANGERS OF TRACHOMA.

Trachoma may be so severe from the outset as to destroy the vision in a few months, or even weeks. As a result of such acute infection, early and deep ulceration of the cornea may ensue, followed by perforation, infection of the interior of the eyeball, and evacuation of its

foration, infection of the interior of the eyebail, and evacuation of its contents.

In untreated trachoma, damage to the cornea at some stage of the disease is the rule. This corneal involvement takes the form of ulceration, keratitis (inflammation of the cornea), and the formation of a condition known as pannus. Pannus consists in the clouding or fogging of the transparent corneal surface, so that it presents a ground-glass appearance. In one form of pannus there is an overgrowth of thick salmon-colored tissue so dense as often completely to obstruct vision. vision.

thick salmon-colored tissue so dense as often completely to obstruct vision.

As scar tissue formation advances in the lids, it contracts, thus destroying the lids and causing them to curve in (entropion), with the result that the eyelashes are constantly in contact with the eyeball. The irritation caused thereby brings about inflammation of the cornea, which may be followed by ulceration or thickening so that the cornea may become opaque or may perforate and the eye be lost.

Without dwelling upon the truly desperate conditions that may result from trachoma, it is remarkable to what degree even apparently insignificant alteration in the transparency of the cornea may affect vision. Even sight haziness of the cornea, hardly apparent to the naked eye, often sadly obscures the sight.

It is safe to say that 75 per cent of untreated trachoma cases suffer some visual damage, including errors of refraction, by reason of changes caused during some stage of the disease. These ill results may be greatly lessened by treatment, especially in mild cases, but the results are frequently disappointing when the disease is severe. A fundamental fact to bear in mind is that trachom is more easily preventable than curable, and that the best results are obtained when preventive and curative measures are instituted early.

The effects of trachoma are felt not only by the individual but also by the community in which he lives. The invalidism caused by the disease is liable to impose financial burdens on that community, and the resulting bilindness may render its victims public charges.

Finally, school children affected by the disease have their studies interfered with, their education will be more expensive, their power to theirs they may become permanent charges on the State.

THE PREVALENCE OF TRACHOMA AMONG THE INDIANS,

The Prevalence of Trachoma Among the Indians.

The occurrence of trachoma among western Indians has occasionally been noted in the medical literature for many years. It seems doubtful whether it has been generally recognized as such, however, by physicians on reservations until recently. In most of the older reservation records examined during this investigation, many eases of eye affections were recorded as "sore eyes," "conjunctivitis," "keratitis," "bad eyes," "scrofulous eyes," or "granulated eyes."

In the records of very recent years increasingly frequent note is made of cases of trachoma as such, and the medical supervisor of the Office of Indian Affairs states that within the past three years concerted action has been taken to provide special curative measures, and their necessity has been emphasized to combat the disease.

All of the officers engaged in these investigations endeavored by examination of records and consultations to secure evidence of the past prevalence of trachoma among the tribes visited, but the results were for the most part unsatisfactory, and reliance was placed on examinations of as large a number of Indians as possible to determine the present prevalence of the disease.

Number of Indians inspected.

NUMBER OF INDIANS INSPECTED.

seen that approximately one-eighth of this number were examined. If this rate of infection prevails among the Indians generally, it may be conservatively estimated that there are at the present time a total of 71,907 cases of trachoma among this class of the population.

The persons examined represented both sexes and all ages. Some of them were students in boarding schools, others in day schools and mission schools, and the remainder were reservation Indians. All taken together are considered as representative of the general Indian population on the reservations and in the localities mentioned, with the exception of Oklahoma, to which explanatory reference is made on page 27.

TRACHOMA AMONG ALL INDIANS EXAMINED.

This table, it will be remembered, contains records of all Indians inspected.

[The table above referred to appears as Exhibit A on page 1277 of to-day's RECORD.]

[The table above referred to appears as Exhibit A on page 1277 of to-day's Record.]

From an examination of the foregoing table it is evident that the incidence of trachoma varies much among indians in different sections of the country, and even in different parts of the same reservation. For instance, in Oklahoma, among 3,252 Indians examined, 2,237, or 68.7 per cent, had trachoma. In New York, on the other land, out of 943 Indians examined, only 2, or 0.2 per cent, had the disease, and these two probably contracted the infection at a nonreservation boarding school. On the Navajo Reservation likewise, Fricks reported the finding of trachoma in 30 per cent of those examined around Fort Defiance and along the Santa Fe Raliroad, while 150 miles in the interior of the reservation it ran below 10 per cent.

The accompanying Chart I shows in graphic form the percentages of trachoma found among those examined in the several States and the comparative incidence of infection. Broadly speaking, it would be possible to place these States in groups representing geographic areas, as the Atlantic slope, the Missouri River watershed, the Southwestern Plateau, the Pacific slope, etc. It must be remembered, however, that the habits of the Indians, their degree of sanitation, their exposure to poverty, and not climate, soil, or attitude, are the important factors in determining the prevalence of trachoma.

Arlzona: Fricks reports that of 5,873 Indians examined 24.9 per cent were found to have trachoma. The more isolated tribes, however, like the While River Apaches, two days travel from the outside world, and the Havasupais, at the bottom of the Cataract Canyon, showed very slight infection—2 and 2.5 per cent, respectively. Eight cases of trachoma were seen by him among the white employees and their children at different schools, presumably contracted from Indians.

During the past year the public schools of white children. In one school of 30 puplis no trachoma wish found, in one of 27 puplis no trachoma, and in one of 30 thre

no cases were tound, but this may be due to the small number examined, the habits of the Seminoles in that State rendering them very inaccessible, since they spend practically all of their time deep in the Everglades.

Idaho: In Idaho the percentage of prevalence among those Indians examined was 15.96 per cent, which is about that for California. In fact, the Pacific Coast States might be placed in one group from the standpoint of trachoma prevalence, but this must be considered high when it is remembered that Boldt, an authority on the disease, regards 16 cases per 1,000 population as a heavy infection in a community.

In Iowa, Kansas, and Nebraska the Indian population is small, and while the percentages of trachoma among those examined are high, being 32.04, 21.1, and 41 per cent, respectively, these percentages in the last two States are increased because they are based largely upon examinations of nonreservation schools, the students of which come from a number of other States, and because in such schools the chances of transmission of infection are greater than in isolated families.

While engaged in examining Indian children in Kansas it was found by Hierring that a number were in attendance at public schools attended by white children. He inspected two such schools near the Sac and Fox Reservation. In one where 17 white children were examined 3 cases of very active trachoma were found, and in another where 4 children were examined 2 active cases were found.

In Michigan also the Indian population is small and the largest amount of trachoma seen by Clark was in the Mount Pleasant non-reservation boarding school.

Minnesota: Among the 3,542 Indians examined in Minnesota 533 cases of trachoma were found—a percentage of 15.05. The percentage of trachoma is represented by Dr. Clark to be higher in some sections of the State than in others, and to vary in different parts of the same reservation. In respect to this varying distribution he states as follows:

"The whole of the northeastern section of Minnesota,

reservation. In respect to this varying distribution he states as follows:

"The whole of the northeastern section of Minnesota, embracing the Lake Superior watershed, is free from trachoma. This area includes Grand Portage, Grand Marais, Vermilion Lake, and Nett Lake. One case of trachoma was found in the Vermilion Lake Boarding School, a recent recruit from Lake Winnibigoshish region. These Indians have but little communication with the Indians of other parts of the State, and their freedom from trachoma can only be explained on the ground of lack of exposure.

"The highest percentage of trachoma was found on the White Earth Reservation. In the examination of 1,323 Indians on this reservation 272 cases of trachoma were found, a percentage of 20.56.

"A peculiarly heavy trachomatous infection exists at Pine Point, White Earth Reservation. In a house-to-house canvass 147 people were examined, finding 53 cases of trachoma, 36.05 per cent.

"Only 2 cases of trachoma were found among the Indians of Fond du Lac Reservation, a percentage of 1.24 examined. These Indians are in close contact with civilization. They are better housed than are the Indians of other sections of Minnesota and with whom they have little

in close contact with civilization. They are better housed than are the Indians of other sections of Minnesota and with whom they have little association.

"A striking parallel can therefore be drawn from these figures regarding the influences favoring the spread of trachoma among the Indians of Minnesota. Wherever the primitive Indian is found in contact with civilization, childlike in his conception of responsibility, accepting the vices of the white man but eschewing the good things, there the heaviest trachoma infection has been found. On the other hand, the more nearly he approaches the surrounding white population in manner of living, as in the case of the Indians of the Fond du Lac Reservation, there little trachoma is found."

In a previous investigation of the prevalence of trachoma among Indians at the White Earth and Leech Lake Reservations made in May, 1912. Clark found that out of a total of 545 Indians examined, 253, or 46.1 per cent, had the disease. This large percentage, however, was due to the fact that 115 Indians who were assembled from the surrounding country for treatment were included in the enumeration with children of boarding schools at which the examinations were made. Montana: Out of a total of 2,042 Indians examined in Montana, White found 537 cases, or 26.3 per cent, of trachoma. He concludes that the disease is astonishingly prevalent; that it affects the young, the middle aged, and the old, and that its worst effects are seen among the latter.

Nevada: Notwithstanding the Indian reservations visited in Nevada are remote and the Indians brought in little contact with white men, they showed a high degree of prevalence. This may be due, however, to their association with highly infected tribes farther south in the recent or remote past and to their primitive habits and insanitary surroundings once the infection was introduced among them.

New Mexico: Out of 2,207 Indians examined in New Mexico, 494,

insanitary surroundings once the infection was introduced among them.

New Mexico: Out of 2,207 Indians examined in New Mexico, 494, or 22.38 per cent, were found to be suffering with trachoma. At the Jicarilla Agency the percentage of those examined (201) having trachoma was 8.45; but Dr. Smith expresses the belief that the disease is more prevalent than this figure would indicate, since here the incidence among the school children examined is considered more nearly representative of the population as a whole.

Among 462 Indians examined on the Navajo Reservation in New Mexico, 130, or 30 per cent, were found to have trachoma. This is the same per cent of trachoma found among the Navajos examined by Fricks in Arizona. In reporting on this condition Dr. Smith states as follows:

Fricks in Arizona. In reporting on this condition Dr. Smith states as follows:

"The most remarkable thing in this investigation was the high percentage of trachoma found. It would appear from this that the agency physician's estimate of 2,000 cases among his 8,000 Indians is not too high. The rate was high in all school children examined, but was also high among those of the same age not in school. The tendency of trachoma to run in families seemed more marked here (than elsewhere), but this could not be determined accurately, because not many children of the same family were present in school."

Among the Zuni Indians only 5.88 per cent of 170 examined had trachoma. Dr. Smith expresses the belief, therefore, that trachoma is comparatively rare among these Indians. On the other hand, he states that the disease is very frequent among the Puchlo Indians and that the results are unusually serious.

North Carolina: At the Cherokee Reservation Fricks found 7 per cent

that the results are unusually serious.

North Carolina: At the Cherokee Reservation Fricks found 7 per cent of the 317 Indians examined to be infected with trachoma. They are citizens of North Carolina, and he states that they live just as do the poorer white mountaineers of that section, but attend Indian schools.

North and South Dakota: Trachoma was found to be very prevalent among the Indians of North and South Dakota. The most heavily infected area was found in the north and northwestern part of North Dakota. Dr. Schereschewsky reported the highest percentage of the disease in these States at the Fort Berthold Reservation, N. Dak., where 30.1 per cent of the Indians examined were found infected. The lowest percentage in these States was found by him on the Rosebud Reservation, where 10 per cent of those examined were afflicted with the disorder.

the disorder.

In South Dakota, out of 6,121 Indians examined, 1,059, or 17.24 per cent, were found afflicted with trachoma. These cases ranged from mild involvement to the severest possible types of the disease and total

mild involvement to the severest possible types of the disease and total blindness.

Oklahoma: In Oklahoma Dr. Guthrie examined 3,252 Indians and found 2,235, or 68.72 per cent, suffering from trachoma. It is needless to state, however, that practically all of these were students at schools. On account of their being widely scattered on land allotments and because of opposition on the part of many, he found it impracticable to examine as relatively a large number of adults as children.

In other States the prevalence of trachoma in schools has been found generally to be somewhat greater than among reservation Indians not in schools. It is believed, therefore, that the percentage of the disease among the Indian population of Oklahoma as a whole is not as high as the figures presented would indicate.

Guthrie collected data regarding the degree of blood in 2,857 of the Indians examined by him and compiled the following table:

Table II.—Percentage of trachoma, according to degree of Indian blood, among 2,857 Indians examined in Oklahoma.

Degree of blood.	Number examined.	With trachoms.	Percentage of tra- choma.
Full blood. Between half and full. Less than half.	1,834	1, 460	79. 60
	630	389	61. 74
	393	203	52. 41

From these results Guthrie concludes that Indians of full blood in Oklahoma sustain a much heavier infection than do mixed bloods, and, since much the larger proportion of school children examined by him were full bloods, he considers this also an important factor in explaining the high percentage of trachoma found by him.

During his investigations Dr. Guthrie reported the finding of trachoma among negro school children as follows:

"An examination was made of 79 negro pupils at the Tullahassee Boarding School. These children are the descendants of the Creek freedmen. I was informed that very few of them are of Indian blood and I gained the impression that their association with the Indian population

was not more intimate than that among the whites and Indians. It is interesting to know that over 60 per cent of these negro pupils were suffering from trachoma."

This observation is of importance on account of the mixed population in Oklahoma and because of the current belief that the negro is immune to trachoma.

Oregon: In Oregon, out of 904 Indians examined, 94, or 10.4 per cent, had trachoma. This State thus had the smallest percentage of trachoma cases of any of the Pacific Coast States.

Pennsylvania: All of the Indians examined in Pennsylvania were students of the Carlisle School. They numbered 552, and there was found among them 76 cases of trachoma, or 13.76 per cent. Many cence in the traching among the students of this institution. Its influence in the traching of the students of this institution. Its influences in the traching of the students of this institution. Its influences in the trachoma cases are in Virginia were inmates of the Hampton Normal School. There were 43 in all, 13 of whom had trachoma. This institution, like the Carlisle School, has representation from a large number of tribes and localities. Cumming states that all of the trachoma had been treated, surgically or otherwise, none was in an acute active stage, and 2 cases were, after the examination, sent to an ophthalmologist and operated upon.

Wisconsin: Out of a total of 2,999 Indians examined in Wisconsin, 207, or 6.80 per cent, were found to have trachoma. Clark refers to prevalence in the State as follows:

"The Indians of Wisconsin have long been in contact with civilization and are increasingly inclined to partake of its benefits. The houses of the Indians in Wisconsin are well built for the most part and furnished, comparing favorably with the houses of white people in like circumstances.

An excepton to the rule is the Lac du Flambeau, with a trachoma per the most primitie and provential provential provential provential provential provential provential provention live parts of two different tribes, the Shoshones and the

PREVALENCE OF TRACHOMA IN INDIAN BOARDING SCHOOLS.

PREVALENCE OF TRACHOMA IN INDIAN BOARDING SCHOOLS.

The general prevalence of trachoma among all Indians examined having been dealt with, it becomes necessary to consider its prevalence in boarding schools, since these are very generally regarded as one of the most important factors for the advancement of the Indian in the general scheme of supervision devised for his benefit by the Federal Government.

There is well-grounded basis for this belief, for, at no time in his life is the Indian more amenable to civilizing influences than during his stay at a boarding school, nor, by reason of the very complete control which may be exercised in such institutions over his habits, environment, and daily life, is any better opportunity afforded for educating him in the principles of hygiene and home sanitation, and in ingraining these principles into his character so as to insure their practical application upon his return to his reservation and tribe.

The impairment of vision frequently resulting from trachoma constitutes such a menace to his physical and mental efficiency, and the opportunities for its propagation in schools are so numerous and favorable, that it became necessary to examine very carefully into the incidence of this disease in Indian boarding schools.

During the investigations 133 boarding schools were visited by the several officers engaged in the work and 16,470 pupils examined. Although this number has been included in the total number contained in Table I.I it is pertinent to consider them separately, and the following Table III shows by States the names of schools visited, the number inspected, the number of cases of trachoma, and the percentage of the disease in each.

[The table above referred to appears as Exhibit B on page

[The table above referred to appears as Exhibit B on page 1279 of to-day's RECORD.]

On inspection of the above table it will be seen that 16,470 pupils in Indian boarding schools were examined for trachoma and 4,916 cases of this disease found, or a general percentage of 29.86. The highest percentage found was reported by Guthrie at the Rainey Mountain School in Oklahoma, where out of 114 pupils examined no less than 105, or 92.10 per cent, were found to be suffering from this affection. Only 3 schools contained in the list were found free from trachoma—the Holy Family Mission School, in Wisconsin, and the Friend's Indian and the Thomas Indian schools, in New York. The absence of trachoma infection in these schools is accounted for by the fact that no trachoma was found in the Indian population from which the inmates of these schools are drawn.

Classifying these schools according to the percentages of trachoma found among the pupils, it will be seen, in the case of the 133 schools abulated, that in 2 schools over 90 per cent of the pupils were found to be trachomatous, in 8 from 80 to 90 per cent. in 10 from 70 to 80 per cent, in 9 from 60 to 70 per cent, in 8 from 50 to 60 per cent, in 8 from 40 to 50 per cent, in 7 from 35 to 40 per cent, in 12 from 20 to 35 per cent, in 14 from 25 to 30 per cent, in 10 from 20 to 25 per cent, in 17 from 15 to 20 per cent, in 11 from 10 to 15 per cent, in 10 from 5 to 10 per cent, in 4 from 0.5 to 5 per cent, and in 3 schools only was not trachoma found. In 88 schools, or approximately 66 per cent

of the total number examined, 20 per cent or more of the pupils examined were found to be suffering from trachoma:

Arlzona: Fricks reports the examination of 15 Indian boarding schools in this State, with a total of 2.224 pupils. He found 515 cases of trachoma, or a percentage of 25.55. The greatest amount of infection found was at the Chinn Lee Boarding School, where 50 per cent of the pupils were stated to be trachomatous, as contrasting with the rate of 30 per cent found to prevail for the surrounding reservation Indians. He reports that the pupils at this school have had no medical supervision for the past year. The next highest rate was found at the St. Johns Mission School, which he states to be poorly lighted, without medical attention, and the common towel in use in the wash rooms. While the general trachoma rate in the Arizona boarding schools was found to be 28.85 per cent, Fricks found a rate of only 19 per cent in the reservation Indians examined, exclusive of school children.

California: Three boarding schools, with a total of 729 pupils, were camined therring in this State. One hundred and seventy-eight cases of trachoma were found, a percentage of 24.41. This is considerably in excess may were found, a percentage of 24.41. This is considerably in excess may be supplied to the fact that in the large Sherman Institute 133 pupils were ment of the mission tribes in southern California, where trachoma is infrequently met with.

Nevertheless, 25 cases of trachoma were found in this group of pupils. Herring believes this to be a connent provided the agency of schools, as it was evident that many of these children dile agency of schools, as it was evident that many of these children dile agency of schools, as it was evident that many of these children dile agency of schools, as it was evident that many of these children dile agency of schools, as it was evident that many of these children dile agency of schools, as it was evident that many of these children dile agency of schools, as it was evident tha

Minnesota: Ten boarding schools were inspected in this State, 9 by Clark and 1 by Preble. Eight hundred and thirty-three pupils were examined and 193 cases of trachoma found, or a percentage of 23.16. This is again far in excess of the general percentage of 15.05 found for the State. The percentages ran from 42 per cent at the White Earth School down to 1.2 per cent at the Vermilion Lake School. The low percentage prevalent at this school is explained by Clark as due to the very low percentage found among the Indians from which this school is recruited.

to the very low percentage found among the Indians from which this school is recruited.

Wisconsin: Ten schools were examined by Clark in this State with 1.296 pupils and 137 cases of trachoma, or a percentage of 10.57. This is again nearly double the general trachoma percentage found prevalent in the State. In one school (Holy Family Mission) rocase of trachoma was found, while in the St. Mary's Mission School but 1 case out of 194 pupils was detected. These low percentages are again due to the absence of trachoma among the Indians in those parts of the State from which the pupils at these schools are recruited. Discussing the prevalence of trachoma in the schools of these three States, Clark writes as follows:

"The highest percentage of trachoma among school children is found in the boarding schools of heavily infected reservations. It is found that the percentage of trachoma in boarding schools is invariably in excess of that in the reservations in which they are situated.

"A still more significant fact, from an epidemological standpoint, is the higher percentage of trachoma in the nonreservation boarding schools than the percentage of trachoma in the nonreservation boarding schools than the percentage of trachoma in the nonreservation boarding schools than the percentage of trachoma in the nonreservation boarding schools than the percentage for the State in which they are situated. Only one explanation is possible for this condition, the intimate personal contact and daily association of the healthy with the diseased in schools must, of necessity, result in an increased number of cases of trachoma in such schools. The ominous portent of such a condition is the possible spread, through children thus infected, of trachoma in Indian populations not infected or only slightly so."

Montana: Eleven Indian boarding schools in this State were examined by White. One hundred and elghty-elght cases of trachoma were found infected, while at the St. Ignatius Mission School on the Flathead Reservation only 17, or 9.88

infected.

Infected.

Nevada: At the Carson School, Billings found a trachoma infection of 12 per cent. This is considerably below the percentage of trachoma found on the reservations of the State, which ranged between 21 and 47 per cent, and forms an exception to the generally greater prevalence of trachoma in boarding schools than on reservations.

New Mexico: Four boarding schools in this State, with a total of 728 pupils and 177 cases of trachoma, were inspected by Smith. The extraordinarily high percentage of 83.87 was encountered in one school, the Presbyterian Mission School. The general prevalence of trachoma for all the boarding schools is 24.31 per cent, slightly in excess of the percentage of 22.38 per cent computed for the State.

New York: Two boarding schools, with a total of 126 pupils, were examined within this State by Leake. No case of trachoma was found, a circumstance well explained by the fact that only in two instances was trachoma present in 943 New York Indians examined. As has already been pointed out, these Indians contracted the infection at a nonreservation boarding school in another State.

North Carolina: At the Cherokee Boarding School examined by Fricks, 11 cases of trachoma, or 8 per cent, were found among the 141 pupils examined.

North and South Dakota: These States are considered deather out.

North Carolina: At the Cherokee Boarding School examined by Fricks, 11 cases of trachoma, or 8 per cent, were found among the 141 pupils examined.

North and South Dakota: These States are considered together owing to contiguity and general similarity in climate and character of Indian population. Twenty-three boarding schools in the two States were visited by Schereschewsky, Herring, and Preble. A total of 800 and 2.240 pupils were examined in North and South Dakota, respectively, with the result of finding 207 cases of trachoma in the former State and 466 cases in the latter, giving percentages of 25.87 and 20.8 per cent. These percentages, as usual, are in excess of the general percentages computed for these States as a whole, the latter being 22.94 and 17.24 per cent, respectively. The highest percentage found was by Freble at the St. Elizabeth's Mission School at Wakpala, S. Dak., while the lowest was reported by Schereschewsky at the St. Francis Mission School on the Rosebud Reservation, where only 21 pupils out of 270, or 7.9 per cent, were found suffering from this disorder. Schereschewsky points out that trachoma had been vigorously treated at this institution the previous year, which accounts, in part at least, for the low incidence of the disease at this school.

Oklahoma: The prevalence of trachoma in the boarding schools of Oklahoma is so great that it merits special attention. Guthrie reports that he visited 30 schools, inspected 3,069 pupils and found 2,122 cases of trachoma, or 69.14 per cent. In some schools nearly all the pupils were infected with the disease. As the Oklahoma Indians are in rapid process of assimilation with the general population, the prevalence of trachoma among them to such considerable extent constitutes a serious menace to the future general population of that State.

Pennsylvania: Five hundred and fifty-two pupils at the well-known Indian school at Carlisle were examined by Clark and 76 cases of trachoma found, a percentage of 13.76. As has already been pointed out, the

PREVALENCE OF TRACHOMA IN INDIAN DAY SCHOOLS

The data collected as to the prevalence of trachoma in Indian day schools were not so complete as those for the boarding schools for the following reasons: Many of the camps were visited on days when the day schools were not in session and the pupils were seen in their homes, or some day schools were located at such distances from agencies (90 to 100 miles) that it would obviously have been wasteful of valuable time to spend several days in travel to see 10 or 20 children when much larger numbers of Indians were at hand for examination. Nevertheless, from the observations made, it would seem that trachoma is, in many instances, as common in the day schools as in the boarding schools.

many instances, as common in the day schools as in the bounds schools.

Thus Fricks in Arizona, as the result of the examination of 990 children in the day schools, found 409 cases of trachoma, a percentage of 41.31. This is greatly in excess of the general rate (24.9) found for the State. In California 11 day schools were examined, with 131 scholars, and a trachoma percentage of 14, in Colorado 1 with a percentage of 25.6, in lowa 1 with a percentage of 36.66, and in Kansas 2 with a percentage of 41.93.

On the other hand, in Montana the result of the examination, by White, of 473 day-school scholars showed 94, or 19.87 per cent, to be trachomatous, a rate distinctly lower than that found in the boarding schools of the State, and lower than the general rate computed for Montana.

Montana.

In Michigan, Minnesota, and Wisconsin, Clark examined 334 day scholars, with the result of finding 13 cases of trachoma, a percentage of 3.98. This percentage is relatively low, and corresponds to the low general trachoma rate in the sections where these day schools were

of 3.98. This percentage is relatively low, and corresponds to the low general trachoma rate in the sections where these day schools were situated.

In New York State 335 day-school scholars were examined by Leake, but, as previously stated, no cases of trachoma were found.

In North Carolina 66 day pupils were examined and 6 cases of trachoma found, or 9 per cent. This is 2 per cent in excess of the general rate determined for the Cherokee Indians.

In North Dakota 179 day pupils were inspected by Schereschewsky and 20 cases of trachoma found, or a percentage of 11.8, which is far below the average found either for the boarding schools or the whole number of Indians examined in the State. In South Dakota a similar condition is manifest. Out of 473 day scholars examined by the same investigator in this State, but 23 cases of trachoma were found, or 4.9 per cent. This percentage is seen to be relatively very low when compared to the percentages found in the boarding schools of the State. Schereschewsky states that it can partly be accounted for by the disinclination manifested by the Indians of North and South Dakota to send their children to school when they are suffering from "sore eyes," and partly to curative measures which have been instituted by the Indian Office, particularly at Rosebud, among the Indian day scholars of these States.

In Oklahoma, among 34 scholars in 2 day schools, 23 cases of trachome were found or a percentage of 67.2

or these States.

In Oklahoma, among 34 scholars in 2 day schools, 23 cases of trachoma were found, or a percentage of 67.2.

In Utah 1 day school was examined, and 7 out of 10 pupils were found to be trachomatous. In Wyoming 8 out of 14 day pupils were found infected with the disease.

The result of the examination of 274 day scholars in Washington by Lloyd gave 66 cases of trachoma present, or 24.48 per cent, a rate in excess of that prevalent in the Indian boarding schools and among the total Indian population examined in that State.

To summarize, out of 3,488 day scholars inspected and considered here, 752 cases of trachoma were found, or 21.55 per cent. If we exclude from the above figures the relatively large proportion of New York day-school scholars, in which no trachoma was found, we find a prevalence, exclusive of the day pupils of this State, of 24 per cent. This is in excess of the general average found for the total examinations, but it is considerably below the percentage found for the boarding schools.

schools.

It seems likely that the prevalence of trachoma in the day schools corresponds, in most instances, with the prevalence of the disease on reservations in general, and further strengthens the inference that the higher trachoma rate prevailing in boarding schools is due to the fact that the disease is being spread among the immates of these latter institutions. Here it is necessary to state, however, that in certain of these institutions little trachoma was found, and the several officers reported in some of them excellent sanitary conditions.

THE PREVALENCE OF TRACHOMA AMONG RESERVATION INDIANS.

On examination of the reports of the several officers engaged in this investigation it appears that 17,822 reservation Indians were examined. This number consists of individuals above and below the school age and does not include the inmates of several boarding schools which were not listed in Table III, because of some defect in the data, nor day-school pupils who were visited in their homes.

Of this number 3,064, or 17.2 per cent, were found to be afflicted with trachoma. The prevalence among this group is seen to be distinctly below the rate found for the total number examined, the boarding-school rate, and the day-school rate. On the other hand, owing to the greater average age of the individuals and the consequent longer duration of the disease, the majority of the instances of visual damage was found among their number. The percentage noted for the several States varied from 60.4 per cent in Oklahoma to 0 per cent in New York and Florida. Other States showing a high rate of prevalence were Utah, with 39.2 per cent; Wyoming, with 37.26 per cent; Nevada, with 36.5 per cent; and Montana, with 30.76 per cent. It is worthy of note in this State that the rate of prevalence among reservation Indians was found to exceed that among the boarding schools and day schools. States with a low rate of prevalence were Michigan, with 1.21 per cent; Wisconsin, with 4.39 per cent; and North Carolina, with 5.45 per cent.

The following table gives the number of Indians examined in each State, the number of cases of trachoma found, and the percentage:

Table IV .- Prevalence of trachoma among reservation Indians.

[Exclusive of school children.]

State.	Number of Indians examined.	Number of cases of tra- choma.	Per cent of tra- choma.
Arizona	2,759	531	19
California Colorado Florida	528 191 22	45 17	8, 52 8, 81
Idaho	307	46	15
Iowa	23		26
Michigan	246	3 327	1. 21 12. 64
Montana	829	255	30. 76
Nevada	348	127	36. 5
New Mexico. New York. North Carolina.	962 482 110	214	22. 24
North Dakota.	2,478	565	22, 8
Oklahoma	149		60, 40
OregonSouth Dakota	266	31	11.65
	3,289	544	16.54
Utah.	125	49	39. 2
Washington.	359	78	21. 7
Wisconsin	1,592	70	4, 39
	161	60	37, 26
Total	17,811	3,064	17. 2

The almost uniformly lower rate observed than in the schools and boarding schools is striking, and serves further to strengthen the evidence already adduced as to the part played by the schools in the disseminating of the disease.

On the whole, it is evident, as the result of these examinations, that there is an exceedingly high prevalence of trachoma among the Indians in nearly all sections of the country.

INCIDENCE OF TRACHOMA ACCORDING TO AGE, SEX, AND DEGREE OF INDIAN BLOOD,

As a result of data compiled from the reports of inspections of the several officers and expressed opinions by them, some reference may be made regarding the incidence of trachoma according to age, sex, and degree of Indian blood among those affected.

Age: Of over 2,000 cases of trachoma among 10,425 Indians examined, in which records were kept and compiled regarding age, it was found that approximately 4.5 per cent were under 6 years of age, over 50 per cent were between 6 and 20 years of age, and the remainder above 20 years. It is thus evident that the disease falls heaviest on those of school age. The disease is rare among infants under 1 year of age, but a very few cases were found. The complications of the disease, when permanent, exert their ill effects in after life, frequently affecting ability to engage in useful occupation.

Sex: Out of a group of 10,425 Indians examined in all sections, with 2,061 cases of trachoma among them, it was found that the incidence of the disease was slightly higher among females than among males. Of this total number examined. 5,303 were males with 984 cases of trachoma and 5,122 females with 1,983 cases.

Degree of Indian blood: From the observations made it was evident that the incidence of trachoma was greater among the full bloods than

among the mixed bloods examined. This appeared to be attributable, however, to the more prosperous circumstances and better living conditions among the latter.

DAMAGE TO VISION DUE TO TRACHOMA

A complete census would have been necessary to determine the total percentage of blindness due to trachoma on the several reservations visited. This was obviously impracticable within the time allotted for the inspection, but observations on this point were made among those

risited. This was obviously impracticable within the time allotted for the inspection, but observations on this point were made among those examined.

These data have been compiled in the case of 23,560 Indians examined. Of this total number 5,505 had trachoma, of which 527 showed marked damage to vision. These injuries were of the usual type and consisted variously of corneal uleers, corneal opacites, pannus, entropion with keratitis, perforation of the cornea and resulting evacuation of the contents of the eye, etc. In 141 individuals the damage consisted in bilindness of one or both eyes.

This by no means represents the extent of visual damage among Indians due to trachoma. It should be borne in mind that in but relatively few cases among the school children had the disease progressed sufficiently far to produce corneal complications, and it was this class of persons that constituted the largest number examined. Moreover, Indians suffering from marked visual disturbance and blindness were least accessible for examination, and some of these unifortunates evaded the examiners because of their sensitiveness in regard to deformities, particularly blindness.

At the San Carlos Reservation, Ariz., out of 2,000 Indians with 11 per cent trachoma, 148 were examined when they came in to draw rations. Fricks states that these latter were the lame, the halt, and the blind of the reservation, and among them were found 15 blind from trachoma. Figured on this basis, a conservative estimate would give between 300 and 400 blind Indians in New Mexico Smith found trachoma not only very frequent, but the results unusually serious, 10 totally blind and 19 with vision seriously impaired as a result of trachoma. Clark states that the greatest number of cases of trachoms with serious damage to vision in his territory was found on reservations most heavily infected and on which the infection had long existed.

The greater percentage of visual disturbance reported upon and due to trachoma appeared among the older Indians, since the

SOURCE AND DURATION OF TRACHOMA INFECTION AMONG THE INDIANS.

According to Fricks, there is some basis for the belief that the infection of trachoma has been recently acquired by the Havasupals outside their reservation, and this is believed to be the case with the Navajos and their first cousins, the Apaches. How long the disease has existed among the purely desert Indians who are in no wise related is mere speculation, but that it is rapidly increasing is the opinion of those who have long known the Indians.

In referring to the possible original source of the infection of trachoma among the Indians of Kansas, Nebraska, Utah, Wyoming, and California. Dr. Herring states that it can not even be guessed at. In conversation with long-time white residents on and near badly infected reservations he was told that there appeared to have been as much blindness and defects of vision and "sore eyes" among the Indians 20 or 30 years ago as to-day. The question arises whether trachoma was really introduced among the Indians in recent times by the whites. Regarding this, Herring observes that the present extent of prevalence among Indians in the States mentioned does not depend on the amount of their contact with the white population; and in Kansas and Nebraska, where the prevalence was not so great, such contact had certainly been longer and closer than in Utah and Wyoming. In California also, where the prevalence was least of any of the State just mentioned, white contact has had its longest duration, dating back to the entrance of the Spanish padres in the latter half of the eighteenth century.

Among the Navajos of New Mexico Smith states that trachoma is

to the entrance of the Spanish padres in the latter half of the eighteenth century.

Among the Navajos of New Mexico Smith states that trachoma is
apparently scattered throughout the tribe. He was unable to determine where or from what source the infection appeared, but expressed
the belief that it was not of recent introduction.

In Idaho and Washington, Lloyd reports chronic cases which gave
histories of having had the disease for from 15 to 25 years, but no
facts were presented to show the origin of the infection.

According to Clark, trachoma is doubtless of more recent origin
than tuberculosis, but has existed for many years. This was evidenced by the finding of many cases of long standing, played-out
trachoma of years' duration, and cases that were contracted through
contact with subjects long since dead.

No reliable data were available to indicate the origin or duration
of the disease in Okiahoma. From statements of some of the older
Indians themselves it appeared that the infection had prevailed among
their tribes prior to removal from other sections of the country to
Okiahoma.

Oklahoma.

Okishoma.

There was evidence to show that trachoma has existed among the Indians of North Dakota for at least the last generation. No information bearing on the origin of trachoma in South Dakota was obtainable. That it has prevailed for a long period of time is evident. A considerable number of cases of long duration were seen. Upon questioning older Indians who were found affected it was learned frequently that they had had the same "sore eyes" for years, usually stating that they had contracted the disease when young, often while attending school.

On the whole, it appears that trachoma has been prevalent among Indians in widely scattered sections for many years, but the source of the infection among them as a race must, in all probability, remain a mystery.

Mr. SMITH of Arizona. Mr. President, can the Senator give the Senate any information as to the prevalence of the disease of the eye of which he has spoken among the Arizona Indians?

Mr. ROBINSON. No investigations have been made by this commission into that subject especially, because the commission which is now reporting is not charged with that duty. These commission into that subject especially, because the commission which is now reporting is not charged with that duty. These suggestions as to trachoma are made because in the course of tuberculosis, because tuberculous children are excluded from these

our investigations into tuberculosis these facts became known, and they were thought of sufficient importance to communicate to Congress.

Mr. SMITH of Arizona. If the Senator will pardon me further, this disease, as I understand from communications to me, prevails very largely in Arizona and has been communicated to the Mexican children, and they in the public schools are communicating it to others.

Mr. ROBINSON. In the data which I have in the remarks I am making is contained all the information that is available as to trachoma in Arizona, and it confirms the suggestion made by the Senator from Arizona that it is alarmingly prevalent.

Attention is now directed to the condition of the Indians with reference to tuberculosis. This disease is disclosed to be quite general among the Indians and is not limited to any section or climate. Even in Arizona and New Mexico, where climatic con-ditions are exceedingly favorable for the treatment and cure of tuberculosis, the percentage of afflicted Indians is shown to be

15 per cent of the whole population of some of the tribes.

For the fiscal year ended June 30, 1912, of 190,791 Indians reported on approximately 26,500 were believed to have tuberculosis.

Thirty-two per cent of the whole number of deaths reported from the various reservations were alleged to be due to tuberculosis. A comparison of the death rate between Indians and whites due to tuberculosis shows that while 32 per cent of the whole number of deaths reported from the various reservations were due to tuberculosis only 11.2 per cent of the deaths occurring in the registration area of the United States were attributable to that cause. The death rate from all causes among the Indians is approximately 33 per thousand for the year 1912, while the Census Bureau places 16 per thousand as the death rate from all causes in the registration area.

In some of the States the death rate for any given period among the Indians appears to exceed the birth rate.

In California, in 1912, 169 births occurred and 250 deaths. In Idaho 110 births and 127 deaths. In Nevada 78 births to 95 deaths. In New York 101 births to 120 deaths. In Oregon 117 births to 130 deaths. In Washington, Wyoming, Wisconsin, South Dakota, Oklahoma, North Carolina, New Mexico, Montana, and Minnesota and several other States the birth rate exceeded the death rate among Indians during the year 1912, but in few instances were the births greatly in excess of the number of deaths.

THE PREVALENCE OF TUBERCULOSIS AMONG THE INDIANS.

The existence of tuberculosis among the Indians has been recognized for a long time. Available records of the past no doubt contain many errors due to the wide distribution and inaccessibility of the Indian population, failure to recognize and report cases of tuberculosis, and to the use of inaccurate nomenclature, so that neither the site nor nature of the lesion could be determined. The older records are filled with general terms such as "tubercle," "consumption," and "scrofula."

"scrofula."

The records of recent years are more carefully kept, and taken in connection with a better understanding of tuberculosis and a more accurate recognition of tuberculosis cases, furnish fairly reliable data for the estimation of the relative prevalence of tuberculosis among representatives of the three main races of the United States. The death rate from tuberculosis in these three races has been stated to be as follows: White, 1.73 per 1,000; negro, 4.85 per 1,000; Indians, 5.03 per 1,000. Based on this estimate and allowing one death among every seven persons affected, the case incidence of tuberculosis would therefore be 12.1, 33.9, and 35.4 per 1,000, respectively.

Although no accurate data could be obtained relative to the length of time tuberculosis has existed among the Indians visited by the officers engaged in this investigation, an increasing prevalence of this disease among them is shown by the records of the Indian Office and the fact emphasized in various reports submitted by that office from time to time.

By reason of the immense territory to be covered, the restrictions

By reason of the immense territory to be covered, the restrictions of time allotted to this survey, and the broad field of investigation, officers engaged in this duty found it impracticable to employ methods other than inspection and physical examinations of suspects. Limitations of time also precluded more than one examination of a tuberculous suspect. Two officers engaged in this survey, however, employed the tuberculin (Von Pirquet) test in a certain number of cases for the purpose of estimating the prevalence of tuberculosis among the tribes visited by them. The results of this test are given in another part of this report.

In consideration of the above-mentioned limitations of the examination, it is believed the amount of tuberculosis reported is lower than the number of cases actually existing at present among the Indians visited by these officers.

The significant importance of trachoma, one of the diseases spe-

visited by these officers.

The significant importance of trachoma, one of the diseases specifically mentioned in the law providing for this investigation, among the school population necessitated the examination of a large number of indian schools for this disease. These children were also inspected for the presence of tuberculosis among them. The very generally observed regulation of the Indian Office excluding tuberculous children from schools naturally resulted in the finding of a comparatively small number of cases of active tuberculosis in a large percentage of the population inspected.

Arizona: Frieks reports an inspection of 5.772 tests in the indian contraction in the contraction of the population in the contraction of the case of active tuberculosis.

schools by regulation. There were found 114 cases of tuberculosis, namely: Pulmonary, 52; glandular, 54; osseous, 6; other forms, 2.

In discussing tuberculosis incidence in Arizona, Fricks states that the percentage of infection varies from 1.5 per cent among the White River Apaches to 14.6 per cent among the White River Apaches on the grounds that many of them live in isolated tepees built of arrow weed, and the custom of burning the tepee, with everything in it, in which one of them dies.

The highest general prevalence of tuberculosis in Arizona was found among the northwestern tribes, with a percentage of 8.3 among the Navajoes to 14.6 among the Walapais. All of these tribes are decreasing in number. The Walapais, therefore, are considered a menace to the public health by reason of this high disease incidence and the fact that they dwell in insanitary hovels at various points along the Santa Fe Railroad.

California; In his report on the prevalence of tuberculosis among the Indians of California examined by him, Ellilings refers to the insanitary conditions of the homes of the Indians visited, the lack of personal cleniliness of the Indian himself, and his indifference and ignorance regarding the indiance of such conditions on health.

The highest percentage of tuberculosis in California was found on the Round Valley Reservation—15 per cent—and among the Indians in the San Quentil Penitentiary. He also gathered from morbidity statistics of this agency a record of 244 cases of measles and 552 of influenza, diseases which are frequently followed by tuberculosis.

Colorado: Smith found a comparatively low percentage of tuberculosis among the Southern Utes of Colorado, though the result of the Von Pirquet test made on 65 school children at Ignacio, Colo, gave 81.5 per cent of positive reactions. It may therefore be assumed that the amount of infection at this point is high, and a more detailed examination of this population than was possible under existing conditions would probably reveal a greater number of c

Considering the difficulties required to be met, this institution is a very creditable one."

Iowa: White found a percentage of 15 per cent among the Sac and Fox Indians of Iowa. This high percentage of tuberculosis is attributed to the general insanitary condition of the dwelling places of these Indians and to their habits. These Indians are also reported to be addicted to the use of the "mescal button," which seems to exert a very pernicious influence over them.

Minnesota: Clark inspected 546 and Preble 187 Indian boarding-school children in Minnesota, and found a total of 27 cases of tuberculosis—10 pulmonary, 16 glandular, and 1 osseous—a percentage of 3.24. The high percentage of tuberculosis, 14.28 in the Vermilion Lake School, at Tower, Minn., is caused by glandular cases entirely.

At the Cass Lake Indian Boarding School the percentage of tuberculosis was found to be 4.25. This school is located 7 miles by water from the agency physician, and is therefore subject to infrequent medical inspection. In St. Benedict's Industrial Indian Mission School, White Earth Reservation, a percentage of 3.19 was found.

He also inspected 2.709 reservation Indians, exclusive of children in Indian boarding schools, and found 145 cases of tuberculosis, 5.35 per cent. Of these 145 cases, 90 were pulmonary, 34 glandular, 19 osseous, and 2 cutaneous forms of this disease. These cases were found in a house-to-house canvass of the various reservations, and are a conservative representation of the prevalence of tuberculosis among the Indian of the State.

tive representation of the prevalence of tuberculosis among the Indians of the State.

The highest percentage of tuberculosis, 23.07, was encountered in a smail nonreservation settlement at Pelican Point, near Orr, Minn. Pelican Point is an old Indian settlement, the India homes are disgustingly filthy, and the Indians themselves very poor and much addicted to the use of intoxicants.

On the Leech Lake Reservation the tuberculosis rate was found to be 49.2 per 1,000. Nett Lake Reservation 48.2 per 1,000, Red Lake 55.4 per 1,000, and White Earth 46.8 per 1,000 among Indians inspected for this disease, exclusive of Indian boarding-school children, as compared to the estimated 5 per 1,000 among the white population. Clark reports:

"At Pine Point, White Earth Reservation, the percentage of tuberculosis is 9.52, while that for the whole reservation, including Pine Point, is but 4.63. This percentage of tuberculosis is associated with a like high trachoma percentage, 36.05, and presents a situation demanding specific recommendations."

Michigan: Clark inspected 333 children in Indian boarding schools in Michigan and found 8 cases of tuberculosis, 6 pulmonary and 2 glandular, a percentage of 2.40. The pulmonary cases were in the early stages of the disease held under close observation and therefore only a potential danger to the rest of the school population.

In addition, he examined 310 reservation Indians, exclusive of school children, and found 7 cases of tuberculosis, 6 pulmonary and 1 osseous, or 2.25 per cent.

At Pay Wills, a nonreservation settlement, the highest percentage.

children, and found 7 cases of tuperculosis, 6 pulmonary and 1 osseous, or 2.25 per cent.

At Bay Mills, a nonreservation settlement, the highest percentage, 3.54, was found. These Indians have for years been in contact with the white population engaged in the lumber industries of that region. The sanitary condition of their homes is only fair.

Among Indians of the Mackinac Agency, Baraga, Mich., he found very little tuberculosis, only 1.18 per cent. The disease is rare among the while population of this section. The homes of the majority of these Indians compare favorably with those of white people in like

circumstances. Still. their comparative freedom from tuberculosis is largely due to lack of exposure on account of rarity of the disease in the surrounding white population.

Kansas, Nebraska, and Oklahoma: By reason of the location of large nonreservation boarding schools and the consequent examination of a relatively larger proportion of school children than reservation Indians in these States, the reported percentage of tuberculosis found is low. This is due to a regulation of the Indian Service excluding tuberculous children from the Indian schools, and the artificial reduction of the tuberculosis rate in the school population caused thereby. Guthrie, however, in an examination of 305 Cheyennes and Arapahoes in Oklahoma, found 22 cases of tuberculosis, or 7.21 per cent. His next highest percentages were among the Poncas and Seminoles, these percentages being 5.30 and 4.31, respectively.

Montana: Among 2.042 Indians inspected in Montana for tuberculosis White found 247 cases, namely: Pulmonary, 58; glandular, 183; osseous, 6; a percentage of 12.14. The highest percentage of tuberculosis among the Indians of this State, 19 per cent, was found among the Flathead Tribe and the lowest, 5.30 per cent, among the Northern Cheyennes. Other percentages were, Piegans, Blackfeet Reservation, 10.34 per cent; Sioux, Fort Peck, 13.57 per cent; Gros Ventre, Assinboin, Arapaho, and Sioux, Fort Belknap, 14.10 per cent; Crow, 15.38 per cent. He attributes this great prevalence of tuberculosis among the Indians of Montana to filithy habits, insanitary homes, and the use of intoxicants by these Indians.

Nevada: Billings inspected 522 reservation Indians in Nevada and found 62 cases of tuberculosis, 21.43 per cent. These cases are classified as 38 pulmonary, 21 glandular, 3 osseous, and 1 cutaneous. A percentage of 32.67 of tuberculosis was found among the Palutes of Pyramid Lake Reservation. Among 101 Indians examined on this reservation he found 33 cases of tuberculosis classified as pulmonary, 29; glandular, 3; osseous, a t

Among 100 Paintes examined at Fort McDermitt were found 16 pulmonary and 2 glandular tuberculosis cases, a total of 18, or 180

Among 100 Paintes examined at Fort McDermitt were found 16 pulmonary and 2 glandular tuberculosis cases, a total of 18, or 180 per 1,000.

Among 329 children examined in four Indian schools he found 62 cases of tuberculosis, or 18.54 per cent. These school children are drawn from an Indian population in which tuberculosis is found to prevail to an alarming extent. This accounts for the large number of cases in the schools inspected. He explains this heavy prevalence on the ground that Indian customs and insanitary dwellings favor the spread of tuberculosis.

New York: Leake reports a tuberculosis percentage of 1.27 among 865 Indians examined by him for this disease in New York. The average duration of illness, four years in the pulmonary cases, he properly infers does not indicate an extreme susceptibility on the part of these Indians when once infected.

From rather indefinite data Leake is inclined to think tuberculosis is on the decrease among the Iroquois Indians, or else many affections believed to be tuberculosis in the past were not tuberculosis at all. The sanitary condition of their homes is comparable to that. The sanitary condition of their homes is comparable to that. The sanitary condition of their homes is comparable to that. White people in like circumstances. Furthermore, the nutrition of these Indians is good, their food supply being largely of home production, and eggs, meat, vegetables, and fruits are used daily in most families.

New Mexico: The highest percentage of tuberculosis among the

The sanitary condition of their homes is comparable to that of white people in like circumstances. Furthermore, the nutrition of these Indians is good, their food supply being largely of home production, and eggs, meat, vegefables, and fruits are used daily in most families.

New Mexico: The highest percentage of tuberculosis among the Indians of New Mexico is found by Smith among the Apaches of the Jicarilla and Mescalero Reservations, being 9.45 and 7.21 per cent, respectively.

The Jicarilla Reservation Indians, who dwell in tepees, present a higher percentage of tuberculosis than is found on the Mescalero Reservation where the majority of the Indians are domiciled in houses, showing that careless habits, poverty, lack of proper food, lack of cleanliness, and bad social customs after all are the great determining factors in the spread of this disease.

On the other hand, he reports that the lowest percentage of tuberculosis prevails among the Navajo and Zoni Tribes. The Navajos are prosperous and well fed, it being a poor family that does not possess from 100 to 1,000 head of sheep and goats. The construction of their dwelling, the "Hogan." permits ventilation. It is a custom of these people to spend much of their time sitting outdoors in the sunshine in front of their "Hogan."

The Zunis are thrifty and industrious. The Interiors of their dwellings are often whitewashed, and their construction facilitates ventilatings are often whitewashed, and their construction facilitates ventilatings are often whitewashed, and their construction facilitates ventilatings are often of moist material which subsequently hardens. Thrift, good food supply, and improved sanitary condition of the home are the main cause of the low comparative percentage of tuberculosis among these people.

Smith employed the Von Pirquet test for the determination of tribal infection to tuberculosis, This test consists in the inoculation of the skin with tuberculin, a subsequent reddening at the site of the incurion and the provide of the constr

The tabulation by Smith of his results is presented in the following table:

- Known causes only

6 Unknown. 6 Only 2 subjects. Only 9 subjects.

Table V shows the percentage of positive reactions to the tuberculin (Von Pirquet) test as compared with the death rate from tuberculosis compiled from the agency records among the Indians of New Mexico. It will be seen that a high percentage of reactions to the tuberculin test is found associated with a like high death rate from tuberculosis. Therefore the result of this test in a given population under known conditions not only enables us to calculate the probable death rate from tuberculosis, but also serves as an index of the actual prevalence of this disease.

North Carolina: Fricks examined 317 Cherokees in North Carolina and found 6 cases of tuberculosis, 4 pulmonary and 2 glandular, a percentage of 1.89. He says: "The Cherokees, numbering 2,115, with 41 per cent full bloods and 59 per cent mixed, are citizens of North Carolina. They live just as the poorer white mountaineers of that section."

North and South Dakota: North and South Dakota are treated as a unit in the consideration of the prevalence of tuberculosis among the Indian population because of their contiguity, and also because two officers—Schereschewsky and Prebie—collected data independently in these two States.

Indian population because of their contiguity, and also because two officers—Schereschewsky and Preble—collected data independently in these two States.

In all, 9.568 Indians were examined in these two States and 361 cases of tuberculosis found.

Tuberculosis incidence was considered by each of the two officers from the standpoint of—

(1) Tuberculosis in reservation Indians, exclusive of schools. Of these, 5.813 were examined and 296 cases of tuberculosis found, a percentage of 5.09. Of these there were 162 pulmonary, 108 glandular, 19 osscous, and 7 cases of all other forms of tuberculosis.

(2) Tuberculosis in Indian boarding schools. There were examined 3.103 Indian boarding-school children in these two States and 52 cases of tuberculosis found among them, namely, 18 pulmonary, 32 glandular, 5 cases on, and 1 of other forms, a percentage of 1.67.

(3) Tuberculosis in Indian day schools. Schereschewsky examined 652 children in Indian day schools of the two Dakotas and found 9 cases of tuberculosis, 4 pulmonary and 5 glandular, a percentage of 1.38. Schereschewsky properly observes:

"Cases of tuberculosis found among the reservation Indians examined, exclusive of those in attendance at schools, give us a much better idea of the incidence of tuberculosis among the Indians of the Northwest than the tables relating to its prevalence in schools. In school children we are dealing with a class in which the incidence of tuberculosis is artificially diminished by the exclusion from their number of those suffering from the disease. Among reservation Indians such is not the case."

He found the highest percentage, 5.89, of tuberculosis among the

those suffering from the disease. Among reservation Indians such is not the case."

He found the highest percentage, 5.89, of tuberculosis among the Indians of North Dakota, on the Fort Berthold Reservation, and the lowest at the Turtle Mountain Reservation, where only 0.92 per cent of the Indians examined were found to be tuberculous. A compilation of agency mortality records by Schereschewsky shows that tuberculosis causes approximately 22.32 per cent of all the deaths in the reservations visited by him. This, he says, is twice the percentage, 11, found in the registration area of the United States. "The tubercular death rate is 6.99 per thousand, or 4.37 times the white death rate (1.63) per thousand." (Mortality Statistics, Bureau of Census Bul. 109.)

Oregon: Billings inspected 316 Indian children in the Salem non-reservation boarding school and found 11 cases of pulmonary tuberculosis, 29 glandular, and 3 osseous, a total of 23, or 13.6 per cent.

Among 788 reservation Indians examined were found 61 pulmonary, 59 glandular, 8 osseous, and 3 of other forms of tuberculosis, a total of 131, or 16.62 per cent.

The highest percentage, 24.56, of this disease was found in the various tribes of the Siletz Reservation. Percentages for other reservations are: Klamath Lake, 20.27; Umatilia, 20.66; and Warm Spring, 23.75.

Pennsylvania: Among the 552 students of the Carlisle Indian Boarding School, Carlisle, Pa., who were inspected for tuberculosis, 26 cases of this disease were discovered, or 4.7 per cent. Of these cases of the disease 8 were pulmonary, 17 glandular, and 1 osseous. The Carlisle shool receives pupils from nearly every tribe in the United States. In view of the great prevalence of tuberculosis among some of these tribes, a certain number of cases of tuberculosis among some of these tribes, a certain number of cases of tuberculosis among some of these tribes, a certain number of cases of tuberculosis among some of these tribes, a certain number of cases of tuberculosis may be expected to develop in th

year.

At Carlisle are found facilities for caring for a small number of tuberculous students, who are in the early stages of this disease.

Attached to the school hospital are sleeping porches wherein students infected with tuberculosis sleep in the open air.

An agreement has also been entered into by the school authorities with the State of Pennsylvania whereby certain of these Indian students in the more advanced stages of tuberculosis are taken into the State Tuberculosis Sanatorium at Mount Alto, Pa.

Utah: Among the Uintah and Ouray Indians of Utah, 182 were inspected and 8 cases of tuberculosis found, 4 pulmonary, 3 glandular, and 1 osseous, a percentage of 4.39.

Virginia: Cumming inspected 43 Indian students at the Hampton Normal Institute, Hampton, Va., and found 3 cases of tuberculosis, 2 pulmonary and 1 osseous, a percentage of 6.97.

Washington: Lloyd inspected 1.347 Indians, including school children, in Washington, and found 73 cases of tuberculosis, namely, 48 pulmonary, 21 glandular, and 4 osseous, a percentage of 5.41 for the State.

pulmonary, 21 glandular, and 4 osseous, a percentage of 5.41 for the State.

The large number of school children inspected and included in the total number used for the calculation of the percentage of prevalence of tuberculosis in this State, reduces the tuberculosis rate by reason of the exclusion of known tuberculous pupils from Indian schools. It is therefore believed that the prevalence of tuberculosis among these Indians is much greater than shown by the figures presented herewith. Among the Dwamish and allied tribes, exclusive of the Cushman and Tulalip Schools, Lloyd found the following percentages of tuberculosis according to reservations: Lummi, 11.95; Suquamish, 13.51; Swinomish, 10.20 On the Colville and Spokane Reservations the percentage of tuberculosis was found by him to be 8.26. Washington may therefore be classed with California, Oregon, and Nevada as one of the States in which the greatest prevalence of tuberculosis was found in the course of this investigation.

Lloyd considers tuberculosis a serious problem among the Indians of Washington. Specific mention is also made of overcrowding in poorly ventilated houses as the principal factor in producing this heavy tuberculosis infection.

Wisconsin: An inspection for tuberculosis was made of the Indians in all boarding schools and reservations in Wisconsin. A total of 1,703 reservation Indians, exclusive of school children, was inspected and 52 cases of tuberculosis were found, a percentage of 3.05 for the State. The greatest relative number of tuberculosis cases was found among the Indians of the Lac Du Flambeau Reservation, with a percentage of 6.48. The majority of these Indians dwell in very insanitary homes and their customs and habits favor the spread of this disease among them.

The following percentages of tuberculosis were found among the

tary homes and their customs and habits favor the spread of this disease among them.

The following percentages of tuberculosis were found among the Chippewas of Wisconsin: Lac Courte Oreille, 3.72 per cent; La Pointe, 4.73 per cent; Red Cliff, 2.89 per cent.

Among the Monominees and Oneidas the percentage of tuberculosis among those examined was found to be 1.35 and 2.76, respectively. The sanitary condition of the majority of the homes visited among these Indians was good. The Oneidas cultivated a considerable part of their lands and are self-supporting.

Among the 1.296 children examined in the Indian boarding schools of Wisconsin were found 37 cases of tuberculosis, of which number 24 were pulmonary, 9 glandular, 3 osseous, and 1 cutaneous, or 2.98 per cent.

At the Lutheran mission, Stockbridge Reservation, 8.88 per cent of

At the Lutheran mission, Stockbridge Reservation, 8.88 per cent of tuberculosis was found. In the Government school at Keshena, Menominee Reservation, the percentage was 7.69. This percentage includes the children of this school transferred to the agency hospital at that place.

The presence of tuberculosis in these boarding schools, however, is adventitious and due to reluctance on the part of the school authorities to return children in the early stage of this disease to insanitary homes and to a poor food supply.

The tuberculosis case incidence among the Indians of Wisconsin, inclusive of school children, according to data collected in this investigation, is 29.6 per 1,000.

Wyoming: Among the Arapahos and Shoshones of the Shoshone Reservation in Wyoming 392 Indians were examined, and 13 cases, or 3.31 per cent, of tuberculosis was found.

CONSIDERATION OF RECORDED DEATHS FROM TUBERCULOSIS,

CONSIDERATION OF RECORDED DEATHS FROM TUBERCULOSIS.

During the inspection complete data were not found at all the agencies by officers engaged in the work. On request, therefore, the Office of Indian Affairs furnished a compilation from their records of the birth rate, death rate, and number of deaths reported as due to tuberculosis among the Indian population of the United States during the fiscal year 1912. From these data was compiled the following table. It is proper to add that, in view of the known difficulties on many of the reservations in obtaining accurate information as to the causes of deaths among Indians, some of these figures must be in the nature of estimates. It is likely that many deaths among Indians are considered by them to be due to tuberculosis, and so reported to the agency, when no physician has been called, that were not caused by this disease at all.

TABLE VI.—Indian birth rate, death rate, and death rate due to tuberculosis, 1912.

[From a compilation by the Office of Indian Affairs.]

It will be observed on comparing this table with the case incidence of tuberculosis found, by the officers engaged in this investigation, among these Indians examined, such incidence is correspondingly high on one or more reservations in the majority of the States in which the tuberculosis death rate is high.

Mention has been made in another part of this report of the inability of the medical officers engaged in this investigation to make repeated examinations of tuberculous suspects by reason of the short time allowed for the completion of the survey. The detection of tuberculosis may not be easy in its earliest stages even with the aid of all modern appliances in use for that purpose, and then only after repeated examinations of the suspected subject. The medical officers were restricted to the making of a physical examination of each suspect, and to but one examination. For these reasons it is believed the percentages of tuberculosis incidence found during this investigation are lower than a more detailed and prolonged inspection would reveal, and may be considered in the nature of a preliminary sanitary survey. However, this survey as conducted has revealed so great a prevalence of tubercular infection among the Indians inspected as to warrant the immediate adoption of measures for the relief of this situation in the Indian population of our country.

CAUSES OF PREVALENCE OF TUBERCULOSIS AMONG THE INDIANS.

CAUSES OF PREVALENCE OF TUBERCULOSIS AMONG THE INDIANS.

The prevalence of tuberculosis among Indians is generally attributed by those familiar with the subject to marked changes in their habits of living occasioned by contact with our civilization. Formerly the Indians lived in tepees, engaged in out-door sports, and were nomadic, earning their living by hunting. fishing, and trading. Contact with the white man has worked radical changes in the habits and occupations of the Indians. They have been collected on reservations, and their former hunting grounds converted into farms and pastures. Hunting and fishing are no longer profitable. Every energy is being exhausted by the Government to convert the hunter into a farmer, and thus to transform the Indian race into an agricultural people. This transition encounters the inherent difficulty of determined resistance on the part of the Indian, who is slow to re-nounce the customs and habits which have characterized his race through many centuries. The substitution of houses for tepees has resulted in the adoption of habits of living conducive to the spread of tuberculosis. In many Indian homes sanitary conditions are frightful. Whole families live in single rooms with no ventilation, ignorant of the precautions necessary to promote health, and without the means of avoiding infection and contagion. Bad air, scant and unwholesome food, over-crowding in poorly constructed houses, and other insanitary habits have made the white plague a menace to the Indian race.

WHAT IS NOW BEING DONE TO REMEDY THESE CONDITIONS.

For the fiscal year ending June 30, 1912, there were 53 small hospitals and sanatoria in the Indian service, the total capacity of the same being limited to 1,256 patients. Since that time a few others have been constructed. For the most part these are mere school hospitals with only sufficient capacity to accommodate sick pupils. Little is being done to prevent the sprend of the disease, because no provision has been made therefor by Congress. The discovery of the prevalence of tuberculosis among the Indians is of comparatively recent date. The Indian Bureau and its head, Commissioner Sells, realize the necessity for a feasible and comprehensive remedy. Owing to the vast territorial area of many of the reservations and the inadequate means now supplied, the present system is inefficient and not capable of properly dealing with this important problem.

When the Indian appropriation act, approved June 30, 1913, was under consideration in the Senate, an amendment was inserted in the bill carrying \$100,000 for the establishment and maintenance of a general tuberculosis sanitarium for the treatment of Indians generally. It was suggested that this sant-tarium should be established at a point in New Mexico on the Mescalero Reservation, about 10 miles from the nearest railway station and nearly 50 miles from the agency. In lieu of this provision the conference on the bill authorized this commission and directed it, as a part of the duties prescribed, to inquire into the feasibility and necessity for such a sanitarium. The proposed site is one of rare beauty, having an altitude of

more than 5,000 feet. It is, however, inaccessible on account of its remoteness from any railroad and from the Mescalero Agency, near which the greater number of Indians in that locality reside.

The commission does not recommend the establishment at any point of a central tuberculosis hospital for Indians as feasible or advisable. In reaching this conclusion we have been governed in part by the judgment and experience of many Indians whose opinions have been expressed before the commission, as well as that of officers and employees in the Indian Service who have devoted especial attention to the question.

No considerable number of Indians afflicted with tuberculosis could conveniently or would willingly avail themselves of treatment in such an institution. The characteristic affection of Indian parents for their children prompts them to oppose any system of relief which would require the removal of their afflicted offspring to a hospital so remote that they would be deprived of visiting and administering to their wants. Such a hospital would be available only for those residing on near-by reserva-To accomplish any substantial benefit through a central sanitarium it would be necessary to require by law the forcible transportation to the hospital and the confinement there of the This would meet with universal resistance, and the consequent dejection and despondency resulting to patients compelled to attend the hospital would make recovery or improvement in any case improbable. Moreover, comparatively few of the total number of Indians afflicted with tuberculosis could be treated in a single hospital.

We are therefore unable to recommend the establishment of a tuberculosis sanitarium in New Mexico for the treatment of Indians generally, and in view of the urgency and importance of the subject, recommend the adoption of a much more practicable plan looking both toward the relief of those now afflicted, and the removal of the causes and conditions which have occa-

sioned the spread of the disease.

The commission recommends-

First. That provision be speedily made for the establishment of temporary hospitals on the several reservations where tuberculosis is known to be common, to which afflicted Indians may go or be removed for treatment. These hospitals may be inexpensive, but should be provided with necessary apparatus, nurse help, and medical service. It will probably not be necessary to provide for the forcible removal of patients to these hospitals. On the contrary, it is believed that the Indians will facilitate the work to be done at these hospitals and gladly avail themselves of the opportunities for treatment there to be afforded. In this way within 5 or 10 years treatment can be given to practically all tuberculosis Indians in the United States and many of them can be restored. As an illustration of the possibilities of this plan, at the sanitarium maintained by the Phoenix Indian School in Arizona, about 90 per cent of the patients treated there during the last year are claimed to have Even if it be true that this high percentage of cures is attributable in part to the favorable climatic conditions at Phoenix, it is believed that the system is capable of producing gratifying results on all the reservations which may be supplied with camp hospitals.

Second. No system looking solely to the relief of those now afflicted can be complete or satisfactory. Science has demonstrated that tuberculosis is preventable, and can therefore be eradicated. In order to accomplish this broader purpose, systematic instruction in sanitary habits of living must be given

the Indian and sanitary requirements enforced.

It is suggested that a force of field matrons be provided to visit Indian homes and give instruction in housekeeping and house cleaning, reporting from time to time to the superintendent of the reservation or the physician in charge of the camp hospital. Accurate information as to the condition and number of afflicted Indians may be thus obtained. No attempt, however, is here made to outline the details or define the various methods which experience may prove necessary on the different reservations.

Undoubtedly the plan here proposed will increase the number of employees in the Indian service and the expense of its may be paid in some cases from the tribal funds. Where no tribal fund exists the burden must be borne by the Government.

THE WORK SHOULD BE DONE BY THE INDIAN SERVICE.

The question may arise whether this work should be done through the direct agency of the Indian service, or by the Public Health and Marine-Hospital Service. On the one hand it would seem to logically fall under the bureau in charge of the Public Health and Marine Service. On the other, it is doubtful whether it would be wise to place the health department of the Indian service under a bureau in a different de-

partment of the Government. If this were done conflicts in authority, rivalries, and jealousies might impair and retard the progress of the important work here recommended to be undertaken. While the matter is open to controversy, sound policies of administration seem to me to require that the work be carried forward under the supervision of the Bureau of Indian Affairs. Certainly a force should be created with sufficient resources to adequately and intelligently deal with this far-reaching problem, indirectly chargeable to the inefficient manner in which the Government has dealt with its wards, the Indians.

The history of the American Indian is both romantic and We may contemplate with amazement and admiration the tenacity with which the Jewish people have clung to their racial characteristics through centuries of persecutions and

How different is the story of the Indian. He has but feebly withstood the shock of contact with other races. His instincts and virtues seem inseparably connected with freedom from restraint and personal liberty unlimited by law or custom. His origin is enveloped in mystery. Here and there still remain scattered and rapidly disappearing evidences of ancient Indian civilizations.

Recoiling before the advance of progress, the Indian has relinquished the possession of this continent and abandoned his primitive pursuits and ideals. Hesitating and mistrustful he has rebelled against the fate which is scourging him into helplessness and dependency. Loyal to savage institutions, the Indian has not responded promptly to the influences of civilized

Whatever defects exist in the normal Indian character, his ferocity as an enemy is excelled by his fidelity as a friend. Few instances of Indian ingratitude are recorded. He has been faithful to the hand that has protected him. The loyalty of our Indian allies during the Revolution is a familiar and pleasing

chapter in American history.

Mr. President, there is a stain of shame upon our flag. have not kept faith with the Indian. Perhaps it was the law of progress that we should conquer him; unavoidable that his hunting grounds should be transformed into fields; inevitable that by war and treaty, by sword and promise, he should be impoverished and despoiled. It is not to our shame, nor to his, that we have beaten him in battle, for the Indian fights with all the energy of despair. It is not regrettable that we have reclaimed a continent from savagery and compelled the Indian to yield to the processes of civilization. Our disgrace arises from unfulfilled promises, violated treaties. Herein the record is shamefully consistent. It is relieved by few instances of pledges honestly fulfilled.

Driven back upon the desert and herded in half-starved bands on semiarid reservations, the American Indian faces threatened extinction. Our Indian policy has heretofore been unsatisfactory and has resulted in gross injustice. Must it henceforth be marked by offensive restraint and charity, which in the end

may reduce the race to abject dependency?

The total of our dealings with the Indians is not to our We have taught him vice and immorality and communicated to him diseases which threaten his extinction. The time for revision of our Indian policy is at hand. The first principle to be recognized is simple justice, common honesty, honest restitution. To accomplish this a reorganization of the Indian Service seems necessary. The present Commissioner of Indian Affairs is alert and capable and willing to lead this

On the title-page of a current publication appears a striking picture; it represents an aged emaciated Indian chief, clad in the habilaments of a vain and vanished glory, dismounted, standing beside his wasted, half-starved steed on the brow of a barren hill; no other sign of life. About him the desert stretches in solitude and sublimity. Behind him the winds gather the drifting sands in gray and yellow clouds. At his feet the bones of a buffalo lie bleaching, while from the desert's rim the dying

day signals farewell.

Mr. President, "When the last grim joke is entered in the big black book of jobs," when the accounts of history are finally balanced and our civilization credited with every achievement to which it is entitled—the reclamation of a continent from savagery, the spread of knowledge, the progress of science, the promotion of universal peace and liberty, the establishment of the reign of moral force—whatever of restitution remorse may in the meantime prompt or justice compel, our Government will still be debtor to the Indian race. Must the balance be recorded in the blood of a doomed people?

Mr. President, I ask that the findings and recommendations of the commission be printed in the Congressional Record and

printed as a document and referred to the Committee on Indian Affairs. The testimony is now being printed as part of the report.

There being no objection, the report was referred to the Committee on Indian Affairs and ordered to be printed as a document and to be printed in the RECORD, as follows:

REPORT OF THE FINDINGS OF THE JOINT COMMISSION ON INDIAN TUBER-CULOSIS SANITARIUM AND YAKIMA INDIAN RESERVATION PROJECT (H. DOC. NO. 505).

the Senate and House of Representatives of the United States of America, in Congress assembled:

America, in Congress assembled:

The joint commission of Congress to investigate the necessity and feasibility of establishing, equipping, and maintaining a tuberculosis sanitarium in New Mexico for the treatment of tuberculous Indians, and to also investigate the necessity and feasibility of procuring impounded waters for the Yakima Indian Reservation or the construction of an irrigation system upon said reservation, to impound the waters of the Yakima River, Wash., for the benefit of the Indians of said reservation, respectfully submits the following report:

AUTHORITY AND DUTIES OF THE COMMISSION.

This commission was created by the act of Congress approved lines.

of the Yakima River, Wash., for the benefit of the Indians of said reservation, respectfully submits the following report:

AUTHORITY AND DUTIES OF THE COMMISSION.

This commission was created by the act of Congress approved June 30, 1913, the Indian appropriation act, section 23, under the following provisions:

A commission consisting of two members of the Senate Committee on Indian Affairs, to be appointed by the chairman of said committee, and two Members of the House of Representatives, to be appointed by the Speaker, is hereby created for the purpose of investigating the necessity and feasibility of establishing, equipping, and maintaining a tuberculosis sanitarium in New Mexico for the treatment of tuberculous Indians, and to also investigate the necessity and feasibility of procuring impounded waters for the Yakima River, Wash., for the reciamation of the lands on said reservation, and for the use and benefit of the Indians of said reservation. That said commission shall have full power to make the investigations herein provided for, and shall have authority to subppena and compel the attendance of witnesses, administer oaths, take testimony, incur expenses, employ clerical help, and do and perform all acts necessary to make a thorough and complete investigation of the subjects herein mentioned, and that said commission shall report to Congress on or before January 1, 1914: Provided, That one-half of all necessary expenses incident to and in connection with the making of the investigation herein provided for, including traveling expenses of the members of the commission, shall be paid from the contingent fund of the House of Representatives and one-half from the contingent fund of the Senate on vouchers therefor signed by the chairman of the said commission.

Under the foregoing provisions of law, Senators Robinson, of Arkansas, and Townsend, of Michigan, and Representatives Strephens, of Texas, and Burake, of South Dakota were appointed members of said commission, and organized on the 25th day of Augus

PROPOSED TUBERCULOSIS SANITARIUM IN NEW MEXICO FOR INDIANS.

of said reservation and for the use and benefit of the Indians of said reservation.

PROPOSED TUBERCULOSIS SANITARIUM IN NEW MEXICO FOR INDIANS. The joint commission visited a number of Indian reservations and schools in several States, held hearings and investigated conditions with reference to tuberculosis among the Indians, the prevalence of the disease, and the most practical means of combating it.

Senate Document No. 1038, Sixty-second Congress, third session, relating to contagious and infectious diseases among the Indians, was available for the use of the commission. This document is a report by the Public Health Service of investigations made in accordance with the act of Congress approved August 24, 1912, into the prevalence of contagious and infectious diseases among the Indians of the United States.

The information contained in Senate Document No. 1038, above referred to, while incomplete and not claimed to be entirely accurate, is, for the purposes of this investigation, reliable, and, in connection with the testimony taken by the commission, sufficient to compel the conviction that both trachoma and tuberculosis are quite general among the Indians and that tuberculosis in some localities is rapidly increasing. For the fiscal year ending June 30, 1912, out of 190,791 Indians reported on approximately 26,500 were estimated to have tuberculosis. Thirty-two per cent of the whole number of deaths reported from the various reservations was alleged to be due to tuberculosis. Out of the total Indian population of 322,765 it is believed that there are approximately 26,500 cases of tuberculosis. We believe that on some of the reservations the percentage of the afflicted is one-fourth of the entire population. A comparison of the death rate between Indians and whites from tuberculosis discloses that 32 per cent of the whole number of deaths reported from the various reservations was due to tuberculosis, as against 11.2 per cent of the death secouring from the same cause in the registration area. While in a

gress has provided the necessary means. When the Indian appropriation act approved June 30, 1913, under which this commission was created, was under consideration in the Senate, an amendment carrying \$100,000 for the establishment of a central tuberculosis sanitarium for the treatment of Indians generally was inserted in the bill. It was suggested that this sanitarium should be established at a point in New Mexico on the Mescalero Reservation approximately 50 miles from the Mescalero Agency, for the treatment of tuberculous Indians from the various reservations throughout the United States.

The following letter from the chairman to the Commissioner of Indian Affairs, September 8, 1913, and his reply thereto, with accompanying data, disclose not only the alarming prevalence of said diseases among the Indians, but also the totally inadequate facilities available for the use of the department in checking the ravages of trachoma and tuberculosis:

September 8, 1913.

SEPTEMBER 8, 1913.

Hon. Cato Sells,

Commissioner of Indian Affairs, Washington, D. C.

My Dear Mn. Sells: Will you please furnish for the use of the commission appointed to investigate the management and conduct of the Bureau of Indian Affairs a statement showing:

1. The number and percentage of Indians afflicted with trachoma at Indian schools and on the Indian reservations.

2. The number and percentage of Indians afflicted with tuberculosis and the deaths from these diseases among Indians on reservations and in the schools; also a comparison of the death rate as between the Indians and the whites from tuberculosis in the registration area of the United States.

3. The number and capacity of each hospital available for Indians.

4. Whether, in your judgment, it would be desirable to have a large hospital on the Mescalero Reservation or smaller hospitals at the various reservations where conditions are most acute.

I should appreciate early information regarding these subjects.

Sincerely, yours,

Joe T. Robinson, Chairman.

JOE T. ROBINSON, Chairman.

SEPTEMBER 9, 1913.

MY DEAR SENATOR: In response to the questions submitted in your letter of September S. I have the honor to reply as follows:

1. The number and percentage of Indians afflicted with trachoma at Indian schools and on Indian reservations.

(a) At Indian schools (boarding).

Total	39, 231	8,940	22.7

This table is given in further detail in accompanying Exhibit A. Using this rate, 22.70 per cent, with a population of 322,765 Indians is estimated that there are 71,997 cases of trachoma among the

2. The number and percentage of Indians afflicted with tuberculosis and the death rate from this disease among Indians on reservations and in schools; also a comparison of the death rate as between the Indians and the whites from tuberculosis in the registration area of the United States.

For the fiscal year ended June 30, 1912, the following information is

and the whites from tuberculosis in the registration area of the United States.

For the fiscal year ended June 30, 1912, the following information is available regarding tuberculosis:

Of 190,791 Indians reported upon by superintendents, 13.89 per cent, or 26,500, are estimated to have tuberculosis. During that year 1,906 deaths due to tuberculosis were reported from the various agencies.

Thirty-two per cent of the whole number of deaths reported from the various reservations were due to pulmonary tuberculosis, as against 11.2 per cent of deaths due to the same disease occurring in the registration area of the United States. The death rate among Indians is 32.24 per thousand, while the Census Bureau gives 16 per thousand in the above registration area.

3. The number and capacity of each hospital available for Indians. Ending June 30, 1912, there were 53 hospitals and sanatoria in the service, with a capacity of 1,255 patients. Since this report was compiled several others have been constructed and the capacity of others increased. The accompanying table will give the location and capacity of each. It will be noted that they are mostly school hospitals of capacity sufficient only to accommodate sick pupils. (Exhibit C.)

In answer to your question 4, I am quoting the following paragraph from my letter of September 8:

"The solution of the problem of caring for this vast number of cases would be the establishmeat of tuberculosis camps on the reservations. This has been done in a few instances and will be done on others as funds become available and where local conditions are conducive to their proper maintenance of camps or hospitals would be excessive, and there are also hundreds of Indians where cases are few and where the cost of maintenance of camps or hospitals would be excessive, and there are also hundreds of Indians receiving absolutely no treatment whatever and as many more within reach of physicians who are not equipped to care for them. Again, there are very many incipient cases in whom the disease

CAUSES OF TUBERCULOSIS AMONG THE INDIANS,

The astonishing prevalence of tuberculosis among Indians is thought to be occasioned by the habits and manner of living prevailing among them. Formerly the Indians lived in tepees, engaged in outdoor sports, and earned their living by hunting, fishing, and trading. Contact with the white man has worked a radical change in the habits and occupations of the Indians. They have been collected on reservations, their hunting grounds converted into farms and pastures, and every energy exhausted to change a naturally nomadic race into an agricultural people. This transformation has been attended with great difficulties. The substitution of insanitary houses for tepees has resulted in the adoption of habits of living peculiarly conducive to the spread of tuberculosis. In many Indian homes sanitary conditions are frightful Large families live in single rooms, poorly ventilated, and without the ordinary comforts of life.

The commission respectfully submits the following specific findings and recommendations:

It is not feasible to establish and maintain a central tuberculosis sanitarium in New Mexico for the treatment of Indians generally, for the following reasons:

It is not feasible to establish and maintain a central tuberculosis sanitarium in New Mexico for the treatment of Indians generally, for the following reasons:

First. It would be an inefficient and inadequate method of combating the disease. The commission does not regard the establishment of a central tuberculosis hospital at any point as feasible or advisable. In reaching this conclusion we have been governed by the experience and judgment of many representative Indians themselves, and of the officers and employees in the Indian service and health service, who have devoted special attention to the question.

No considerable number of Indians afflicted with tuberculosis would avail themselves willingly of treatment in such a hospital. The Indians almost unanimously regard the establishment of a central hospital as impracticable. It would only be availed of by Indians living on near-by reservations. Indian parents would not consent to the removal of afflicted children for treatment to a hospital so remote that they would be deprived of seeing them in person and administering to their wants. It is certain that in order to accomplish any substantial benefits by a central sanitarium it would be necessary to enact a statute authorizing the forcible removal of patients from their homes to the hospital and their confinement there.

Moreover, such a system could only provide for comparatively few of the total number of Indians who need treatment.

Second. A much more comprehensive remedy can be afforded by the establishment of camp hospitals, in the nature of temporary sanitariums, for the treatment of tuberculous Indians on the reserval reservations where the disease is known to be common. These hospitals should be temporary and inexpensive, provided with necessary apparatus, experienced nurses, and physicians. It will probably not be necessary to provide for the forcible removal of tuberculous Indians to these camp hospitals. Nearly all of the Indians would consent to the removal of whom can be restored to health.

high percentage could not be maintained in an hospitals to be classifished.

Third. While the proposed site in New Mexico is in some respects admirably adapted to the purpose, for the reason already stated we do not believe it advisable to establish and maintain a central sanitarium. If it be thought necessary to provide a hospital for the benefit of the Indians on the Mescalero Reservation and other reservations in New Mexico, we believe the remoteness of the proposed site from any railway station and its inaccessibility to the greater number of the Indians on the Mescalero Reservation render it undesirable as a site for even a camp hospital, which should be located near the agency.

The treatment to be afforded at these camp hospitals should be supplemented by a vigorous campaign throughout the Indian country giving systematic instruction in sanitary habits and methods of living, looking toward the making and enforcement of reasonable sanitary regulations. The details should be worked out and developed by the public service. The importance of the problem calls for vigorous and prompt action.

II.

THE NECESSITY AND FEASIBILITY OF PROCURING IMPOUNDED WATERS FOR THE YAKIMA INDIAN RESERVATION OR THE CONSTRUCTION OF AN IRRIGATION SYSTEM UPON SAID RESERVATION TO IMPOUND THE WATERS OF THE YAKIMA RIVER, WASH., FOR THE BENEFIT OF THE INDIANS OF SAID RESERVATION.

The second part of the task assigned this joint commission of Congress relates to a subject quite distinct and disconnected from any question of health or sanitation. It involves many disputed facts, complicated questions of law, and policies of far-reaching importance. In addition to investigating the feasibility of a general tuberculosis sanitarium in New Mexico for Indians, the commission is charged with

investigating the necessity of procuring impounded waters from the Yakima River, in the State of Washington, for the use and benefit of the Yakima Indian Reservation.

A brief historical statement of the subject will be of value and im-

portance.

TREATY OF 1855 WITH VAKIMA AND ASSOCIATED INDIAN TRIBES

TREATY OF 1855 WITH YAKIMA AND ASSOCIATED INDIAN TRIBES,
In 1855 the United States made a treaty, ratified in 1859, with the
Yakima and associated Indian tribes in the State of Washington by the
terms whereof said Indians ceded a large area of lands to the United
States, reserving to themselves what is known as the Yakima Indian
Reservation, the same being definitely described.
Said reservation comprises about 1.092,819 acres, of which approximately 120,000 acres in the basin of the Yakima River are irrigable.
The exclusive right of taking fish in all the streams running through
or bordering the reservation was expressly reserved by the treaty to the
Indians.

At the time of this freaty irrigation was little known, and it does

mately 120,000 acres in the bash of the Yakima River are irrigable.

The exclusive right of taking fish in all the streams running through or bordering the reservation was expressly reserved by the treaty to the Indians.

At the time of this treaty irrigation was little known, and it does not the treaty. It is certain to the irreaty, and the intervent of the irreaty. It is certain to the irreaty, it is certain to the irreaty. It is certain to the irreaty, it is certain to the irreaty. The controlling purpose of the treaty, however, was to make possible the permanent settlement of the Yakima Indians and their transformation into an agricultural people.

"The treaty was not a grant of rights to the Indians, but a grant of rights from them—a reservation of rights not granted." (U. S. v. Winna, 180 and 181 and 181

resenting the various interests involved appeared before the commission and submitted their views in detail.

A part of this testimony has already been printed, and the remainder is herewith submitted.

After a careful consideration of the whole subject and the entire record, the following findings of fact and recommendations are submitted for such consideration and action as the Congress may deem necessary and advisable.

1. That the allowance by the former Secretary of the Interior, Mr. Hitchcock, of 147 cubic feet per second of water of the low-water flow of the Yakima Rilver for the use and benefit of the irrigable lands on the Yakima Indian Reservation was when made, and now is, inadequate, inequitable, and unfair to said Indian reservation.

2. From a consideration of users other than those on said reservation, and that the low-water flow of the Yakima Rilver is insufficient to supply their needs and the requirements of said reservation. We therefore believe that the United States should provide for the use and benefit of the irrigable portion of said reservation, free from storage cost and storage-maintenance cost, sufficient water to equal the amount to which said reservation was equitably entitled when the finding of Secretary Hitchcock was made.

While its difficult to determine what this amount should be, we are convinced that it should not be less than one-half of the natural flow of the Yakima River and should be sufficient to irrigate one-half of each allotment of irrigable land on said reservation; that this will cost approximately \$500.000, and we recommend that an appropriate one-half of each allotment of irrigable land on said reservation may demand and on estimates to be submitted, and \$500.000 being the amount we believe necessary to purchase such free water, in addition to the amount now available for the Irrigable allotments in excess of the area to be furnished water free, the allottees may be permitted, but should not be required, to sell the same, or any portion thereof, under such term

part of the bills for and audited.

Respectfully submitted.
Senator Joe T. Robinson, of Arkansas (chairman),
Senator Chas. E. Townsend, of Michigan,
Representative Jno. H. Stephens of Texas,
Representative Chas. H. Burke of South Dakota,

Joint Commission of Congress.

Ross Williams, of Arkansas, Special Clerk and Stenographer for the Commission.

Mr. SHEPPARD. Mr. President, I ask unanimous consent that the very admirable speech delivered by the Senator from Arkansas [Mr. Robinson], in presenting his report on Indian affairs, be made a part of the report and published with it. Mr. SMOOT. Mr. President, I shall have to object to that

request. I do it with some hesitation, I will say to the Senator from Texas, but the Senate and the House have repeatedly gone on record as opposed to printing as a public document any address that may have been delivered in the Senate or the House. It is not proper, Mr. President, and it should not be allowed. It is for that reason that I object.

Mr. SHEPPARD. I regard the speech as a part of the report;

really as being a summary of the report.

Mr. SMOOT. Everyone who is interested in this question will know by the report itself that the speech was delivered. The speech is in the RECORD, and anyone who desires can have it sent through the mails just the same as if it were a public document. I hope the Senator from Texas will not press the request further. I will say if he does, I shall have to object.

Mr. SHEPPARD. In view of the statement made by the Sen-

ator from Utah, I will withdraw the request.

PETITIONS.

Mr. WEEKS presented a petition of sundry citizens of Huntington, Mass., praying for the passage of the so-called antipolygamy bill, which was referred to the Committee on the Judiciary.

He also presented petitions of the Board of Aldermen of Medford; of the Board of Trade of Stoneham; and of Local Lodge No. 281, Brotherhood of Boiler Makers and Iron Ship Builders of America, of Roslindale, all in the State of Massachusetts, praying for the construction of the proposed supply

ship for the Navy at the Boston Navy Yard, which were referred to the Committee on Naval Affairs.

Mr. BRISTOW presented a petition of Sunflower Court, No. 7, Guardians of Liberty, of Emporia, Kans., praying for the enactment of legislation authorizing a literacy test for immigrants to this country, which was referred to the Committee on Immi-

He also presented a petition of the Good Roads Club of Wilsey, Kans., praying for the enactment of legislation providing for the construction and maintenance of national highways by the Government, which was referred to the Committee on Agriculture and Forestry.

He also presented a petition of sundry citizens of Haven, Kans., praying for the enactment of legislation to prevent lobbying by religious societies, which was referred to the Committee on the Judiciary.

ADDRESS BY ROME G. BROWN (S. DOC. NO. 332).

Mr. FLETCHER. From the Committee on Printing I report favorably on the application of the Senator from Alabama [Mr. Bankhead] to print as a Senate document an address delivered by Mr. Rome G. Brown before the National Rivers and Harbors Congress, December 5 last, on the subject of the obstacles to the improvement of navigable rivers. I ask that the report be considered now and the document ordered printed.

The VICE PRESIDENT. Is there objection to printing the address as a document? The Chair hears none, and it is so ordered.

TREATIES AND CONVENTIONS.

Mr. FLETCHER. I should like to have unanimous consent to consider and dispose of the concurrent resolution which was reported yesterday from the Committee on Printing as a substitute for Senate resolution 210, in reference to the printing of treaties and conventions, found on page 1187 of the RECORD. is Senate concurrent resolution No. 11.

There being no objection, the Senate proceeded to consider the concurrent resolution, which was read as follows:

Resolved by the Senate (the House of Representatives concurring), That there be printed for the use of the Senate 1,000 additional copies of Senate Document No. 357, volumes 1 and 2, Sixty-first Congress, and Senate Document No. 1063, Sixty-second Congress, being a compilation of the treaties, conventions, international acts, protocols, and agreements between the United States of America and other powers from 1776 to 1913; and that the superintendent of documents is hereby authorized to order reprinted such copies of the foregoing documents as may be required for sale by his office in accordance with law.

The VICE PRESIDENT. The question is on agreeing to the concurrent resolution.

The concurrent resolution was agreed to.

INTERNATIONAL MARITIME CONFERENCE.

Mr. MARTIN of Virginia. Mr. President, I report back favorably from the Committee on Appropriations, without amendment, the bill (H. R. 11003) to provide for expenses of representatives of the United States at the International Maritime Conference for Safety of Life at Sea, and I ask unanimous

consent for its present consideration.

The VICE PRESIDENT. The bill will be read for the infor-

mation of the Senate. The Secretary read the bill, as follows:

Be it enacted, etc., That for the expenses of the representatives of the United States at the International Maritime Conference for Safety of Life at Sea, now in session at London, there is appropriated, out of any money in the Treasury not otherwise appropriated, the sum of \$5,000 in addition to the appropriation of \$10,000 made in the joint resolution approved June 28, 1912, entitled "Joint resolution proposing an international maritime conference."

The VICE PRESIDENT. Is there objection to the present consideration of the bill?

There being no objection, the bill was considered as in Com-

mittee of the Whole.

Mr. MARTIN of Virginia. Mr. President, perhaps I ought to explain the bill, which I can do in a very few words. In June last a joint resolution of Congress invited this conference, and authorized the President, in case the Governments of foreign nations agreed to send representatives to it, to appoint representatives for the United States. An appropriation of \$10,000 was made to defray the expenses of the representatives of the United States, to be appointed by the President under the joint

That conference is now in session in London. Its sessions have been prolonged beyond the time originally contemplated, and the appropriation of \$10,000 has been exhausted. The American representatives will have to withdraw from the conference and return home unless a further appropriation is made, although the conference was held at the initiative of the United

Those facts were communicated to the President by the chairman of the American delegation, and the Secretary of State has made a recommendation that this additional appropriation of \$5,000 shall be made, stating that it is absolutely necessary and

immediately urgent.

The communication of the Secretary of State went, as is usual in such matters, to the Secretary of the Treasury, who in turn recommends that the appropriation be made. The Secretary of State in his communication states that he recommends the appropriation with the approval of the President of the United States. So the appropriation is recommended by the Secretary of State and by the Secretary of the Treasury, and in addition to that I have a letter from the Secretary of Commerce also urgently recommending that the appropriation be made.

I will not take the time of the Senate to read these commu-

nications, feeling sure that the Senate will concur with the House in the passage of the bill.

Mr. SMOOT. Mr. President, I will state my reason for not objecting to the consideration of the bill. This conference was held upon the invitation of the Government of the United States. If it had not been so held, I would certainly object. I would object to the passage of a measure giving an additional amount to pay the expenses of delegates to any foreign conference that would otherwise be held. But I believe that the United States having issued the invitation it would be very unfortunate, indeed, for our delegates to withdraw from the convention at this time.

Mr. NELSON. Mr. President, I desire to say that I have taken a great deal of interest in this matter. An appropriation was originally made of \$10,000. It became evident at the last session of Congress that an additional appropriation was needed, and it was recommended by the department. I made an effort at that time with the Appropriations Committee, and introduced. I think, an amendment to that effect, to secure just this appropriation, but at that time I was met with no favor. am glad to see that what ought to have been done then will

finally be done on this occasion.

Mr. OLIVER. Mr. President, I happened to meet with the American delegates at this congress when I was in London a few weeks ago. They are doing a very good work there. think the congress will be productive of great good. time our delegates informed me that the appropriation was about exhausted and that they would be compelled to return home before their labors were finished unless an increase was granted.

I am very glad, indeed, that the administration and the committees of Congress have seen proper to recommend this appropriation, and I trust that the bill will pass without any oppo-

Mr. NELSON. Mr. President, I wish to correct a misapprehension. I do not think it was through the fault of the chairman of the Committee on Appropriations of the Senate that we failed to make the appropriation at the last session. The objection came from other sources and other quarters. I do not jection came from other sources and other quarters. want the chairman of the committee to understand that I am

criticizing him at all with respect to the matter.

Mr. WARREN. Mr. President, I agree in a general way with the remark the Senator from Utah [Mr. SMOOT] made about a second appropriation for such commissions. They ought to keep within the amount that was originally appropriated. say, however, that in this case more money was asked for, and the reason why only \$10,000 was embraced in the joint resolution at the last session was because we could not get those on the House side to agree to the amount that those on the Senate side sought to give. As a result, only \$10,000 was appropriated, which was evidently too small an appropriation.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

CONDITIONS IN MEXICO.

Mr. LEWIS. Mr. President, I ask the unanimous consent of the Senate to allow to be printed as a public document the following matter. The Chicago Tribune has had a special representative in Mexico, who has written a series of articles upon the actual conditions in that country, some favorable to the contention which we on this side represent in supporting the President and some unfavorable.

I respectfully ask unanimous consent to have those articles printed as a public document, that they may serve as information to Senators. The articles are illuminating and from an influential paper, eminent in America. They are reports of a

date some within the last 30 days.

Mr. SMOOT. Mr. President, I do not know of anyone who is not supporting the President in his Mexican policy. know what is contained in the articles submitted by the Sena-It seems to me that they ought to be referred to the Committee on Printing, and if, in their judgment, after examination, they think they ought to be published as a document, of course

they will report back the matter and ask the Senate to print

Mr. LEWIS. I thank the Senator, and-

Mr. BACON. I suggest-

Mr. LEWIS. I yield to the Senator from Georgia.

Mr. BACON. The VICE PRESIDENT. May the Chair inquire of the Senator from Illinois as to whether the articles come from Mexico? Mr. LEWIS. I answer yes; by a person traveling in Mexico for the purpose of making observations under directions of a great agency of America-a leading Chicago newspaper-

The VICE PRESIDENT. Then the Chair will be compelled to rule that unless presented to the Senate through the Department of State or the President of the United States they are not before the Senate, because foreign communications come in

Mr. LEWIS. Mr. President, permit me to accept the suggestion of the Senator from Utah and the Senator from Georgia that the articles be referred to the Committee on Printing, that a report may be then made as to whether the contents would entitle them to be printed or whether they are within the ban suggested by the Vice President according to their contents. They do not relate to political features, I might add, but merely to the geographical features and the conditions as they are—mere physical conditions.

The VICE PRESIDENT. The matter will be referred without reading and without introduction into the RECORD to the Committee on Printing. The Chair desires to call the attention of the Committee on Printing, however, to the rule with refer-

ence to communications coming from foreign countries.

Mr. LEWIS. May I correct a false impression I seem to have left? They are communications not from a foreign country, nor touching the country as a country, but the conditions there of farmers and laborers—the general business conditions and the general physical conditions-written by an American citizen who has gone there to make an examination, not touching the political phase nor the martial phase, save as incidentally touched upon in its effect on farms and factories and the general industries of the country. If it can go to the Committee on Printing, I think the committee will solve whatever question there may be.

The VICE PRESIDENT. The matter will be referred to the

Committee on Printing.

Mr. BACON. I hope when the report comes back, before action on it by the Senate, it may have the examination of the Committee on Foreign Relations.

Mr. LEWIS. The suggestion meets my approval, sir. I have

no objection whatever.

The VICE PRESIDENT. The Senate has it in its power to do what it pleases with the matter when it comes back.

BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows

By Mr. OLIVER:

A bill (S. 3797) granting a pension to Charles Rossman (with accompanying papers); to the Committee on Pensions.

By Mr. BRISTOW:

A bill (S. 3798) granting a pension to James Young (with accompanying papers); and

A bill (S. 3799) granting a pension to Nancy E. Elmore (with accompanying papers); to the Committee on Pensions.

By Mr. JONES:

A bill (S. 3800) making an appropriation for aids to navigation in Alaska; to the Committee on Commerce.

bill (S. 3801) donating a site upon which to construct a building as a monument to commemorate the women of the Civil War; to the Committee on the Library.

A bill (S. 3802) for the relief of the heirs of Joshua Curtis. deceased; to the Committee on Claims.

A bill (S. 3803) granting a pension to Helen A. Burrill; to the Committee on Pensions.

By Mr. CHILTON:

A bill (S. 3804) for the relief of Templin Morris Potts, captain on the retired list of the United States Navy (with accompanying papers); to the Committee on Naval Affairs.

By Mr. KENYON: A bill (S. 3805) for the relief of the successors in interest of homestead entrymen and settlers upon the public domain; to the Committee on Public Lands.

By Mr. NORRIS: A bill (S. 3806) granting an increase of pension to Robert R. Polk; to the Committee on Pensions.

By Mr. WARREN:
A bill (S. 3807) granting a pension to Florence M. Craigie; to the Committee on Pensions.

By Mr. BRADLEY:
A bill (S. 3808) to carry out the findings of the Court of Claims in the case of James Harvey Dennis; to the Committee on Claims.

By Mr. KERN: A bill (S. 3809) granting an increase of pension to Zach J. Burns (with accompanying papers); and

A bill (S. 3810) granting a pension to Ella Hawkins (with accompanying papers); to the Committee on Pensions. By Mr. STEPHENSON:

A bill (S. 3811) granting an increase of pension to Susan Thompson (with accompanying papers);

A bill (S. 3812) granting an increase of pension to Frank

La Plante (with accompanying papers);

A bill (S. 3813) granting an increase of pension to Amelia Peabody (with accompanying papers);

A bill (S. 3814) granting a pension to Frederick Mertens

(with accompanying papers);

A bill (S. 3815) granting an increase of pension to Lou E. Hecox (with accompanying papers); and

A bill (S. 3816) granting an increase of pension to Alexander Ledessimer (with accompanying papers); to the Committee on

Pensions. By Mr. MYERS:

A bill (S. 3817) authorizing the issuance of a patent to James Gunning for lot 2, section 32, township 29 north, range 39 east, Montana; to the Committee on Public Lands.

By Mr. JOHNSON:

A bill (S. 3818) to correct the naval record of Thomas Taylor: and

A bill (S. 3819) for the relief of Charles P. Ryan; to the Committee on Naval Affairs.

A bill (S. 3820) granting an increase of pension to George N. Townsend:

A bill (S. 3821) granting an increase of pension to Willard R. Merrill:

A bill (S. 3822) granting a pension to Mary O'Neil;

A bill (S. 3823) granting an increase of pension to John W. Nash:

A bill (S. 3824) granting a pension to Ernest H. Robbins;

A bill (8, 3825) granting a pension to Delia D. Watson;

A bill (S. 3826) granting a pension to John H. Rollins: A bill (S. 3827) granting a pension to Eva M. Roberts:

A bill (S. 3828) granting a pension to Arthur H. King; bill (S. 3829) granting an increase of pension to Mary

J. White; A bill (S. 3830) granting an increase of pension to Francis

Cyr

A bill (S. 3831) granting a pension to Susan B. Merrill;

A bill (S. 3832) granting an increase of pension to Frank H. Oliver:

A bill (S. 3833) granting a pension to Eliza F. Withee (with accompanying papers);

A bill (S. 3834) granting an increase of pension to Caleb Emery (with accompanying paper);

A bill (S. 3835) granting an increase of pension to Daniel Libbey

A bill (S. 3836) granting a pension to Priscilla T. Brewster;

A bill (S. 3837) granting a pension to Henry M. Libby; to the Committee on Pensions.

By Mr. HUGHES:

A bill (S. 3838) granting a pension to Addison B. Burroughs; to the Committee on Pensions.

By Mr. McCUMBER: A bill (S. 3840) granting an increase of pension to Lilla A. Holliday (with accompanying papers);
A bill (S. 3841) granting an increase of pension to Allen H.

De Groff; and

A bill (S. 3842) granting an increase of pension to William H. Marsden (with accompanying papers); to the Committee on Pensions.

A bill (S. 3843) for the relief of Bellevadorah Steele; to the Committee on Claims,

By Mr. MARTIN of Virginia; A joint resolution (S. J. Res. 92) authorizing the governor of any State to loan to military colleges and schools within his

State by the United States under the provisions of existing laws; to the Committee on Military Affairs.

PROHIBITION OF POLYGAMY.

Mr. WEEKS. I introduce a joint resolution, which I ask to have read.

The joint resolution (S. J. Res. 91), proposing an amendment to the Constitution of the United States, was read the first time by its title and the second time at length, as follows:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled (two-thirds of each House concurring therein), That the following article is proposed as an amendment to the Constitution of the United States, which, when ratified by the legislatures of three-fourths of the several States, shall be valid to all intents and purposes as a part of the Constitution of the United States, namely: States, namely:

"ARTICLE XVIII.

"Section 1. Polygamy shall not exist within the United States or any place subject to its jurisdiction.

"Sec. 2. Congress shall have power to enforce this article by appropriate legislation."

Mr. WEEKS. Mr. President, I wish to say that I introduce the joint resolution at the request of many citizens of Massachusetts, who think there is reason that it be given consideration. I have not made sufficient investigation myself to justify me in indorsing it otherwise than to desire that those citizens shall have an opportunity to be heard. Therefore I ask that the joint resolution be referred to the Committee on the Judiciary.

The VICE PRESIDENT. It will be so referred.

BILL TO REPEAL HETCH HETCHY GRANT.

Mr. WORKS. I introduce a bill and I ask that it may be After it is read I wish to make a brief statement as to

its object and the reason for its introduction.

The bill (S. 3839) to repeal an act entitled "An act granting to the city and county of San Francisco certain rights of way in, over, and through certain public lands, the Yosemite National Park, and Stanislaus National Forest, and certain lands in the Yosemite National Park, the Stanislaus National Forest, and the public lands in the State of California, and for other purposes," approved December 19, 1913, and to revoke the grant made thereby, was read the first time by its title and the second time at length, as follows:

Be it enacted, etc., That an act entitled "An act granting to the city and county of San Francisco certain rights of way in, over, and through certain public lands, the Yosemite National Park, and Stanislaus National Forest, and certain lands in the Yosemite National Park, the Stanislaus National Forest, and the public lands in the State of California, and for other purposes," approved December 19, 1918, be, and the same is hereby, repealed, and the grant thereby made to the city and county of San Francisco for the benefit of said city and county and other cities be, and the same is hereby, revoked and declared of no effect.

Mr. WORKS. Mr. President, the introduction of this bill at so early a day to revoke the grant made by Congress to San Francisco needs some explanation. It is done for the following reasons, besides others that might be mentioned:

1. The bill granting the right of way was passed without any adequate investigation and under a complete misunderstanding

and misapprehension of the facts.

2. The claims made, and which undoubtedly influenced Members of Congress in both Houses to support the bill, that San Francisco was immediately in need of more water and that she could not obtain an adequate supply of water from any other source than Hetch Hetchy, were not supported by any evidence, were untrue, and clearly disproved by the evidence of every engineer who investigated these questions on both sides of the

3. The claims made that the bill made ample provision for the landowners and that there was sufficient water in the Tuolumne River to supply both San Francisco and the San Joaquin Valley lands vere equally unfounded.

4. That the exercise of the privileges of the grant by San Francisco will leave at least 200,000 acres of land wonderfully. fertile with irrigation barren and practically worthless

5. The passage of the bill making this important grant was procured by questionable means that should of themselves induce Congress to revoke the grant:

(a) It was supported by one of the most powerful and insidious lobbies ever assembled in support of any bill in Congress.

(b) That lobby deceived and misled Members of Congress by misrepresentations and false statements, upon which they relied and without which the bill never could have passed.

(c) The San Francisco Examiner, out of selfish and interested motives, was filled with misstatements of facts and misleading matter. A special edition of the paper printed in Washington on the eve of the passage of the bill, for the purpose of influencing the votes of Senators, contained signed statements of three members of the Cabinet and the Vice President, under flaring State such tents and camp equipage as have been issued to the headlines and accompanied by their pictures, favoring the passage of the bill, thus making it appear that the bill was an administration measure. How these signed statements, intended to influence the action of Members of this body on a bill of grave importance, were obtained, or by whom; why they were put out in this form, or how much the signers of them knew about the facts or the merits of the bill, have not been disclosed, but I take it for granted that their use in that way was unauthorized by the signers of them. The owner and publisher of this same newspaper brought his attorneys and emissaries here from New York and Chicago, and perhaps other places, to labor with Senators over whom they were supposed to have influence to secure their support of the bill.

6. Ex-Federal officers were supporting the bill, not on its merits but because its passage would be a precedent for Federal encroachment on the rights of the States in the matter of controlling the distribution, sale, and use of water and electric power. This purpose was openly avowed. These men were willing to sacrifice the rights of the people of my State and destroy their property and homes to establish a pernicious precedent that might lead to further violations of the rights of the

7. On the other hand, Members of this body who had theretofore stood for the rights of the States in this respect and who had in other instances voted and spoken against bills of the kind, but not so obnoxious in that particular as this one, both spoke and voted for this bill, containing the very same objectionable provisions that they had so vehemently combated on previous occasions.

8. The conditions demand a full and unbiased investigation of the needs of both San Francisco and the landowners of the

San Joaquin Valley, that justice may be done.

9. The National Government holds the Yosemite National Park, of which Hetch Hetchy is a part, in trust for the use of the whole people as a public park and can not in right or justice commit it or any part of it to other uses, and particularly to commercial purposes. Much less can the Government justly or reasonably make its control of this or any other park the means of making money by selling rights in it to impound water or generate power.

10. The grant was made to 26 cities, none of which except San Francisco have any rights in the waters of the stream and none of which are willing to accept or share in the benefits of

the grant.

11. The grant is for privileges that will enable San Francisco to store ten times as much water as she needs or will need for a hundred years, and to generate many times the amount of electric power she will need for use within that time.

12. The fact having been clearly shown and not disputed by anyone having knowledge of the facts that San Francisco could secure all the water she needed or would need for a century from other sources at reasonable cost, as compared with Hetch hetchy, it was a palpable and unjustifiable breach of trust for the National Government to permit Yosemite Park to be used for a reservoir site.

13. The bill was reported out of the Committee on Public Lands in the absence of a number of its members known to be opposed to it and without any adequate hearing, and was made a special order by unanimous consent when but a few Senators were present, thus shutting off all further hearing or investigations that were being demanded by people deeply and vitally interested in the subject.

14. The impounding of the water as provided for in the act will exclude all people from the Hetch Hetchy Valley and water-

shed.

Mr. President, knowing, as I do, that this act was passed under a total misapprehension of the facts and that its passage was procured under false pretenses, knowing that San Francisco does not need the use of the water of the Tuolumne River and that to allow her to take it will mean an unnecessary and perpetual loss of millions of dollars every year to the farmers of California and to the farm products of the country, and firmly believing that to allow San Francisco to store the water that she does not need in the Hetch Hetchy Valley will permanently destroy one of the most magnificent and entrancing natural beauties of this country and of the world in violation of the trust of the National Government to preserve it, my sense of duty to my State and to the country impels me to make one more effort to prevent the final consummation of this great wrong.

This question has not yet been fully or fairly investigated. No such hearing by any committee of Congress as would disclose the truth respecting this important matter has been had. I shall feel it my duty to insist upon a full, fair, and impartial investigation, so that every Member of Congress may be informed and vote intelligently on a question so vital to the best interests of my State.

Mr. President, I ask that the bill may be appropriately referred.

Mr. WILLIAMS. Mr. President, if we have arrived at that stage-I do not know whether we have or not-that we have

reached the calendar—
The VICE PRESIDENT. The Chair is merely considering to what committee to refer the bill introduced by the Senator from California [Mr. Works] in view of the statement which he has just made.

Mr. PERKINS. I suggest that the bill be referred to the

Committee on Public Lands.
Mr. BACON. Mr. President, if morning business has closed, I wish to submit a motion.

The VICE PRESIDENT. The morning business is not yet closed. The bill introduced by the Senator from California [Mr. WORKS] will be referred to the Committee on Public Lands.

Mr. NELSON. I wish the Senator from Mississippi would withhold his motion for a moment. I have a little local bill which I should like to have considered.

Mr. WILLIAMS. For what purpose does the Senator from Minnesota desire me to yield?

Mr. NELSON. I desire to ask unanimous consent for the consideration of a local bill relating to Minnesota.

Mr. WILLIAMS. I rose for a similar purpose. If the Senator from Minnesota will wait a minute, I will try to get my bill through.

OMNIBUS CLAIMS BILL.

Mr. PAGE submitted an amendment intended to be proposed by him to the omnibus claims bill, which was ordered to be printed and, with the accompanying paper, referred to the Committee on Claims.

THE MILITARY ACADEMY.

Mr. CHAMBERLAIN submitted the following resolution (S. Res. 236), which was referred to the Committee on Military Affairs .

Thereas it has been stated that a condition very detrimental to the discipline and welfare of the United States Military Academy exists: Therefore be it

discipline and welfare of the United States Military Academy exists: Therefore be it

Resolved by the Senate of the United States, That the Committee on Military Affairs be, and the same is hereby, authorized and directed to investigate the conditions now existing at the United States Military Academy at West Point, N. Y., both as to discipline of cadets and the conduct of the officers and professors of said academy in their relations to the cadets and to the affairs of the academy generally.

Said Committee on Military Affairs, or any subcommittee thereof, is hereby empowered to sit and act during the session of Congress or of either House thereof at such time and place as it may deem necessary; to require by subpœna or otherwise the attendance of witnesses and the production of papers, books, and documents; to employ stenographers at a cost not exceeding \$1 per printed page; to take and make a record of all evidence taken and received by the committee and keep a record of its proceedings; to have such evidence, record, and other matter required by the committee printed; and to employ such other clerical assistance as may be necessary. The chairman of the committee or any member thereof may administer oaths to witnesses. Subpœnas for witnesses shall be issued under the signature of the chairman of the committee or subcommittee thereof. Every person who having been summoned as a witness by authority of said committee or any subcommittee thereof willfully makes default or who having appeared refuses to answer any questions pertinent to the investigation herein authorized shall be held to the penalties provided by section 102 of the Revised Statutes of the United States.

The expenses thereof shall be paid from the contingent fund of the Senate on vouchers ordered by said committee, signed by the chairman thereof, and approved by the Committee on Contingent Expenses.

JOHN S. M'KINNEY.

Mr. WILLIAMS. I ask unanimous consent for the present consideration of the bill (S. 3192) waiving the age limit for appointment as cadet engineer in the Revenue-Cutter Service of the United States in the case of John S. McKinney. The bill has been unanimously reported favorably from the Committee on Commerce.

The VICE PRESIDENT. Is there objection to the present consideration of the bill?

Mr. SMOOT. Let the bill be read. I did not hear what the request was

The VICE PRESIDENT. The Secretary will read the bill.

The Secretary read the bill (S. 3192) waiving the age limit for appointment as cadet engineer in the Revenue-Cutter Service of the United States in the case of John S. McKinney, as follows:

Be it enacted, etc., That the Secretary of the Treasury is hereby authorized to waive the age limit for the appointment of cadet engineers in the Revenue-Cutter Service, as required by the act of June 23, 1906, in the case of John S. McKinney, and that the Secretary of the Treasury is authorized to permit the said John S. McKinney to participate in the next competitive examination to be held for the position of cadet engineer in the Revenue-Cutter Service.

The VICE PRESIDENT. Is there objection to the present consideration of the bill?

Mr. SMOOT. I desire to ask the Senator from Mississippi what are the reasons why the age limits should be waived in this case?

Mr. WILLIAMS. I will briefly state them. Mr. McKinney took the examination on May 5, 1912, with only 10 days' notice after a sea service of five months. His mark was below the passing point. Then, under the impression that the age limit was 27 years, he came back and took the examination again and passed. Then he found that he was disqualified because he was over 26, which is the real age limit. He was at that time a little less than a year over the age.

This man has served in the Naval Militia, engineering division, three years; has been apprentice machinist in the Washington Navy Yard two years and five months; apprentice draftsman, Washington Navy Yard, a year and a month; third-class copyist draftsman, Washington Navy Yard, a year and two months; second-class copyist draftsman, Bureau of Steam Engineering, seven months; third-class assistant draftsman there a year and three months; and is assistant draftsman there at present. In addition to that, he has served upon 3 battleshipsthe Arkansas, the Wyoming, and the Texas-upon 12 destroyers and 5 colliers. So he has had abundant training in the service.

In addition to that, I will state to the Senator that there is a letter here from Capt. W. Strother Smith, of the United States Navy, telling what good service Mr. McKinney has rendered, and recommending him in case he passed the examination as peculiarly fitted for the position which he seeks. There are also letters from Mr. Woodward, of the George Washington University, where Mr. McKinney studied, and from Lieut. Commander U. T. Holmes, United States Navy, telling of his peculiar qualifications as a draftsman. The other naval officer told about his service aboard the battleships.

Mr. SMOOT. Does the Senator know whether the question of

Mr. SMOOT. Does the Senator know whether the question of his age was considered at the time he took the second examina-

tion? Mr. WILLIAMS. He was rejected on that account.

Mr. SMOOT. But he did pass a successful examination? Mr. WILLIAMS. That is my understanding. After the first examination he returned from five months' sea service and took the examination at once. He failed by 13 points on that first examination. From that time until May 19 his time was spent in preparation for the last examination, which was held on June 23. It was his impression that he was eligible for appointment until his twenty-seventh birthday, but he was notified that he could not be appointed because after June 7, 1913, he would be 26 years of age and thus ineligible. He did not pass the second examination, having been forbidden to stand it because he had passed the age limit. He wants now merely the permission granted by the bill to take the examination. That is all that he

desires—merely to waive the ineligibility on account of age.

Mr. SMOOT. I will not object, Mr. President.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

Mr. WILLIAMS. I ask that the report of the committee be

printed in the RECORD.

There being no objection, the report submitted by Mr. Cham-BERLAIN on October 30, 1913, was ordered to be printed in the RECORD, as follows:

Report to accompany S. 3192.

The Committee on Commerce, to whom was referred the bill (S. 3192) waiving the age limit for appointment as cadet engineer in the Revenue-Cutter Service of the United States in the case of John S. McKinney, having considered the same, report thereon with a recommendation that it pass without amendment.

RESTORATION TO PUBLIC DOMAIN OF LANDS IN MINNESOTA.

Mr. NELSON. I ask unanimous consent for the present consideration of the bill (S. 1784) restoring to the public domain certain lands heretofore reserved for reservoir purposes at the headwaters of the Mississippi River and tributaries.

The VICE PRESIDENT. The Secretary will read the bill

for the information of the Senate.

The Secretary read the bill, as follows:

The Secretary read the bill, as follows:

Be it enacted, etc., That there is hereby restored to the public domain, subject to the easement provided for in section 2 hereof, any and all lands hitherto reserved by Executive order in connection with the construction, maintenance, and operation of reservoirs at the headwaters of the Mississippi River and its tributaries the restoration of which the Secretary of War has recommended or may hereafter recommend to the Secretary of the Interior.

Sec. 2. That the lands hereby restored shall forever be and remain subject to the right of the United States to overflow the same or any part thereof by such reservoirs as now exist or may hereafter be constructed upon the headwaters of the Mississippi River, and all patents issued for the lands hereby restored shall expressly reserve to the United States such right of overflow.

Sec. 3. That the time when such restoration shall take effect as to any of such lands shall be prescribed by the Secretary of the Interior; and in all cases where actual settlement has been made on any of said

lands prior to January 1, 1912, and improvements made the said settlers shall have a preferred and prior right to enter and file on said lands under the homestead law for the period of 90 days following the time fixed hereunder for the restoration of the lands.

SEC. 4. That no rights of any kind, except as specified in the foregoing section, shall attach by reason of settlement or squatting upon any of the lands hereby restored to entry before the hour on which such lands shall be subject to homestead entry at the several land offices, and until said lands are opened for settlement no person shall enter upon and occupy the same except in the cases mentioned in the foregoing section, and any person violating this provision shall never be permitted to enter any of said lands or acquire any title thereto.

The VICE PRESIDENT. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

Mr. KENYON. Mr. President, I will ask the Senator to ex-

plain the bill.

Mr. NELSON. The explanation is simple. Some 20 or more years ago provision was made by the Government for building five or six reservoirs at the headwaters of the Mississippi River. For the purpose of these reservoirs a large quantity of public land was withdrawn. The reservoirs have been long since built, and the lands the Government needs for those purposes have been used, leaving a lot of surplus lands. It is the purpose to restore the surplus lands that are not needed to homestead entry under the public-land laws of the United States. In order that the Government may be amply protected in case it should need them in the future, the lands are restored subject to the condition that if at any time the United States needs more of these lands to flood them for reservoir purposes it shall have the right to do so.

Mr. GALLINGER. The proposed legislation, I assume, does

not at all interfere with the existing reservoirs?

Mr. NELSON. Not at all. It is recommended both by the War Department and by the Interior Department.

Mr. KENYON. The right of overflow is reserved to the Government?

Mr. NELSON. Yes; the Government retains the right of

overflow The VICE PRESIDENT. If there be no amendments to be

proposed, the bill will be reported to the Senate.

The bill was reported to the Senate without amendment.

Mr. WALSH. Mr. President, I observe from the statement of the Senator from Minnesota that it is his view that the lands are made subject only to homestead entry. I observe, however, that they are unrestrictedly restored to the public domain, making them subject to entry of any character.

Mr. NELSON. They are the kind of lands which under our public-land laws can not well be entered under any other law. The preemption law has been repealed; the cash-entry law does not apply; and they will not come under the stone-and-timber I can not conceive of any law under which the lands could be entered except the homestead law.

Mr. WALSH. Could they not be entered under the soldiers'

additional homestead law?

Mr. NELSON. I think not; not these lands. Mr. WALSH. Why does not the Senator think so?

Mr. NELSON. I do not think the soldiers' additional homestead law would apply to those lands. They have been in a state of reservation, and by this bill they are restored. There are a number of settlers who have lived on the lands for many years; they have been in a state of reservation, and the object is to open the lands to those homestead settlers. They are given a preferential right in the bill, and whoever takes the lands takes them subject to the Government's right to overflow them at any time.

Mr. WALSH. Let me inquire further of the Senator whether

they would not be subject to any ordinary scrip entry.
Mr. NELSON. I hardly think so. I do not think so.

Mr. WALSH. I am quite sure that was not the intention of the Senator.

of the Senator.

Mr. NELSON. The only thing to which they might be subject would be, possibly, new selections in reference to the grant of the Northern Pacific Railroad. I can not think of anything else, because the lands, or a part of them, are within the limits of the indemnity grant of the Northern Pacific Railroad.

Mr. WALSH. They would be open, would they not, to selection under whatever rights still remain to select under the

forest-reserve act?

Mr. NELSON. I think not. They are mainly lands, I may say, of a swampy and marshy character. Part of them are covered with tamarack. They are what we call tamarack and cedar swamps.
Mr. WALSH.

It simply occurred to me that it might be advisable on general grounds, at least, to restrict entries to those under the homestead law. I prefer, however, to defer

to the judgment of the Senator from Minnesota with respect to

Mr. NELSON. This bill was prepared by the department, and it has their recommendation. It has the recommendation of the War Department and also of the Interior Department. not think there is any likelihood of anybody entering that kind of land with scrip.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed.

REGULATION OF OPIUM TRAFFIC.

Mr. SIMMONS. I ask unanimous consent for the present consideration of House bill 1966 and House bill 1967. First, I will ask the Senate to consider the bill (H. R. 1966) to amend an act entitled "An act to prohibit the importation and use of opium for other than medicinal purposes," approved February

Mr. President, I have no objection to the passage of these bills, but I suggest that we conclude the morning business and then let them be taken up.

Mr. SIMMONS. I supposed we had concluded morning busi-We have passed two or three local bills here by unanimous consent. These are bills that will lead to no debate.

Mr. JONES, I am not going to object.

Mr. SIMMONS. They are very short bills. They are unanimously reported by the committee, and the department is very anxious that they shall be passed.

Mr. JONES. I am not going to object; but I have some mat-

ters to present during the transaction of morning business, and I thought I might not be able to wait here until the whole matter was finished.

Mr. SIMMONS. I should not have asked for the consideration of the bills at this time but for the fact that I discovered we were passing some other bills by unanimous consent, and I supposed morning business had been concluded.

Mr. JONES. I thought that was the general understanding, and I wanted to call attention to the fact that it has not been

Mr. SIMMONS. I hope the Senaor will permit me to have these two bills passed. If they lead to any debate, I will not press them.

Mr. SMOOT. I am not going to object to the consideration of this bill, but I shall object to a unanimous-consent agreement for the consideration of any other bills during this morning

Mr. THOMAS. I hope the Senator will except the next bill, because the two are companions.

Mr. SIMMONS. They are two bills which are allied to each other.

Mr. SMOOT. I am fully aware of the nature of the bills, and I am heartily in favor of the passage of both of them. I did not know the Senator had requested the consideration of both.

Mr. SIMMONS. I have.

Mr. SMOOT. Then I shall not object to their consideration. Mr. SIMMONS. I have taken up House bill 1966, and now I am going to ask the Senate to take up House bill 1967. They are allied, and they ought to go together. One is to prohibit the manufacture of smoking opium, and the other is to prohibit the importation and exportation of it.

The VICE PRESIDENT. Is there any objection?

The Senate, by unanimous consent, proceeded to consider the bill, which had been reported from the Committee on Finance with amendments.

Mr. BURTON. Mr. President, as I understand, the proposed statute pertains exclusively to the exportation and importation of opium, and is brought here in pursuance of a convention into which the United States has entered with other powers. There is also another bill pending here providing an internal-revenue

Mr. SIMMONS. The last bill to which the Senator refers has not yet been reported out of the committee.

Mr. BURTON. Complaint has been made to me that there was a regulation in one of these bills to the effect that no opium should be used in any drug or other substance unless on the prescription of a physician. I am not sure but that the regulation was more severe

Mr. SIMMONS. That bill has not been reported out of the

Mr. BURTON.

Mr. BURTON. It is not here? Mr. SIMMONS. No. Mr. BURTON. I am entirely unfamiliar with the merits of the question; but a constituent of mine said that that requirement was unduly severe and would prevent the use of certain preparations which are useful rather than hurtful. That bill has not yet been reported?

Mr. SIMMONS. No. I will say to the Senator that hearings have been requested upon the bill, and it is still in committee. The two bills that have been reported are the one just read and another with reference to the manufacture of opium in this country.

The VICE PRESIDENT. The amendments of the Committee on Finance will be stated.

The SECRETARY. On page 4, line 21, before the word "regulations," it is proposed to insert the word "such"; after the word "regulations," to strike out "to be" and insert "as are"; and in lines 22 and 23, to strike out the words "the Secretary of State, the Secretary of the Treasury, and the Secretary of Com-merce," and insert "such country for the importation thereof into such country, such regulations to be promulgated from time to time by the Secretary of State of the United States," so as to make the proviso read:

Make the proviso read:

Provided, That oplum or cocaine, and salts, derivatives, or preparations thereof, except smoking oplum or oplum prepared for smoking, the exportation of which is hereby absolutely prohibited, may be exported to countries regulating their entry under such regulations as are prescribed by such country for the importation thereof into such country, such regulations to be promulgated from time to time by the Secretary of State of the United States.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

Mr. SIMMONS. I now ask unanimous consent for the present consideration of House bill 1967, regulating the manufacture of smoking opium within the United States, and for other pur-

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill had been reported from the Committee on Finance with an amendment, in section 1, page 1, line 8, to insert the words "Every person who prepares opium suitable for smoking purposes from crude gum opium, or from any preparation thereof, or from the residue of smoked or partially smoked oplum, commonly known as yen shee, or from any mixture of the above, or any of them, shall be regarded as a manufacturer of smoking oplum within the meaning of this act," so as to make the section read:

That an internal-revenue tax of \$200 per pound shall be levied and collected upon all opium manufactured in the United States for smoking purposes; and no person shall engage in such manufacture who is not a citizen of the United States and who has not given the bond required by the Commissioner of Internal Revenue. Every person who prepares opium suitable for smoking purposes from crude gum opium, or from any preparation thereof, or from the residue of smoked or partially smoked opium, commonly known as yen shee, or from any mixture of the above, or any of them, shall be regarded as a manufacturer of smoking opium within the meaning of this act.

The amendment was agreed to.

Mr. SMOOT. I desire to offer an amendment, in section 1, page 1, line 3, to strike out "\$200" and insert "\$300."

Mr. SIMMONS. On behalf of the committee I will accept that amendment.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and-the bill to be read a third time.

The bill was read the third time and passed.

PROSECUTIONS UNDER WHITE-SLAVE ACT.

Mr. JONES. Mr. President, a few days ago I introduced a resolution (S. Res. 235) calling upon the Department of Justice for certain information with reference to the enforcement of the "white-slave" act. At the suggestion of some of the Senators that resolution was withdrawn.

I think in justice to the Senate, and also to the department, I ought to state that after conferring with the department I am convinced that there was no real foundation for the suggestions that have been made to me, although they came from most reliable sources. I am assured by the department in the most positive way that no instructions have been given that will result in relaxing the efforts to enforce this law.

In the statement that was submitted by the Senator from Indiana the other day the first clause in the first sentence reads as follows:

No order to stop white-slave prosecutions in cases not involving com-mercialism has been issued.

I think that is subject to the construction that lawyers understand to be implied in a negative pregnant, in that it might be construed as meaning that instructions had been issued cases involving commercialism; but the department assure me that no such instructions have been issued. I am satisfied that the Department of Justice have not issued any instructions with reference to cases involving commercialism or with reference to cases not involving commercialism that will result

in a lax enforcement of that law.

Statements were also made in the newspapers, not only of Seattle but of San Francisco, that the United States attorney for the western district of Washington had stated in an inter-view that he had received instructions not to prosecute cases except those of an international character. As I say, the department inform me that no such instructions have been sent. They sent a telegram to the United States attorney, and I think it is but fair that that telegram and the answer should be presented to the Senate. I have a letter from the department setting out the telegram to Attorney Allen and his answer, so far as the department and myself deem proper. I had intended to ask that this letter be read to the Senate; but I know the Senator from Oklahoma has a bill that he wants to pass before the morning hour closes, so I shall ask that it be inserted in the RECORD.

The VICE PRESIDENT. Without objection, that will be

done.

The matter referred to is as follows:

DEPARTMENT OF JUSTICE, Washington, D. C., December 18, 1913.

Hon. Wesley L. Jones, United States Senate.

My Dear Senator: Referring again to the matter of the enforcement of the Mann White-Slave Act and the agitation in Seattle:
On the 16th instant I wired District Attorney Clay Allen as follows:
"Congressional inquiry arose because Seattle and San Francisco papers last week quoted you as expressing opinion that there would be no further prosecutions under Mann White-Slave Act save of international cases. Please wire me statement covering."
In response to which on the same date he submitted the following by wire:

In response to which on the same date he submitted the following by wire:

"The interview referred to was false and was known to be false by the local men who inspired it. The story was published here by the Post-Intelligencer and was indignantly denied by both Commissioner White and myself on the following day. The afternoon papers, Sun and Star, on day following both carry interview denying the Post-Intelligencer article, and while Commissioner White was present in my office I called Editor Bone, of Post-Intelligencer, and protested for both White and myself because of this infamous story. The only change ever made in this office with reference to charges of this kind from that pursued by my predecessor was in reference to the amount of bond to be required. There was an unwritten rule established, as I am informed, at the request of local representative of Immigration Department, requiring bond in all cases offenders of this class \$5,000. I suggested that an arbitrary rule of this kird was unwarrantable, that the size of bond should be determined by the fact of each case. This, however, was never a matter of comment beyond the office."

And on the 17th he supplemented above with the following:

"Referring my telegram yesterday regarding congressional inquiry through stenographic error the following was omitted: 'Am to-day presenting to grand jury sitting in Tacoma three white-slave cases, two of which are interstate."

Examination of the files here discloses that there was no correspondence about the bond matter referred to by Mr. Allen, it being handled entirely within his effice.

Respectfully (for the Attorney General),

W. M. Wallace, Jr.,

Assistant Attorney General.

BANKING AND CURRENCY.

Mr. OWEN. Mr. President, I send to the desk a concurrent resolution providing for the printing of the same number of copies of the banking and currency bill as was ordered in the case of the tariff act.

The VICE PRESIDENT. The concurrent resolution will be

The concurrent resolution (S. Con. Res. 12) was read and considered, as follows:

Resolved by the Senate (the House of Representatives concurring), That there be printed for the use of Congress 80,000 copies of the Federal reserve act in pamphlet form, to be apportioned as follows: Thirty five thousand copies for the use of the House of Representatives, 20,000 copies for the use of the Senate, 5,000 copies for the use of the Committee on Banking and Currency of the Senate, 5,000 copies for the use of the Committee on Banking and Currency of the House, 5,000 copies for the use of the document room of the Senate, and 10,000 copies for the use of the document room of the House.

Mr. SMOOT. This is a concurrent resolution?

Mr. OWEN. It is a concurrent resolution. The language and the number are identical with the resolution providing for extra copies of the tariff act. The Public Printer estimates that 80,000 copies will cost \$677

Mr. GALLINGER. I will ask the Senator from Oklahoma if he has given attention to the question as to how large a proportion of the copies of the tariff act have actually been dis-I know that we are loading down the document room tributed? and the folding room with publications of all kinds that are never called for, and they have been trying to unload recently.

This is a trifling matter, as far as the expense is concerned; yet I have no doubt that a very much less number of copies would answer the purpose. Of course, I will not object if the Senator has looked into it.

Mr. OWEN. There are 25,000 banks, every one of which, of course, will want at least one copy, and probably several copies. I think there will be an actual demand for the number pro-

Mr. WARREN. May I ask a question of the Senator?

Mr. OWEN. Certainly.

Mr. WARREN. As I heard the concurrent resolution read, it did not provide any copies for the Treasury Department. Is it the Senator's expectation that the department will reprint copies for their own use?

Mr. OWEN. They have the right to do so, I suppose, if they find any extra demand.

Mr. WARREN. With as many as it is proposed we shall print, I think we might well furnish the department with copies, because, naturally, they will have a demand for them.

Mr. OWEN. We might cover that by providing 5,000 copies

additional for the Treasury Department.

Mr. SMOOT. I would have to object to that. If the department want copies, they can print them out of their own appropriation.

Mr. WARREN. That is true; but if the printing of this number is expected to cover all the calls upon Members of Congress, and then the department is left with none, they would have to print some additional copies, unless some are to be placed at their disposal under this resolution. If that is not to be done, may we not cut down the number somewhat-say, to 60,000 or 65,000 copies?

Mr. OWEN. I think nearly every Senator and Member will want to furnish the bankers in his own State with copies, because every one of them will be actively interested in the docu-

ment and ought to have it.

Mr. WARREN. There is no doubt of that.

The VICE PRESIDENT. The question is on agreeing to the concurrent resolution.

The concurrent resolution was agreed to.

RAILROADS IN ALASKA.

The VICE PRESIDENT. The morning hour having expired, the Chair lays before the Senate the special order, which is Senate bill 48. It will be stated.

The Secretary. A bill (S. 48) to authorize the President of the United States to locate, construct, and operate railroads

in the Territory of Alaska, and for other purposes.

Mr. CHAMBERLAIN. Mr. President, in reference to this measure, I do not think there is very much disposition upon the part of the Senate generally to take it up for discussion until after the holiday recess, an adjournment for which I assume will shortly follow. To the end that the bill may be taken up after the holidays, I should probably propose a unanimous-consent agreement for that purpose. Before doing so, however, I desire to state that if the Senate refuses to give its unanimous consent to the consideration of the bill after the holidays, we can attain the same end in only one other way, and that is to take up the bill for discussion now and have the adjournment take place while the discussion is in progress.

Mr. GALLINGER. I notice that on the calendar the bill is set down as a special order. My recollection of the rule is

that a special order continues but one day.

Mr. CHAMBERLAIN. The rule provides further that if the consideration of a special order is not completed at the time of adjournment on that day, then it becomes the unfinished business

Mr. GALLINGER. It becomes the unfinished business?

Mr. CHAMBERLAIN. Yes, sir.

Mr. GALLINGER. I think the Senator is mistaken about that, but let us look at the rule.

The VICE PRESIDENT. Let the Chair state that he thinks there is a fair understanding, in view of the complication that arose between the unfinished business and this bill, that this bill was to be a special order for the first day after the unfinished business was disposed of, and that then it was to become the unfinished business. I think there was a fair understanding on that subject.

Mr. GALLINGER. That would be agreeable to me. I quite agree to that, as this bill was laid aside for the currency bill. I think if the Senator from Oregon would move to proceed to its consideration now and make it the unfinished busineess— Mr. CHAMBERLAIN. We can proceed to its consideration

Mr. WILLIAMS. With the understanding that we will stop proceeding with it right away.

Mr. GALLINGER. I think the Senator from Oregon had better make that motion.

Mr. CHAMBERLAIN. I am going to keep the bill in its proper place on the calendar.

Mr. GALLINGER. If the Senator moves to proceed to the consideration of the bill, it will then become the unfinished

Mr. CHAMBERLAIN. I move that the Senate proceed to the consideration of the bill.

The VICE PRESIDENT. Is there objection? The Chair hears none.

Mr. BURTON. What order was made about the bill?

The VICE PRESIDENT. Senate bill 48 is now before the

Mr. CHAMBERLAIN. I want to have it understood that it will be the unfinished business, because there was some question raised heretofore as to whether it could become the unfinished business or not in its present status on the calendar.

Mr. GALLINGER. It has become that by the Senator's

Mr. WILLIAMS. I ask unanimous consent that the bill be temporarily laid aside to come up as the unfinished business of the Senate.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

PENOBSCOT RIVER BRIDGE.

Mr. JOHNSON. I ask unanimous consent for the present consideration of the bill (S. 1346) to authorize the Eastern Maine Railroad to construct, maintain, and operate a bridge without a draw across the Penobscot River between the cities of Bangor and Brewer, in the State of Maine.

This is a very small matter, favorably reported by the Committee on Commerce. It grants the right to build a railroad bridge across the Penobscot without a draw, the same right having been granted to build a highway bridge only a few rods below this proposed bridge.

The PRESIDING OFFICER (Mr. GALLINGER in the chair). Is there objection to the present consideration of the bill?

There being no objection, the bill was considered as in Committee of the Whole.

The bill was reported from the Committee on Commerce with an amendment, to add as an additional section the following:

SEC. 2. That the right to alter, amend, or repeal this act is hereby

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

FENCE ON INTERNATIONAL BOUNDARY LINE.

Mr. ASHURST. Mr. President, yesterday I introduced a bill (S. 3791) to provide for the construction of a fence on the international boundary line from the Rio Grande River to the Pacific Ocean on the southern boundary of the United States, and appropriating \$350,000 therefor.

I notice, to my surprise, that one or two newspapers characterize this bill or this attempted appropriation on my part as an improper one. The high character of those papers would seem to make it incumbent upon me to offer at least a short explanation as to the intent, purposes, and scope of the bill.

The act of Congress approved May 26, 1910, volume 36, part of Public Laws, Sixty-first Congress, 1909-1911, page 440, reads as follows:

Hereafter the Secretary of Agriculture may permit the erection of fences along international boundary lines, but entirely within the territory of the United States, for the purpose of keeping out diseased

The Bureau of Animal Industry very properly has been active in the matter of trying to secure the building of such fence along the international line between the Republic of Mexico and our own Republic for the purpose of preventing the bringing in or the straying in from that Republic into this country of cattle infested with tick and various deleterious and harmful diseases.

I might add that the lack of a fence along the national boundary line has been the cause of the loss of millions of dollars to our cattlemen, and that the raising of cattle in the State of Arizona is a prime and important industry. Mr. President, I had not intended to encumber the RECORD upon this matter, but in order now that the necessity and the propriety of this legislation may be made apparent, I ask that I may have read at the desk, first, a letter from the Live Stock Sanitary Board of Arizona, and then that certain correspondence relating thereto be incorporated in the RECORD without reading.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Arizona?

Mr. SMOOT. I should like to ask the Senator if there is any real necessity to print the correspondence in the Record. I

do not want the Senator to fee! that I am objecting to any request that he may make within reason, but-

Mr. ASHURST. My dear Senator, there is necessity for its going into the RECORD, in my opinion, or I should not have asked it. I would not do even a thing uselessly. I have introduced a bill, and I have a number of letters from the Bureau of Animal Industry and other bureaus regarding this legislation, and I do feel that inasmuch as aspersions have been made, I at least ought to put into the RECORD public documents that are issued from the departments of the Government urging this legislation.

Mr. SMOOT. I will say to the Senator I do not really think there was even a necessity to call attention to those newspaper articles; but it was his judgment that he should do so, and I am not going to object at this particular time to the matter going into the RECORD. But I want to give notice, Mr. President, that I shall try in the future to keep correspondence out of the RECORD.

The other morning in looking at the RECORD I found not one Senator asking that a certain document be put in the RECORD, but two pages over I found exactly the same document printed in the RECORD. It was printed twice the same day, word for word alike. It seems to me that we are running mad on printing in the RECORD.

Mr. ASHURST. Mr. President— Mr. SMOOT. I will say to the Senator I am not going to object at this time, but I simply give notice now that I shall try to keep such matter out in future.

The PRESIDING OFFICER. Does the Senator from Ari-

zona ask for the reading of one of the letters?

Mr. ASHURST. May I not, first, without consuming too much time, say I appreciate that there is some force in the suggestion of the distinguished Senator from Utah, but also say that there are documents, papers, and letters that do more justice to the RECORD than do some of our speeches at times. I do not know that that applies to the Senator from Utah. I feel on this subject, however, that I ought to include in the RECORD papers that seem to me to be pertinent. I will ask that the petition from the Live Stock Sanitary Board of Arizona be read, and then I may not ask for any more.

Mr. SMOOT. I want to say just one word on the subject. The Congressional Record is supposed to record what Senators say. It is not supposed to be, nor was it ever created or established, for putting in correspondence from anyone who sees fit to address a letter to a Senator of the United States. It is for that reason, and that only, that I say that in the future I shall

object to such requests.

Mr. VARDAMAN. I ask the Senator if the RECORD has not been used for that purpose from time immemorial?

Mr. SMOOT. Years ago it was very seldom that correspond-

ence was put into the Record.

Mr. VARDAMAN. But in recent years?

Mr. SMOOT. Of late it seems that half the Record, almost, is taken up in recording correspondence from citizens all over the United States sent to different Members of Congress.

Mr. ASHURST. To bring the matter to a close, the Senator

from Utah must not feel that he has driven me from my position; but, I repeat, there is some force in his suggestion. shall ask only that the petition and letter from the Live Stock Sanitary Board of Arizona be included. That is all I ask, but

should like to have it read.

The PRESIDING OFFICER. Without objection, the matter indicated by the Senator will be read.

The Secretary read as follows:

LIVE STOCK SANITARY BOARD OF ARIZONA, Phoenix, December 9, 1913.

Hon. Henry F. Ashurst,

United States Senator from Arizona, Washington, D. C.:

Dear Senator: I am inclosing herewith a resolution passed by the
Live Stock Sanitary Board at a meeting held in Phoenix, December 2,
1913.

1913.
This matter has been agitated by the stockmen of Arizona for a number of years, and while I was in Washington last summer I visited the Bureau of Animal Industry and was assured by Dr. Melvin, the chief of the bureau, that he realized the benefit of such a fence, and that if an appropriation could be secured for this purpose they would be only too glad to proceed with the work at once.

Yours, sincerely,

Secretary Live Stack Sentence Beauty

SAM B. BRADNER, Secretary Live Stock Sanitary Board. Resolution.

Resolution.

Whereas the Live Stock Sanitary Board has information showing that the present condition of the international boundary line between the State of Sonora, Mexico, and the State of Arizona is open, unfenced, and unprotected, thereby enabling cattle to drift across said line from the State of Sonora into the State of Arizona without inspection or in any manner conforming to the requirements of the State of Arizona or the regulations of the Bureau of Animal Industry; and Whereas for the proper enforcement of the regulations of the United States Bureau of Animal Industry and for the protection of the live-stock industry of the United States, and especially the State of Ari-

zona, it is advisable that the international boundary line between said State of Sonora, Mexico, and the State of Arizona be fenced in a manner to prevent the drifting of live stock across said line: Therefore be it

Resolved by the Live Stock Sanitary Board of the State of Arizona, That the United States Bureau of Animal Industry be, and is hereby, requested to fence the said international boundary line between the State of Sonora, Mexico, and the State of Arizona, and that the United States Senators and Congressman from the State of Arizona be requested to take the necessary action to secure the relief asked in this resolution.

JAMES A. JOHNSON, Chairman of the Board. SAM B. BRADNER, Secretary.

FLECTION OF SENATORS.

Mr. WALSH. Mr. President, I desire to give notice that at the conclusion of the routine business on Monday next I shall ask the Senate to proceed to the consideration of the bill (S. 2860) providing a temporary method of conducting the nomination and election of United States Senators.

THE COMMITTEE ON COMMERCE.

Mr. WILLIAMS. I ask unanimous consent for the present consideration of Senate resolution No. 97, authorizing the Committee on Commerce or any subcommittee thereof to hold hearings, and so forth.

The PRESIDING OFFICER. The Senator from Mississippi asks for the present consideration of a resolution, which will be

read for the information of the Senate.

There being no objection, the Senate proceeded to consider Senate resolution No. 97, which had been reported from the Committee to Audit and Control the Contingent Expenses of the Senate, with amendments, in line 4, after the word "employ," to insert "if necessary"; and in line 5, after the word "page," to strike out "and to employ such assistants as may be required," so as to make the resolution read:

so as to make the resolution read:

Resolved, That the Committee on Commerce or any subcommittee thereof be, and the same are hereby, authorized during the Sixty-third Congress to send for books and papers, to administer oaths, and to employ, if necessary, a stenographer at a price not to exceed \$1 per printed page, to report such hearings as may be had in connection with any subject which may be pending before the said committee or under investigation or examination thereby; that the committee or any subcommittee thereof may sit during the sessions or recesses of the Senate; the expenses thereof to be paid out of the contingent fund of the Senate; and that such committee or subcommittee thereof may sit during the sessions of the Senate or during the vacation of the Senate at any place in the United States.

The amendments were agreed to.

The resolution as amended was agreed to.

EXECUTIVE SESSION.

Mr. BACON. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 15 minutes spent in executive session the doors were reopened and (at 2 o'clock and 35 minutes p. m.) the Senate adjourned until Monday, December 22, 1913, at 12 o'clock m.

NOMINATIONS.

Executive nominations received by the Senate December 20, 1913.

CONSULS.

Clarence Carrigan, of California, to be consul of the United States of America at Grenoble, France, vice Charles P. H. Nason, resigned.

Ezra M. Lawton, of Ohio, to be consul of the United States of America at Tegucigalpa, Honduras, vice Arminius T. Haeberle, appointed consul at St. Michaels, Azores.

APPRAISER OF MERCHANDISE.

George W. Wolf, of New York, to be assistant appraiser of merchandise in the district of New York, in place of Bernard Herstein, resigned.

UNITED STATES ASSAYER.

Charles Gammon, of Utah, to be assayer in charge of the United States assay office at Salt Lake City, Utah, in place of Joseph U. Eldredge, jr., resigned.

COLLECTORS OF INTERNAL REVENUE,

Paul A. Hemmy, of Wisconsin, to be collector of internal revenue for the first district of Wisconsin, in place of Henry Fink, superseded.

John D. McNeel, of Alabama, to be collector of internal revenue for the district of Alabama in place of Sim T. Wright,

UNITED STATES ATTORNEYS.

Francis D. Winston, of North Carolina, to be United States attorney for the eastern district of North Carolina, vice Herbert F. Seawell, removed.

John W. Preston, of California, to be United States attorney for the northern district of California, vice Benjamin L. Mc-Kinley, appointed by the court.

Frank C. Dailey, of Indiana, to be United States attorney for the district of Indiana, vice Charles W. Miller, resigned.

Rogers L. Burnett, of Pennsylvania, to be United States attorney, middle district of Pennsylvania, vice Andrew B. Dunsmore, resigned.

UNITED STATES MARSHALS.

W. T. Dortch, of North Carolina, to be United States marshal for the eastern district of North Carolina, vice Claudius Dock-

ery, removed.
Charles A. Webb, of North Carolina, to be United States marshal for the western district of North Carolina, vice William E. Logan, removed.

PROMOTIONS IN THE ARMY.

INFANTRY ARM.

Capt. Ralph H. Van Deman, Twenty-first Infantry, to be major from December 11, 1913, vice Maj. Albert C. Dalton, Twenty-seventh Infantry, detailed in the Quartermaster Corps

Twenty-first Infantry, promoted.

Second Lieut. James H. Laubach, Nineteenth Infantry, to be first lieutenant from December 11, 1913, vice First Lieut. Roscoe H. Hearn, Ninth Infantry, promoted.

PROMOTIONS AND APPOINTMENT IN THE NAVY.

Medical Inspector George B. Wilson to be a medical director in the Navy from the 14th day of November, 1913.

Medical Inspector Charles F. Stokes to be a medical director

in the Navy from the 20th day of November, 1913.
Surgeon Sheldon G. Evans to be a medical inspector in the

Navy from the 14th day of November, 1913.

Naval Constructor Horatio G. Gillmor, with rank of lieutenant commander, to be a naval constructor in the Navy, with rank of commander, from the 4th day of December, 1913.

Jerome M. Lynch, a citizen of New York, to be an assistant surgeon in the Medical Reserve Corps of the Navy from the 5th

day of December, 1913.

REGISTERS OF THE LAND OFFICE.

Joseph Binnard, of Butte, Mont., to be register of the land office at Helena, Mont., vice Stephen Carpenter, whose term will expire December 20, 1913.

John E. Robins, of Ely, Nev., to be register of the land office at Elko, Nev., a new office under act of Congress approved October 3, 1913.

Mrs. Mary Wolfe Dargin, of Denver, Colo., to be register of the land office at Denver, Colo., vice Charles D. Ford, removed.

RECEIVER OF PUBLIC MONEYS.

Ashley G. Dawley, of Elko, Nev., to be receiver of public moneys at Elko, Nev., a new office under act of Congress approved October 3, 1913.

POSTMASTERS.

ALASKA.

Albert Wile to be postmaster at Iditarod, Alaska. Office became presidential July 1, 1912.

ARKANSAS.

A. Harris to be postmaster at Junction City, Ark., in place of Charles L. Jones, removed.

CALIFORNIA.

J. W. Heard to be postmaster at Oilcenter, Cal., in place of J. S. Rees, removed.

CONNECTICUT.

Dennis C. Murphy to be postmaster at Taftville, Conn., in place of James Graham, removed.

ILLINOIS.

Margaret Keegan to be postmaster at Loda, Ill., in place of Charles E. Healey, removed.

IOWA.

John J. Dunlevy to be postmaster at Lansing, Iowa, in place of George W. Metcalf, resigned.

Wallace M. Higbee to be postmaster at Fairbank, Iowa, in place of M. J. Collins, removed.

Jay Sullivan to be postmaster at Fontanelle, Iowa, in place of W. H. McClure, removed.

KANSAS.

J. R. Lovitt to be postmaster at McCracken, Kans., in place of Clarence P. Dutton. Incumbent's commission expired January 14, 1913.

Joseph Pelishek to be postmaster at Wilson, Kans., in place of James M. Brown. Incumbent's commission expired February 9,

W. A. Waddell to be postmaster at Cottonwood Falls, Kans., in place of June B. Smith. Incumbent's commission expired March 31, 1912.

MARYLAND.

Washington F. Collins to be postmaster at Millington, Md., in place of Rose E. Walls. Incumbent's commission expired January 11, 1913.

Harry O. De Vries to be postmaster at Ellicott City, Md., in place of C. H. Oldfield, removed.

MASSACHUSETTS.

John Adams to be postmaster at Provincetown, Mass., in place of Joseph A. West, deceased.

Thomas H. Hackett to be postmaster at Westboro, Mass, in place of John W. Fairbanks, removed.

Charles E. Adair to be postmaster at Utica, Mich., in place of Stuart Beatty. Incumbent's commission expired December 14, 1912.

N. C. Sutherland to be postmaster at Romeo, Mich., in place of William T. Hosner. Incumbent's commission expired January 5, 1913.

G. Martin Harrington to be postmaster at Bancroft, Mich., in place of Hugh W. Parker. Incumbent's commission expired

February 9, 1913. Levi A. Harris to be postmaster at Gaylord, Mich., in place of W. S. Carpenter, removed.

Edwin S. Noble to be postmaster at Elk Rapids, Mich., in place of A. K. Dougherty, resigned.

Johnson A. Saur to be postmaster at Kent City, Mich. Office

became presidential October 1, 1912. William R. Teifer to be postmaster at Trenton, Mich. Office became presidential October 1, 1912.

MINNESOTA.

Bernard P. Eagan to be postmaster at Spooner, Minn. Office became presidential October 1, 1913. Joseph Huelskamp to be postmaster at Gaylord, Minn., in place of Jacob Geib. Incumbent's commission expired February

T. F. Oneill to be postmaster at Gilbert, Minn. Office became presidential July 1, 1910.

Axel Ringborg to be postmaster at Bagley, Minn., in place of Aaron R. Butler. Incumbent's commission expired January 22, 1913.

William F. Roche to be postmaster at Lakeville, Minn. Office became presidential October 1, 1913.

James J. McCarthy to be postmaster at Greeley, Nebr., in place of William E. Morgan, resigned.

NEW JERSEY.

Edward F. Higgins to be postmaster at Bloomfield, N. J., in place of H. C. Farrand. Incumbent's commission expired June 9, 1913.

NORTH DAKOTA.

A. I. Koehmstedt to be postmaster at Langdon, N. Dak., in place of John McGauvran. Incumbent's commission expired July 20, 1913.

Myrtie Nelson to be postmaster at Bowman, N. Dak., in place of W. H. Workman, removed.

Frank Renning to be postmaster at Velva, N. Dak., in place of George W. Downing, removed.

W. W. Smith to be postmaster at Valley City, N. Dak., in place of William H. Pray, removed.

J. W. Stambaugh to be postmaster at Carrington, N. Dak.,

in place of E. T. Halaas, removed.

George H. Gee to be postmaster at Salem, Ohio, in place of William S. Atchison. Incumbent's commission expired January

OKLAHOMA,

M. W. Ligon to be postmaster at Ada, Okla., in place of U. G. Winn, removed.

SOUTH DAKOTA.

J. W. Applegate to be postmaster at Edgement, S. Dak., in place of J. R. Johnston. Incumbent's commission expired August 5, 1913.

F. B. Boyle to be postmaster at Corsica, S. Dak. Office became presidential January 1, 1913.

Matthew F. Ryan to be postmaster at Mobridge, S. Dak., in place of John G. Vawter, resigned.

Elizabeth Kirby-Smith to be postmaster at Sewanee, Tenn., in place of Elizabeth Kirby-Smith. Incumbent's commission expired January 30, 1910.

Thomas E. Glass to be postmaster at Jackson, Tenn., in place of William E. Arnold, removed.

C. W. Metcalf, jr., to be postmaster at Memphis, Tenn., in place of J. C. French, deceased.

Mamie Erwin Perkins to be postmaster at Selmer, Tenn. Office became presidential October 1, 1912.

J. V. Walker to be postmaster at Tracy City, Tenn., in place of William E. Byers. Incumbent's commission expired March 3, 1913.

WEST VIRGINIA.

J. Carl Vance to be postmaster at Clarksburg, W. Va., in place of S. C. Denham, removed.

WISCONSIN.

Simon Skroch to be postmaster at Independence, Wis., in place of Joseph M. Garlick. Incumbent's commission expired January 26, 1913.

. CONFIRMATIONS.

Executive nominations confirmed by the Senate December 20, 1913.

APPRAISER OF MERCHANDISE.

Thomas Butterworth to be appraiser of merchandise, Cincinnati, Ohio.

COLLECTORS OF INTERNAL REVENUE.

Frank B. Niles to be collector of internal revenue for the tenth district of Ohio.

Harry H. Weiss to be collector of internal revenue for the eighteenth district of Ohio.

John D. McNeel to be collector of internal revenue for the district of Alabama.

UNITED STATES ATTORNEYS.

Robert N. Bell to be United States attorney, northern district

Thomas D. Samford to be United States attorney, middle district of Alabama.

Alexander D. Pitts to be United States attorney, southern district of Alabama.

Frank C. Dailey to be United States attorney for the district of Indiana.

Rogers L. Burnett to be United States attorney, middle district of Pennsylvania.

REGISTER OF THE LAND OFFICE.

Joseph Binnard to be register of the land office at Helena, Mont.

WITHDRAWAL.

Executive nomination withdrawn December 20, 1913. UNITED STATES ATTORNEY.

Rogers H. Burnett to be United States attorney, middle district of Pennsylvania.

HOUSE OF REPRESENTATIVES.

Saturday, December 20, 1913.

The House met at 12 o'clock noon. The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

O Thou, who are infinitely wise and good, ever ready to hear the prayers of those who diligently seek Thee, teach us, we beseech Thee, how to be faithful, how to be noble, how to be great in the common duties of everyday life, that we may develop symmetrically all the powers of mind and soul with which Thou hast endowed us unto the perfect man as we know

it in Christ Jesus. Amen.

The Journal of the proceedings of yesterday was read and approved.

BRIDGE ACROSS THE BAYOU BARTHOLOMEW, ARK.

Mr. GOODWIN of Arkansas. Mr. Speaker, I desire to call up the bill (H. R. 8142) to authorize the construction, maintenance, and operation of a bridge across the Bayou Bartholomew at or near Wilmot, Ark., and ask unanimous consent for its immediate consideration.

The SPEAKER. The Clerk will report the bill by title. The Clerk read as follows:

A bill (H. R. 8142) to authorize the construction, maintenance, and operation of a bridge across the Bayou Bartholomew at or near Wilmot, Ark.

Mr. PAGE of North Carolina. Mr. Speaker, reserving the right to object, there is no opposition to that, is there?

Mr. GOODWIN of Arkansas. No, sir. The SPEAKER. Is there objection? Mr. MANN. Let the bill be reported.

The SPEAKER. The bill will be reported in full.

The Clerk read as follows:

The Clerk read as follows:

Be it enacted, etc., That the county of Ashley, a corporation organized and existing under the laws of the State of Arkansas, its successors and assigns, be, and they are hereby, authorized to construct, maintain, and operate a bridge and approaches thereto across the Bayou Bartholomew at or near Wilmot, Ark., at a point suitable to the interests of navigation, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

expressly reserved.

The SPEAKER. Is there objection?

Mr. MANN. Reserving the right to object, Mr. Speaker, of course this proceeding is unusual. Is there any emergency about the matter?

Mr. Speaker, I desire to say, in answer to Mr. ADAMSON. that question, if the gentleman from Arkansas will yield, that this bill was overlooked in our committee. The chief clerk was absent, and the bill was misplaced in some way, and when we reported the other bridge bills this was overlooked. When we discovered it we thought the gentleman from Arkansas had been treated unjustly through inadvertence, and I called a meeting of the committee, and we reported the bill.

Mr. MANN. It does not strike me that that constitutes an emergency. I would like to ask the gentleman from Arkansas

whether or not there is need of great haste?

Mr. GOODWIN of Arkansas. I will state to the gentleman that in a sense it may be considered an emergency matter. Bayou Bartholomew has not been actively navigated for some years, but it is a barrier between rich districts of my district, and it should be bridged. There are three or four good towns on each side of the bayou, and there is a great necessity for constructing the bridge.

The SPEAKER. Is there objection? [After a pause.] The

Chair hears none. The question is on the engrossment and

third reading of the bill.

The bill was ordered to be engrossed and read a third time,

was read the third time, and passed.

On motion of Mr. Goodwin of Arkansas, a motion to reconsider the vote whereby the bill was passed was laid on the table.

DISTRICT OF COLUMBIA APPROPRIATION BILL.

Mr. PAGE of North Carolina. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 10523, the District appropriation bill.

The motion was agreed to.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union, with Mr. HULL in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 10523, the District appropriation bill, which the Clerk will report by title,

The Clerk read as follows:

A bill (H. R. 10523) making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1915, and for other purposes.

The CHAIRMAN. On yesterday, when the committee rose, a point of order made by the gentleman from Illinois [Mr. MANN] against the amendment offered by the gentleman from Missouri [Mr. Borland] was pending. The Chair is ready to

rule on the point of order. The point of order is based upon the ground that the amendment proposes to change existing law, and that to be in order it must meet the requirements of the essential provisions of what is known as the Holman rule. The amendment in its practical effects provides that when under the proposed law a new street, avenue, or road in the District of Columbia shall be improved by any of the methods designated, such proportions of the cost shall be charged against the abutting property and assessments shall be levied against the owners of such abutting property, and when collected shall be deposited in the United States Treasury to the credit of the funds available for that purpose. In other words, this amendment purports to be a complete, permanent, and substantive provision of law, providing that hereafter in the administration of that portion of the for.

affairs of the District of Columbia relating to the improvement of streets or avenues and roads real estate owners shall be required to pay a certain proportion of the cost of such improve-

ments adjacent to their own property.

This proposed law, of course, is not unlike similar laws in operation generally in the municipalities of the country which impose taxes against local benefits such as sidewalks or pavements. At the present time improvements of the kind mentioned in the proposed amendment are paid for out of the general fund of the District of Columbia, which is raised one-half from taxation in the District and one-half contributed from the Federal Government.

Of course the amendment does not undertake to comply with the first provision of clause 2 of Rule XXI relating to the reduction of salaries. Neither does it undertake to comply with the second provision relating to the reduction of the number of employees

The third provision would make it necessary that the amendment should reduce the appropriation carried in the bill within the meaning and spirit of the rule as construed heretofore.

At this point another question arises relating to the germaneness of the amendment under a ruling which seems to be well established, and that is that without regard to the question of whether the amounts of the appropriations carried in the bill are reduced within the meaning of the third provision of clause 2 of Rule XXI, if the amendment constitutes separate, independent, permanent, substantive legislation, then, even though it should meet the requirement as to a reduction of expenditures, it would not be in order unless it came officially from the committee having jurisdiction of the subject matter of the amendment under the terms of the proviso of clause 2, Rule XXI. This has been held in two or three well established and generally accepted rulings.

As stated in the beginning, this amendment does contain such substantive provision of permanent law, designed for the first time to establish a system of assessments against the abutting property holders, which would require them in the future to pay a substantial portion of the expenses of street improvements. Now, this amendment does not come officially from the committee having jurisdiction of its subject matterthe Committee on the District of Columbia—but it is offered by the gentleman from Missouri [Mr. Borland] in his individual capacity; and without being called upon to pass upon the question of whether a reduction of expenditures would occur within the meaning of the third provision of clause 2 or within the meaning of the proviso, the Chair feels constrained to hold that under the previous ruling requiring an amendment of this character to come from the appropriate committee as aforesaid, or to be offered under the authority of the appropriate committee, that would preclude its consideration in this connection, and the point of order is sustained.

Mr. JOHNSON of Kentucky. Mr. Chairman, a bill not only

The CHAIRMAN. The committee will rise informally, in order that the House may receive a message from the Senate. Mr. MANN. Had not the committee better rise formally?

Mr. PAGE of North Carolina. Mr. Chairman, I move that the committee rise.

The motion was agreed to.

The committee accordingly rose; and the Speaker having resumed the chair, Mr. Hull, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 10523) making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1915, and for other purposes, and had come to no resolution

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Baker, its Secretary, announced that the Senate had passed, with an amendment, the bill (H. R. 7837) to provide for the establishment of Federal reserve banks, to furnish an elastic currency, to afford means of rediscounting commercial paper, to establish a more effective supervision of banking in the United States, and for other purposes, and had requested a conference with the House of Representatives on the bill and amendment, and had appointed as conferees on the part of the Senate Mr. OWEN, Mr. O'GORMAN, Mr. REED, Mr. POMERENE, Mr. SHAFROTH, Mr. HOLLIS, Mr. NEL-SON, Mr. BRISTOW, and Mr. CRAWFORD.

THE CURRENCY.

Mr. GLASS. Mr. Speaker, I ask unanimous consent that the House disagree to the amendment of the Senate to the bill H. R. 7837, the currency bill, and agree to the conference asked

The SPEAKER. The gentleman from Virginia [Mr. Glass] asks unanimous consent that the House disagree to the Senate amendment to the currency bill and send the bill to conference. Is there objection?

Mr. MANN. Reserving the right to object, would the gentle-man from Virginia be able, officially or unofficially, to let the House know later in the day what the prospects are of an im-

mediate agreement in conference?

Mr. GLASS. I can let the House know now what the prospects are for an immediate agreement. There is no prospect at all of an immediate agreement.

Mr. MANN. It is not likely to be back to the House to-day,

in any event?

Mr. GLASS. No; I think not. Mr. MURDOCK. Mr. Speaker, reserving the right to object, does the gentleman mean by his reply to the gentleman from Illinois that there will be no conference report back in the House to-day, to be printed in to-morrow morning's RECORD?

Mr. GLASS. I undoubtedly do mean that.

Mr. GLASS. I undoubtedly do mean that. Mr. MURDOCK. Does that mean that probably the matter will go over for printing until Tuesday?

Mr. GLASS. I can not say as to Tuesday. Perhaps we can

come to an agreement by Monday.

Mr. MURDOCK. If there should be an agreement on Sunday, can the conference report be printed on Monday morning?

Mr. GLASS. I do not know. I am not prepared to say as to

Mr. MANN. Would it not be practicable, whenever the conference report is ready, in the existing situation to waive the laying over for one day for printing of the conference report and print it and take immediate action upon it?

Mr. GLASS. I will ask unanimous consent to do that.

Mr. MANN. Of course, the Senate

Mr. GLASS. I will ask unanimous consent that that be done. I will say frankly to the House that the newspaper reports that the conference report has already been agreed upon and written are utterly without foundation in fact. There has been

Mr. MADDEN. There are differences which-

Mr. GLASS. I say the report that has been given some degree of dignity in another branch of Congress, that the conference report has been agreed upon and practically written, is utterly without foundation in fact. I have not discussed the matter 15 minutes with any Member of the other House within

Mr. MADDEN. Then the gentleman wishes the House to understand that there are serious differences of opinion between

the two Houses?

Mr. GLASS. Undoubtedly there are some wide differences. Mr. MURRAY of Oklahoma. Mr. Speaker, reserving the right to object, I had hoped that the gentleman from Virginia would think better of the amendments offered in the Senate, and if it is intended to convey the idea that this House unanimously opposes the Senate amendments I should feel like objecting. not think there is a single provision put into the bill by the Senate, except one, but that is much better than the House pro-I would feel like concurring in the Senate amendments if I thought that the gentleman from Virginia and his associates would undertake to hold up and delay the bill and undertake to defeat the amendments that have been put on the bill in

Mr. GLASS. Mr. Speaker, "the gentleman from Virginia" is not indicating in a general way what he thinks of the Senate amendments. He does not propose to do that now, but will do that in conference,

Mr. MURRAY of Oklahoma. But the gentleman stated that there were very "serious differences," and I thought I could understand the meaning of that expression of the English lan-

guage as a desire on his part to defeat the Senate amendments. Mr. HARDWICK. Mr. Speaker, I want to suggest to the gentleman from Virginia that because of the fact that the Senate has selected an unusually large number of conferees the number of conferees that we chould have on the part of the House is one that deserves some consideration at his hands. Will we have an equal number of conferees with the Senate?

Mr. GLASS. Not if I can prevent it. [Laughter and ap-

plause.]

Mr. HARDWICK. I do not feel inclined myself to give consent to the appointment of the lesser number of conferees. Why Why should not we have the same number as has the Senate?

Mr. MANN. The gentleman from Georgia will understand

that the conferees act as a separate body.

Mr. HARDWICK. Certainly; but why should not we have the same number as the Senate?

Mr. MANN. For the very good reason that it would ordinarily take three Senators to equal one Representative. [Laughter.]

Mr. HARDWICK. Mr. Speaker, while that view of the situation may be very agreeable to ourselves, I doubt whether it quite comports with the fact, but really I am serious, and I would like to know why we ought not to have the same number of conferees as has the Senate?

Mr. GLASS. Mr. Speaker, I have given the matter very

serious consideration-

Mr. HARDWICK. I want to know how you get at it.

Mr. GLASS. If the gentleman will allow me to proceed. have given the matter serious consideration, and I shall object to the appointment of a like number of conferees, because the House conferees want to deal with the matter as effectively as they may from the House point of view.

Mr. HARDWICK. Does not the Senate want to deal with the matter as effectively from the Senate's point of view?

Mr. GLASS. We differ in judgment as to how that may best be done.

Mr. HARDWICK. I want to ask, Mr. Speaker, how that question can be raised. I find myself utterly disagreeing with the gentleman from Virginia, and I believe that the House on this important bill, perhaps the most important that has passed this body in 100 years, certainly 50 years, ought to have a larger number of conferees.

The practice has been to appoint three con-The SPEAKER.

ferees. On the tariff bill there were five appointed.

Mr. HARDWICK. Because the Senate appointed five. The SPEAKER. Not necessarily because the Senate ap-

pointed five, but because the gentleman from Alabama asked the Chair to appoint five.

Mr. HARDWICK. Perhaps the reason the gentleman from Alabama asked the Speaker to appoint five was because the

Senate appointed five.

The SPEAKER. To tell the gentleman the truth, the Chair does not understand exactly the modus operandi of proceeding for a larger number of conferees. It is in the discretion of the Speaker. It is usual to appoint three. On that occasion the Chair appointed five, and the Chair states frankly to the gentleman from Georgia that it was because the gentleman from Alabama [Mr. Underwood] asked him to appoint five.

Mr. HARDWICK. And the gentleman naturally asked for

five because the Senate appointed five.

The SPEAKER. It might have been for that reason, and it might have been because he wanted to get some particular Member on the conferees.

Mr. MANN. Mr. Speaker, I may be mistaken, but my recollection is that when the Payne bill passed the House the House appointed the conferees first.

Mr. HARDWICK. And appointed five.
Mr. GARRETT of Tennessee. The gentleman from Illinois is mistaken about the House appointing the conferees first. The Senate appointed first, and there were seven conferees on the part of the House.

Mr. HARDWICK. Mr. Speaker, it is well known by the entire House, the membership on both sides of this aisle, and the country that there are a good many divergent ideas about the bill and what it ought finally to contain, and for one I shall not give unanimous consent that is based on a proposition that we are to have only three conferees when the Senate has

Mr. GLASS. Mr. Speaker, I desire to say that the members of the Banking and Currency Committee of the House have no differences to adjust. We have asked the Speaker to appoint our conferees with a view of getting through with this business and letting the Members of Congress go home for a recess. [Applause.]

Mr. HARDWICK. While that may be true, we can get through with it just as well with five or seven or nine conferees as with three, and the gentleman need not try to get that sentiment enlisted upon that side of the controversy. I want to get home just as badly as does the gentleman, and I have been here longer than he has.

Mr. GLASS. Mr. Speaker, I am not disposed to permit the gentleman from Georgia to say what is the proper thing to do.

Mr. HARDWICK. I am going to tell the gentleman what I think is the proper thing to do and what he can not proceed to do with my consent.

Mr. GLASS. The gentleman's consent is not absolutely neces-

sary to proceed with this business, Mr. HARDWICK. Suppose the gentleman try to proceed without it. Mr. Speaker, I object to the gentleman's request.

Mr. PAYNE. Mr. Speaker, permit me to make a suggestion that I think may restore harmony upon that side of the House, and that is that the gentleman from Virginia ask for unanimous consent to disagree to the Senate amendments and ask for a conference, and then allow the House to vote on the number of the conferees

Mr. HARDWICK. That is agreeable to me.

Mr. AUSTIN. Mr. Speaker, a parliamentary inquiry. The SPEAKER. The gentleman will state it.

Mr. AUSTIN. When will a motion to concur in the Senate amendments be in order?

Mr. HARDWICK. It is in order now, if the Speaker will pardon me for answering the gentleman's question.

Mr. AUSTIN. Then I make that motion.

The SPEAKER. The motion of the gentleman from Tennessee is that the House concur in the Senate amendments.

Mr. MANN. Mr. Speaker, that motion is not in order yet, because the matter can not come before the House until unanimous consent is given.

The SPEAKER. The Chair thinks that the motion is out of order until we dispose of the request for unanimous consent.

Mr. UNDERWOOD. Mr. Speaker, I desire to suggest to the gentleman from Georgia [Mr. Hardwick] that the request which has been submitted by the gentleman from Virginia is for unanimous consent to send the bill to conference. If that is granted, that does not carry with it the question of appointing

Mr. HARDWICK. Mr. Speaker, the gentleman from Alabama knows very well that if the gentleman from Virginia [Mr. Glass] has requested that only three conferees be appointed, and the question is not raised, and the gentleman's request is granted, the Speaker will undoubtedly appoint only three conferees on the part of the House. If the gentleman will pardon me just a moment, so that the Members of the House may understand my point of view, it seems to me that any bill of this importance, affecting every section of this country and interest in it, the House is entitled to more than three conferees. If three men are wise, that does not necessarily mean that all wisdom resides in any three Members of the House, even if the gentleman from Virginia be one of the three.

Mr. UNDERWOOD. Mr. Speaker, I desire to call the gentleman's attention to this fact: I suppose the gentleman from Virginia [Mr. GLASS] does not desire to foreclose the rights of anyone, but it has been generally understood up to this time that there would be three conferees appointed on the part of the

Mr. HARDWICK. I did not so understand it. Mr. UNDERWOOD. I mean that that is the usual process in a bill of this nature.

Mr. HARDWICK. After the Senate appointed nire, did we still understand that?

Mr. UNDERWOOD. I said up until this time-up until yesterday.

Mr. HARDWICK. Oh, yes. Mr. UNDERWOOD. And I know that the gentleman from Virginia and his colleagues, constituting the three senior members on the committee, following the custom in this House, have been keeping up with the Senate amendments. They have informed themselves as to what the Senate has been doing, been keeping up with the Senate amendments. and have tried to work out their views in reference to the matter. If you inject a number of other conferees into the situation, of necessity it would delay action on the bill. I take it that the points of difference between the two Houses are not going to be very serious, except possibly on one or two matters.

Mr. HARDWICK. They are very important. UNDERWOOD. And when they come back here the House itself will have a full and ample opportunity to act on

the conference report.

Mr. HARDWICK. It will not have if this request be granted

Mr. UNDERWOOD. The suggestion I wish to make to the gentleman from Georgia is that if he grants unanimous consent to send the bill to conference, that does not foreclose his right to make a motion to appoint nine conferees, if he desires to, because the Speaker under the rules has the right to appoint the conferees only when the House does not otherwise determine. Of course, after the unanimous consent is given, the gentleman from Georgia would have the right to move the appointment of the same number of conferees that the Senate has named. If that motion is agreed to, that would end it. If the motion is voted down, the Speaker could appoint the conferees as asked for by the gentleman from Virginia. I am sure the gentleman from Georgia understands the rules as well as I do.

Mr. HARDWICK. Well, there is no need for the gentleman and myself to spar about this matter. Of course the gentleman

knows just as well as I do that with the chairman of the committee moving to appoint three it is not at all probable that any Member, outside of the committee, on either side of the House, could prevail on the House, on a hastily brought-up fight, to act otherwise, without the opportunity for some argument of the question

Mr. UNDERWOOD. Does not the gentleman from Georgia think that if he has an opportunity to submit his views to the House and ask for a vote on them that is as far as he ought

to go in reference to the matter?

Mr. HARDWICK. Possibly; but there is this further question involved: Some of these Senate amendments are of immense importance, and, in my judgment, some of them vastly improve this bill. What I would like to do, and if I can get any assurance on that point I am willing to waive any other right I have in the premises, is to be assured we are to be given an opportunity to vote on some of the Senate amendments if the conferees of the House will not agree to them in conference. Of course that depends upon the conduct of our conferees, and the gentleman knows as well as I do that the conferees can come in and move the adoption of the conference report as a whole and we can not get a vote on any one of the Senate amendments, no matter how greatly we desire, if we let this

amendments, no matter assume the stage of the proceedings pass.

In UNDERWOOD. Well, I think it would be a difficult professor on a bill of proposition for any gentleman going to conference on a bill of this kind to agree in advance that he will bring particular

amendments back for a vote.

Mr. HARDWICK. Yet that is frequently done.
Mr. UNDERWOOD. I think the papers go first to the Senate, and if the Senate should immediately agree to the report it would not be in the power of the gentleman from Virginia—Mr. HARDWICK. It has come to the House first in this case; the report comes back to the House first.

Mr. UNDERWOOD. I have not looked-

Mr. MANN. The House agrees to it first.

Mr. HARDWICK. So we have the first shot at it, so that argument does not apply. The gentleman knows I have not liked this bill at all-

Mr. MANN. There is only one Senate amendment. Mr. HARDWICK. Well, that is true, but there are many details-different propositions.

You could not act on part of the Senate report. Mr. MANN. Mr. BARNHART. Mr. Speaker, a parliamentary inquiry.
The SPEAKER. The gentleman will state it.
Mr. BARNHART. Would a motion be in order to refuse to

concur in the Senate amendment and send it to conference?

The SPEAKER. That is exactly what is up now, except it is

not a motion, but a request for unanimous consent.

Mr. BARNHART. I know, but we do not seem to be getting anywhere in the discussion.

The SPEAKER. Well, we will get there after awhile.

Mr. MANN. Mr. Speaker, a parliamentary inquiry. The SPEAKER. The gentleman will state it.

The bill as it passed the House, having been considered in the Committee of the Whole covering the entire subject, and there being no new subject involved in the Senate amendment as distinct from the various issues involved in the bill as it passed the House, is it not now in order for the gentleman from Virginia to move to disagree to the Senate amendment and agree to the conference asked for without sending it to the committee or having it acted upon in the Committee of the Whole House on the state of the Union?

Mr. HARDWICK. Mr. Speaker, I would like to be heard on

that question if the gentleman raises it seriously.

Mr. MADDEN. Mr. Speaker, a parliamentary inquiry.

Mr. UNDERWOOD. Will the gentleman let me again put this motion?

Mr. MADDEN. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. MADDEN. If objection is made to the request for unanimous consent made by the gentleman from Virginia, would that not send the bill to the Committee on Banking and Currency automatically?

The SPEAKER. Under the practice of the House, that is

exactly what would happen.

Mr. MADDEN. Unless we have some sort of an agreement that we are to have an opportunity to vote for some of the Senate amendments and if the conferees of the House justst upon the House bill as it went to the Senate, I shall refuse to give unanimous consent.

Mr. HARDWICK. That is what will happen. The SPEAKER. The Chair will state for the information of those who have not already learned it, that there is only one Senate amendment, which strikes out everything after the enacting clause in the House bill and brings in one amendment.

Mr. MANN. Now, Mr. Speaker, I do not understand that there is any new issue presented in the Senate amendment entirely apart from the consideration of the propositions involved in the bill as it passed the House and was considered in the Committee of the Whole House on the state of the Union in the The change which might have been made in the House in the consideration of the bill here, if made in the Senate, does not send it to the Committee of the Whole House on the state of the Union when it comes back. There must be a new proposition entirely to require it to be considered in the Committee of the Whole in the House, and, unless required to be so considered, does not go to the Committee on Banking and Currency,

but it is in order to take it up now.

The SPEAKER. The Chair will ask the gentleman from Illinois [Mr. Mann] if he ever saw such a performance in the

House?

Mr. GLASS. Never in the world.

Well, Mr. Speaker, I have never seen a banking Mr. MANN. and currency bill of this kind presented, but I have seen such performances in the House.

The SPEAKER. Has the gentleman ever seen that motion

Mr. MANN. Of course, it is frequently made. Now, on an appropriation bill that comes back to the House, where the Senate inserts a new amendment, an amendment covering a new item, it is never considered in the House, but has to go to the Committee of the Whole House on the state of the Union.

The SPEAKER. The Chair understands the gentleman now. He is talking about taking it from the Speaker's table because

it is the House bill with Senate amendments.

Mr. MANN. But a House bill with Senate amendments does not have to be referred to the committee unless it is to be considered in the Committee of the Whole House on the state of the Union.

The SPEAKER. Now, the only thing that ever took this bill originally from the Committee of the Whole House was one section in it that appropriated \$100,000 for something or

Mr. MANN. That created a lot of offices. Now, the Senate has changed some items in the form of a new amendment, but the subject matter was all under consideration in the House in the Committee of the Whole before. So far as I have observed the Senate amendment, there is nothing in it which would require it to go again to the Committee of the Whole.

The SPEAKER. It would take a Senate proposition involving an appropriation of money to send this for consideration to the Committee of the Whole House on the state of the The Chair has not had time to read this amendment. But the first thing to do is to get rid of this unanimous consent.

Mr. UNDERWOOD. Mr. Speaker, I renew the request.

Mr. MADDEN. Mr. Speaker-

Mr. UNDERWOOD. Allow me The SPEAKER. What is the request?

Mr. UNDERWOOD. I ask unanimous consent that this Senate amendment be disagreed to and the request of the Senate for a conference be agreed to. Now, that does not involve the question of who shall be the conferees. After the motion is agreed to, that question can be settled by the House.

Mr. HARDWICK. Mr. Speaker, reserving the right to object, I ask the gentleman to modify his request so as to give us five

conferees on the part of the House.

Mr. UNDERWOOD. That is not satisfactory to the chairman of the committee, and I do not think it should be taken away from him unless the House wants to do it.

Mr. HARDWICK. The gentleman is now proceeding by unan-

imous consent.

Mr. UNDERWOOD. I understand that. I think if the gentleman from Georgia [Mr. HARDWICK] has an opportunity, as he will, to move for five conferees, this unanimous-consent request does not take away any of his rights. I think if we do not do this, it will be necessary to ask for a rule to send the bill to conference, if we want to get away before the holidays

Mr. MADDEN. Will the gentleman yield?

Mr. UNDERWOOD. I will.

Mr. MADDEN. Is there any reason why there ought not to be an understanding, before unanimous consent is granted, that the House will have an opportunity to vote on the amendment, or amendments, as the case may be, that are added to this bill by the Senate. The reason I ask it is that I consider the bill a very much better one now than when it passed the House. In fact, I considered the bill as it passed the House very dangerons to the fiscal interests of the country, and I, for one, am not willing to send this bill to conference without knowing in advance that I am going to have an opportunity to vote for the

bill as passed by the Senate. I would not vote for the bill as it passed the House, and I do want to help to pass a law that I think is advantageous to the business interests of the country, and this is much more so than the bill which passed the House.

Mr. UNDERWOOD. I will state to the gentleman from Illinois [Mr. Madden] that, of course, the House might by unanimous consent take up the bill now and consider the amendment. But if we did that, it would take up the time of the House to-day and Monday.

Mr. LENROOT. There is just one amendment.

Mr. UNDERWOOD. We might spend a large portion of the time in the House to-day and yet might not thrash out these amendments that the committee will ultimately agree to. I think it expedites the matter, and if we want to get away before Christmas the matter should be expedited.

Mr. HARDWICK. I will ask the gentleman from Alabama how could we spend the time in a more useful and profitable way? This is an important matter. We shall be serving the best interests of the country if we take our time.

Mr. MURRAY of Oklahoma. Mr. Speaker, I object, and move that the House concur in the Senate amendment.

The SPEAKER. The gentleman can not do both things at

once. Mr. MURRAY of Oklahoma. Then I make a preferential motion.

The SPEAKER. The gentleman can not make a preferential motion until you get rid of the other.

Mr. MURRAY of Oklahoma. Then I object. The SPEAKER. The gentleman has a perfect right to object. Mr. MANN. Mr. Speaker, will the gentleman from Alabama permit me to make a suggestion to him?

Mr. UNDERWOOD. Certainly.

Mr. MANN. When this bill goes to conference, and the conferees report back to the House, it is within the power of the House to receive the conference report, and the motion of the gentleman would then be in order.

Mr. HARDWICK. Yes; but, if the gentleman will pardon me, we should have to vote on it as a whole. We can not vote on the different substantive propositions involved. Some of them we might favor and some of them we might perhaps oppose. This is the stage in the parliamentary proceedings in which rights of that kind must be preserved if they are to be preserved at all.

Mr. MURRAY of Oklahoma. Mr. Speaker, I move now to concur in the Senate amendment.

The SPEAKER. The Chair finds by examination of this bill

that the salaries were raised in it.

Mr. MANN. Mr. Speaker, the raising of salaries would not send it to the Committee of the Whole House on the state of the Union. The changing of a salary would not, but it has been suggested that the guaranteeing of bank deposits would.

Mr. HARDWICK. But the creation of new offices would not?

Mr. MANN. I do not think so.

Mr. UNDERWOOD. Mr. Speaker, I suggest to the gentleman from Oklahoma [Mr. Murray], in order to avoid all question, that he ask unanimous consent to concur in the Senate amendment. I undertsand that if that is disagreed to it is equivalent to a motion to disagree, and then it will be in order to The bill would then be before the agree to the conference. House, would it not?

Mr. MURRAY of Oklahoma. Oh, yes; but one vote might

change the result. We might get a majority.

The gentleman might ask unanimous Mr. UNDERWOOD. consent that the bill be laid before the House for consideration and then move to concur in the Senate amendment. Speaker is in doubt whether it can be done.

Mr. MURRAY of Oklahoma. Then, Mr. Speaker, I will withdraw the motion for that purpose and ask unanimous consent.

Mr. UNDERWOOD. I will ask unanimous consent, Mr. Speaker, that the bill be laid before the House for consideration. The SPEAKER. The gentleman from Alabama [Mr. Underwood] asks unanimous consent that the bill be taken from the Speaker's table and laid before the House for consideration.

Is there objection? [After a pause.] The Chair hears none.

Mr. MURRAY of Oklahoma. Mr. Speaker, I move that the

House concur in the Senate amendment.

The SPEAKER. The Clerk will report the bill by title.

The Clerk read as follows:

An act (H. R. 7837) to provide for the establishment of Federal reserve banks, to furnish an elastic currency, to afford means of rediscounting commercial paper, to establish a more effective supervision of banking in the United States, and for other purposes.

Mr. UNDERWOOD. Mr. Speaker, I want to inquire of the gentleman from Oklahoma whether or not he desires to discuss the question?

Mr. MURRAY of Oklahoma. I am not particular about it.

would be willing to take a vote on it.

Mr. MANN. There is a motion pending to concur in the Senate amendment. That amendment must be read. I am not willing to vote on a proposition of that sort without its

being reported.

Mr. UNDERWOOD. My purpose is to set a time for debate. Mr. MANN. I have no objection to an agreement as to the

time for debate.

Mr. UNDERWOOD. If it is agreeable to the gentleman from Oklahoma [Mr. Murray], I will ask unanimous consent that there may be 30 minutes' debate on the motion, 15 minutes to be controlled by the gentleman from Oklahoma and 15 minutes

by the gentleman from Virginia [Mr. Glass].

Mr. MADDEN. Mr. Speaker, I reserve the right to object.

Mr. MURRAY of Oklahoma. Mr. Speaker, I think if we are going to discuss it at all, we had better have a little more time

Mr. MADDEN. I think, Mr. Speaker, it is only fair that we should have sufficient time to discuss the bill intelligently, and we ought to have at least two hours on a side. Personally, I favor the Senate amendments, and would vote for them if an opportunity were given to me, and I want to see everybody else in the House have an opportunity to hear just what the merits of the Senate amendments are.

Mr. UNDERWOOD. Mr. Speaker, I think this bill ought to go to conference at once. Of course, after the bill is reported it will be in order to move the previous question which will limit debate to 20 minutes on a side. I think if we want to get away before the Christmas holidays that ought to be done.

Mr. MURRAY of Oklahoma. Suppose we agree to 30 min-

utes on a side.

Mr. MANN. I shall object to any unanimous-consent agree-

ment with such a short time allowed for debate.

The SPEAKER. The gentleman from Illinois [Mr. Mann] objects to any unanimous-consent agreement. The Clerk will read the Senate amendment.

The Clerk read as follows:

The Clerk read as follows:

Strike out all after the enacting clause and insert the following:

"That the short title of this act shall be the 'Federal reserve act.'

"Wherever the word 'bank' is used in this act, the word shall be held to include State bank, banking association, and trust company, except where national banks or Federal reserve banks are specifically referred to.

"The terms 'national bank' and 'national banking association' used in this act shall be held to be synonymous and interchangeable. The term 'member bank' shall be held to mean any national bank, State bank, or bank or trust company which has become a member of one of the reserve banks created by this act. The term 'board' shall be held to mean Federal reserve board; the term 'district' shall be held to mean Federal reserve district; the term 'reserve bank' shall be held to mean Federal reserve bank.

"FEDERAL RESERVE DISTRICTS.

"FEDERAL RESERVE DISTRICTS.

mean Federal reserve bank.

"FEDERAL RESERVE DISTRICTS.

"SEC. 2. As soon as practicable, the Secretary of the Treasury and not less than two other members of the Federal reserve board hereinafter provided for, to be assigned by the President, acting as 'The reserve bank organization committee,' shall designate not less than 8 nor more than 12 cities to be known as Federal reserve cities, and shall divide the continental United States, including Alaska, into districts, each district to contain one, and only one, of such Federal reserve cities. The determination of said organization committee shall not be subject to review except by the Federal reserve board when organized: Provided, That the districts shall be apportioned with due regard to the convenience and customary course of business and shall not necessarily be coterminous with any State or States. The districts thus created may be readjusted and new districts may from time to time be created by the Federal reserve board, not to exceed 12 in all. Such districts shall be known as Federal reserve districts and may be designated by number. A majority of the organization committee shall constitute a quorum with authority to act.

"Said organization committee shall be authorized to employ counsel and expert aid, to take testimony, to send for persons and papers, to administer oaths, and to make such investigation as may be deemed necessary by the said committee in determining the reserve districts and in determining the cities within such districts where such Federal reserve banks shall be severally located. The said committee, shall supervise the organization, in each of the cities designated, of a Federal reserve bank which shall include in its title the name of the city in which it is situated, as 'Federal Reserve Bank of Chicago.'

"Under regulations to be prescribed by the organization committee, every national banking association in the United States and every trust company within the District of Columbia incorporated under an act of Congress approved Oc

cates.

"The shareholders of every Federal reserve bank shall be held individually responsible, equally and ratably, and not one for another, for all contracts, debts, and engagements of such bank to the extent of the amount of their subscriptions to such stock at the par value thereof in

addition to the amount subscribed, whether such subscriptions have been paid up in whole or in part, under the provisions of this act.

"Any national bank failing to signify its acceptance of the terms of this act within the 60 days aforesaid shall cease to act as a reserve agent, upon 30 days' notice, to be given within the discretion of the said organization committee or of the Federal reserve board.

"Any national banking association in the United State now or the provisions of the Federal reserve board."

"Any national banking association in the United State now or the provisions of this act applicable thereto, all of the rights, privileges, and franchises of such association granted to it under the national-bank act, or under the provisions of this act, shall be thereby forfeited. Any noncompliance with or violation of this act states of competent jurisdiction in a used by any court of the United States of competent jurisdiction in a used by any court of the United States of competent jurisdiction in a used by any court of the United States of competent jurisdiction in a used by any court of the United States of the Pederal reserve board, by the Comptroller of the Currency in his own name before the association shall be declared dissolved. In cases of such noncompliance or violation, other than the failure to become a member beank under the provisions of this act, every director, who was a such as a such as

"Sec. 3. Each Federal reserve bank shall establish branch offices within the Federal reserve district in which it is located and also in the district of any Federal reserve bank which may have been suspended, such branches to be established and conducted at places and under regulations approved by the Federal reserve board.

"FEDERAL RESERVE BANKS.

"FEDERAL RESERVE BANKS.

"Sec. 4. When the organization committee shall have established Federal reserve districts as provided in section 2 of this act, a certificate shall be filed with the Comptroller of the Currency showing the geographical limits of such districts and the Federal reserve city designated in each of such districts. The Comptroller of the Currency shall thereupon cause to be forwarded to each national bank located in each district, and to such other banks declared to be eligible by the organization committee which may apply therefor, an application blank in form to be approved by the organization committee, which blank shall contain a resolution to be adopted by the board of directors of each bank executing such application, authorizing a subscription to the capital stock of the Federal reserve bank organizing in that district in accordance with the provisions of this act.

"When the minimum amount of capital stock prescribed by this act for the organization of any Federal reserve bank shall have been subscribed and allotted the organization committee shall designate any five banks of those whose applications have been received to execute a certificate of organization, and thereupon the banks so designated shall, under their seals, make an organization crificate which shall specifically state the name of such Federal reserve bank, the territorial extent of the district over which the operations of such Federal reserve bank are to be carried on, the city and State in which said bank is to be located, the amount of capital stock and the number of shares into which the same is divided, the name and place of doing business of each bank executing such certificate, and of all banks which have subscribed to the capital stock of such Federal reserve bank and the number of shares subscribed by each, and the fact that the certificate is made

to enable those banks executing same, and all banks which have subscribed or may thereafter subscribe to the capital stock of such Federal reserve bank to avail themselves of the advantages of this act.

"The said organization certificate shall be acknowledged before a fudge of some court of record or notary public; and shall be, together with the acknowledgment thereof, authenticated by the seal of such court of notary thanks and the court of notary who court of notary thanks and the court of notary who court of notary thanks and the court of notary who court of notary thanks and the court of notary who court of notary thanks and the court of notary who court of notary thanks and the court of the currency as aforesaid, the said Federal reserve bank shall become a body corporate, and as such, and in the name designated in such organization unless it is sooner dissolved by an act of Cougress, or unless its franchise becomes forfeited by some violation of law.

"Third. To make contracts."

"Fourth wife of such certified by some violation of law.

"Third. To make contracts."

"Fifth. To appoint by its board of directors, elected as hereinafter provided, such officers as are not otherwise provided for in this act, to define their duties, require bonds of them and fix the penalty thereof, to dismiss such officers or any of them as may be appointed by them at pleasure, and to appoint of them as may be appointed by them at pleasure, and to appoint of them as may be appointed by the many be conducted, and the privileges granted to it by law may be exercised and enjoyed.

"Seventh. To exercise by its board of directors, or dity arthorized to dismiss and such incidental powers as shall be necessary to carry on the business of banking within the limitations prescribed by this act.

"Eighth. Upon deposit with the Treasurer of the United States of any bonds of the United States in the manner provided by a submission of the wind and

"The chairman of the board of directors of the Federal reserve bank of the district in which the bank is situated or, pending the appointment of such chairman, the organization committee shall classify the member banks of the district into three general groups or divisions. Each group shall contain, as nearly as may be, one-third of the aggregate number of the member banks of the district, and shall consist, as nearly as may be, of banks of similar capitalization. The groups shall be designated by number by the chairman.

"At a regularly called meeting of the board of directors of each member bank in the district it shall elect by ballot a district reserve elector and shall certify his name to the chairman of the board of directors of the Federal reserve bank of the district. The chairman shall establish lists of the district reserve electors thus named by banks in each of the aforesaid three groups and shall transmit one list to each elector in each group.

the aforesaid three groups and shall transmit one list to each elector in each group.

"Every elector shall, within 15 days after the receipt of the said list, certify to the chairman his first, second, and other choices of a director of class A and class B, respectively, upon a preferential ballot, on a form furnished by the chairman of the board of directors of the Federal reserve bank of the district. Each elector shall make a cross opposite the name of the first, second, and other choices for a director of class A and for a director of class B, but shall not vote more than one choice for any one candidate.

"Any candidate having a majority of all votes cast in the column of first choice shall be declared elected. If no candidate have a majority of all the votes in the first column, then there shall be added together the votes cast by the electors for such candidates in the first column. If any candidate then have a majority of the electors voting, by adding together the first and second choices, he shall be declared elected. If no candidate have a majority of electors voting when the

first and second choices shall have been added, then the votes cast in the third column for other choices shall be added together in like manner, and the candidate then having the highest number of votes shall be declared elected. An immediate report of election shall be

manner, and the candidate then having the highest number of votes shall be declared elected. An immediate report of election shall be declared.

"Three directors belonging to class C shall be appointed directly by the Federal reserve board, and shall have been for at least two years residents of the district for which they are appointed, one of whom shall be designated by said board as chairman of the board of directors of the Federal reserve bank of the district to which he is appointed and shall be designated by said board as 'Federal reserve agent.' He shall be a person of tested banking experience; and in addition to his duties as chairman of the board of directors of the Federal reserve bank of the district to which he is appointed and shall be regulations to be established by the Federal reserve board at local office of said board, which shall be situated on the premises of the Federal reserve bank of the district. He shall make requirer reserve bank of the Federal reserve board, and shall act as its official representative for the performance of the functions conferred upon it by this act. He shall receive an annual compensation to be fixed by the Federal reserve board and paid monthly by the Federal reserve bank to which he is designated. One of the directors of class C, who shall be a person of tested banking experience, shall be appointed by the Federal reserve board as deputy chairman and deputy Federal reserve agent to exercise the powers of the chairman of the board and Federal reserve agent to exercise the powers of the chairman of the board and Federal reserve agent to exercise the powers of the chairman of the board and Federal reserve bank hall be paid by the respective Federal reserve banks. Any compensation that may be provided, a reasonable allowance for necessary expenses in attending meetings of their respective boards, which amount shall be paid by the respective Federal reserve banks. Any compensation the chairman of the board of directors of Federal reserve banks for the first time, cal

such directors, such appointees to hold office for the unexpired terms of their predecessors.

"STOCK ISSUES—INCREASE AND DECREASE OF CAPITAL.

"SEC, 5. The capital stock of each Federal reserve bank shall be divided into shares of \$100 each. The outstanding capital stock shall be increased from time to time as member banks increase their capital stock and surplus or as additional banks become members, and may be decreased as member banks reduce their capital stock or surplus or cease to be members. Shares of the capital stock of Federal reserve banks owned by member banks shall not be transferable nor be hypothecable. In case a member bank increase its capital stock or surplus, it shall thereupon subscribe for an additional amount of capital stock of the Federal reserve bank of its district equal to 6 per cent of the said increase, one-half of said subscription to be paid in the manner hereinbefore provided for original subscription and one-half subject to call of the Federal reserve boand. A bank applying for stock in a Federal reserve bank at any time after the organization thereof must subscribe for an amount of the capital stock of the Federal reserve bank equal to 6 per cent of the paid-up capital stock and surplus of said applicant bank, paying therefor its par value plus one-half of 1 per cent a month from the period of the last dividend. When the capital stock of any Federal reserve bank shall have been increased, either on account of the increase of capital stock of member banks or on account of the increase of capital stock of member banks or on account of the increase of capital stock of member banks of the capital stock in a spinal reserve bank, and in case a member bank goes into voluntary liquidation it shall surrender all of its holdings of the capital stock of said Federal reserve bank and he redeased from its stock subscription not previously called. In either case the shares surrendered shall be canceled and such member bank shall be declared insolvent and a receiver appointed therefor, the s

"DIVISION OF EARNINGS.

"BUCISION OF EARNINGS.

"Spc. 7. After all necessary expenses of a Federal reserve bank have been paid or provided for, the stockholders shall be entitled to receive an annual dividend of 6 per cent on the paid-in capital stock, which dividend shall be cumulative. One-half of the net earnings, after the aforesaid dividend claims have been fully met, shall be paid into a surplus fund until such fund shall amount to 40 per cent of the paid-in capital stock of such bank, and of the remaining one-half, 50 per cent shall be paid to the United States as a franchise tax, and 50 per cent shall be paid to the United States as a frustee for the benefit of depositors in all failed member banks in the United States and failed

member trust companies in the District of Columbia, the money to be kept in and losses from failures to be paid from it as a depositors' insurance fund under a division of the Treasury to be constituted and managed under such regulations as may be prescribed by the Secretary of the Treasury. Whenever the Secretary of the Treasury, out of said find, shall pay any amounts due to depositors of failed member banks, the Secretary of the Treasury shall be subrogated to all the rights of said depositors, and in the settlement of the affairs of any such bank all dividends that would have been due to such depositors shall be paid to the Secretary of the Treasury, and the same shall be by him paid into and become a part of said depositors' Insurance fund. All net earnings derived by the United States from Federal reserve banks shall, in the discretion of the Secretary, be used to supplement the gold reserve held against outstanding United States notes, or shall be applied to the reduction of the outstanding bonded indebtedness of the United States, under regulations to be prescribed by the Secretary of the Treasury, Should a Federal reserve bank be dissolved or go into liquidation, any surplus remaining, after the payment of all debts, dividend requirements as hereinbefore provided, and the par value of the stock, shall be paid to and become the property of the United States and shall be similarly applied.

"Every Federal reserve bank incorporated under the terms of this act, the capital stock and surplus therein and the income derived therefrom shall be exempt from Federal, State, and local taxation, except in respect to taxes upon real estate.

"Sec. 8. That section 5154, United States Revised Statutes, be amended to read as follows:

"Any bank incorporated by special law of any State or of the United States or organized under the general laws of any State or of the United States or organized under the general laws of any State or of the United States or organized under the general laws of any State or of the United St

" STATE BANKS AS MEMBERS,

by the Federal reserve act and by the national banking act for associations originally organized as national banking associations."

"SEC. 9. Any bank incorporated by special law of any State, or organized under the general laws of any State or of the United States, may make application to the reserve bank organization committee, pending organization, and thereafter to the Federal reserve board or the right to subscribe to the stock of the Federal reserve board or the right to subscribe to the stock of the Federal reserve bank organized or to be organized within the Federal reserve bank organized or to be organized. The organization committee or the Federal reserve board, under such rules and regulations as it may prescribe, subject to the provisions of this section, may permit the applying bank to become a stockholder in the Federal reserve bank of the district, stock shall be issued and paid for under the rules and regulations in this act provided for national banks which become stockholders in Federal reserve banks of the district, stock shall be issued and paid for under the rules and regulations in this act provided for national banks which become stockholders in Federal reserve banks.

"The organization committee or the Federal reserve board shall establish by-laws for the general government of its conduct in acting upon applications made by the State banks and banking associations and trust companies for stock ownership in Federal reserve banks. Such by-laws shall require applying banks not organized under Federal law to comply with the reserve and capital requirements and to submit to the examination and regulations prescribed by the organization committee or by the Federal reserve board. No applying bank shall be admitted to membership in a Federal reserve bank under the provisions of the national banking associations and restrictions hereinbefore provided, be required to conform to the provisions of the membership in a federal reserve bank under the provisions of the membership in a federal reserve ba

to exceed the book value thereof, less any liability to said Federal reserve bank, except the subscription liability not previously called, which shall be canceled, and said Federal reserve bank shall, upon notice from the Federal reserve board, be required to suspend said banking association or trust company from further privileges of membership, and shall within 30 days of such notice cancel and retire its stock and make payment therefor in the manner herein provided. The Federal reserve board may restore membership upon due proof of compliance with the conditions imposed by this section.

"FEDERAL RESERVE BOARD.

"Sec. 10. A Federal reserve board is hereby created, which shall consist of seven members, including the Secretary of the Treasury, who shall be a member ex officio, and six members appointed by the President of the United States, by and with the advice and consent of the Senate. In selecting the six appointive members of the Federal reserve board, not more than one of whom shall be selected from any one Federal reserve district, the President shall have due regard to a fair representation of the different geographical divisions of the country. The six members of the Federal reserve board appointed by the President and confirmed as aforesaid shall devote their entire time to the business of the Federal reserve board and shall encresive an annual salary of \$12,000, together with actual necessary traveling expenses. The members of said board, the Secretary of the Treasury, the Assistant Secretary of the Treasury, and the Comptroller of the Currency shall be ineligible during the time they are in office and for two years thereafter to hold any office, position, or employment conferred by any member bank. Of the six members thus appointed by the President at least two shall be persons experienced in banking or finance. One shall be designated by the President to serve for one, one for two, one for three, one for four, one for five, and one for six years, and thereafter each member so appointed shall serve for a term of six years unless sooner removed for cause by the President. Of the six persons thus appointed, one shall be designated by the President, of the six persons thus appointed, one shall be designated by the President, of the six persons thus appointed, one shall be designated by the President, of the six persons thus appointed, one shall be designated by the President, of the six persons thus appointed, one shall be designated by the President, of the six persons thus appointed, one shall be designated by the President as governor of the Federal reserve board. The governor of the Federal reserve board an

of the Federal reserve board, subject to its supervision, shall be the active executive officer. The Secretary of the Treasury may assignoffices in the Department of the Treasury for the use of the Federal reserve board shall within Todice.

"The Federal reserve board shall have power to levy semiannually upon the Federal reserve boards, in proportion to their capital stock and surplus, an assessment sufficient to pay its estimated expenses and salaries of its members and employees for the half year succeeding the levying of such assessment, together with any deficit carried forward from the preceding half year.

Washington, D. C., as soon as may be after the passage of this act, at a date to be fixed by the reserve bank organization committee. The Secretary of the Treasury shall be act officio chairman of the Federal reserve board. No member of the Federal reserve board shall be nofficer of any bank, banking institution, trust company, or Federal reserve bank nor hold stock in any bank, banking institution, or trust company; and before entering upon his duties as a member of crust or company; and before entering upon his duties as a member of a vacancy shall occur, other than by expiration of term, among the six members of the Federal reserve board appointed by the President, with the advice and consent of the Senate, to fill such vacancy, and when appointed he shall hold office for the unexpired term of the member whose place he is selected to fill.

"Nothing in this act contained shall be construed as taking away any powers heretofore vested by law in the Secretary of the Treasury which shall expire at the end of the next session of the Senate.

"Nothing in this act contained shall be exercised subject to the supervision, and control of the Seretary of the Treasury, such powers shall be exercised subject to the supervision and control of the Secretary of the Treasury abundancy and the exercised subject to the supervision of the Senate.

"Other process here to be printed for the information of the Currency an

fraction thereof that such reserve falls below 32½ per cent. The tax shall be paid by the reserve bank, but the reserve bank shall add an amount equal to said tax to the rates of interest and discount fixed by the Federal reserve board.

"(d) To supervise and regulate through the bureau under the charge of the Comptroller of the Currency the issue and retirement of Federal reserve notes, and to prescribe rules and regulations under which such notes may be delivered by the comptroller to the Federal reserve agents applying therefor.

"(e) To add to the number of cities classified as reserve and central reserve cities under existing law in which national banking associations are subject to the reserve requirements set forth in section 20 of this act; or to reclassify existing reserve and central reserve cities or to terminate their designation as such.

"(f) To suspend or remove any officer or director of any Federal reserve bank, the cause of such removal to be forthwith communicated in writing by the Federal reserve board to the removed officer or director and to said bank.

"(g) To require the writing off of doubtful or worthless assets upon the books and balance sheets of Federal reserve banks.

"(h) To suspend, for cause relating to violation of any of the provisions of this act, the operations of any Federal reserve bank and take possession thereof and administer the same during the period of suspension.

"(i) To require bonds of Federal reserve agents, perform the duties, functions, or services specified or implied in this act, and to make all rules and regulations necessary to enable said board effectively to perform the same.

"(i) To reverse general supervision over said Federal reserve banks.

"(i) To reverse general supervision over said Federal reserve banks.

rules and regulations necessary to enable said board effectively to perform the same.

"(j) To exercise general supervision over said Federal reserve banks.

"(k) To authorize member banks to use, as reserves, Federal reserve notes, or bank notes based on United States bonds, to the extent that said board may find necessary.

"(1) To grant by special permit to national banks applying therefor, when not in contravention of State or local law, the right to act as trustee, executor, administrator, or registrar of stocks and bonds undersuch rules and regulations as the said board may prescribe.

"(m) To employ such attorneys, experts, assistants, clerks, or other employees as may be deemed necessary to properly conduct the business of such board and to accomplish the purposes of this act. All salaries, allowances, and expenses of those employed to be fixed in advance by said board and to be paid in the same manner as the salaries of the members of said board. All such attorneys, experts, assistants, clerks, and other employees to be appointed without regard to the provisions of the act of January 6, 1883 (22 R. S., 403), and amendments thereto, or any rule or regulation made in pursuance thereof: Provided, That nothing herein shall prevent the President from placing said employees in the classified service.

"FEDERAL ADVISORY COUNCIL.

"FEDERAL ADVISORY COUNCIL.

"Sec. 12. There is hereby created a Federal advisory council, which shall consist of as many members as there are Federal reserve districts. Each Federal reserve bank by its board of directors shall annually select from its own Federal reserve district one member of said council, who shall receive such compensation and allowances as may be fixed by his board of directors subject to the approval of the Federal reserve board. The meetings of said advisory council shall be held at Washington, D. C., at least four times each year, and oftener if called by the Federal reserve board. The council may, in addition to the meetings above provided for, hold such other meetings in Washington, D. C., or elsewhere, as it may deem necessary, may select its own officers and adopt its own methods of procedure; and a majority of its members shall constitute a quorum for the transaction of business. Vacancies in the council shall be filled by the respective reserve banks, and members selected to fill vacancies shall serve for the unexpired term.

term.

"The Federal advisory council shall have power, by itself or through its officers, (1) to confer directly with the Federal reserve board on general business conditions; (2) to make oral or written representations concerning matters within the jurisdiction of said board; (3) to call for information and to make recommendations in regard to discount rates, rediscount business, note issues, reserve conditions in the various districts, the purchase and sale of gold or securities by reserve banks, open-market operations by said banks, and the general affairs of the reserve banking system.

"POWERS OF FEDERAL RESERVE BANKS,

"POWERS OF FEDERAL RESERVE BANKS.

"Sec. 13. Any Federal reserve bank may receive from any of its member banks, and from the United States, deposits of current funds in lawful money, national-bank notes, Federal reserve notes, or checks and drafts upon solvent banks of the Federal reserve system, payable upon presentation; or, solely for exchange purposes, may receive from other Federal reserve banks deposits of current funds in lawful money, national-bank notes, or checks and drafts upon solvent member or other Federal reserve banks, payable upon presentation.

"Upon the indorsement of any of its member banks, with a waiver of demand notice and protest by such bank, any Federal reserve bank may discount notes, drafts, and bills of exchange arising out of actual commercial transactions; that is, notes, drafts, and bills of exchange issued or drawn for agricultural, industrial, or commercial purposes, or the proceeds of which have been used, or are to be used, for such purposes, the Federal reserve board to have the right to determine or define the character of the paper thus eligible for discount, within the meaning of this act. Nothing in this act contained shall be construed to prohibit such notes, drafts, and bills of exchange, secured by staple agricultural products, or other goods, wares, or merchandise from being eligible for such discount; but such definition shall not include notes, drafts, or bills covering merely investments or issued or drawn for the purpose of carrying or trading in stocks, bonds, or other investment securities, except bonds and notes of the Government of the United States. Notes, drafts, and bills admitted to discount under the terms of this paragraph must have a maturity at the time of discount of not more than 90 days: Provided, That notes, drafts, and bills drawn or issued for agricultural purposes or based on live stock and having a maturity not exceeding six months may be discounted in an amount to be limited to a percentage of the capital of the Federal reserve bank, to be as

"The aggregate of such notes and bills bearing the signature or indorsement of any one person, company, firm, or corporation rediscounted for any one bank shall at no time exceed 10 per cent of the unimpaired capital and surplus of said bank; but this restriction shall not apply to the discount of bills of exchange drawn in good faith against actually existing values.

"Any national bank may accept drafts or bills of exchange drawn upon it and growing out of transactions involving the importation, exportation, or domestic shipment of goods having not more than six months' sight to run; but no bank shall accept such bills to an amount equal at any time in the aggregate to more than one-half its paid-up capital stock and surplus.

"Section 5202 of the Revised Statutes of the United States is hereby amended so as to read as follows: No association shall at any time be indebted, or in any way liable, to an amount exceeding the amount of its capital stock at such time actually paid in and remaining undiminished by losses or otherwise, except on account of demands of the nature following:

indepted, or in any way make, to an amount endemaining undiminished by losses or otherwise, except on account of demands of the nature following:

"First. Notes of circulation.

"Second. Moneys deposited with or collected by the association.

"Third. Bills of exchange or drafts drawn against money actually on deposit to the credit of the association, or due thereto.

"Fourth. Liabilities to the stockholders of the association for dividends and reserve profits.

"Fifth. Liabilities incurred under the provisions of this act.

"The Federal reserve board may authorize the reserve bank of the district to discount the direct obligations of member banks, secured by the pledge and deposit of satisfactory securities; but in no case shall the amount so loaned by a Federal reserve bank exceed three-fourths of the actual value of the securities so pledged.

"The rediscount by any Federal reserve bank of any bills receivable and of domestic and foreign bills of exchange and acceptances shall be subject to such restrictions, limitations, and regulations as may be imposed by the Federal reserve board.

"Open-Market operations.

" OPEN-MARKET OPERATIONS.

"Sec. 14. Any Federal reserve bank may, under rules and regulations prescribed by the Federal reserve board, purchase and sell in the open market, at home or abroad, either from or to domestic or foreign banks, firms, corporations, or individuals, cable transfers and bankers' acceptances and bills of exchange of the kinds and maturities by this act made eligible for rediscount with or without the indorsement of a member bank.

"Every Federal reserve bank abell here

acc made eligible for rediscount with or without the indorsement of a member bank.

"Every Federal reserve bank shall have power:

"(a) To deal in gold coin and bullion at home or abroad, to make loans thereon, exchange Federal reserve notes for gold, gold coin, or gold certificates, and to contract for loans of gold coin or bullion, giving therefor, when necessary, acceptable security, including the hypothecation of United States bonds or other securities which Federal reserve banks are authorized to hold;

"(b) To buy and sell, at home or abroad, bonds and notes of the United States, and bills, notes, revenue bonds, and warrants with a maturity from date of purchase of not exceeding six months, issued in anticipation of the collection of taxes or in anticipation of the receipt of assured revenues by any State, county, district, political subdivision, or municipality in the continental United States, such purchases to be made in accordance with rules and regulations prescribed by the Federal reserve board;

"(c) To purchase from member banks and to sell, with or without its indorsement, bills of exchange arising out of commercial transactions, as hereimbefore defined;

"(d) To establish from time to time, subject to review and determination of the Federal reserve board, rates of discount to be charged by the Federal reserve bank for each class of paper, which shall be fixed with a view of accommodating commerce and business;

"(e) To establish accounts with other Federal reserve banks for exchange purposes and, with the consent of the Federal reserve bank for exchange purposes and, with the consent of the Federal reserve board, to open and maintain banking accounts in foreign countries, appoint correspondents, and establish agencies in such countries wheresoever it may deem best for the purpose of purchasing, selling, and collecting bills of exchange, and to buy and sell, with or without its indorsement, through such correspondents or agencies, bills of exchange arising out of actual commercial transactions wh

"GOVERNMENT DEPOSITS.

"Sec. 15. The moneys held in the general fund of the Treasury, except the 5 per cent fund for the redemption of outstanding national-bank notes and the funds provided in this act for the redemption of Federal reserve notes may, upon the direction of the Secretary of the Treasury, be deposited in Federal reserve banks, which banks, when required by the Secretary of the Treasury, shall act as fiscal agents of the United States; and the revenues of the Government or any part thereof may be deposited in such banks, and disbursements may be made by checks drawn against such deposits.

"No public funds of the Philippine Islands, or of the postal savings, or any Government funds, shall be deposited in the continental United States in any bank not belonging to the system established by this act: Provided, however, That nothing in this act shall be construed to deny the right of the Secretary of the Treasury to use member banks as depositories.

"NOTE ISSUES.

" NOTE ISSUES.

"NOTE ISSUES.

"Sec. 16. Federal reserve notes, to be issued at the discretion of the Federal reserve board for the purpose of making advances to Federal reserve banks through the Federal reserve agents as hereinafter set forth and for no other purpose, are hereby authorized. The said notes shall be obligations of the United States and shall be receivable by all national and member banks and Federal reserve banks and for all taxes, customs, and other public dues. They shall be redeemed in gold on demand at the Treasury Department of the United States, in the city of Washington, D. C., or in gold or lawful money at any Federal reserve bank.

of Washington, D. C., or in gold or lawful money at any Federal reserve bank.

"Any Federal reserve bank may make application to the local Federal reserve agent for such amount of the Federal reserve notes hereinbefore provided for as it may require. Such application shall be accompanied with a tender to the local Federal reserve agent of collateral in amount equal to the sum of the Federal reserve notes thus applied for and issued pursuant to such application. The collateral security thus offered shall be notes and bills accepted for rediscount under the provisions of section 13 of this act, and the Federal reserve agent shall each day notify the Federal reserve board of all issues and withdrawals of Federal reserve notes to and by the Federal reserve bank to which he is accredited. The said Federal reserve board shall be authorized at any

time to call upon a Federal reserve bank for additional security to protect the Federal reserve notes issued to intend reserves in gold or law-discovery of the protect of the Federal reserve notes in actual circulation, but the amount of gold in the unit money of not less than 35 per cent against its deposits and its Federal reserve notes issued to said bank and in actual circulation and not offset the treasury, shall be at least equal to 40 per cent of the Federal reserve notes issued to said bank and in actual circulation and not offset for the protect of the federal reserve notes issued to said bank and in actual circulation and not offset for a said out shall be assigned by the Federal reserve board to each Federal reserve bank through which they were originally issued, and the federal reserve bank through which they were originally issued, and the protect of the federal reserve bank through which they were originally issued, and the protect of the federal reserve bank through which they were originally issued, and the protect of the federal reserve bank which they were originally issued, and the protect of the federal reserve bank which they were originally issued, and the protect of the federal reserve bank shall upon demand of the Secretary of the Treasury, reimbures and receptor of the Treasury in gold or of the federal reserve bank shall, upon demand of the Secretary of the Treasury, reimbures and receptor of the Treasury in gold or of the federal reserve bank shall, upon demand of the Secretary of the Treasury in gold or deficience, then such funds shall be reimbured to the extent desired necessary by the Secretary of the Treasury in gold or search of the federal reserve the protect of the Secretary of the Treasury in gold or search of the federal reserve the protect of the Secretary of the Treasury in gold or search of the secretary of the Treasury in gold or search of the secretary of the Treasury of the

Bility to reimburse the United States for any expenses incurred in printing and issuing circulating notes.

"Every Federal reserve bank shall receive on deposit from member banks or from Federal reserve banks checks and drafts drawn upon any of its depositors, and when remitted by a Federal reserve bank, checks and drafts drawn upon funds to the credit of said depositor in said restrued as prohibiting a member bank from making reasonable charges for checks and drafts so debited to its account, or for collecting and remitting funds, or for exchange sold to its patrons. The Federal reserve banks and the charge which may be imposed for the service of clearing or collection rendered by the Federal reserve bank and the charge which may be imposed for the service of clearing or collection rendered by the Federal reserve bank and the charge which may be imposed for the service of clearing or collection rendered by the Federal reserve bank.

"The Federal reserve board shall make and promulgate storefor among Federal reserve bank and their branches, and may at its discretion exercise the functions of a clearing house for such Federal reserve banks, or may designate a Federal reserve bank to exercise such functions, and may also require each such bank to exercise such functions, and may also require each such bank to exercise such functions, and may also require each such bank to exercise such functions of clearing house for its member banks.

"Sec. 17. That so much of the provisions of section 5159 of the Revisions of existing statutes, as require that before any national bank in association shall be authorized to commence banking business it shall transfer and deliver to the Treasurer of the United States at stated amount of United States registered bonds be, and the same is hereby, repealed.

"Sec. 18. Any member bank desiring to retire the whole or any part of its circulating notes may file with the Treasurer of the United States sounds securing circulation to be retired.

"Sec. 18. Any member bank desiring to retire

"Sec. 19. Demand liabilities within the meaning of this act shall comprise all liabilities maturing or payable within 30 days, and time deposits shall comprise all deposits payable after 30 days, and all savings accounts and certificates of deposit which are subject to not less than 30 days' notice before payment.

"When the Secretary of the Treasury shall have officially announced, in such manner as he may elect, the establishment of a Federal reserve bank in any district, every subscribing member bank shall establish and maintain reserves as follows:

"(a) A bank not in a reserve or central reserve city as now or hereafter defined shall hold and maintain reserves equal to 12 per cent of the aggregate amount of its demand liabilities and 5 per cent of its time deposits, as follows:

"In its vaults for a period of 24 months after said date, four-twelfths thereof.

"In its vaults for a period of 24 months after said date, four-twelfths thereof.
"In the Federal reserve bank of its district, for a period of six months after said date, two-twelfths, and for each succeeding six months an additional one-twelfth, until five-twelfths have been so deposited, which shall be the amount permanently required.
"For a period of 24 months after said date the balance of the reserves may be held in its own vaults, or in the Federal reserve bank, or in banks in reserve or central reserve cities as now defined by law.
"After said 24 months' period said reserves, other than those hereinbefore required to be held in the reserve bank, shall be held in the vaults of the member bank or in the Federal reserve bank, or in both, at its option.

before required to be held in the Federal reserve bank, or in both, at its option.

"(b) A bank in a reserve city as now or hereafter defined shall hold and maintain reserves equal to 15 per cent of the aggregate amount of its demand liabilities and 5 per cent of its time deposits, as follows:

"In its vaults six-fifteenths thereof.

"In the Federal reserve bank of its district for a period of six months after the date aforesaid at least three-fifteenths, and for each succeeding six months an additional one-fifteenth, until six-fifteenths have been so deposited, which shall be the amount permanently required.

"After said 24 months' period all of said reserves, except those hereinbefore required to be held permanently in the Federal reserve bank, shall be held in its vaults or in the Federal reserve bank, or in both, at its option.

"(c) A bank in a central reserve city, as now or hereafter defined, shall hold and maintain a reserve equal to 18 per cent of the aggregate amount of its demand liabilities and 5 per cent of its time deposits, as follows:

"In its vaults six-eighteenths thereof.

"In the Federal reserve bank for a period of six months after the date aforesaid at least three-eighteenths, and permanently thereafter six-eighteenths.

"The balance of said reserves shall be held in its own vaults or in the Federal reserve bank, at its option.

"Any Federal reserve bank may receive from the member banks as reserves, not exceeding one-half of each installment, eligible paper, as described in section 14, properly indorsed and acceptable to the said reserve bank.

"If a State bank or trust company is required by the law of its State to keep its reserves either in its own vaults or with another State bank or trust company, such reserve deposits so kept in such State bank or trust company shall be construed, within the meaning of this section, as if they were reserve deposits in a national bank in a reserve or central reserve city for a period of three years after the Secretary of the Treasury shall have officially announced the establishment of a Federal reserve bank in the district in which such State bank or trust company is situate. Except as thus provided no member bank shall keep on deposit with any nonmember bank a sum in excess of 10 per cent of its own paid-up capital and surplus. No member bank shall act as the medium or agent of a nonmember bank in applying for or receiving discounts from a Federal reserve bank with a Federal reserve bank in the carried by a member bank with a Federal reserve bank in "The reserve carried by a member bank with a Federal reserve bank in the carried bank in the carried bank in the carried by a member bank with a Federal reserve bank in the carried bank in the carried bank in the carried by a member bank with a Federal reserve bank in the carried bank in the carried by a member bank with a Federal reserve bank in the carried bank in the carr

ceiving discounts from a Federal reserve bank under the provisions of this act.

"The reserve carried by a member bank with a Federal reserve bank may, under the regulations and subject to such penalties as may be prescribed by the Federal reserve board, be checked against and withdrawn by such member bank for the purpose of meeting existing liabilities: Provided, however, That no bank shall at any time make new loans or shall pay any dividends unless and until the total reserve required by law is fully restored.

"United States banks located in Alaska or outside the continental United States may remain nonmember banks, and shall in that event maintain reserves and comply with all the conditions now provided by law regulating them; or said banks, except in the Philippine Islands, may, with the consent of the reserve board, become member banks of any one of the reserve districts, and shall, in that event, take stock, maintain reserves, and be subject to all the other provisions of this act.

"Sec 20. So much of sections 2 and 3 of the act of June 20, 1874, entitled 'An act fixing the amount of United States notes, providing for a redistribution of the national-bank currency, and for other purposes,' as provides that the fund deposited by any national banking association with the Treasurer of the United States for the redemption of its notes shall be counted as a part of its lawful reserve as provided in the act aforesaid, be, and the same is hereby, repealed. And from and after the passage of this act such fund of 5 per cent shall in no case be counted by any national banking association as a part of its lawful reserve.

"BANK EXAMINATIONS.

"BANK EXAMINATIONS.

the passage of this act such fund of 5 per cent shall in no case be counted by any national banking association as a part of its lawful reserve.

"BANK EXAMINATIONS.

"SEC. 21. Every member bank shall be examined by the Comptroller of the Currency at least twice in each calendar year and as much oftener as the Federal reserve board shall consider pecessary. The Federal reserve board may authorize examinations by the State authorities to be accepted in the case of State banks and trust companies and may at any time direct the holding of a special examination. The person making the examination of any member bank shall have power to call together a quorum of the directors of such bank, who shall, under oath, state to such examiner the character and circumstances of such of its loans of discounties of all bank examiners and make report thereof to Congress. The expense of the examinations herein provided for shall be assessed by authority of the Federal reserve board upon the banks examined in proportion to assets or resources held by such banks upon the dates when the various banks are examined.

"In addition to the examinations made and conducted by the Comptroller of the Currency, every Federal reserve banks within its district. Such examination shall be so conducted as to inform the Federal reserve board, provide for special examination of member banks within its district. Such examination shall be so conducted as to inform the Federal reserve board sunder whose auspices it is carried on of the condition of its member banks and of the lines of credit which are being extended by them. Every Federal reserve bank shall at all times furnish to the Federal reserve board shall often the said Pederal reserve bank shall at all times furnish to the Federal reserve bank as are authorized by law, or vested in the courts of justice, or such as shall be or shall have been exercised or directed by Congress, or either House thereof, or any committee thereof.

"No bank shall be subject to any visitorial powers other than such s

"Except so far as already provided in existing laws this provision shall not take effect until 60 days after the passage of this act.

"Sec. 23. The stockholders of every national banking association shall be held individually responsible for all contracts, debts, and engagements of such association, each to the amount of his stock therein, at the par value thereof, in addition to the amount invested in such stock. The stockholders in any national banking association who shall have transferred their shares or registered the transfer thereof within 60 days next before the date of the failure of such association to meet its obligations, or with knowledge of such impending failure, shall be liable to the same extent as if they had made no such transfer, to the extent that the subsequent transferee fails to meet such liability; but this provision shall not be construed to affect in any way any recourse which such shareholders might otherwise have against those in whose names such shares are registered at the time of such failure.

"Loans on Farm Lands."

"LOANS ON FARM LANDS.

"Loans on farm lands."

"Sec. 24. Any national banking association not situated in a central reserve city may make loans secured by improved and unencumbered farm land, situated within its Federal reserve district, but no such loan shall be made for a longer time than five years, nor for an amount exceeding 50 per cent of the actual value of the property offered as security. Any such bank may make such loans in an aggregate sum equal to 25 per cent of its capital and surplus, or to one-third of its time deposits, and such banks may continue hereafter as heretofore to receive time deposits and to pay interest on the same.

"The Federal reserve board shall have power from time to time to add to the list of cities in which national banks shall not be permitted to make loans secured upon real estate in the manner described in this section.

" FOREIGN BRANCHES.

to the let of cities in which national banks shall not be permitted to make loans secured upon real state in the manner described in this section.

"FOREIGN BRANCHES."

"SEC. 25. Any national banking association possessing a capital and surplus of \$1,000,000 or more may file application with the Federal reserve board, upon such conditions and under such regulations as may be prescribed by the said board, for the purpose of securing authority to establish branches in foreign countries or dependencies of the United States for the furtherance of the foreign commerce of the United States for the furtherance of the foreign commerce of the United States. Such application shall specify, in addition to the name and capital of the banking operations proposed are to be carried on and the amount of capital of the banking sosociation filing fit, the place or places where the banking operations proposed are to be carried on and the amount of capital or this foreign business. The Federal reserve board shall have power to approve or to reject such application if, in its judgment, the amount of capital proposed to be set aside for the conduct of foreign business is inadequate or if for other reasons the granting of such application is deemed inexpedient.

"Every mational banking association which shall receive authority the proposed of the conduct of foreign business is inadequate or if for other reasons the granting of such application is deemed inexpedient.

"Every mational banking association which shall receive authority the proposed pro

Mr. UNDERWOOD. Mr. Speaker, I move the previous question on the motion of the gentleman from Oklahoma [Mr. Murray], which will allow 20 minutes debate on each side.

The SPEAKER. The gentleman from Alabama moves the previous question on the motion of the gentleman from Oklahoma to concur in the Senate amendment.

Mr. WINGO. Mr. Speaker, is it not now preferential to move to concur with an amendment?

The SPEAKER. Not while the previous question is pending. Mr. MANN. Mr. Speaker, the gentleman would have authority to make a preferential motion if he was entitled to the Of course he would not-

The SPEAKER. As a matter of fact, as a technical ruling,

he is not entitled to the floor.

Mr. MANN. I do not say anything about that.
The SPEAKER. The gentleman from Alabama was recognized to make his motion, and made it, and the Chair was starting to put it. Those in favor of ordering the previous question will say "aye"; those opposed, "no."

The question was taken, and the previous question was

ordered.

Mr. WINGO. Mr. Speaker, I desire to make a preferential motion. I move to concur in the Senate amendment with an

Mr. UNDERWOOD. Mr. Speaker, the previous question hav-

ing been ordered-

The SPEAKER. The previous question having been ordered, it cuts out the gentleman's motion.

Mr. WINGO. Does it cut out a preferential motion?

The SPEAKER. The previous question cuts out everything except 40 minutes' debate.

Mr. WINGO. If the Chair will permit, that was my object in asking before you put the question. I understood that the

previous question would bar—

The SPEAKER. The gentleman from Arkansas waited, of course unintentionally, but nevertheless it is a fact that he waited, until the gentleman from Alabama [Mr. Underwood] had been recognized to move the previous question, and the Chair was starting to put it. The previous question can not be dislocated

A parliamentary inquiry, Mr. Speaker. Mr. WINGO.

The SPEAKER. The gentleman will state it.
Mr. WINGO. Is it in order to make a preferential motion at any time until the House has ordered the previous question? The SPEAKER. But the previous question has been ordered.

Mr. WINGO. I know; but that was the question. the proper time, and I simply want to be straight on the record, I do not think I should have been cut out of making my motion.

The SPEAKER. The situation is this: The gentleman from Alabama rose and addressed the Chair, and the Chair recognized him. A number of gentlemen were standing up, including the gentleman from Arkansas. The Chair recognized the gentleman from Alabama because he addressed the Chair, and the Chair had started to put the motion for the previous question when the gentleman from Arkansas [Mr. Wingo] made the parliamentary inquiry.

Mr. WINGO. Another parliamentary inquiry, Mr. Speaker.

I could not interrupt the gentleman from Alabama while he was making the motion. I was endeavoring to get the floor, and as soon as the gentleman had concluded his motion I was given recognition, made a parliamentary inquiry, and the Speaker ruled then, as he now admits, incorrectly. He ruled then that I

could not make the motion then,

The SPEAKER. Well, the Chair rules that now, because the previous question is a summary proceeding that is intended to get the bill along to another stage. Now, if the House should vote down this motion to concur, the gentleman might get what he wants by moving to instruct the conferees.

Mr. WINGO. The gentleman from Arkansas was aware that a motion to concur with an amendment was in order pending the previous question being ordered, and that was the reason

he rose in the first instance. Mr. UNDERWOOD. Mr. Speaker-

The SPEAKER. The gentleman from Alabama or the gentleman from Virginia [Mr. GLASS] is entitled to 20 minutes

Mr. MANN. How does the gentleman from Alabama get 20

Mr. UNDERWOOD. I think the gentleman from Virginia is entitled to 20 minutes.

The SPEAKER. The Chair thinks so, too.

Mr. MURRAY of Oklahoma. I desire to claim the floor under

this motion.

Mr. HARDWICK. The gentleman is the mover of the proposition.

The SPEAKER. The gentleman from Virginia [Mr. GLASS] is entitled to 20 minutes and the gentleman from Oklahoma [Mr. MURRAY] is entitled to 20 minutes, and they may arrange as they please how the time shall be occupied.

Mr. HARDWICK. I think the mover of the proposition has

the opening.

The SPEAKER. He has it if he wants it.

Mr. HARDWICK. Does the gentleman claim it? The SPEAKER. The Chair did not understand that he was claiming the floor for debate. The Chair understood that he was claiming to control the 20 minutes. The Chair will recog-

mize the gentleman from Oklahoma. It is his motion.

Mr. MURRAY of Oklahoma. Mr. Speaker, I do not intend to occupy all of the 20 minutes, but to give some other gentle-

men an opportunity to speak.

I want to say in the beginning that it is easy to be courteous. It is sometimes difficult to do our duty. Courtesy would have dictated permitting the gentleman from Virginia to make his motion, and to make up the committee of conference; but when the gentleman from Virginia [Mr. Glass] said, after being questioned by three or four gentlemen, that he could not tell when an agreement would be reached, because there were "serious differences," in view of that statement and of the action of the gentleman in the House and in the caucus, when it seemed he was afraid of an amendment being made in the caucus by a Democrat, I am unwilling to be so courteous as to overlook my obligation and duty.

There is no doubt in my mind but what every amendment placed in this bill by the Senate makes the bill better than it was when it left the House. There is one that is wholesome from one standpoint, but under a principle of commercial banking might have been left out, and that is in the matter of loaning money on real estate for so long as five years. But it will be wholesome if it be made a basis of currency, and I do not

see why it should not, along with other securities.

There is a proviso wherein the Treasurer may deposit funds in member banks. Outside of this it is clear to my mind that every provision is in the interest of the people, particularly the one, so far as it goes, in making up the board, and the other as to the loans upon farms and cattle, the only prime paper of the South and West. The board eliminates all officers except the treasurer, and, in my opinion, that is a very wise provision. There are limitations on the board going toward an effort to hedge any political movement in the board, and that is of vital importance.

On the question of credit to agriculture, it has extended the time to six months in lieu of three months, with specific language, plainer and clearer than the bill contained when it left

the House.

I want to say to the gentlemen from the South and West who represent a constituency whose prime paper is made up of this class of security that now is your only opportunity to secure it. I can not understand how you, voting for "courtesy," afford to jeopardize that interest of your constituents, if the conferees were to come back limiting that period and cut off that security, being met with the argument—and that is a sound argument—that the people expect the passage of this bill immediately. When it comes back we will be confronted with the necessity of a holiday recess, with the argument that the people expect this bill to pass.

I may say, Mr. Speaker, that the bankers of the country for months have not known where they will be placed. They naturally hoard their funds, naturally hedge against evil tendencies and contingencies that might arise, and, in some instances, from purely selfish motives. When this bill comes back they will know where they will be, and it will make it easier for money in the country. We might continue indefinitely the consideration of this bill, and I think it would make it a better bill, but in the meantime we might create one or two more of the panics created the other day by the gentleman from Illinois, and, then, those panics might become real. I want to say that that argument ought to apply now that the people expect the passage of this bill.

The Members of the South and West, and Members of those districts that are agricultural districts, have an opportunity to get what they fought for, what their people expect they should get; but if this goes back you have not that assurance, because the gentleman from Virginia [Mr. Glass], as you are well aware, fought that provision in the caucus and on the floor of this House. I do not claim or intimate that the gentleman from Virginia is less earnest or less honest about this question than I. The fact that he is honest makes it more necessary for honest men differing with him to stand by our position. If the gentle-man from Virginia had some other motive, he would likely yield

to the Senate conferees, especially if he was trying to please some one. But having a different view, I say to these gentlemen representing that class of constituency, in the interest not only of the farmer but in the interest of the bankers of that section, that now is your opportunity, and I warn you if you lose that opportunity you have yourself to blame. I repeat again, courtesy is easy but duty is hard to perform, and between duty and courtesy, between obligation and organization, and between committee report on one side and the interest of the people of this country on the other there ought not to be any hesitation as to where your vote will be cast. [Applause.]

I might enumerate many provisions in these amendments where the wording is made plainer and where every section is more in the interest of the people. Now, I apprehend that some will say that the number of regional reserve banks have been reduced. It is true the Senate amendment says that there shall be not less than 8 nor more than 12, leaving it with the board, which I think is wise. It might prove in the end that we were unable to organize more than 8, and so it is wiser than to fix the number at 12. And even from that standpoint it is better. Now, other gentlemen may desire to discuss this question, and I will reserve the balance of my time.

The SPEAKER. The gentleman reserves 11 minutes. Mr. RUBEY. Will the gentleman yield for a question? Mr. MURRAY of Oklahoma. For a question.

Mr. RUBEY. What provision, if any, is there in this bill for the retirement of national-bank notes?

Mr. MURRAY of Oklahoma. There is a provision for that, but I can not tell the gentleman just where to find it.

Mr. RUBEY. Is the gentleman willing to vote for an amendment that he does not know what it contains?

Mr. MURRAY of Oklahoma. I understand what it is and what it contains, but I do not know just the section and page now.

Mr. GLASS. Mr. Speaker, the chairman of the Banking and Currency Committee of the House does not ask nor desire that any Member shall vote on this question through considerations of courtesy to him. I do ask, however, that the House shall send this bill to conference. I ask it for the reason that it would be a grave error to concur in the Senate amendment, involving many changes in the bill as passed by the House, and expressing its deliberate judgment.

In the first place, I do not believe that the bill as returned from the Senate would be a workable law. It contains some crudities and contradictions which should be corrected. I shall not take the time of the House to point out these inconsistencies, but will simply mention one or two. In the first place, the amendment of the Senate, as I last read it, provides that the directors of class B of the regional reserve banks shall not be officials, directors, employees, or stockholders of member banks; and yet further provides that the directors of class B shall be selected from the same list of electors as directors of class Aa list composed exclusively, as was intended, of bank directors. How could that be made to operate? Directors of class B of the regional reserve banks are required to represent peculiarly the banking interests.

Mr. MURRAY of Oklahoma. Mr. Speaker, will the gentleman

Mr. GLASS. I have only a few moments, and do not desire to

Mr. MURRAY of Oklahoma. Will the gentleman yield to a

Mr. GLASS. No; I do not care to yield. I am sure that I am right and have made no misstatement of the facts. Then, again, this House, and the Democratic caucus also, vehemently insisted on a definite policy of constituting these regional reserve banks the fiscal agents of the Government, and requiring that the Government funds should be deposited in these banks under restrictions requiring that there should be a fair distribution of them in the various sections of the country. Under the Senate amendment all of that is altered and the Secretary of the Treasury is made the sole custodian, in his discretion, of these funds, and may continue to deposit these funds or not, as

The House, after full discussion, decided that we would not embark on that uncertain and reckless proposition of permitting 7,500 national banks and, it may be, 18,000 State banks, scattered all over the country, to engage in the acceptance business—that is to say, in business involving contingent liabilities without one dollar of reserve behind them as a safeguard. Th is one of the provisions of the Senate amendment. Banker after banker who came before our committee warned us against that sort of thing, and Sir Edmund Walker, head of the Canadian banking system, who was at one time a banker in this country, familiar with banking operations here and abroad,

deliberately testified before our committee that such a thing might involve frightful consequences to the banking institutions of this country. That involves nobody knows how great an expansion of credit.

Then the reserve section of the bill has been radically altered, so that under the Senate amendment the cash reserve in member banks required under existing law amounts to more than both the cash reserve and the credit reserve balances of the country. The required cash reserve in member banks has been so reduced as to practically amount to no reserve at all. Is the House willing to approve that? Within six months after the passage of this bill there would be a veritable saturnalia of inflation in the country.

Under the Senate amendment you can never have more than 12 regional reserve banks without amending the law, no matter what the necessity might develop. Under the Senate amendment the reserve board can readjust the districts as it may please, without any sort of restriction, whereas the House bill provides that this could not be done except under certain restrictions. The House bill also provides that no Federal reserve bank shall be abolished without the assent of a certain

number of banks in the district. That safeguard is swept aside.

Under the Senate amendment the distribution of earnings is entirely changed so as to provide, not a guaranty of bank deposits as some Members of this House have been misled to believe, but to provide a mere pretense of an insurance of deposits, for which purpose the Senate amendment appropriates the profits of the Government instead of taxing the banks themselves, if such a scheme is to be embarked upon at all. A colleague awhile ago propounded a question to the Member from Oklahoma asking the latter to point to the provision of the Senate amendment providing for the retirement of the bond-secured national-bank currency. There is no such provision. secured national-bank currency. There is no such provision. The Senate amendment provides for an interminable perpetuation of the bond-secured currency. We have complained for 50 years of the inflexibility of this currency. Bankers, business men, textbook writers, currency experts, uniformly and concurrently agree that we ought ultimately to retire, without disturbance or shock, this bond-secured currency; and yet the Senate amendment extends its existence interminably. Not only that, but it requires the regional reserve banks to purchase a given amount of United States 2 per cent bonds annually, against which, whether currency be needed for business purposes or not, notes shall be issued. No banking discretion remains. We may have a redundancy of currency; there may not be one particle of business necessity for the issuance of more, but rather a need of retirement. Yet under this Senate amendment banks are required to issue.

I see my time is rapidly expiring, and as other gentlemen want to talk I am able to indicate only a few of the many objections to this Senate amendment. The fact is that the gentleman who moved to concur does not know what this Senate amendment contains. The print was handed to me only one hour before the motion was made on this floor to concur, and although I have undertaken as best I could to keep up with the amendments of the Senate, frankly I do not know what they are. I know there are some things in that ought not to be in.

Mr. MURDOCK. Will the gentleman yield for a question?

Mr. GLASS. For a question. Mr. MURDOCK. In view of what the gentleman has just said, does not the gentleman think it would have been fair to the House not to have moved the previous question, but to have had this question discussed and let other Members of the House know what is in the bill and not

Mr. GLASS. I can not yield for a discussion of procedure. I am talking of substantive things and not about parliamentary procedure.

Mr. MURDOCK. But parliamentary procedure is vital. The SPEAKER. The gentleman from Virginia declines to

Mr. GLASS. Something has been said about the number of conferees. Of this I want to say that the chairman of the Banking and Currency Committee up to half past 6 o'clock on yesterday evening was led to believe that there would be but three conferees on the part of the Senate. In view of that fact I took the three ranking members of the Banking and Currency Committee of the House, assuming that they would be named as conferees, and with them went over this bill as far as we could, fixing tentatively in our own minds, with the information at hand, for what things we think the House would stand and to what it would object, so we might go into the conference and dispatch the business of the conference with facility, in order

that Members of the House may go home.

Mr. GARRETT of Texas. Mr. Speaker, will the gentleman

yield?

The SPEAKER. Does the gentleman from Virginia yield? Mr. GLASS. I have only a few minutes, but I do not care to

be discourteous to my friend. I will yield.

Mr. GARRETT of Texas. We who come from the agricultural part of the United States and the stock-raising part are vitally interested in the proviso on page 85 of the bill, between lines 13 and 19-

Mr. GLASS. May I anticipate the gentleman's question, in order to save time, and say to him frankly I think the gentlemen who I assume will be the conferees on the part of the House have not reached that section, have not discussed that particular amendment to the bill; but, I assure my friend, if we conclude that it is the judgment of the House that the provisions to which he refers should remain the House conferees will yield. But, Mr. Speaker, I do not think it is fair to ask the chairman of the Banking and Currency Committee now as to these details concerning the things he will assent to or stand against.

Mr. GARRETT of Texas. Mr. Speaker, I want to ask the

gentleman also in regard to the 12-months section. If we can not inquire what is going to happen if these conferees are to be appointed and have some information from them on this question, which is very vital to our part of the country, we will be compelled to vote to concur in the Senate amendment.

Mr. GLASS. Well, Mr. Speaker, I can not undertake to indicate to this House now what the conferees will do. I do not think it would be proper, because I do not know myself.

Mr. GARRETT of Texas. Mr. Speaker, I will ask the gentleman if he would recede upon those two sections of the bill?

Mr. GLASS. I will not agree in advance as to any line of action. I want to represent the judgment of the House and not any particular faction or interest in the House.

Mr. Speaker, I reserve the balance of my time. The SPEAKER. The gentleman from Virginia has six min-

Mr. MURRAY of Oklahoma. I desire to recognize the gen-

tleman from Illinois [Mr. WILLIAMS] for half a minute.
Mr. WILLIAMS. Mr. Speaker, I do not care to occupy the time of the House. I will say I want to put a quietus on the howl of the calamity howlers in the shortest possible way.

I ask unanimous consent to extend my remarks in the Rec-

Mr. MANN. Mr. Speaker, unless some general arrangement is made I shall object to gentlemen taking a minute and then ex-

tending remarks in the Record. I object.

Mr. MURRAY of Oklahoma. Mr. Speaker, I yield three minutes to the gentleman from Kansas [Mr. Neeley].

Mr. NEELEY of Kansas. Mr. Speaker, there are three propositions in this bill that Members of this House representing agricultural constituencies particularly are very much concerned about, and these same Members are exceedingly interested to know what the conferees propose to do if they get a chance to

When we were in the committee we discussed the insurance of bank deposits, the discount of agricultural paper, and the authorization of farm loans by national banks. I found that when the gentleman from Arkansas [Mr. Wingo] offered his bank-deposit guaranty scheme it was received with cold indifference and voted down upon the final vote, without any discussion or consideration whatever, and later the caucus sustained that action. The bill now comes from the Senate with the groundwork laid for this most commendable and feasible plan. I want to know what the conferees propose to do with this. The original bill provided a miserable makeshift of a 45day discount for agricultural paper, and that was the thing that provoked a caucus of the majority side of this House, lasting one day less than three weeks, with the result that those of us who believe in a square deal for the farming interests of the country were finally able to force an amendment to the bill extending the period to 90 days. I want to know what this proposed conference committee, who fought us both in committee and in the caucus, proposes to do with this most commendable six months' extension placed in this bill in the Senate, with relation to agricultural paper? [Applause.] When we were in committee an amendment was offered by the gentleman from South Carolina [Mr. RAGSDALE] designed to accomplish the very purpose accomplished by this Senate amendment, and the expression upon the faces of some of the members of that committee were as uncomplimentary to him when he offered the amendment as was the vote when it was taken. I offered an amendment in that committee also, to extend the time for farm paper from nine months to five years. It was voted down, as was every variation thereof; and upon the floor of the Democratic caucus, joined with the agricultural credit fight, we were finally able to extend the time from nine months to one year. these three things, responsive to a just demand upon the part

of the country and opposed by a majority of the House Banking and Currency Committee, have all been placed in the bill by the Senate; and I, representing an agricultural constituency, desire to be advised what this conference committee proposes to do with these propositions before I vote to give them a chance to put them out forever. There is another proposition involved I suspect that the chairman of the committee is as susceptible to mistakes as are other gentlemen. On page 62, in discussing class A membership, you will find it says:

Class A shall consist of three members, who shall be chosen by and be representative of the stock-holding banks.

They are not to be members of the stock-holding banks, as he says, but representative of them. So that when he made the statement that class B stock was absolutely inconsistent he was mistaken.

Mr. GLASS. Will the gentleman permit an interruption?

Mr. NEELEY of Kansas. I will.

Mr. GLASS. If he will read the bill further, he will see that the directors of class A must be selected from a list of bank directors

Mr. NEELEY of Kansas. Very well. We will take that mat-

ter up when we get to it.

The SPEAKER. The time of the gentleman from Kansas [Mr. Neeley] has expired. The gentleman from Virginia [Mr. GLASS] has six minutes and the gentleman from Oklahoma [Mr. Murray] six and one-half minutes remaining. [Cries of "Vote!"

The SPEAKER. If nobody else wishes to speak, the Chair will put the motion. [Cries of "Vote!" "Vote!"] The House will be in order.

Mr. MURRAY of Oklahoma. Mr. Speaker, being in the affirmative, we would like to close, and I would like the gentleman from Virginia to consume the balance of his time.

Mr. GLASS. Mr. Speaker, I am ready to vote.

Mr. FITZGERALD. The gentleman from Virginia is in

charge of the bill and is entitled to close.

Mr. MURRAY of Oklahoma. Mr. Speaker, I yield the remainder of my time to the gentleman from Georgia [Mr. HARD-I understand the gentleman from Virginia [Mr. Glass] has yielded the balance of his time.

Mr. GLASS. I do not yield my time. I simply mean to make the suggestion, Mr. Speaker, that if it is agreeable to the gentleman from Oklahoma [Mr. MURRAY], I am willing the vote should be taken. Of course, if he wishes to consume more time to speak, I am willing.

Mr. UNDERWOOD rose.

The SPEAKER. The gentleman from Alabama.

The SPEAKER. The gentleman from Alabama.

Mr. UNDERWOOD. Mr. Speaker, I desire to suggest to the gentleman from Oklahoma [Mr. Murrax] that the gentleman from Virginia, being in charge of the bill, according to the practice and customs of the House for a long time, is entitled to close

Mr. MURRAY of Oklahoma. No; that is not the practice and custom of the House. The gentleman from Virginia is not in charge of this motion.

Mr. UNDERWOOD. But he is in charge of the bill, and the custom of the House is that the gentleman in charge of the bill

shall have the privilege of closing.

Mr. MURRAY of Oklahoma. No. He is not the mover of this motion, and the practice the gentleman refers to is not applicable in this case.

Mr. MANN. Oh, yes, it is. It is always true.

Mr. HARDWICK rose.

The SPEAKER. The gentleman from Georgia.

Mr. HARDWICK. Mr. Speaker and gentlemen of the House, it seems to me we ought not to have any great difficulty in voting on this question. Certainly I have none, so far as I am concerned.

If it be true that the country awaits this bill; if it be true that business stagnates because of the delay in its passage; if it be true that the President of the United States is awaiting with eagerness its arrival at the White House, why should we not pass it by the quickest and most direct route?

Why wait, why hesitate, why pause, if we believe, as a majority of the Members on this side believe, and as no man has yet disputed, that the Senate amendments are a vast improvement on the bill as it was passed by the House? Why should we not now and here enact this legislation, upon which

business awaits? [Applause.]

Now, the gentleman from Kansas [Mr. NEELEY] called attention to the several substantive propositions-and they are the only real fundamental substantive things that are involved in this issue—in which the Senate bill is a vast improvement over the bill that passed this House. In the first place, we fought with might and main—those of us who come from the agricultural and rural sections of this country, both from the South and from the West-for more liberal treatment of our agricultural paper. And what was the most we could force from the unwilling management in our own party in a Democratic caucus and in a Democratic House? Ninety days. The Senate has given us six months—twice as much as we gave ourselves. Why do we hesitate? [Applause.] We fought on long-time paper for one year, and we finally got it after much labor and travail. The Senate gives us five years on our long-time loans. [Applause.]

Why do we wait? How will a Representative from one of the Southern or one of the Western States be able to defend his vote before his people at home when he votes to oppose the adoption of this bill with the Senate amendments? My friends, if you vote against adopting the Senate amendments, it will not be a sufficient answer for you when you are attacked at home to say that the practice of the House was that we should go into conference because the gentleman from Virginia or the gentleman from Alabama or the gentleman from somewhere else wanted it done otherwise as a matter of courtesy. Gentlemen, we are dealing with a vast question; we are dealing with a great question that affects every business interest of this country to the remotest confines of the Republic, which affects the very industrial and financial life of our people. I say courtesy will be no answer to our people at home when the voice of duty here demands that we should do this.

Mr. MURDOCK. Mr. Speaker, will the gentleman yield for a

The SPEAKER. Does the gentleman from Georgia yield to

the gentleman from Kansas?

Mr. HARDWICK. Certainly.

Mr. MURDOCK. I wish the gentleman would tell the House that this is our only chance on these three things.

Mr. HARDWICK. Undoubtedly. I want to warn you now, gentlemen. The gentleman from Viginia [Mr. Glass] refused to the propositions of the second of th to say how he would be as regards these two propositions to which I refer, and yet we know how he was in the Democratic caucus. [Applause.]

I do not want any promise, but I know what we may expect from the House conferees, and I have had enough experience in the parliamentary work of this body to know that if we do not vote now we shall probably tie our hands and gag ourselves and give up this great fight for the agricultural interests of the South and the West.

Mr. BARKLEY. Mr. Speaker, will the gentleman yield? The SPEAKER. Does the gentleman yield?

Mr. HARDWICK. Certainly. Mr. BARKLEY. Does the gentleman mean to say that if the conferees should eliminate the provision increasing the term of long-time paper from one year to five years and the term of short-time paper from three months to six months we could not vote against that report when it comes into the

Mr. HARDWICK. But we will have to do it as a whole.

Mr. BARKLEY. Can we not do it as a whole?

Mr. HARDWICK. I understand the gentleman's question, and I do not yield any further. . We would have to vote the report up or down as a whole, and you would be met then, as you are met now, with the insistent cry that the country awaits this bill; that a great panic hovers over us because we do not pass it or because we delay its passage. The President, the administration, the Senate, the country-everything would center here on you, to urge you to vote for the conference report and to enact this legislation.

Mr. MANN. Does the gentleman yield for a question?

Mr. RAKER. Will the gentleman yield for a question? Mr. HARDWICK. I yield to the gentleman from Illinois.

Mr. MANN. Does the gentleman think if the conference report comes in the administration will urge the Senate to pass it on account of the panic hovering over us?

Mr. HARDWICK. I think the President would urge its passage, because we know that business has halted while this bill was in process of being enacted, and we know he has said that it was extremely important for Members on this side to enact this legislation at the earliest possible moment.

Mr. MANN. I hope the gentleman will transmit that information to our beloved Speaker. He has not learned it yet.

[Laughter.]

Mr. HARDWICK. Now, Mr. Speaker, I want to say that I urge upon the membership of this House to concur in the Senate

amendment. There is not a single important trouble—

Mr. GRAHAM of Illinois. I want to point out an inconsistency in the bill and ask you if you want to change it.

Mr. HARDWICK. I can not yield to the gentleman.

Mr. GRAHAM of Illinois. In one place it provides for 35 per cent and in another for 33 per cent of the reserve.

Mr. HARDWICK. I want to say that if the gentlemen in charge of this bill had been liberal with the House about time for this debate and had given us time to go into these details, I would answer with pleasure every single objection of a technical nature that they urge about this Senate amendment; but they have said "no," the previous question is ordered, and we have but 20 minutes' discussion of this great question, in which is wrapped up the very industrial life and financial life of the

American people. [Applause.] And then they say—
The SPEAKER. The time of the gentleman has expired.
Mr. HARDWICK. I hope the House will vote to concur and

pass this bill at once. [Applause.]

Mr. GLASS. Mr. Speaker, how much time have I remaining? The SPEAKER. Six minutes.

Mr. GLASS. How much time has the gentleman from Oklahoma [Mr. MURRAY]?
The SPEAKER. None at all.

Mr. GLASS. I yield two minutes to my colleague from New York [Mr. FITZGERALD].

Mr. FITZGERALD. Mr. Speaker, I hope this bill will be sent to conference. It would make the Democratic Party absolutely ridiculous in the eyes of the country [applause on the Republican side] if, after spending all the time that has been taken to perfect a banking and currency bill, it rushed pell-mell to adopt the Senate amendment because there were one or two things that appealed particularly to large numbers of the House, without anyone really knowing what the result of the amend-ment would be. I do not know whom the House conferees will be, but I have sufficient confidence in them to believe that they will try to meet the sentiments of a majority of the Democrats in this House and not the sentiments of the Progressives and Republicans.

Mr. RAGSDALE. Will the gentleman yield? Mr. FITZGERALD. No; I will not yield. I I have only two minutes. In adjusting the bill they will eliminate the imperfections that have been pointed out by the gentleman from Virginia [Mr. Glass] as calamities, and will so perfect the bill as not only to meet the sentiment of the Members on this side of the House, but will meet the demands of the country for a bill that will bring relief to the financial and commercial interests of the country, and will reflect credit upon the administration and upon the Democratic Party.

Suppose this amendment were to be adopted out of hand, and

after it were adopted it was discovered that through haste or oversight some vital portion of the bill was of such a character that it would bring disaster to the commercial world. cuse could be offered, what defense could be made? Would that not be doing just what our opponents hope we will do, put ourselves where the wrath of the country would sweep us out of

power and out of the confidence of the people?

I hope the House will do the wise and sensible thing, and give a chance to have the bill examined and perfected in an orderly and in the usual way.

The SPEAKER. The time of the gentleman has expired. Mr. GLASS. I yield one minute to my colleague from Cali-

fornia [Mr. HAYES]

Mr. HAYES. Mr. Speaker, the chairman of the committee has stated very succinctly and clearly many things that ought to come out of this bill as it is sent to us from the Senate. I only desire to add one more thing. The Senate amendment permits the use of the notes issued by the Federal reserve banks as reserves in all the member banks, which anybody who knows anything about banking knows would mean the possibility of violent and dangerous and destructive inflation, and it should never pass with that provision in it. [Applause.]

Mr. GLASS. I yield three minutes to the gentleman from

Alabama [Mr. UNDERWOOD]. [Applause.]
Mr. UNDERWOOD. Mr. Speaker, I regard this bill as the greatest economic measure that has confronted the country in many years. I believe if a few inequalities that now exist are smoothed out, we are to have a bill that will be of great service to the people. [Applause.] This bill is so good that many of the opponents of the party in power have voted for it in the Senate and in the House. [Applause.] The gentleman from Georgia [Mr. HARDWICK] opposes the bill going to conference because he says that we must vote the conference report up or down, without amendment, and yet the gentleman from Georgia asked this House to vote up the Senate amendment without consideration or amendment when many inequalities are pointed

out to him that must be perfected.

Mr. RAGSDALE. Will the gentleman yield?

Mr. UNDERWOOD. Yes; for a question.

Mr. RAGSDALE. It has been stated here to-day that the conferees on the part of the House would try to carry out the will of the Democrats of this body. The Democrats of this body in caucus went on record in favor of 90 days for agricultural credits. Will the gentleman state how he stands on that provision as to 6 months or 90 days?

Mr. UNDERWOOD. I will say to the gentleman from South Carolina that in the caucus I favored a liberal provision as to agricultural credits. I favor it now, and I hope the conferees will bring back a report that will enable the Senate provision to stand, so far as the length of time for agricultural paper is concerned. [Applause.] That is my individual view; that is my personal wish, but we can not destroy a great bill by reason of our individual desires.

Now I want to point to just one thing in this bill that makes it impossible for you to accept the Senate amendment as it stands. On page 91 of this bill it provides that the reserve for the redemption of these notes shall be 35 per cent. On page 93 it provides that the same reserve shall be 33 per cent.

Mr. MURRAY of Oklahoma. That is a typographical error. Mr. UNDERWOOD. Of course it was a typographical error, a mistake, but do you want to write typographical error and mistake into the law so that you can not enforce it?

The SPEAKER. The time of the gentleman from Alabama has expired; all time has expired.

Mr. MURRAY of Oklahoma. Mr. Speaker, on this motion I

demand the yeas and nays. Mr. MANN. Mr. Speaker, is anybody on this side entitled to recognition in debate?

Mr. UNDERWOOD. Mr. Speaker, I ask unanimous consent that the gentleman from Illinois may have five minutes.

Mr. WILLIAMS. Mr. Speaker, I object.
Mr. UNDERWOOD. Mr. Speaker, I ask unanimous consent that gentlemen who have been recognized, including the gentleman from Illinois, may have leave to extend remarks in the

Mr. MURRAY of Oklahoma. Make it apply to all Members. Mr. UNDERWOOD. Very well, I will ask to have it apply to all Members.

Mr. MANN. Mr. Speaker, under the reformed liberal rules of the House, nobody can be heard except Members on the majority side of the House, and I object.

The SPEAKER. The Chair wishes to state that the gentleman from Oklahoma was recognized to make his motion, and when the previous question was ordered, nobody participating in that proceeding except Members on the Democratic side, who, of course, were entitled to recognition, the Chair was not trying to prevent Republicans

Mr. MANN. Oh, Mr. Speaker, if the Chair will pardon me, I was not criticizing the Chair. [Cries of "Regular order!"]

Mr. UNDERWOOD. Mr. Speaker, I again renew my request that the gentleman from Illinois may have five minutes by unanimous consent.

Mr. WILLIAMS. Reserving the right to object, Mr. Speaker

Mr. GARDNER. I object, Mr. Speaker.

The SPEAKER. The gentleman from Massachusetts objects.

The gentleman from Oklahoma demands the yeas and nays on the motion to concur in the Senate amendment.

Mr. LEVER. Mr. Speaker, a parliamentary inquiry. The SPEAKER. The gentleman will state it. Mr. LEVER. If the motion of the gentleman from Oklahoma is voted down, will it be in order for the House to instruct the

conferees on certain of these provisions?

The SPEAKER. It would be in order if they get the conferees

Mr. MURDOCK. And recognition. Mr. GRIFFIN. And the votes. [Laughter.]

The SPEAKER. The Chair will state the parliamentary situation. If this motion is voted down, that is equivalent to a disagreement, and then a motion for the conferees will be in order. After the conferees are appointed the motion to instruct them would be in order.

Mr. CULLOP. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.
Mr. CULLOP. When the conferees are appointed, then it is too late to make the motion to instruct. It must be made between the motion for the conferees and the appointment of

The SPEAKER. It will be in order when the conference is agreed to. The question is on the demand of the gentleman from Oklahoma for the yeas and nays.

The yeas and nays were ordered.

The SPEAKER. The question is on the motion of the gentleman from Oklahoma to concur in the Senate amendments.

The question was taken; and there were—yeas 59, nays 295, answered "present" 2, not voting 78, as follows:

Mr. MAHER with Mr. VARE.

On the vote:

Mr. VAUGHAN with Mr. CALDER. Mr. Adair with Mr. Anthony

Mr. L'ENGLE (in favor of) with Mr. BARCHFELD (against concurrence in Senate amendment).

Mr. SABATH with Mr. GILLETT (ending after holidays).

Mr. Talbort of Maryland (against) with Mr. Madden (for concurrence in Senate amendment; ending Monday).

Mr. BROWNING. Mr. Speaker, did Mr. Scully vote?
The SPEAKER. He did not,
Mr. BROWNING. Mr. Speaker, I voted "no." I wish to withdraw my vote and be recorded "present."

The name of Mr. Browning was called, and he answered

Mr. GARRETT of Tennessee. Mr. Speaker, I voted "no." I am paired with the gentleman from Michigan, Mr. Fordney, and I am informed he has not voted. I therefore desire to withdraw my vote and answer "present."

The name of Mr. Garrett of Tennessee was called, and he answered "Present."

The result of the vote was announced as above recorded.

Mr. GLASS. Mr. Speaker—
Mr. MANN. Mr. Speaker, a parliamentary inquiry.
The SPEAKER. The gentleman will state it.
Mr. MANN. Would it be in order at this time to offer a motion to instruct the conferees before the conference asked for by the Senate has been agreed to, or would that motion have to come afterwards? At the proper time I desire to make that motion

The SPEAKER. It would come after the agreement for the conferees and before the conferees are announced.

Mr. GLASS. Mr. Speaker, I desire to move that the House agree to the request for the conference asked for by the Senate.

The SPEAKER. The gentleman from Virginia moves that the House agree to the conference on this bill asked for by the

Senate. Without objection, the conference is agreed to. [After a pause.] The Chair hears none. a pause.]

Mr. MANN. Mr. Speaker, I offer the following privileged motion.

The SPEAKER. The Clerk will report the motion.

The Clerk read as follows:

Resolved, That the managers on the part of the House be instructed in conference to agree to the Senate amendment with an amendment as follows: Strike out all of the Senate amendment and insert in lieu thereof the following:

"That the short title of this act shall be the 'Federal reserve act.'

"The terms 'national bank' and 'national banking association' used in this act shall be held to be synonymous and interchangeable. The term 'member bank' shall be held to mean any national bank, State

bank, or trust company which has become a member of one of the reserve banks created by this act. The term 'board' shall be held to mean Federal reserve board; the term 'district' shall be held to mean Federal reserve district; the term 'reserve bank' shall be held to mean Federal reserve bank.

"FEDERAL RESERVE DISTRICTS.

Federal reserve district; the term 'reserve bank' shall be held to mean Federal reserve bank.

"FEDERAL RESERVE DISTRICTS.

"SEC. 2. That the Federal reserve board, hereinafter provided for, shall, as soon as practicable after their appointment and confirmation, designate from among the reserve and central reserve cities now established a number of such cities to be termed Federal reserve cities, and shall divide the continental United States into districts, each district to embrace one of such Federal reserve iters: Provided, That the districts shall be formed with due regard to the convenience and customary course of financial and commercial business in each district, and need not necessarily coincide with State or county boundaries. The districts thus established shall be known as Federal reserve districts, and each of them shall be designated by the name of the Federal reserve city located therein. The Federal reserve board shall, as soon as practicable after the said districts have been established, proceed to organize, conformable to the provisions of this act, in each Federal reserve city estimated as aforesaid, a Federal reserve bank, which shall be known by the name of the city in which it is established, as, for example, 'Federal reserve bank of Chicago.' Four Federal reserve cities, and appurtenant to them four Federal reserve districts, and no more, shall in the first instance be designated and established as such by the Federal reserve board. *Provided,* That after Federal reserve barks have been organized and in operation for a period of two years in said four Federal reserve cities, with the requisite Federal reserve bistricts appurtenant thereto, and for that purpose may after and change the limits and areas of existing Federal reserve barks. There shall be allotted to every national bank within a Federal reserve district, of the capital stock of the Federal reserve bank of such district, a sun equal to 6 per cent of the Federal reserve bank of such district, as an equal to 6 per cent of the Fed

" STOCK ISSUES.

"SEC. 3. The capital stock of each Federal reserve bank shall be divided into shares of \$100 each, and shall be without voting power. The Federal reserve board shall have power to prescribe regulations for the transfer of said stock. With the consent and approval of the board, reserve banks may establish such branch offices, within their respective districts, as they deem necessary to conform to the convenience and established course of business.

" PEDERAL RESERVE BANKS.

districts, as they deem necessary to conform to the convenience and established course of business.

"FEDERAL RESERVE BANKS.

"Sec. 4. When the Federal reserve board has established Federal reserve districts as prescribed in section 2 of this act, the governor or vice governor of such board shall, under his hand and seal, execute a certificate designating the territorial limits of such districts and the Federal reserve city in each district, and shall file such certificate with the Secretary of the Treasury. When such certificate has been executed and filed as aforesaid, the board shall allot to each and every national-bank stock in the reserve banks as prescribed in section 2 of this act, and when, conformable to section 2 of this act, an amount of such stock has been subscribed for in any Federal reserve district equal to \$6,000,000, and one-third of such subscription has been paid in, the board shall, by its governor or vice governor, under his hand and seal, issue a certificate in writing specifying the name and location of the reserve bank in such district, the territorial limits of the district, the amount of the capital stock subscribed, and the amount paid in on such subscription, and the name and amount of stock taken by each subscriber. Such certificate shall be acknowledged before the cierk of a court of record, or a notary public, and shall be filed with the Secretary of the Treasury.

"Upon the filing of such certificate with the Secretary of the Treasury as aforesaid, the said reserve bank so formed shall become a body corporate, and as such, and in the name designated in such organization certificate, shall have power—

"First, To adopt and use a corporate seal.

"Second. To have succession for a period of 20 years from its organization unless it is sooner dissolved by an act of Congress, or unless its franchise becomes forfeited by some violation of law.

"Third. To make contracts.

"Fourth. To sue and be sued, complain and defend, in any court of law and equity as fully as natural persons.

"Fi

this act and such incidental powers as shall be necessary to carry on the business of banking within the limitations prescribed by this act.

"No Federal reserve bank shall transact any banking business, except such as pertains to the perfection of its organization and management, until two-thirds of its stock subscribed for has been paid in as prescribed in section 2 of this act.

"Every Federal reserve bank shall be conducted, managed, and controlled by a board of nine directors, five of whom shall be appointed by the Federal reserve bank shall be known as directors it, and four of whom shall be known as cliented, who shall be selected in the state of the shall be known as directors it is a shore provided, the board shall subject to the shall notify the member banks in said Federal reserve district to elect four directors within a certain date to be named in the notification. Said board shall supjly to each member bank a blank for the purpose of recording the vote of said member banks. Each member bank shall vote for four 'B' directors upon the blank so forwarded, shall certify that they are the choice of the result to each of said member banks, which certificate shall be signed by the officers of said bank and forwarded to the board within the time which said board shall limit. Said board shall canyass the hallots so received from said member banks. The candidate for director years; the candidate for director receiving the second largest number of votes shall hold office for three years; the candidate for director receiving the second largest number of votes shall hold office for three years; the candidate for director receiving the second largest number of votes shall hold office for one year. During each subsequent year, the election shall be held in the same manner except that each bank shall vote for only one director unless in case of vacancies, when the number to be elected shall be certified by the board to each ember bank, and in such cases a plurality vote shall elect.

"No person shall be legal to

"INCREASE OF CAPITAL.

"INCREASE OF CAPITAL.

"Sec. 5. That the capital stock in the reserve banks shall be maintained as nearly as practicable in an amount equal to 6 per cent of the capital and surplus of the member banks in said district, and the board is authorized from time to time to sell to the public such additional stock in any reserve bank as may be required to maintain this proportion. The price at which said stock shall be offered to the public shall be at its fair market value, but in no case below par. Any bank applying for membership in a reserve bank shall be required by the board to underwrite, at the price fixed by the board, such an amount of capital stock in said reserve bank equal to 6 per cent of the capital and surplus of such applying bank, as may be allotted to it by the board, and to purchase and pay for such portion of said allotment as may not be purchased by the public, as provided for in this act.

"When the capital stock of any reserve bank has been increased, the board shall certify the same to the Secretary of the Treasury.

"Sec. 6. That in case the Federal reserve board shall decide, after two years' operation of the reserve banks first established, that one or more additional banks herein authorized should be established it shall make the necessary change in lines of existing districts, designate the new reserve city or cities, and notify the member banks affected by such change to associate themselves with the new reserve bank or banks and change the deposit of their reserves accordingly. Stockholders in previously established reserve banks affected by the change shall be invited to exchange a portion of their stock certificates as indicated by the reserve board, and for all stock so exchanged the reserve bank or banks from the old reserve bank or banks of the corresponding amount of cash capital in gold.

"If sufficient stock certificates are not thus exchanged the reserve board may offer to the general public at par stock in the newly created district or districts to an amount necessary to make

" DIVISION OF EARNINGS.

"Sec. 7. That after the payment of all necessary expenses and taxes, including its share of the expenses of the Federal reserve board, the stockholders of each Federal reserve bank shall be entitled to receive an annual dividend of 5 per cent on the paid-in capital stock, which dividend shall be cumulative. Net earnings over and above expenses and the aforesaid dividend shall be applied as follows: Twenty-five per cent of such net earnings to be carried to a surplus fund until such fund shall amount to 20 per cent of the paid-in capital stock of such reserve bank, and 37½ per cent of said net earnings shall be set aside in a trust fund to be known as the depositors' insurance fund and shall be used for the payment of the depositors of insolvent member banks under rules and regulations made by the board. When, in the judgment of the

board, there has been accumulated in such depositors' insurance fund a sufficient sum fully to insure the payment of the depositors of insolvent member banks, the board shall have power to suspend the setting aside and accumulation of the said 37½ per cent of such earnings, and thereafter such 37½ per cent of such earnings and thereafter such 37½ per cent of such earnings shall be paid to the United States, except that in the event the depositors' insurance fund is depleted by the payment of depositors of insolvent member banks such fund shall be replicated of depositors of insolvent member banks such fund shall be replicated of the earnings or so much thereof as, in the judgment of the board, may be necessary. The remaining net earnings shall be paid to the United States: Provided, That the amount so paid shall be applied to the purchase, st par, with accrued interest, of the 2 per cent bonds of the United States, stall bonds then to be retired; or if such bonds can not be so purchased shid amount shall be applied to the purchase, st par, with accrued interest, of the 2 per cent bonds of the United States, said bonds then to be retired; or if such bonds can not be so purchased shid amount shall be applied to the purchase, and the capital stock therein and the income derived therefrom shall be exempt from Federal, State, and local taxation, except in respect to taxes upon real estate.

"Sec. 8. That within six months after a national bank shall have been notified by the Federal reserve board of its allotment of stock under section 2 of this act said national bank shall hold a meeting of its stockholders and decide by a majority vote whether it will become a member bank under the terms of this act or whether it will become a member bank under the terms of this act or whether it will be member bank, the officers of said bank, upon a blank provided by the board, shall forward the saceptance by said national bank shall become a member bank, the formal taxetion and shall thereupon have six months within which to sur

"STATE BANKS AS MEMBERS.

"SEC. 10. That from and after the passage of this act any bank or banking association or trust company incorporated by special law of any State, or organized under the general laws of any State or the United States, may make application to the Federal reserve board to become a member of the Federal reserve bank organized or to be organized within the Federal reserve district where the applicant is located. The Federal reserve board, under such rules and regulations as it may prescribe, subject to the provisions of this act, shall permit such applying bank to become a member of the Federal reserve bank of the district in which such applying bank is located, in which case stock shall be allotted to it as provided in this act.

"No such applying bank shall be admitted to membership in a Federal reserve bank unless it possesses a paid-up unimpaired capital sufficient to entitle it to become a national banking association in the place where it is situated, under the provisions of the national banking act, and it shall thereafter be required to make the same reports and be subject to the same examination and supervision as national banking associations and subject also to the reserve requirements of this act.

"If at any time it shall appear to the Federal reserve board that a member bank has failed to comply with the provisions of this act or the regulations of the Federal reserve board, it shall be within the power of the said board, after due hearing, to suspend or expel the said bank from membership. The Federal reserve board my restore membership upon due proof of compliance with the conditions imposed by this act.

"FEDERAL RESERVE BOARD.

"Sec. 11. That the President of the United States shall appoint, by and with the advice and consent of the Senate, a Federal reserve board consisting of eight members, in addition to whom the Secretary of the Treasury shall be an ex officio member. Of the eight members appointed in the first instance, the President shall appoint one for a term of one year, one for a term of two years, one for a term of three years, one for a term of four years, one for a term of five years, one for a term of six years, one for a term of seven years, and ne for a term of eight years, and thereafter all appointments shall be made for a term of eight years, not less than one nor more than three of said members shall be appointed from any one Federal reserve district. Appointments to fill vacancies in the board shall be for the unexpired term and may be made by the President when the Senate is not in session, which appointments shall expire at the end of the next session. In selecting members of the reserve board consideration shall be given to experience in commerce and banking. The eight members of the Federal reserve board thus appointed by the President shall devote their entire time to the work and duties of the board and shall not while in office be officers, directors, or employees of any bank or trust company, nor hold stock in any such institution, and they shall each receive a salary of \$12,000 per year, payable monthly out of the Treasury of the United States upon the order or warrant of the Secretary of the Treasury, one member of said board as governor thereof, and one member as vice governor thereof, who shall act in place of the governor during his disability or absence.

The governor shall be the active executive and presiding officer of the board. The Secretary of the Treasury shall provide the necessary office rooms for said board in the Treasury Department Building, or the board may select quarters elsewhere in the city of Washington if sufficient office room can not be found in said building. The said board shall hold its office in the city of Washington, D. C. The first meeting of the board shall be held as soon as may be, upon the call of the Secretary of the Treasury, at a time and place designated by him.

"The Federal reserve board shall have power to levy semiannually upon the Federal reserve banks, in proportion to their capital stock and surplus, an assessment sufficient to pay its estimated expenses and salaries for the half year succeeding the levying of such assessment, together with any deficiency carried forward from the preceding half year.

surplus, an assessment sufficient to pay its estimated expenses and salaries for the half year succeeding the levying of such assessment together with any deficiency carried forward from the preceding half year.

"The Federal reserve board shall annually make a full report of its operations to the Congress.

"Section 324 of the Revised Statutes of the United States shall be amended so as to read as follows: 'There shall be in the Department of the Treasury a bureau charged with the execution of all laws passed by Congress relating to the issue and regulation of national currency secured by United States bonds and, under the general supervision of the Federal reserve board, of all Federal reserve notes, the chief officer of which bureau shall be called the Comptroller of the Currency, and shall perform his duties under the general direction of the Secretary of the Treasury. Nothing in this act contained shall be construed as taking away any powers heretofore vested by law in the Secretary of the Treasury bepartment and the bureaus under such department.

"SEC, 12. That the Federal reserve board hereinbefore established shall be authorized and empowered—

"(a) To examine at its discretion the accounts, books, and affairs of each Federal reserve bank and of each member bank and to require such statements and reports as it may deem necessary. The said board shall publish once each week a statement showing the condition of each Federal reserve banks. Such statements shall show in detail the assets and liabilities of such Federal reserve hank, single and combined, and shall furnish full information regarding the amount and character of the paper and other investments owned or held by Federal reserve banks.

"(b) To permit or require, in time of emergency, Federal reserve banks to rediscount the discounted prime commercial paper of other Federal reserve banks, at least six members of the Federal reserve banks to rediscount the discounted prime commercial paper of other Federal reserve banks.

"(c) To supervise and reg

"FEDERAL ADVISORY COUNCIL.

"Sec. 13. There is hereby created a Federal advisory council, which shan consist of as many members as there are Federal reserve districts. Each Federal reserve bank, by its board of directors, shall annually select from its own Federal reserve district one member of said council, who shall receive such compensation and allowances as may be fixed by the board of directors, subject to the approval of the Federal reserve board. The meetings of said advisory council shall be held in Washington, D. C., at least four times each year, and oftener if called by the Federal reserve board. The council may select its own officers and adopt its own methods of procedure, and a majority of its members shall constitute a quorum for the transaction of business. Vacancies in the council shall be filled by the respective reserve banks, and members selected to fill vacancies shall serve for the unexpired term.

"The Federal advisory council shall have power by itself or through its officers (1) to meet and confer directly with the Federal reserve board on general business conditions; (2) to make oral or written representations concerning matters within the jurisdiction of said board; (3) to call for complete information and to make recommendations in regard to discount rates, rediscount business, note issues, reserve conditions in the various districts, the purchase and sale of gold or securities by reserve banks, open-market operations by said banks, and the general affairs of the reserve banking system.

"REDISCOUNTS.

" REDISCOUNTS

affairs of the reserve banking system.

"SEC. 14. That any Federal reserve bank may receive from any member bank and from the United States deposits of current funds in lawful money, national-bank notes, Federal reserve notes, and checks and drafts upon solvent member banks of the Federal reserve system, payable upon presentation; and, solely for exchange purposes, may receive from other Federal reserve banks deposits of current funds in lawful money, national-bank notes, and checks and drafts upon solvent member or other Federal reserve banks, payable upon presentation. Reserve banks shall not pay interest on deposits.

"Upon the indorsement of any member bank with a waiver of demand notice and protest any Federal reserve bank may discount notes, drafts, and bills of exchange arising out of actual commercial transactions; that is, notes, drafts, and bills of exchange issued or drawn for agricultural, industrial, or commercial purposes, or the proceeds of which have been used, or may be used, for such purposes, the Federal reserve board to have the right to determine or define the character of the paper thus eligible for discount, within the meaning of this act; nothing herein contained shall be construed to prohibit such notes, drafts, and bills of exchange, secured by staple agricultural products, or other goods, wares, or merchandise from being eligible for such discount; but such definition shall not include notes, drafts, or bills covering merely investments or issued or drawn for the purpose of carrying or trading in stocks, bonds, or other investment securities, except bonds and notes of the Government of the United States. Notes and bills admitted to discount under the terms of this paragraph must have a maturity at the time of discount of not more than 180 days: Provided, however, That not more than 50 per cent of the paper discounted for any member bank shall have a maturity at the time of the paper discounted for any member bank shall have a maturity at the time of the paper discounted for any member

member bank have more than \$200,000 of rediscounts having a maturity longer than 90 days.

"Any Federal reserve bank may discount acceptances of member banks which are based on the exportation or importation of goods and which have a maturity at time of discount of not more than six months and of acceptances based on domestic shipments of goods and which have a maturity at time of discount of not more than four months and bear the signature of at least one member bank in addition to that of the acceptor. The amount so discounted shall at no time exceed one-half the capital stock of the bank for which the rediscounts are made.

"The aggregate of such notes and bills bearing the signature or indorsement of any one person, company, firm, or corporation rediscounted for any one bank shall at no time exceed 10 per cent of the unlimpaired capital and surplus of said bank; but this restriction shall not apply to the discount of bills of exchange drawn in good faith against actually existing values.

"Any national bank may, at its discretion, accept drafts or bills of exchange drawn upon it and growing out of transactions involving the importation or exportation of goods having not more than six months to run or growing out of the domestic shipment of goods and having not more than four months to run; but no bank shall accept such bills to an amount equal at any time in the aggregate to more than the par value of its paid-up and unimpaired capital.

"The Federal reserve board may authorize the reserve bank of the district to discount the direct obligations of member banks, secured by the pledge and deposit of satisfactory securities; but in no case shall the amount so loaned by a reserve bank exceed three-fourties of the actual market value of the securities so pledged or one-half the amount of the paid-up and unimpaired capital of the member bank.

"The rediscount by any Federal reserve bank of any bills receivable and of domestic and foreign bills of exchange shall be subject to such regulations as may be imposed by

"OPEN-MARKET OPERATIONS.

"Sec. 15. Any Federal reserve bank may, under rules and regulations prescribed by the Federal reserve board, purchase and sell in the open market, either from or to domestic or foreign banks, firms, corporations, or individuals, prime bankers' bills, and bills of exchange of the kinds and maturities by this act made eligible for rediscount, and cable transfers.

"Every Federal reserve bank shall have power (a) to deal in gold

or individuals, prime bankers bills, and only of exchange of the kinds and maturities by this act made eligible for rediscount, and cable transfers.

"Every Federal reserve bank shall have power (a) to deal in gold coin and bullion both at home and abroad, to make loans thereon, and to contract for loans of gold or bullion, giving therefor, when necessary, acceptable security, including the hypothecation of interest-bearing obligations of the United States; (b) to buy and sell interest-bearing obligations of the United States and of its dependencies when payment of principal and interest is guaranteed by the United States, and bonds or warrants of any State, county, or municipality, or short-time interest-bearing obligations issued by foreign governments, with a maturity from date of purchase of not exceeding one year, such purchases to be made in accordance with rules and regulations prescribed by the Federal reserve board; (c) to purchase from a member bank and to sell, with or without its own indorsement, bills of exchange arising out of commercial transactions, as hereinbefore defined; (d) to establish publicly from time to time, subject to review and determination of the Federal reserve board, a rate of discount to be charged by such bank for each class of paper, which shall be fixed with a view of accommodating the commerce of the country and promoting stability in business; and (e) establish accounts with other reserve banks and with the consent of the Federal reserve board, to open and maintain banking accounts in foreign countries and establish agencies in such countries wheresoever it may deem best for the purpose of purchasing, selling, and collecting bills of exchange, letters of credit, and travelers' checks, and to buy and sell with or without its indorsement, through such correspondents or agencies, bills of exchange arising out of commercial transactions which have not exceeding 90 days to run and which bear the signature of two or more responsible parties.

"Sec. 16. That all moneys now held in

"Sec. 16. That all moneys now held in the general fund of the Treasury, except the 5 per cent fund for the redemption of outstanding national-bank notes and the funds provided in this act for the redemption of Federal reserve notes, shall, upon the direction of the Secretary of the Treasury, be deposited in Federal reserve banks, which banks shall act as fiscal agents of the United States; and thereafter the revenues of the Government shall be regularly deposited in such banks and disbursements shall be made by checks drawn against such deposits.

"The Secretary of the Treasury shall, subject to the approval of the Federal reserve board, from time to time apportion the Government deposits among the said Federal reserve banks. In proportion to their capital stock as far as practicable: Provided, That for the purposes of collection and transfer only the Secretary of the Treasury may designate national banks as Government depositories.

"NOTE ISSUES.

" NOTE ISSUES.

"Sec. 17. That Federal reserve notes, to be issued under authority of the Federal reserve board for the purpose of making advances to Federal reserve banks as hereinfater set forth, and for no other purpose, are hereby authorized. The said notes shall be obligations of the United States and shall be receivable for all taxes, customs, and other public dues, but shall not be held as reserves by member banks or by a reserve bank. They shall be redeemed in gold on demand at the Treasury Department of the United States, in the city of Washington, D. C., or at any Federal reserve bank may, upon vote of its directors, make application to the local Federal reserve agent for such amount of the Federal reserve notes hereinbefore provided for as it may require. Such application shall be accompanied with a tender to the local Federal reserve agent of collateral security in amount equal to the sum of the Federal reserve notes thus applied for and issued pursuant to such application. The collateral security thus offered shall be notes and bills accepted for rediscount under the provisions of this act, and the Federal reserve agent shall each day notify the Federal reserve board

of all issues and withdrawais of Federal reserve motes to and by the Federal reserve bank to which he is accredited. The said Federal reserve bank to which he is accredited. The said Federal reserve has for additional security to protect the Federal reserve notes issued to it as hereinabefore provided it shall segregate and turn over to lits reserve agent gold coin or gold buillon or United States stated to it as hereinabefore provided it shall segregate and turn over to lits reserve agent gold coin or gold buillon or United States gold coin or gold buillon or United States gold coin to gold buillon or United States gold coin the control of the same than the control of the

erning the transfer of funds among Federal reserve banks and their branches.

branches.

"Sec. 18. That so much of the provisions of section 5159 of the Revised Statutes of the United States and section 4 of the act of June 20, 1874, and section 8 of the act of July 12, 1882, and of any other provisions of existing statutes, as require that before any national banking association shall be authorized to commence banking business it shall transfer and deliver to the Treasurer of the United States a stated amount of United States registered bonds be, and the same is hereby, repealed.

"REFUNDING BONDS.

mereby, repealed.

"REFUNDING BONDS.

"Sec. 19. That as soon after the organization of the reserve banks as practicable and under authority from the Federal reserve board each Federal reserve bank shall purchase at par and accrued interest 2 per cent bonds of the United States. The amount purchased by each reserve bank shall not be more than 50 per cent of its capital in any one year. The bonds so purchased may be held by such reserve bank and used for deposit with its reserve agent as security for the Federal reserve notes issued, or they may be exchanged at the Treasury for one-year Treasury gold notes bearing 3 per cent interest. In case of such exchange the reserve banks shall be bound at the option of the United States to renew year 3 per cent United States gold notes may be used to deposit with the reserve agent as security for the United States reserve notes, or be freely purchased by reserve banks from time to time to employ idle funds, or sold to protect the gold supply.

"National banks which sell 2 per cent bonds to a reserve bank under this provision shall retire such portion of their outstanding national bank notes as are secured by the bonds so sold. The Secretary of the Treasury is hereby directed to issue 3 per cent one-year gold Treasury notes year by year to exchange for 2 per cent bonds as above provided or to take the place of 3 per cent one-year gold notes that have been redeemed. During the period between the first and last purchases of bonds any national bank may continue to apply for and receive circulating notes based upon the deposit of 2 per cent bonds as now provided for shall be exempt from Federal, State, and municipal taxation, both as to income and principal.

"BANK RESERVES."

for by law. The one-year 3 per cent gold Treasury notes above provided for shall be exempt from Federal, State, and municipal taxation, both as to income and principal.

"BANK RESENYES.

"SEC. 20. That when a Federal reserve bank has been duly organized and established as provided in this act in any Federal reserve district every member bank of that district shall establish and maintain reserves as follows:

"(a) A bank not in a reserve or central reserve city as now or hereafter defined shall hold and maintain reserves equal to 12 per cent of the aggregate amount of its net deposits, as follows:

"In its vaults, four-twelfths thereof.

"In the Federal reserve bank of its district, for a period of six months and the state of the state o

"BANK EXAMINATIONS.

"Sec. 23. That the examination of the affairs of every member bank shall take place at least twice in each calendar year and as much oftener as the Federal reserve board shall consider necessary in order to furnish a full and complete knowledge of its condition. The Federal reserve board may authorize examinations by the State au-

thorities to be accepted in the case of State banks and trust companies and may at any time direct the holding of a special examination. The person assigned to the making of such examination of the affairs of any member bank shall have power to call together a quorum of the directors of such bank, who shall, under oath, state to such examiner the character and circumstances of such of its leans or discounts as he may designate; and from and after the passage of this act all bank examiners abail receiv fixed salaries, the amount whereof shall be not less than \$2,000 nor more than \$7,000 per reported to Congress. But the expense of the examinations herein provided for shall be assessed by authority of the Federal reserve board upon the member banks examined in proportion to assets or resources held by such member banks upon the dates when the various banks are examined.

"In addition to the examinations made and conducted by the Comproler of the Currency, every Federal reserve bank may, with the approval of the Federal reserve agent or of the Federal reserve bank arrange for special or periodical examination of the member banks within its district. Such examinations shall be so conducted as to inform the Federal reserve bank under whose auspices it is carried on a complete of the currency, every Federal reserve bank and the bank located within the district of the said Federal reserve bank and the bank located within the district of the said Federal reserve bank.

"The Federal reserve board shall, at least once each year, order an examination of each Federal reserve board, and upon joint application of 10 member banks the Federal reserve board, and upon joint application of 10 member banks the Federal reserve bank, and upon joint application of 10 member banks the Federal reserve bank and located within the district of the said Federal reserve bank.

"SEC. 24. That no member bank, or any officer, director, or employee thereof, shall hereaffer make any loan or grant any grantity shall be deemed guilty of a misdemen

"LOANS ON FARM LANDS.

"Sec. 26. That deposits in national banks, payable mere than 30 days after they are made, shall be known as time deposits, and such banks may continue hereafter as heretofore to receive time deposits and to pay interest on the same. All national banks not located in central reserve cities may make loans, secured by improved, occupied, and unencumbered farm lands situated within the Federal reserve district where the loaning bank is located to the extent of one-half of its value, but no such loan shall be made for a longer period than five years, nor shall the aggregate of such loans by any bank exceed one-third of its time deposits.

"After becoming member banks of any reserve banks, national banks are hereby authorized to act as administrators, executors, or trustees.

"FOREIGN BRANCHES.

"Sec. 28. That any Federal reserve bank or national banking association possessing a capital of \$5,000,000 or more may file application with the Federal reserve board, upon such conditions and under such circumstances as may be prescribed by the said board, for the purpose of securing authority to establish branches in foreign countries or dependencies of the United States for the furtherance of the foreign commerce of the United States, and to act, if required to do so, as fiscal agents of the United States, and to act, if required to do so, as fiscal agents of the United States. Such applications shall specify, in addition to the name and capital of the banking association filing it, the place or places where the banking operations proposed are to be carried on and the amount of capital set aside by the said banking association filing such application for the conduct of its foreign business at the branches proposed by it to be established in foreign countries. The Federal reserve board shall have power to approve or to reject such application if in its judgment the amount of capital proposed to be set aside for the conduct of foreign business is inadequate or if for other reasons the granting of such application is deemed inexpedient.

"Every national banking association which shall receive authority to establish branches in foreign countries shall be required at all times to furnish information concerning the condition of such branches to the Comptroller of the Currency upon demand, and the Federal reserve board may order special examinations of the said foreign branches at such time or times as it may deem best. Every Federal reserve bank and every such national banking association shall conduct the accounts of each foreign branch independently of the accounts of other foreign branches established by it and of its teome office, and shall at the end of each fiscal period transfer to its general ledger the profit or loss accruing at each such branch as a separate item.

"Sec. 29. All provisions of law inconsi

standard of value, to maintain the parity of all forms of money issued or coined by the United States, to refund the public debt, and for other purposes."

"Sec. 29a. That the previsions of the act of May 30, 1908, authorizing national currency associations, the issue of additional national-bank circulation, and creating a National Monetary Commission, which expires by limitation under the terms of such act on the 30th day of June, 1914, are hereby extended to June 30, 1915.

"Sec. 30. That the right to amend, alter, or repeal this act is hereby expressly reserved."

Mr. MANN. Mr. Speaker—
Mr. GLASS. Mr. Speaker, I move the previous question.
Mr. MANN. Mr. Speaker, if I may explain, the amendment has not yet been read. The proposition which I have offered is what is known as the Hitchcock bill in the Senate, which was voted for in the Senate yesterday by all the Republicans and Senator Hitchcock and Senator Poindexter. It is only a questional senator Hitchcock and Senator Poindexter. tion of whether it shall be read in full or not, and, unless somebody desires to have it read, I would ask unanimous consent that it be considered as read and published in the RECORD

Mr. GLASS. There is no objection on this side, I imagine.
Mr. LEVER. Mr. Speaker, a parliamentary inquiry—
The SPEAKER. The thing to do is to read this amendment,

unless some gentleman asks to dispense with the reading.

Mr. MANN. Mr. Speaker, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The SPEAKER. Without objection, it is so ordered.

The SPEAKER. Without objection, the state of the second of the speaker—
The SPEAKER. Mr. Speaker—
The SPEAKER. For what purpose does the gentleman rise?

Mr. LEVER. For a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. LEVER. Would it be in order at this time to offer a substitute for the amendment offered by the gentleman from Illinois?

Mr. MANN. The gentleman from South Carolina is not entitled to the floor.

Mr. GLASS. Mr. Speaker, I move the previous question on the amendment offered by the gentleman from Illinois.

The SPEAKER. When the time comes, the gentleman has

the right to offer an amendment.

Mr. MANN. Mr. Speaker, the gentleman from South Carolina is not entitled to the floor. The gentleman from South Carolina can not take me off the floor. The gentleman in charge of the bill would have the right-

Mr. GLASS. Mr. Speaker, I move the previous question on

the amendment proposed by the gentleman— Mr. CRISP. Mr. Speaker, a parliamentary inquiry. The SPEAKER. The gentleman will state it.

Mr. CRISP. Should not the gentleman from Virginia first be recognized before he can move the previous question?

The SPEAKER. The Chair thinks this: The gentleman from Illinois has the floor and he has a right to discuss that amendment and-

Mr. MANN. Then, Mr. Speaker, I move the previous question.

A parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. CRISP. The previous question having been ordered on this metion, and the House having voted on it, is it in order to have discussion on a motion to instruct?

The SPEAKER. If not, why not?
Mr. CRISP. Because the Chair has ruled that the previous question has cut off all debate, and while a motion of instrucion was in order, it was not debatable.

Mr. SAUNDERS. The Chair ruled on that specific point last

year, because I made it, and it was overruled.

The SPEAKER. The Chair would like the gentleman from Virginia [Mr. SAUNDERS] to restate his proposition,

Mr. SAUNDERS. I was saying in support of the point of order raised by the gentleman from Georgia [Mr. CRISF] that I wish to cite the Chair to a ruling with that specific intent, that was made by the present occupant of the chair in the last session.

Mr. MANN. Mr. Speaker.—
Mr. GLASS. Mr. Speaker, being in charge of the bill, am I not first entitled to recognition?

The SPEAKER. You are, unquestionably.

Mr. GLASS. Then I move the previous question on the amendment offered by the gentleman from Illinois [Mr. Mann].

The SPEAKER. The gentleman from Virginia [Mr. GLASS]

and the gentleman from Illinois [Mr. MANN] both move the previous question.

Mr. CRISP. A parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. CRISP. If the motion for the previous question is voted down, will it not then be in order to offer a substitute?

The SPEAKER. Either a substitute or an amendment.

Mr. LEVER. Mr. Speaker, a parliamentary inquiry.
The SPEAKER. The gentleman will state it.
Mr. LEVER. Is it a fact that the only way the House can get a way to instruct the conferees is to vote on the previous question?

Mr. MANN. Not at all. The way to do it is to vote for my

The SPEAKER. The House will be in order. If the gentleman from South Carolina [Mr. Lever] will state his parliamentary inquiry again, the Chair will try to answer him. was the parliamentary inquiry?

Mr. LEVER. The parliamentary inquiry is this: Whether or not it is a fact that the only way to get a vote on my proposition to instruct the conferees on agricultural loans and loans

on farm loans is by voting down the previous question?
The SPEAKER. That is correct.
Mr. MURDOCK. The regular order.

Mr. MURRAY of Oklahoma. Mr. Speaker, another parlia-

Mr. FITZGERALD. Mr. Speaker, how does the Chair know that is not in the motion now pending to instruct the conferees?

The SPEAKER. The Chair does not know what is in the motion that is pending-Mr. MANN. I do.

The SPEAKER (continuing). And nobody else does except the gentleman from Illinois.

Mr. MURDOCK.

The SPEAKER.

Mr. Speaker, I make a point of order. What is the point of order? The point of order is that the previous Mr. MURDOCK. question is not debatable.

The SPEAKER. Nobody has said that it was. [Laughter.] These gentlemen are making parliamentary inquiries.

Mr. MURRAY of Oklahoma. Mr. Speaker

The SPEAKER. For what purpose does the gentleman rise? Mr. MURRAY of Oklahoma. The Chair a moment ago, as I understood, stated the only way to offer other instructions was to vote down this question. Now, I understand the rule to be that whatever may be the vote on the motion of the gentleman from Illinois [Mr. Mann] other instructions might be raised?
The SPEAKER. That question has not been raised. The speaker is the speaker of the speaker is the speaker.

question is on the motion for the previous question.

The question was taken, and the Speaker announced that the

noes seemed to have it.

Mr. MURDOCK. I demand the yeas and nays.

Mr. GLASS, Mr. CRISP, and Mr. BYRNES of South Carolina asked for a division.

Mr. RAGSDALE. The yeas and nays, Mr. Speaker. The SPEAKER. If the gentlemen will take their seats, the

Chair will state the question. The noes seem to have it.

Mr. GLASS. Mr. Speaker, I ask for a division.

The SPEAKER. The gentleman from Virginia [Mr. GLASS] asks for a division.

The House divided; and there were-ayes 109, noes 101. Mr. RAGSDALE, Mr. HARDWICK, and Mr. LEVER demanded the yeas and nays.

The SPEAKER. The yeas and nays are demanded. Mr. GARNER. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. GARNER. If the previous question were ordered on this amendment and it should be voted down, could instructions then be given with reference to other portions of the bill under the rules of the House? I ask that question so that we can understand the parliamentary situation.

The SPEAKER. Will the gentleman state his inquiry over again? There is so much noise that the Chair was unable to

understand him clearly.

Mr. GARNER. My inquiry was this: If the motion of the gentleman from Illinois [Mr. Mann] should be voted down, then would the conferees be subject to instructions from the House, under the rules of the House, if some gentleman desiring to give them instructions should get recognition from the Chair?

Mr. MANN. Mr. Speaker, if the gentleman will permit, if the previous question should be voted down, it would be in order

Mr. GARNER. I said if the motion of instructions offered by the gentleman from Illinois [Mr. Mann] to instruct the conferees should be voted down.

The SPEAKER. Immediately after the motion for the previous question is voted down, the motion of the gentleman from

Illinois [Mr. Mann] can be substituted for it.
Mr. UNDERWOOD. Mr. Speaker, may I submit a unanimousconsent agreement?

The SPEAKER. Yes.

Mr. UNDERWOOD. I ask unanimous consent, Mr. Speaker, that after the motion of the gentleman is disposed of the House may dispose of the motion to instruct by the gentleman from South Carolina [Mr. Lever], and that the previous question be ordered on that.

The SPEAKER. In answer to the parliamentary inquiry propounded by the gentleman from Texas [Mr. GARNER], the Chair will state that if the previous question is voted down, then the motion for instructions offered by the gentleman from Illinois can be substituted for it.

Mr. GARNER. Mr. Speaker, a further parliamentary inquiry. The SPEAKER. The gentleman will state it.

Mr. GARNER. If the motion to instruct offered by the gentleman from Illinois [Mr. MANN] is voted down, then, under the rules of the House, could the gentleman from South Carolina [Mr. Lever] offer a motion to instruct the conferees with reference to other portions of the bill?

The SPEAKER. The Chair just answered that question. What is the request of the gentleman from Alabama [Mr.

UNDERWOOD]?

Mr. UNDERWOOD. I ask unanimous consent, Mr. Speaker, that the motion of the gentleman from Illinois [Mr. Mann] and the motion of the gentleman from South Carolina [Mr. LEVER | may both be considered pending and both be voted on and the previous question considered as ordered on both of

Mr. LEVY rose.

The SPEAKER. For what purpose does the gentleman from New York rise?
Mr. LEVY. I want my amendment to go in also.

Mr. MURDOCK. Reserving the right to object, Mr.

I will withhold my amendment, Mr. Speaker. The SPEAKER. If gentlemen want business transacted they must be in order. What is the parliamentary inquiry of the gentleman from Kansas [Mr. MURDOCK]?

Mr. MURDOCK. I have made no parliamentary inquiry. reserved the right to object, in order to ask the gentleman from Alabama [Mr. UNDERWOOD] what are the amendments of the gentleman from South Carolina [Mr. LEVER].

Mr. UNDERWOOD. I just stated that he proposed to move to instruct the conferees that they agree to these provisions in the bill that relate to agricultural credits.

Mr. RAGSDALE. And the extension of five years on loans on farm lands.

Mr. MURDOCK. Mr. Speaker, reserving the right to object, I would like to know what the propositions are. We have a right to know that.

Mr. MANN. Well, Mr. Speaker, to save trouble I will ask for the regular order.

Mr. LEVER. Mr. Speaker, I ask that the amendments be read.

The SPEAKER. The gentleman from Illinois asks for the regular order.

Mr. CRISP. Mr. Speaker, the regular order was demanded. I call the attention of the Chair to the fact that the regular order was on my demand for the yeas and nays on the previous question.

The SPEAKER. The Chair understood that, and was going to put the question; but the Chair can not put the question with

six or eight gentlemen speaking at once.

Mr. UNDERWOOD. Mr. Speaker, if the House will pardon me, I think it is evident that a large number of gentlemen want to vote on this particular instruction. I do not think that right ought to be taken away from them. My purpose in asking unanimous consent was to avoid a long roll call, because I think the motion to order the previous question ought to be voted down, considering the number of gentlemen who want to vote on this other question. I wish to avoid a long roll call, and therefore I ask unanimous consent that both propositions be considered as pending, with the previous question ordered.

Mr. MANN. Reserving the right to object, Mr. Speaker-Mr. MURRAY of Oklahoma. I wish to include in that two

motions that I have written out.

The SPEAKER. Will the gentleman from Oklahoma [Mr. MURBAY], instead of paying attention to other Members, talk direct to the Speaker?

Mr. MURRAY of Oklahoma. I shall be glad to, Mr. Speaker. have two amendments written out. I thought, in view of the motion I made in the beginning, that I would possibly be recognized by the Chair. I never dreamed that the majority leader would undertake to make propositions as he did in order to eliminate me. I have written these motions, and I would like to have them included in the gentleman's proposition for

yeas and nays, so that they may all be considered together. have no objection to other gentlemen offering amendments.

I have no objection to what they have offered. One of them is an amendment providing that the formation of the board shall remain as provided by the Senate amendment. The other is with reference to the disqualification of Members of the House and Senate to become members of any of the regional reserve boards.

Mr. GLASS. Mr. Speaker, personally I have not the slightest objection in the world to instructions from this House upon the two propositions—of a six months' discount on agricultural paper and five years on farm loans. [Applause.] Nobody has been authorized to say that I would object to that in conference if I were one of the conferees. I do not think any such instruction is at all necessary, but I have no objection to receiving an instruction from the House on those two points; but I shall object if the instructions are to be extended to other matters.

Mr. MURRAY of Oklahoma. Mr. Speaker, these questions will all be submitted, and under the rules gentlemen have the right to a division of them and vote on them separately, voting down those they do not want and voting for the ones they do want.

Mr. MANN. Mr. Speaker, reserving the right to object, I will say now that I shall not consent to ordering the previous question on a lot of amendments which have not yet been read, when nobody on this side of the House knows what is in

iem. That is a preposterous proposition.

Mr. LEVER. I ask unanimous consent—

bama is pending.

Mr. MANN. I have objected to that. The SPEAKER. The request of the gentleman from Ala-

The SPEAKER. The gentleman from Illinois objects. what purpose does the gentleman from South Carolina [Mr. LEVER1 rise?

Mr. LEVER. I ask unanimous consent that my amendment may be read for the information of the House in response to the request of the gentleman from Illinois [Mr. MANN].

The SPEAKER. The gentleman from South Carolina asks unanimous consent that his amendment may be read for the instruction of the House. Is there objection?

There was no objection.

The SPEAKER. The Clerk will read.

The Clerk read as follows:

Mr. LEVER moves that the conferees of the House be, and they are hereby, instructed to agree in conference to the provisions of the Senate amendment extending the time on loans secured by agricultural products, on page 85, lines 11 to 19, inclusive, and on loans on farm lands, on page 108, lines 16 to 26, inclusive.

Mr. MURRAY of Oklahoma. Now, I will ask the Clerk to read the first part of the instruction I sent up there that is not included in the other motion.

The SPEAKER. Is there objection to the reading of the amendment of the gentleman from Oklahoma?

There was no objection.
The SPEAKER. The Clerk will read.

The Clerk read as follows:

By Mr. Murray of Oklahoma: Page 74, that the conferees be instructed to concur in the Senate amendment to section 10, creating the Federal reserve boards.

Mr. MURRAY of Oklahoma. I will ask the Clerk to read the other one right there, that they did not include.

The Clerk read as follows:

Page 63, line 3, after the word "bank," that the conferees be instructed to agree to lines 4, 5, 6, and 7, as provided by the Senate amendment, in these words:

"No Senator or Representative in Congress shall be a member of the Federal reserve board, a director of a Federal reserve bank, or an officer or director of any member bank."

The SPEAKER. The question is on ordering the year and nays on the motion for the previous question.

The yeas and nays were ordered.

The SPEAKER. The question is on ordering the previous question. The Clerk will call the roll.

The question was taken; and there were—yeas 83, nays 259, answered "present" 2, not voting 90, as follows:

Mr. GARRETT of Tennessee. Mr. Speaker, I voted "no" on this roll call. I have a pair with the gentleman from Michigan, Mr. FORDNEY, and I wish to withdraw that vote and answer

The result of the vote was then announced as above recorded. Mr. MANN. Mr. Speaker, am I not entitled to recognition? I have submitted a motion to instruct, and the gentleman from Virginia in charge of the bill moved the previous question; and having been defeated, am I not entitled to the floor?

The SPEAKER. Unfortunately, the gentleman from Illinois

moved the previous question at the same time.

Mr. MANN. I would have moved it, but I withdrew it, be-

cause I was not entitled to the floor.

Mr. LEVER. Mr. Speaker, I offer the language which I have sent to the desk as a substitute for the proposition of the gentleman from Illinois, and on that I demand the previous ques-

The SPEAKER. The gentleman from South Carolina offers a substitute for the motion of the gentleman from Illinois, and on that moves the previous question.

Mr. MURRAY of Oklahoma. Mr. Speaker, I offer as an amendment to the substitute of the gentleman what I send to the Clerk's desk.

The SPEAKER. The Clerk will report the motion of the gentleman from South Carolina.

The Clerk read as follows:

Mr. Lever moves that the conferees of the House be, and are hereby, instructed to agree in conference to the provision of the Senate amendment extending the time on loans secured by agricultural products, on page 85, lines 11 to 19, inclusive, and on loans on farm lands, on page 108, lines 16 to 28, inclusive.

Mr. MANN. Mr. Speaker, I make the point of order that that amendment is not in order. It is not an amendment to the motion I make.

The SPEAKER. The point of order is overruled.

Mr. MANN. Will the Speaker hear me?

The SPEAKER. The Chair will hear the gentleman.

Mr. MANN. Mr. Speaker, I offered a motion to instruct, including an entire bill, known in the Senate as the Hitchcock amendment or the Hitchcock bill. That bill includes as a part of it, and it is included in my motion, language which the gentleman from South Carolina [Mr. Lever] now offers as an amendment to it. One of the provisions in my motion, included in the Hitchcock bill, is as follows:

Nothing herein contained shall be construed to prohibit such notes, drafts, and bills of exchange, secured by staple agricultural products, or other goods, wares, or merchandise from being eligible for such discount—

Notes and bills admitted to discount under the terms of this paragraph must have a maturity at the time of discount of not more than 180 days: Provided, however, That not more than 50 per cent of the paper discounted for any member bank shall have a maturity exceeding 80 days, and in no case shall any member bank have more than \$200,000 of rediscounts having a maturity longer than 90 days.

Another provision included in the Lever amendment, identical

with the motion that I have offered, is:

That deposits in national banks, payable more than 30 days after they are made, shall be known as time deposits, and such banks may continue hereafter as heretofore to receive time deposits and to pay interest on the same. All national banks not located in central reserve cities may make loans, secured by improved, occupied, and unencumbered farm land situated within the Federal reserve district where the loaning bank is located to the extent of one-half of its value, but no such loan shall be made for a longer period than five years, nor shall the aggregate of such loans by any bank exceed one-third of its time deposits.

I contend that where I have offered a motion the gentleman can not take out of that a few sentences and offer it as an amendment to my motion. My motion of instruction covers the identical language, word for word, to the dotting of the i's and the crossing of the t's, that the gentleman from South Carolina now offers as an amendment to my motion.

Mr. HARDWICK. Mr. Speaker, will the gentleman yield? Mr. CRISP. Mr. Speaker, will the gentleman yield? The SPEAKER. To whom does the gentleman yield?

The SPEAKER. To whom does the Mr. MANN. Either fair charmer.

Mr. HARDWICK. Suppose the gentleman had moved, as he has in a different way, to instruct the conferees to agree upon three propositions; would it not then be in order for any gentleman on either side of the House to move to amend by striking out two of his propositions and leaving the other, and is not that what we are trying to do in this case?

Mr. MANN. But that is not the proposition that is pending. The gentleman may move to strike out all he pleases and that would be in order because that would be germane, but what he moves is to insert as an amendment something already in the

Mr. CRISP. Mr. Speaker, will the gentleman yield? Mr. MANN. Certainly.

motion.

Mr. CRISP. The gentleman from Illinois is arguing the motion as it was read from the Clerk's desk, but that is not the way the gentleman from South Carolina offered it. Mr. MANN. Of course, I am not responsible for that

Mr. CRISP. But the gentleman offered it as a substitute for the gentleman's entire motion to instruct the conferees. The amendment was prepared before the gentleman had offered instructions, and the Record will show that the gentleman from South Carolina offered it as a substitute for the gentleman's instructions.

Mr. MANN. Of course, if it is offered because that side of the House is afraid to let the minority offer a bill, I can not

complain about it.

The SPEAKER. The point of order is overruled, and the vote is on ordering the previous question.

Mr. MURRAY of Oklahoma. Mr. Speaker

The SPEAKER. For what purpose does the gentleman rise? Mr. MURRAY of Oklahoma. I want to say it occurs to me that the motion for the previous question in connection with another motion ought not to lie, on principle.

The SPEAKER. But it was not annexed to it. The gentleman from South Carolina made two separate motions, which he

had the right to do.

Mr. MURRAY of Oklahoma. But he made them in the face of an effort upon my part to get recognition to offer an amendment. I offered an objection and then made a motion to concur in the Senate amendment. The Chair very properly overruled me, because it involved two motions, or was tantamount to two motions. I made them separately, just as he made them separately.

The SPEAKER. If the gentleman will permit, the cases are

not alike. The practice is universal that where a gentleman gets the floor and offers a proposition the motion for the preious question can be immediately made. The gentleman from Oklahoma had two substantive propositions and he was trying to get them in at one time.

Mr. MURRAY of Oklahoma. I know, but I offered one of

them as an amendment.

The SPEAKER. That was voted on, was it not?

Mr. MURRAY of Oklahoma. No.

Mr. MANN. No; he has not had a chance to offer it yet. The SPEAKER. If the gentleman has not offered it, that is

another matter. There is a great difference between sending up something to have it read and offering it.

Mr. MURRAY of Oklahoma. A moment ago those motions were all read, and then we voted on this matter of the previous question and voted down the motion for the previous question.

The SPEAKER. They were read by unanimous consent for the information of the House.

Mr. MURRAY of Oklahoma. That is true; but they were read for the information of the Chair and the House, with the understanding they would be offered at this time.

The SPEAKER. Well, the Chair knows. The gentleman said he was going to offer them. That is all right; he is going to offer them if he gets a chance.

Mr. MANN. Vote down the previous question and you can

The SPEAKER. Under the parliamentary situation the question is on ordering the previous question.

The question was taken, and the Speaker announced the ayes seemed to have it.

Mr. MANN. Mr. Speaker, I ask for a division. The House divided; and there were—ayes 181, noes 93.

So the previous question was ordered.

The SPEAKER. The question is on the substitute offered by the gentleman from South Carolina [Mr. LEVER].

The question was taken, and the Speaker announced the ayes seemed to have it.

Mr. MANN. Mr. Speaker, I ask for a division.
The House divided; and there were—ayes 211, noes 51.
So the substitute was agreed to. [Applause.]
The SPEAKER. The question is on—
Mr. MURRAY of Oklahoma. Mr. Speaker, now I move that additional instructions

Mr. MANN. Mr. Speaker, I make the point of order there is no motion in order now.

Mr. MURRAY of Oklahoma. Well, wait until I get through. We have not disposed of this matter yet. Mr. MANN.

The SPEAKER. The question is on the proposition of the gentleman from Illinois as amended by the substitute offered by the gentleman from South Carolina.

Mr. CRISP. Mr. Speaker, a parliamentary inquiry.
The SPEAKER. The gentleman from Georgia will state it.

Mr. CRISP. An affirmative vote on that instructs the conferees to agree to the Lever instructions. Is that a correct interpretation of the parliamentary situation?

Mr. MANN. That is correct. Mr. LEVER. It is an affirmative vote-

The SPEAKER. Will the gentleman from Georgia state it over again?

Mr. CRISP. If the motion the Speaker is about to put is adopted, the vote on that is to instruct the conferees to agree to the Lever instructions?

Mr. MANN. Mr. Speaker, a parliamentary inquiry.
The SPEAKER. The gentleman will state it.
Mr. MANN. Would the effect of the adoption of the Lever

amendment be to prevent any vote upon the motion which I offered?

The SPEAKER. Why, the Chair was just going to put it.

Mr. MANN. No; upon the motion which I offered?

The SPEAKER. The Chair is inclined to think that the adoption of the substitute ends it.

Mr. MURRAY of Oklahoma. Mr. Speaker—
The SPEAKER. For what purpose does the gentleman from Oklahoma rise?

Mr. MURRAY of Oklahoma. I understand that the Chair rules that the adoption of the substitute carries the motion without a further vote. Is that correct?

The SPEAKER. The question is on the proposition of the

gentleman from Illinois as amended by the substitute offered by the gentleman from South Carolina.

The question was taken, and the motion as amended was

Mr. MURRAY of Oklahoma. Mr. Speaker, now I move as additional instructions to the conferees the propositions I have sent to the Clerk's desk to have read.

Mr. HARDWICK. Mr. Speaker, I raise the question of

The SPEAKER. The point of order is sustained; you can

not have two sets of instructions.

Mr. MURRAY of Oklahoma. Mr. Speaker, is there nothing under the rules by which a motion to do the will of this House

The SPEAKER. It can be done; the gentleman has his opportunity.

Mr. MURRAY of Oklahoma. I realize-

The SPEAKER. The House had its opportunity on the Lever substitute and on the motion for the previous question. Now, it has been decided before the present Speaker got in the chair-

Mr. MURRAY of Oklahoma. I apprehend I would have been ruled out of order, according to what had been said before; but I want to call attention to the fact that this House, under this rule, can not do what it wants to do.

The SPEAKER. This House can always do what it wants to do.

Mr. MANN. Mr. Speaker, a parliamentary inquiry.
The SPEAKER. The gentleman will state it.
Mr. MANN. Is it in order for the gentleman from Oklahoma to say that the House can not do what it wants to do by ordering the previous question, when he himself has just voted [Laughter.] for it?

Mr. MURRAY of Oklahoma. The difference is that I am

unselfish myself, even if the other gentleman is selfish.

Mr. MANN. I will say to the gentleman if I am selfish I am not aware of the fact.

The SPEAKER. The House will be in order. The situation was this, and the Chair had stated it in answer to a parliamentary inquiry made by the gentleman from Texas [Mr. Garner], that if the previous question prevailed on the Lever substitute it shut off all other amendments, but that if the previous question was voted down then the whole thing was open.

Mr. MURRAY of Oklahoma. But, Mr. Speaker-

The SPEAKER. But the House chose to vote the previous question up, and then the vote on the substitute, and then the vote on the motion of the gentleman from Illinois as a substitute.

Mr. MURRAY of Oklahoma. Mr. Speaker, under every cour-

tesy of this House, seniority rule, so to speak—

Mr. MANN. Mr. Speaker, I demand the regular order.

The SPEAKER. The regular order is the appointment of the conferees

Mr. NEELEY of Kansas. Mr. Speaker-

The SPEAKER. For what purpose does the gentleman from Kansas rise?

Mr. NEELEY of Kansas. To send a motion to the desk. Mr. MANN. I make the point of order that there is no motion

The SPEAKER. The point of order is sustained. Mr. HARDWICK. A parliamentary inquiry. The SPEAKER. The gentleman will state it.

Mr. HARDWICK. A motion to give the Chair instructions about the number of conferees would now be in order. This is probably a motion to increase the number of conferees.

The SPEAKER. For the information of the House, the Speaker will order the Clerk to read the motion of the gentleman from Kansas.

The Clerk read as follows:

Resolved, That the Speaker name a conference committee composed of nine members of the Banking and Currency Committee to meet with a like committee of the Senate.

Mr. UNDERWOOD. Mr. Speaker, I make the point of order that that motion is not in order.

Mr. HARDWICK. 'I want to be heard, if the gentleman

makes it seriously.

The SPEAKER. The gentleman from Alabama [Mr. Underwood] makes a point of order that the resolution is not in order, and the gentleman from Georgia [Mr. HARDWICK] desires to be heard. The Chair will hear him.

Mr. HARDWICK. Mr. Speaker, the rules provide that conference committees and other special committees shall be appointed by the Speaker unless otherwise directed by the House.

Ordinarily, in the absence of instructions from the House, the Speaker would appoint such number of conferees as he saw proper; but now, just as the Speaker is about to make the appointment, is the only time and way that the House can express itself as to what its desires are in the premises, so that under the rule it must be in order at this juncture for the House to determine how many conferees we shall have, and even who they may be. The House could name them if it saw fit to do It seems to me the motion of the gentleman from Kansas [Mr. NEELEY] is not only in order but is pertinent at this junc-

Mr. UNDERWOOD. Mr. Speaker, the point of order I make is this: The Speaker, unless directed otherwise, has the appointment of the committee. I take it that is clear under the

Will the gentleman yield?

Mr. UNDERWOOD. Certainly.

Mr. MANN. The gentleman is slightly in error.

Mr. UNDERWOOD. I am not quoting exactly, but-

Mr. MANN. The rule is:

The Speaker shall appoint all select and conference committees which shall be ordered by the House from time to time.

It is absolute; not conditional.

Mr. HARDWICK. I would like to inquire, if the gentleman will yield-

Mr. UNDERWOOD. I will say to the gentleman that I was under the impression the change that was made in the rules of the last Congress was carried in the rules of this Congress.

Mr. FITZGERALD. That was as to standing committees.
Mr. UNDERWOOD. No; as to special committees. I think the rules of the last Congress authorize—

Mr. MANN. I referred to the last Manual, which has the

rules of the last Congress.

Mr. GARRETT of Tennessee. Will the gentleman permit an interruption? I think the differences can be explained in this way: The rules of the House prior to the Sixty-second Congress provided that at the beginning of each Congress, unless otherwise ordered, the Speaker should appoint the standing committees.

Mr. MANN. That is the old rule.

Mr. GARREIT of Tennessee. That was the old rule with regard to the standing committees. The rules never did provide, and do not now provide, any conditions as to the Speaker appointing any conference committee.

Mr. MANN. Prior to 1880 the rules did provide the House

could name conferees, but that has not been the rule since that

time.

Mr. GARDNER. Mr. Speaker-

The SPEAKER. The gentleman from Massachusetts.

I make the point of order that this is a Mr. GARDNER. change in the rules of the House, and as such it must go to the Committee on Rules.

The SPEAKER. The point of order is sustained, and the Chair announces the names of the following gentlemen as the conferees on the part of the House: Mr. GLASS, Mr. KORBLY, and Mr. HAYES.

INDIAN TUBERCULOSIS SANITARIUM (H. DOC. NO. 505).

Mr. STEPHENS of Texas. Mr. Speaker, I desire to present a privileged report from the special committee for the investigation of Indian matters, and ask that it be printed.

The SPEAKER. The Clerk will report it by title.

The Clerk read as follows:

Report of the Joint Commission on Indian Tuberculosis Sanitarium and Yakima Indian Reservation Project.

The SPEAKER. The report is ordered printed and referred to the House Calendar.

DISTRICT OF COLUMBIA APPROPRIATION BILL.

Mr. PAGE of North Carolina. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 10523, the District of Columbia appropriation bill.

Mr. MANN. Oh, let us quit. Mr. GARNER. Oh, no; let us pass this bill to-day. The SPEAKER. The gentleman from North Carolina [Mr. PAGE] moves that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the District of Columbia bill. The question is on agreeing to that motion.

The motion was agreed to.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union, with Mr. HULL in the

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the further consideration of the District of Columbia appropriation bill.

Mr. JOHNSON of Kentucky. Mr. Chairman, when the consideration of the appropriation bill for the District of Columbia was interrupted by the bringing in of the currency bill I was addressing the Chair and I now wish to continue along the same addressing the Chair, and I now wish to continue along the same

line which I then contemplated.

A bill was introduced into the House by the gentleman from Missouri [Mr. Borland], numbered H. R. 10234. In regular order that bill was referred to the Committee on the District of Columbia. The gentleman from Missouri came before the committee and said that he was anxious to have the bill considered by the House District Committee, with a view to getting it upon the calendar, in order that it might be offered as an amendment to the District appropriation bill, which was then about to be brought in.

Mr. Chairman, I am addressing my remarks to the Chair and

ask his attention.

Mr. MOORE. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Kentucky yield? Mr. JOHNSON of Kentucky. Yes.

Mr. MOORE. Mr. Chairman, I would like to make a parliamentary inquiry of the Chair.

The CHAIRMAN. The gentleman will state it.

Mr. MOORE. In view of the confusion in the House and our inability to understand what is going on, I ask the parliamentary status.

The CHAIRMAN. The Chair will state that earlier in the day he sustained a point of order made by the gentleman from Illinois [Mr. MANN] against the amendment offered by the gentleman from Missouri [Mr. BORLAND]. The gentleman from Kentucky [Mr. Johnson] thereupon took the floor and is pro-

To discuss the point of order?

The CHAIRMAN. The Chair is not aware of the exact import of the gentleman's discussion.

Mr. MOORE. Then, may I interrupt the gentleman from Kentucky for a moment? Will he yield?

The CHAIRMAN. Does the gentleman yield? Mr. JOHNSON of Kentucky. Yes.

Mr. MOORE. I ask the gentleman from Kentucky whether he is discussing the point of order?

Mr. JOHNSON of Kentucky. Yes; and— Mr. MOORE. Because it is impossible for us on this side to hear him. Or is he discussing the five-minute rule?

Mr. JOHNSON of Kentucky. I am discussing the point of

Mr. MOORE. A parliamentary inquiry, Mr. Chairman. May I inquire what is the point of order? The gentleman from Kentucky says he is discussing the point of order.

The CHAIRMAN. There is no point of order pending now,

as the Chair understands.

to the gentleman from Pennsylvania? Mr. JOHNSON of Kentucky. No; I must go on with my re-

Mr. MOORE. Mr. Chairman, another parliamentary inquiry. The CHAIRMAN. The gentleman will state it.

Mr. MOORE. Is it proper for the gentleman from Kentucky or any other gentleman to discuss a point of order when the Chair declares that there is no point of order?

Mr. JOHNSON of Kentucky. Mr. Chairman, I decline to be interrupted further. I have the floor. I offer an amendment. Mr. PAGE of North Carolina. I reserve a point of order

against the amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk began the reading of the amendment.

Mr. BORLAND. Let me suggest to the gentleman from Kentucky that he has not indicated where the amendment goes in. It should go in at the end of line 11, page 20.

Mr. JOHNSON of Kentucky. That is where we are in the reading of the bill; it can not be inserted elsewhere.

The Clerk resumed the reading of the amendment.

Mr. BORLAND. Mr. Chairman, I desire to call the attention of the Chair to the fact that this amendment is offered by the chairman of the Committee on the District of Columbia, and he is offering as an amendment the bill as it came from that committee. The Clerk is reading a portion of the bill which is stricken out by the committee and not the bill as it came from the committee. He ought to read the bill as it was perfected by the committee.

The CHAIRMAN. The Clerk will only read the portions not

stricken out.

Mr. MANN. I reserve a point of order on the amendment. Mr. PAGE of North Carolina. I have reserved a point of

The Clerk resumed and completed the reading of the amend-

The amendment is as follows:

ment.

The amendment is as follows:

Insert at the end of line 11, page 20, the following:

"That hereafter whenever, under appropriations made by Congress, the roadway of any street, avenue, or road in the District of Columbia is improved by laying a new pavement thereon or by resurfacing an existing pavement from curb to curb or from gutter to gutter, where no curb exists, where the material used is sheet asphalt, asphalt block, asphaltic or bituminous macadam, concrete, or other fixed roadway pavement, such proportion of the total cost of the work, including all the expenses of the assessment, to be made as hereinsafter prescribed, shall be charged against and become a lien upon the abutting property, and assessments therefor shall be levied pro rata according to the linear frontage of said property on the street, avenue, or road, or portion thereof upon the roadway of which said new pavement is laid or the existing roadway of which is resurfaced: Provided, however. That there shall be excepted from such assessment the cost of paving or resurfacing the roadway space included within the intersections of streets, avenues, and roads, as said intersections are included within such roadways for which street railway companies are responsible under their charters or under law on streets, avenues, or roads where such railways have been or shall be constructed.

"The assessments herein provided for shall be levied and paid for in the following manner, namely: Where the width of the roadway actually to be paved is 40 feet or less between the curbs, or between the gutters, where no curbs exist, after deducting the amount required to be paved by the street railway companies, the total cost of the work, including the expenses of assessments, shall be assessed against the abutting property owners, one-half to each side; where the width of the street thus to be paved, after deducting the amount required to be paved by the street railway companies, shall be assessed against the abutting property owners, one-half to each sid

Mr. PAGE of North Carolina. Mr. Chairman, because of the fact that I could not catch the amendment as it was read, I want to inquire at this juncture if this is identical in terms with the Borland amendment, which has been offered hereto-

Mr. JOHNSON of Kentucky. It is an exact copy of it.
Mr. MANN. With a slight difference.
Mr. JOHNSON of Kentucky. Perhaps with the failure to erase the word "that" at the beginning.
Mr. MANN. There is a greater difference than that, to which

will call attention later.

Mr. JOHNSON of Kentucky. Whether it is identical or not is not material. This amendment stands on its own merits, regardless of the amendment which has been held not to be in

Mr. Chairman, in arguing the point of order which the Chairman must determine, I do not believe it can be done in a better way than to give a plain history of this amendment just as it has come to the point where it has been offered as an amendment to the District appropriation bill.

While the District Committee was in session, the gentleman from Missouri [Mr. Borland] came before the committee and asked that a bill which he had introduced, relative to the subject of assessments of benefits being levied against abutting property

where streets were to be improved, be taken up for consideration then and there. A motion was made in the committee to take up the bill for consideration. The bill was taken up for consideration and amended. The gentleman from Missouri [Mr. Borland, being present all the time, asked that the bill be amended so as to make it germane to the District appropriation bill, and that the motion which was to follow should also em-brace the instruction that it be reported to this committee by the House District Committee as an amendment to this bill. upon the motion which the gentleman from Missouri [Mr. Bor-LAND] asked to be made was made. That motion was adopted. I am now offering this amendment in the name of the House District Committee, that amended bill having been heretofore favorably reported to the House and put upon the calendar.

Mr. PAGE of North Carolina. May I interrupt the gentle-

man from Kentucky?

Mr. JOHNSON of Kentucky. Yes. Mr. PAGE of North Carolina. I understand from the statement just made by the gentleman from Kentucky that he, as chairman of the Committee on the District of Columbia, was instructed by his committee to offer this bill as an amendment

to the District appropriation bill.

Mr. JOHNSON of Kentucky. The suggestion was made by the gentleman from Missouri [Mr. Borland] to the House District Committee that this bill be amended and thereby put in such shape as to be germane to this feature of the bill, and that that be done for the purpose of offering it as an amendment to this bill at this stage. That motion was then made and unani-mously adopted by the committee, and I am now undertaking to carry out the instructions of the resolution adopted by the House District Committee.

Mr. MONDELL. Will the gentleman yield?

Mr. JOHNSON of Kentucky. Yes.
Mr. MONDELL. Do I understand that the gentleman was authorized by his committee, at a meeting of the committee, to

offer this as an amendment to this bill?

Mr. JOHNSON of Kentucky. The House District Committee has been authorized, by a motion adopted by the committee, to offer this bill as an amendment to the District appropriation bill.

Mr. MONDELL. Was that action taken at a regular meeting

of the committee, at which a quorum was present?

Mr. JOHNSON of Kentucky. That action was taken at a meeting of the committee, in answer to written notices sent out the day before, and in answer to telephone calls to each and every member of that committee before it met upon that morning, and in the presence of a quorum.

Mr. MOORE. Mr. Chairman, I make the point of order that

there is no quorum present.

The CHAIRMAN. The gentleman makes the point of order that there is no quorum present. The Chair will count. [After counting.] Sixty-four Members present; not a quorum. The Clerk will call the roll.

The Clerk called the roll, and the following Members failed

During the call of the roll the following occurred: Mr. STAFFORD. Mr. Chairman, I understand this is a call of the names of Members who failed to answer on the first call. I wish to direct the attention of the Chairman to the fact that when a quorum appears in committee but one call of the roll is necessary, and I cite to the Chair the fourth volume of Hinds' Precedents

Mr. FOSTER. Mr. Chairman, I make the point of order that

the gentleman can not interfere with the roll call.

The CHAIRMAN. It has been the practice of the House without objection on the part of anyone, to call the names of

those who failed to respond the first time.

Mr. STAFFORD. We are wasting time in calling the roll, and if you have time to waste on that side, of course we have.

The Clerk proceeded and completed the calling of the roll. The committee rose; and the Speaker having resumed the chair, Mr. HULL, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 10523, the District of Columbia appropriation bill, and, finding itself without a quorum, the roll had been called, whereupon 285 Members answered to their names, and he reported the names of the absentees.

Mr. MOORE. Mr. Speaker, I move that the House do now

adjourn

The SPEAKER. The gentleman from Pennsylvania moves that the House do now adjourn.

The question was taken; and on a division, demanded by Mr. Moore, there were 20 ayes and 127 noes.

Mr. MOORE. Mr. Speaker, I demand the yeas and nays. The SPEAKER. The gentleman from Pennsylvania demands the yeas and navs.

The question was taken, and seven Members arose in the affirmative, and the yeas and nays were refused.

Mr. MOORE. Mr. Speaker, I make the point of order of no

Mr. FITZGERALD. Mr. Speaker, I make the point of order that after the committee rises and a quorum is reported to be present there is no motion in order except the motion to adjourn, and if that be voted down it does not require a quorum to go back into committee.

Mr. MANN. It does not require a quorum to go back into

committee.

The SPEAKER. The House will resolve itself into Committee of the Whole House on the state of the Union, with the gentleman from Tennessee [Mr. Hull] in the chair.
Mr. PAGE of North Carolina. Mr. Chairman, I ask unani-

mous consent that I may address the committee for three

minutes

Mr. RAGSDALE. Mr. Chairman, I object. The CHAIRMAN. The question is on the adoption of the amendment offered by the gentleman from Kentucky,

Mr. PAGE of North Carolina. Mr. Chairman, I desire to address myself to the amendment.

Mr. MANN. Mr. Chairman, I ask to be recognized on the point of order. Of course, the amendment can not be voted on until the point of order is disposed of.

The CHAIRMAN. No point of order having been made, the

Chair did not feel called upon to rule.

Mr. MANN. I reserved the point of order, and the gentleman from North Carolina [Mr. Page] made the point of order on the amendment.

The CHAIRMAN. The gentleman from North Carolina, as

the Chair understood, also reserved the point of order.

Mr. PAGE of North Carolina. Mr. Chairman, I really reserved the point of order. I may have said that I made it, but my desire was to reserve it.

Mr. MANN. I understood that the gentleman from Kentucky

argued the point of order, and I desire to be heard for a moment

on the point of order.

on the point of order.

The CHAIRMAN. The Chair will hear the gentleman.

Mr. MANN. Mr. Chairman, the amendment offered by the gentleman from Kentucky provides that hereafter whenever approved the chairman from propriations are made by Congress for roadway improvement or resurfacing the amount shall be collected by a tax levied on the abutting property. I contend that the amendment is not germane to a provision making a specific appropriation. The amendment proposed now by the gentleman is not confined to the items in this bill, and is not confined to the appropriations made even for the ensuing fiscal year, is not confined to the appropriations for this year, but provides for taking effect whenever the bill takes effect—that all street improvements hereafter made out of any appropriations made by Congress in any way, either for the current year or the ensuing fiscal year or a succeeding fiscal year, shall be raised by special assessment upon the abutting property. I contend that is not germane

to a provision making a specific appropriation in this bill.

Mr. JOHNSON of Kentucky. Mr. Chairman, upon the raising of the question as to whether this amendment is germane, I wish to say that I can not imagine how anybody can conceive the idea that it is a specific appropriation in this bill. the idea that it is not germane. To be germane it must simply relate to the same subject matter. The subject matter which is here sought to be amended is payment for the building of streets. The amendment offered deals with no other subject than the manner in which the building of streets shall be paid for. If this amendment is not germane to the subject of paying for streets, then one can not be drawn that would be germane, because this amendment deals with nothing else than that subject. The gentleman from Illinois in his remarks emphasizes the word "hereafter." That cuts no figure in this case, because this amendment comes from the legislative committee having jurisdiction over such matters, and in the amendment legisla-tion is permissible under the Holman rule. It need not come from the committee having legislative jurisdiction of the matter if there is no new legislation in it. The rule provides that legislative matter may be tacked onto an appropriation bill if it comes from the committee having legislative jurisdiction of the subject matter. This fully meets that requirement.

The CHAIRMAN. The gentleman from Illinois makes the point of order against the amendment offered by the gentleman

from Kentucky upon the ground that it is not germane. pending bill contains a provision appropriating money for the improvement and repair of streets, avenues, and roads. The amendment seeks to add to the provision and to some extent to modify the provision of this section of the bill to which it is offered by enacting a provision of law requiring that assess-ments be made upon the landowners of property abutting the improvements. The question of germaneness is the only ques-

tion raised by the point of order.

Mr. MANN. Mr. Chairman, the Chair will recognize that we argued at length yesterday the question as to whether this amendment retrenches expenditures. That was argued at length, and while it was not argued again to-day, that point is

still supposed to be before the Chair.

Mr. PROUTY. Mr. Chairman, if that point of order is to be made and argued, I want to be heard on that particular phase

I understood that was not raised to-day

Mr. MANN. Mr. Chairman, I have no desire to argue it further, so far as I am concerned, but, of course, that is one of the points of order that is made. We would not argue it for two hours and then suppose that it was abandoned.

Mr. PROUTY. The ruling went off on another point.
Mr. MANN. I understand; but the same question we argued yesterday is involved in this amendment.

Mr. PROUTY. Yes; but it would Mr. MANN. Oh, it would apply. Yes; but it would apply unless urged.

Mr. PROUTY. It would not apply unless it is urged, and the gentleman raised the point of order that it was not germane.

Mr. MANN. Mr. Chairman, I beg the gentleman's pardon. I made the point of order, and I argued the germaneness. did not suppose it was necessary to repeat the argument which I made yesterday, and I shall not do it, even to delight my friend from Iowa.

The CHAIRMAN. Then the Chair will also undertake to dispose of the other ground suggested by the gentleman from Illinois, as to whether the effect of the proposed amendment will be to retrench expenditures within the meaning of the rule. the first question of germaneness, the Chair is of opinion that if the amendment would retrench expenditures within the meaning of the rule it would also be germane to this paragraph of the bill. It relates solely and alone to the question of improving the streets, avenues, roads for which an appropriation is being made, and seeks to modify the existing law; and if in doing so it retrenches expenditures, the Chair is of the opinion that that objection is not tenable. The proviso of clause 2 of Rule XXI is to the effect-

That it shall be in order further to amend such bill upon the report of the committee or any joint commission authorized by law, or the House Members of any such commission having jurisdiction of the subject matter of amendment, which amendment being germane to the subject matter of the bill shall retrench expenditures.

This last clause evidently means the retrenchment not only of appropriations or expenditures contained in the bill, but expenditures under the operation of the existing general law taken in connection with the provisions of the pending measure. The Chair finds from an examination of a number of precedents undertaking to define the scope and meaning of the term "retrenchment of expenditures" that it is not to be taken in that precise literal sense which would perhaps result in restrict-ing the proper and logical scope of its operation. The Chair

will not stop to read the precedents. It is apparent that if the General Government and the District of Columbia should shift a substantial portion of the expenses of improving the streets, avenues, and roads of the District of Columbia to the abutting property owners, a correspondingly less amount would have to be appropriated annually out of the funds of the District of Columbia to the extent of one-half and the remainder out of the Treasury of the United States. The Chair thinks it necessarily follows that the effect of the operation of the proposed amendment, keeping in view the existing general law applying to the District of Columbia and the administration of applying to the District of Columbia and the administration of its different bureaus, divisions, and departments, together with the pending measure, it would result in retrenching expenditures within the meaning of the proviso of clause 2, Rule XXI, and therefore the Chair overrules the point of order. The question is on the adoption of the amendment offered by the gentleman from Kentucky.

Mr. MANN. Mr. Chairman, I would just like to call attention to one effect of the amendment without arguing the general

tion to one effect of the amendment without arguing the general

proposition-

Mr. BORLAND. Mr. Chairman, will the gentleman yield? The CHAIRMAN. Does the gentleman from Illinois yield? Mr. MANN. No. Under this amendment if we should pave

or resurface to-day, which possibly may be done some time, the road out here in front of the Capitol or the roads around the White House or the roads around in front of the public buildings in Washington, the District Commissioners are required to levy a tax against them, and if it is not paid they are to be to levy a tax against them, and if it is not paid they are to be sold for nonpayment of taxes. It is the first time I have ever heard of a body giving to a little municipality the power to sell the capitol of the State, but here is a proposition which would permit the sale to a tax buyer of the White House and the Capitol of the United States. It is certainly not a very well guarded provision. well guarded provision.

Gentlemen will say Congress will make an appropriation. Well, possibly. I have heard a great many people say now Congress will make an appropriation, but I have noticed a very great disregard of those promises in the course of time. There ought not to be the power given to the District commissioners in Washington under any circumstances to levy a special assessment or taxes against Government property and authorize that

to be sold.

Mr. FITZGERALD. Will the gentleman yield?

Mr. MANN.

Mr. FITZGERALD. Does not this apply only in those cases where this work is done upon the application of the property

Mr. MANN. That is not the case at all. It is wherever any roadway is improved or resurfaced the commissioners are required to take this action.

Mr. FITZGERALD. That is in connection with the appro-

priation to which it attaches.

Mr. MANN. It is not confined to the appropriation. We have just been arguing that. It applies to all cases in the District where there is a paving or resurfacing. That is not all. There is no assessment levied anywhere in the United States for street paving-no special assessment, at least-where the property owners do not have an opportunity to be heard and say whether their property is benefited; but under this provision the District commissioners, against the will of every property owner in the block, may force an asphalt pavement upon them and levy a special assessment against them which they can not contest in court.

They can have no hearings as to whether their property is to be benefited or as to whether the street is to be paved. After the pavement is put in the commissioners levy what they call a special assessment, but what is in effect a special tax, against these property owners, and they are required to pay it, with no opportunity to be heard by any court in the land.

Mr. PAGE of North Carolina. Mr. Chairman—

The CHAIRMAN. The gentleman from North Carolina [Mr.

Pagel is recognized.

Mr. PAGE of North Carolina. Mr. Chairman, so far as the merits contained in the amendment now pending are concerned, I want to confess that I am in sympathy with them. But I do want to say in this connection that I shall oppose the amendment. I shall oppose it, not because I am opposed to the provisions that it carries but because of the criticism of the District of Columbia appropriation bill during all the years I have served in this body-and that criticism has come mostly even from gentlemen who are now urging this amendment—as to substantive legislative propositions carried in such bill.

Time and time again during the hearings that were held by

the subcommittee framing this bill, when those urging proposi-

sons that carried substantive legislative propositions brought them to our attention, we told them unhesitatingly that this committee would not undertake to consider propositions of a legislative character and referred them to the legislative committee having jurisdiction over these particular matters, namely, the committee presided over by my distinguished friend the gentleman from Kentucky [Mr. Johnson]. Now, in this instance, having guarded this bill against legislative provisions, believing, as I do, that it is not good legislative practice to legis-late upon an appropriation bill, but bringing it into this House clear of these provisions which would establish here a precedent for this kind of legislation upon appropriation bills, we are met by the very gentlemen who have contended against this practice with an effort to place upon this bill substantive legislative propositions. And, as I said in the beginning, so far as the merits of this proposition are concerned, I would favor them if they were brought in as a legislative proposition separate from this bill.

But I contend that this is not the place to legislate, and gentlemen in this House have time and time again contended with me against legislative propositions in an appropriation bill.

It is a strange situation in which we find ourselves. would naturally conclude that these gentlemen were opposed to legislative propositions in an appropriation bill that did not meet their approval, but that they were heartily in favor of legislative propositions if they happened to meet their approval. And I appeal to this membership to sustain the committee, which brought this bill in without legislative propositions, and defeat this amendment. I believe, as I have said repeatedly, that it is bad practice. The gentlemen have a favorable report from the legislative committee having jurisdiction of this matter. They have two days in every month in which they can call up from the calendar the bills that they have reported to this House, and these propositions can be considered upon their merits and class as legislative propositions.

I contend, Mr. Chairman, however meritorious this legisla-tion may be; however beneficial it might be to the Treasury; however just the provisions it places on the property owners of this District, this is not the place for that, and this House

should not legislate upon this appropriation bill.

I do not know that there is anything further I care to add. I am not antagonizing the provisions of the bill. I want that distinctly understood. But I am antagonizing the effort on the part of gentlemen who heretofore have fought legislative provisions upon this bill. Because of consideration for them, as well as for consideration for the rules of this House, the committee formulating this bill has met their objections by bringing in a bill clear of these provisions. Now, I want to be consistent, and I believe they ought to be consistent, and that this committee ought to be consistent, and keep out of this bill

substantive legislative propositions.

Mr. JOHNSON of Kentucky. Mr. Chairman, for some years, whenever a District appropriation bill has been before this body for consideration I have stood here day in and day out, week in and week out, insisting upon respect for the rules of this My contention has never been other than that the rules of this House should be observed. I am here to-day, in offering this amendment, complying to the strict letter of the rules governing this body. Heretofore substantive legislation has found its way into appropriation bills contrary to the rules of this The piece of legislation that is now proposed has just been decided by the Chairman to be within the rules of this House. The gentleman from North Carolina [Mr. Page], who is in charge of this bill, and who has just stated that he is in favor of its terms, provided it came in another way, should not be forgetful that this amendment is not now contrary to the rules of this body, but is in full compliance with those rules. I insist that Members vote their sentiments, and not undertake to get behind the subterfuge that heretofore objection has been made to substantive legislation in appropriation bills.

Under the ruling just made by the Chair the legislation proposed in the amendment offered by me is not contrary to the rules, but is within them, and Members who cast their votes for this amendment are not now violating any parliamentary rule.

Mr. BORLAND and Mr. McCOY rose.

The CHAIRMAN. The gentleman from Missouri [Mr. Bor-

LAND] is recognized.

Mr. BORLAND. Mr. Chairman, the very purpose of the Holman rule, I want to say to my colleague from North Carolina [Mr. Page], is to permit legislation being put upon appropriation bills if it has the purpose of retrenching public expenditures.

The evil that has been complained of heretofore, when the Democratic side of the House was fighting this practice of overloading appropriation bills with legislation, was the evil of

putting on legislation which increased public expenditures. Every one of those bills that came in in the past, during the time I was a Member of this House under the Republican régime, contained items of new legislation increasing public expenditures in violation of the rules of the House.

But the Holman rule is intended for the sole purpose of permitting legislation-something which is broader than mere limitation-substantive legislation, if it has the effect of retrenching or reducing expenditures; and we have declared by an almost united party action that that was our principle, that legislation of that character really belonged upon an appropria-tion bill. We have denominated it "legislation." We have met that issue fairly by the adoption of the Holman rule, and if now that Holman rule is to be abrogated by a rule of the committee to the effect that it will not put on any legislation, even though it retrench expenditures, it is still within the power of any Member of Congress under the rules of the House to offer such legislation; and that is the very scope and purpose, I might say, of this proposition.

Now, as to the argument of the gentleman from Illinois [Mr. Mann], that some one could sell Government buildings in the National Capital for nonpayment of such assessments for street paving, it is probably so long since my friend from Illinois read the celebrated case of McCullough against Maryland and the opinion of the Chief Justice in that case that he has forgotten that local

power can seize any of the property of the United States. Mr. MANN. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Missouri yield to the gentleman from Illinois?

Mr. BORLAND. No. The gentleman from Illinois declined

to yield to me.

Mr. MANN. I did not.

Mr. BORLAND. I asked the gentleman to yield.

Now, we have been operating for 14 years in this District, since the year 1894, under a law which is just this law exactly a law applying to assessments for sidewalks. That law is found in volume 28 of the Statutes at Large, on page 244. It is referred to specifically in this amendment, which is an arrendment proper to be used in this case, so that under the gentleman's contention for 19 years we have been in danger of having our public buildings sold for the nonpayment of a sidewalk tax. Of course, no such state of affairs ever existed or can exist under the law as it now stands or under such amendments to it as

may from time to time be made in pursuance of it.

Mr. SISSON. It does not change it now.

Mr. BORLAND. No; as the gentleman from Mississippi says, it does not change it now. There is not much objection to this proposition, even at this late day, on the merits. I want to say that when I introduced this bill a year ago it provided that only one-half of the expense of the street pavement should be in-curred at the cost of the abutting property owner. The District Committee, clothed with discretion to consider this bill, in its wisdom changed that to a charge on the property owner for the improvement of the street for an average width of 40 feet.

It has been contended-and even as late as to-night's Washington papers-that because Washington has very wide streets this law is unjust. I want to tell you that is a chimera. Washington has on paper a number of wide streets, but in practice the width of the streets has been reduced by throwing the extra land back into the front yards of property owners, and the average road that is improved is only an average roadway. If any gentleman looks at Massachusetts Avenue, or any other of the avenues that are supposed to be of unusual width, on paper, he will see that the property owner, without tax or charge, is enjoying a large front yard which he actually uses as his own property. That is what becomes of your wide streets. They are not improved at the expense of the abutting property owners, and will not be.

But there is another feature that is of great interest in con-nection with this matter, and that is the schedule as to what is

to be paved under this appropriation.

Mark, gentlemen, these are the streets that the District Commissioners say are to be paved with asphalt under this appropriation. There are about 20 of them. Listen to the width that is going to be paved:

Northwest section: V Street from Tenth Street to Florida Avenue, 32 feet; Warner Street from New Jersey Avenue to Fifth Street, 30 feet; K Street from Washington Circle to Twenty-eighth Street, 50 feet; I Street from Twenty-sixth Street, to Virginia Avenue, 38 feet.

Southwest section: Howison Place, M Street to N Street, 24 feet; M Street from Half Street to First Street, 35 feet; K Street from Four-and-a-half Street to Eighth Street, 30 feet.

Northeast section: Thirteenth Street from B Street to C Street, 35 feet; Ninth Street from H Street to K Street, 32 feet; K Street from Seventh Street to Tenth Street, 40 feet; Tennes-

see Avenue from B Street to D Street, 40 feet.

Southeast section: Massachusetts Avenue from Thirteenth Street to Fourteenth Street, 40 feet; New Jersey Avenue from M Street to N Street, 40 feet; Pennsylvania Avenue (south side) from end of pavement to bridge, 32 feet; I Street from Eleventh Street to Thirteenth Street, 34 feet; E Street from Seventeenth Street to Eighteenth Street, 35 feet; Thirteenth Street from Pennsylvania Avenue to Potomac Avenue, 32 feet; I Street from Sixth Street to Seventh Street, 32 feet; Potomac Avenue from Eighth Street to Ninth Street, 40 feet.

Georgetown: Wisconsin Avenue from Thirty-fourth Street to

Thirty-fifth Street, 35 feet.

The CHAIRMAN. The time of the gentleman from Missouri

Mr. BORLAND. I ask for five minutes more.

Mr. MANN. I hope the gentleman will get his five minutes, although he was discourteous to me.

Mr. BORLAND. I have had no intention to be discourteous to the gentleman, but I did not like his refusal to yield to me.

Mr. MANN. I did not refuse to yield to the gentleman. Mr. BORLAND. Then I am mistaken. I am very glad to

learn that.

There is only one of these streets that is wider than 40 feet in its roadway, and that is the handsome K Street. I undertake to say that on K Street the property bears a relatively high value on account of the extra width, so that it could bear the extra cost. But on K Street, under the liberal proposal of this amendment, they will only pay for 40 feet of pavement, so that there can be no injustice done even to the fortunate owners of property on K Street.

Mr. STAFFORD. Will the gentleman yield?
Mr. BORLAND. I will yield in a minute to my friend from Wisconsin. It has been said also that somebody or other might own a wedge at the corner of an avenue where it intersected a street. Why, bless your soul, the United States Government owns nearly all of those wedges, and now it is proceeding to buy all the rest of them that it can buy. They are in the hands of the Federal Government; but wherever those wedges are in the hands of private owners, on account of the extra light and air that they have around them they have an increased value and they sell for an unusually high price, more than enough to absorb a dozen such expenses as this pavement.

Now I will yield to my friend from Wisconsin.

Mr. STAFFORD. In the enumeration that the gentleman gave, did he include the so-called avenues, or only the so-called

Mr. BORLAND. I took this illustration verbatim from the official statement of the commissioners as to the streets proposed

Mr. STAFFORD. Take, for instance, the Avenue of the Presidents, Rhode Island Avenue, Vermont Avenue, New Jersey Avenue.

Mr. JOHNSON of Kentucky. Will the gentleman from Missouri yield to let me answer that question?

Mr. BORLAND. I yield to the gentleman from Kentucky. Mr. JOHNSON of Kentucky. I will say in answer to the gentleman from Wisconsin that a few days ago I saw the statement made in a report by one of the officers of the District of Columbia to Congress that certain additional appropriations were asked for because of the extreme width of the avenues in the District of Columbia. I addressed a written communication to that official, and asked him to name to me the avenues that were 160 feet wide, as he said. His answer was that Pennsylvania Avenue is the only one, except five or six squares of Louisiana Avenue.

Mr. STAFFORD. There are some in excess of 40 feet,

Mr. BORLAND. Mr. Chairman, I must decline to yield

Mr. STAFFORD. Will the gentleman answer my question? Are there not some in excess of 40 feet?

Mr. BORLAND. Yes; I undertake to say that the Avenue of the Presidents is paved in excess of 40 feet, and so is K Street and Massachusetts Avenue.

Mr. JOHNSON of Kentucky. But will the gentleman from Missouri explain that the property owners will not have to pay for paving more than 40 feet.

Mr. BORLAND. The property will justify a greater expenditure than that, on account of its greater value, but it is limited to 40 feet, anyway.

Mr. STAFFORD. Why should you limit it to 40 feet? Those owning property on the wide avenues are more able to pay than the people who live on the narrower side streets.

Mr. BORLAND. That is a concession to a clamor that I do not regard as sound, that because a man lives on a street of extra width he ought to be treated with some special consideration; but I point it out for the purpose of showing that under no circumstances is any injustice done on account of the width of the avenues.

Mr. ROBERTS of Massachusetts. Will the gentleman yield

for a question?

Mr. BORLAND. Yes.

Mr. ROBERTS of Massachusetts. I am asking for information. The gentleman has been speaking of K Street. calls to my mind the fact that between Thirteenth and Fourteenth Streets, K Street on one side is bordered by a public

Mr. JOHNSON of Kentucky. Franklin Park, owned by the Government of the United States, and the United States will

have to pay for that.

Mr. BORLAND. The chairman of the District Committee suggests that Franklin Park is a Government reservation, and that the private owners would not have to pay for it, but that I take it that is true the Government would have to pay for it. of many of these other wide streets. I think there is hardly a municipality in the country outside of Washington where the property owner does not pay for the special improvements abutting on his own property, and I think that rule ought to be applied, with some limit of fairness, to the property in the District of Columbia. I hope the amendment will pass.

The CHAIRMAN. The time of the gentleman has expired. Mr. MANN. Mr. Chairman, I believe my distinguished friend from Missouri is an able lawyer, and probably he has forgotten more law than I ever knew. Evidently he has forgotten all he knew on this subject. He said that the Supreme Court of the United States has made a decision which would affect this case. I challenge the gentleman to produce any decision of the Supreme Court which shows that Congress can not pass a law authorizing the sale for taxes of Government property belonging to the United States.

Mr. BORLAND. And I challenge the gentleman to point out

where we have undertaken to do any such thing.

Mr. MANN. I will do it. Mr. BORLAND. And I will show, further, that the defect, if it is a defect, exists in the present law; the same law pre-

Mr. MANN. The gentleman's bill provides that all the costs shall be assessed against the abutting property owners. Then it provides for the collection of the assessment through the sale of the property by reference to the statutes that requires the District Commissioners, in the case of Franklin Park named, to assess one-half the cost of paving K Street against Franklin Park, and if the assessment is not paid it requires the District Commissioners to sell the property. It will not be the first time that public property has been sold for special assessments. Property of cities is sold for special assessments constantly. The property of a municipality is sold for special assessments constantly; but here is a proposition to permit the District Commissioners to sell the property of the United States. It is not customary anywhere that I know of to permit a municipality to order the sale of property belonging to the superior organization. Now, if the gentleman from Missouri will produce the decision, I will eat the book. [Laughter.]

The CHAIRMAN. Debate is exhausted on this amendment.

Mr. SISSON. Mr. Chairman, I move to strike out the last

word.

Mr. FOSTER. Mr. Chairman, do I understand that all debate on this amendment is exhausted?

The CHAIRMAN. The Chair has so stated.

Mr. FOSTER. Then, a motion to strike out the last word in order to debate is not in order?

Mr. SISSON. Mr. Chairman, I ask unanimous consent to proceed for five minutes.

The CHAIRMAN. The gentleman from Mississippi asks unanimous consent to address the committee for five minutes. Is there objection?

There was no objection.

Mr. SISSON. Mr. Chairman, I think it is fair to state, not only for this Committee on Appropriations, but for the District Committee, that when we were discussing the assessment and improvement item under the bill your subcommittee decided that that law in reference to the present assessment and improvement should be changed. We then conferred with the chairman of the District Committee and asked him, so that the item might be in order under the Holman rule, to report such a bill. The District Committee in drafting the measure went further than the Appropriations Committee asked it to do by including

practically in that bill all the streets of the city of Washington. That was not the request of the subcommittee nor of the members of the subcommittee, but the District Committee having the full right under the Holman rule and the holding of the Chair to do this, this is as properly before the House as any Item in the bill, because we are proceeding under the rules of the House to consider this, and this bill is as much before the House as any item in the bill.

The purpose of the Holman rule was to permit this sort of legislation on an appropriation bill, because the English-speaking people have been able to retrench expenses by putting riders

on appropriation bills.

The law in relation to the sale of property in this bill is identical with the present law in relation to assessments relating to streets and sidewalks, because it refers specifically to the provision read by the gentleman from Missouri [Mr. Borland]. The power of the District Commissioners is not enlarged, except that a greater amount is assessed against the property owners. In other words, the power now in the commissioners is as great

as it would be if this amendment were agreed to.

If the amendment is agreed to, it simply means that the Federal Government will respond as the property owners do when a street in front of Government property is improved. It now responds as property owners do in a street in front of Government property if the improvement is made, and therefore the power the gentleman from Illinois refers to is not a power greater than the commissioners after this amendment is agreed Now, this is a question whether, under the Holman rule, we will take this opportunity where we may have a chance to get it through the other body or not. If this bill goes over to the other body by itself, the chance of ever writing it into law is very shadowy and distant, so far as the future is concerned. But if it is put on this bill, the chances are that it may become a law in the District of Columbia bill.

Mr. PAGE of North Carolina. Will the gentleman yield?

Mr. SISSON. I will. Mr. PAGE of North Carolina. Does not the same reason prevail in another body for placing on the bill riders that they may

become a law?

Mr. SISSON. That is true; and if they do it under their rules, they are responsible for it. But, Mr. Chairman, I do not like that privilege to be exercised there and we not to have the same right here. If they put on amendments over there which increase expenses of the Federal and the District governments, then the House of Representatives, if they are an economical body, ought to have the right to meet that with the corresponding rule to reduce expenses. In other words, to use a homely expression, "What is sauce for the goose ought to be sauce for the gander."

Mr. GREEN of Iowa. Mr. Chairman, will the gentleman

yield?

Mr. GREEN of Iowa. Do I understand the gentleman to say this amendment is the same in form as the provision for other

assessments for sidewalks?

Mr. SISSON. No. I said the powers vested by this amendment in the District Commissioners are identical with the powers now vested in the commissioners. It does not change the power of the District Commissioners to make the assessment. It simply changes the amount that may be assessed against the property owner.

Mr. GREEN of Iowa. The point I had reference to was that this amendment simply contains a provision for publishing

notice of the assessment.

Mr. SISSON. I did not say that.
Mr. GREEN of Iowa. No; the gentleman did not say that.
I am saying it. It does not state what the notice shall be. It does not provide for any hearings.

Mr. SISSON. The general law here-

Mr. GREEN of Iowa. Oh, the general law is not made a part by this amendment.

Mr. SISSON. The power of the District Commissioners and the manner are provided for in another section of the District law

Mr. GREEN of Iowa. But it was not provided in this amend-

Mr. SISSON. This is simply for the purpose of enabling this power of the District Commissioners to be enlarged, so that they may levy the assessment against the property owner, and they do that by assessing it all in the exact manner that they assess a part of it now. There is no difference in procedure. assess a part of it now. The only difference is in the amount to be paid by the property

Mr. SIMS. Mr. Chairman, I would like to address the committee for five minutes.

Mr. LINTHICUM. Mr. Chairman, I demand the regular

Mr. SIMS. I shall have to take it on the next paragraph. It makes no difference. No time will be saved. It is pertinent here. I would like to have five minutes,

The CHAIRMAN. The gentleman from Maryland objects, and the question is on agreeing to the amendment.

The question was taken; and on a division (demanded by Mr.

LEVY) there were-ayes 30, noes 40. Mr. JOHNSON of Kentucky. Mr. Chairman, I make the point

of order that there is no quorum present.

Mr. PAGE of North Carolina. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and Mr. Cullor having assumed the chair as Speaker pro tempore, Mr. Hull, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 10523, the District appropriation bill, and had come to no resolution thereon.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted-

To Mr. PORTER, for five days, on account of sickness in his family.

To Mr. L'ENGLE, for the day, on account of illness.

COMMISSION OF FINE ARTS (H. DOC. NO. 461).

The SPEAKER pro tempore laid before the House tha following, which the Clerk reported:

Ordered. That House Document No. 461, the report of the Commission of Fine Arts, be printed with illustrations.

Mr. MANN. That was not ordered before?

The SPEAKER pro tempore. The matter went before the Senate and was referred back, as it contained illustrations.

Mr. MANN. I know what took place in the Senate. The Senate did not order it printed, because they said the House had ordered it printed.

The SPEAKER pro tempore. Without objection, it will be so

There was no objection.

EXTENSION OF REMARKS.

Mr. FOWLER. Mr. Speaker, I ask unanimous consent that I may be permitted to extend my remarks in the RECORD on the currency bill, having had that permission granted last session, but having failed to take advantage of it.

The SPEAKER pro tempore. Is there objection? Mr. MANN. Mr. Speaker, having to-day been denied the opportunity to address the House and again denied the right to the floor when I was entitled to it, the minority having had no opportunity this afternoon, I object.

Mr. FOWLER. Mr. Speaker, a parliamentary inquiry.
The SPEAKER pro tempore. The gentleman will state it.
Mr. FOWLER. Mr. Speaker, during the discussion of the banking and currency bill in the House I made a speech and obtained permission to extend my remarks in the RECORD. My parliamentary inquiry is, as the banking and currency bill has now finally been disposed of, have I that privilege now?

The SPEAKER pro tempore. The Chair would say with reference to the leave given to the gentleman at that time that the time has expired, and if the gentleman desires that per-

mission new leave would have to be given.

Mr. MANN. I have no doubt some arrangement may be made by which leave will be granted to everybody, but it will not

be granted to the majority and not to the minority.

Mr. FOWLER. Mr. Speaker, the parliamentary inquiry is, as I understand the rule, when unanimous consent is obtained to extend remarks in the RECORD upon any bill this right obtains until five days after the bill has finally passed.

The SPEAKER pro tempore. The Chair will say to the gen-tleman that the rule is exactly the reverse. The time extended to the gentleman was five days after the passage of the bill and was in another session of Congress. That time has exand was in another session of Congress. pired and the leave is abrogated because of the rule itself.

Mr. FOWLER. But, Mr. Speaker, the bill has not been passed

The SPEAKER pro tempore. It was passed by the House

and the purpose of the gentleman's leave has been fulfilled, although the gentleman did not take advantage of it.

Mr. FOWLER. Mr. Speaker, a further parliamentary inquiry.
The SPEAKER pro tempore. The gentleman will state it.
Mr. FOWLER. Does not that rule obtain until five days after the passage of the bill by both Houses instead of by one of the Houses?

The SPEAKER pro tempore. It does not.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Tulley, one of its clerks, announced that the Senate had passed without amendment a bill of the following title:

H. R. 11003. An act to provide for expenses of representatives of the United States at the International Maritime Conference for Safety of Life at Sea.

The message also announced that the Senate had passed the following resolutions, in which the concurrence of the House of Representatives was requested:

Senate concurrent resolution 11.

Senate concurrent resolution 11.

Resolved by the Scnate (the House of Representatives concurring),
That there be printed for the use of the Senate 1,000 additional copies
of Senate Document No. 357, volumes 1 and 2, Sixty-first Congress, and
Senate Document No. 1063, Sixty-second Congress, being a compilation
of the treaties, conventions, international acts, protocols, and agreements between the United States of America and other powers from
1776 to 1913; and that the superintendent of documents is hereby
authorized to order reprinted such copies of the foregoing documents
as may be required for sale by his office in accordance with law.

Senate concurrent resolution 12.

Resolved by the Senate (the House of Representatives concurring),
That there be printed for the use of Congress 80,000 copies of the Federal
reserve act in pamphlet form, to be apportioned as follows: Thirty-five
thousand copies for the use of the House of Representatives, 20,000
copies for the use of the Senate, 5,000 copies for the use of the Committee on Banking and Currency of the Senate, 5,000 copies for the use of
the Committee on Banking and Currency of the House, 5,000 copies
for the use of the document room of the Senate, and 10,000 copies for
the use of the document room of the Senate, and 10,000 copies for
the use of the document room of the Senate, and 10,000 copies for

ENROLLED JOINT RESOLUTION PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. ASHBROOK, from the Committee on Enrolled Bills, re-ported that this day they had presented to the President of the United States for his approval the following joint resolution:
H. J. Res. 165. Joint resolution for recognition of the services

of the late David Du B. Gaillard, lieutenant colonel, Corps of Engineers, United States Army, as a member of the Isthmian Canal Commission, and for the relief of Mrs. Katherine Davis Gaillard.

ENROLLED BILL SIGNED.

Mr. ASHBROOK, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bill of

the following title, when the Speaker signed the same:
H. R. 11003. An act to provide for expenses of representatives of the United States at the International Conference for Safety of Life at Sea.

SENATE BILL AND CONCURRENT RESOLUTION REFERRED.

Under clause 2, Rule XXIV, Senate bill and concurrent resolution of the following titles were taken from the Speaker's table and referred to their appropriate committees, as indicated below

S. 3454. An act authorizing the Secretary of Commerce to lease to the city of Port Angeles, Wash., certain property; to the Committee on the Public Lands; and

S. Con. Res. 11. Concurrent resolution authorizing the printing of additional copies of Senate Document No. 357, Sixtyfirst Congress, and Senate Document No. 1063, Sixty-second Congress, being a compilation of treaties, conventions, etc., between the United States and other powers; to the Committee on Printing.

ADJOURNMENT.

Mr. PAGE of North Carolina. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 55 minutes p. m.) the House adjourned to meet on Monday, December 22, 1913, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, executive communications

were taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of the Treasury, transmitting a copy of a communication of the Secretary of the Interior of the 15th instant submitting a supplemental estimate of appropriation in the sum of \$5,000 for the preservation, development, administration, and protection of the national monuments created under the provisions of the act of June 8, 1906 (34 Stats., 225), entitled "An act for the preservation of American antiquities" (H. Doc. No. 506); to the Committee on Appropriations and ordered to be printed.

2. A letter from the Secretary of the Treasury, transmitting copy of a communication of the Secretary of War of the 16th instant submitting an urgent deficiency appropriation required by the Isthmian Canal Commission for the current fiscal year under item 4 of the appropriations made by the sundry civil | States; to the Committee on Agriculture.

act of June 23, 1913, being for skilled and unskilled labor on the Isthmus, etc., \$2,250,000 (H. Doc. No. 507); to the Committee on Appropriations and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. McCOY, from the Committee on the Judiciary, to which was referred the bill (H. R. 10046) to regulate the judicial procedure of the courts of the United States, reported the same without amendment, accompanied by a report (No. 157), which said bill and report were referred to the House Calendar.

Mr. POST, from the Committee on Elections No. 1, to which was referred the resolution (H. Res. 356) to dismiss the charges filed by John P. Grace against Richard S. Whaley be dismissed, reported the same without amendment, accompanied by a report (No. 158), which said resolution and report were referred to the House Calendar.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows

By Mr. STEPHENS of Texas: A bill (H. R. 11093) to amend an act entitled "An act to authorize the sale and disposition of surplus or unallotted lands of the diminished Colville Indian Reservation in the State of Washington, and for other purposes"; to the Committee on Indian Affairs,

Also, a bill (H. R. 11094) for the relief of the Turtle Mountain Chippewa Indians, and for other purposes; to the Commit-

tee on Indian Affairs.

Also, a bill (H. R. 11095) to authorize the Secretary of the Interior to expend the proceeds arising from the sale of town sites on the Yuma Rservation in California, and the Colorado River Reservation in Arizona and California; to the Committee on Indian Affairs.

Also, a bill (H. R. 11096) authorizing the Tuscarora Nation of New York Indians to lease or sell the limestone deposits upon

their reservation; to the Committee on Indian Affairs.

By Mr. ADAMSON: A bill (H. R. 11097) to amend the laws relating to shippers' manifests of merchandise for exportation, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. TAYLOR of Colorado: A bill (H. R. 11098) to provide for the establishment and maintenance of mining experiment stations, and for other purposes; to the Committee on Mines and

Mining.

By Mr. LAFFERTY: A bill (H. R. 11099) authorizing and directing the Interstate Commerce Commission to prepare and establish a single uniform classification of freight, with its rate schedule, and to prescribe rules for the ascertainment and apportionment of freight operating expenses; to the Committee on Interstate and Foreign Commerce.

By Mr. BYRNS of Tennessee: A bill (H. R. 11100) to authorize the Secretary of War to complete the erection of Locks and Dams B, C, and D, and put same into operation in the Cumberland River below Nashville, State of Tennessee, and for other purposes; to the Committee on Rivers and Harbors.

By Mr. HENSLEY: A bill (H. R. 11101) to establish a mining experiment station at Flat River, St. Francois County, Mo., to aid in the development of the mineral resources of the United States, and for other purposes; to the Committee on Mines and

Mining.

By Mr. KINKAID of Nebraska: A bill (H. R. 11102) providing that the marriage of a homestead entryman to a homestead entrywoman shall not impair the right of either to a patent, after compliance with the law a year, to apply to eixsting entries; to the Committee on the Public Lands.

By Mr. McKELLAR: A bill (H. R. 11103) to amend section 1, chapter 209, of the United States Statutes at Large, volume 27, entitled "An act providing when plaintiff may sue as a poor person and when counsel shall be assigned by the court," and to provide for the prosecution of writs of error and appeals in forma pauperis, and for other purposes; to the Committee on the Judiciary

By Mr. SINNOTT: A bill (H. R. 11104) to provide for a deferred-residence homestead; to the Committee on the Public

Lands.

By Mr. MAGUIRE of Nebraska: A bill (H. R. 11105) to provide for the encouragement of live stock, agricultural, horticultural, machinery, and the industrial exhibits in the various

By Mr. GOEKE: A bill (H. R. 11106) for the erection of a public building at Delphos, Ohio; to the Committee on Public

Buildings and Grounds.

Also, a bill (H. R. 11107) to provide for the purchase of a site for a public building at Celina, Ohio; to the Committee on Pub-

lic Buildings and Grounds.

Also, a bill (H. R. 11108) for the erection of a public building at St. Marys, Ohio; to the Committee on Public Buildings and Grounds.

By Mr. GOODWIN of Arkansas: A bill (H. R. 11109) pro viding for the erection of a public building at the city of El Dorado, Ark.; to the Committee on Public Buildings and Grounds.

By Mr. KINKAID of Nebraska: A bill (H. R. 11110) to authorize the Secretary of the Interior to contract with irrigation districts, organized under State laws, for the construction by the Government of reservoirs and canals and the operation of the same, the Government to be compensated for the costs thereof by tax levies made on the lands of the water users of irrigation districts as provided by the statutes of the State in which the irrigation district may be situated; to the Committee on Irrigation of Arid Lands.

By Mr. AIKEN: A bill (H. R. 11111) to amend sections 1 and 105 of the Judicial Code, to provide for the appointment of a district judge, district attorney, and marshal for the west-ern district of South Carolina, and for other purposes; to the

Committee on the Judiciary

By Mr. SHERLEY: A bill (H. R. 11112) to create the Gettys-burg Peace Memorial Commission, charged with the duty of locating the memorial on the Gettysburg battle field to commemorate the fiftieth anniversary of that battle, July 1, 2, 3, and 4, 1913; to the Committee on the Library.

By Mr. KEY of Ohio: A bill (H. R. 11113) to enlarge, extend, remodel, etc., post-office building at Findlay, Ohio; to the

Committee on Public Buildings and Grounds

By Mr. TAYLOR of New York: A bill (H. R. 11114) authorizing the Secretary of War to donate to the city of New Rochelle, N. Y., one condemned bronze gun and three pyramids of shell; to the Committee on Military Affairs.

By Mr. STANLEY: A bill (H. R. 11167) to prescribe the conditions under which corporations may engage in interstate commerce, and for other purposes; to the Committee on the Ju-

diciary.

By Mr. McGILLICUDDY: A bill (H. R. 11168) to prescribe the conditions under which corporations may engage in interstate commerce, and for other purposes; to the Committee on

By Mr. LEWIS of Maryland: Resolution (H. Res. 355) regarding the Government ownership and operation of telegraph and telephone lines; to the Committee on the Post Office and

By Mr. POST: Resolution (H. Res. 356) to dismiss the charges filed by John P. Grace against Richard S. Whaley; to the House Calendar.

By Mr. KINDEL: Joint resolution (H. J. Res. 179) to establish a fair and relative parcel-post graduate; to the Committee on the Post Office and Post Roads.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills were introduced

and severally referred as follows:

By Mr. ASHBROOK: A bill (H. R. 11115) to remove the charge of desertion from the military record of Earl W. Shaffer; to the Committee on Military Affairs.

By Mr. BARTON: A bill (H. R. 11116) granting a pension to Z. B. Partridge: to the Committee on Invalid Pensions.

By Mr. BRODBECK: A bill (H. R. 11117) granting an increase of pension to George W. Householder; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11118) granting an increase of pension to William C. Stair; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11119) granting an increase of pension to John Zumbrum: to the Committee on Invalid Pensions.

Also, a bill (H. R. 11120) to correct the military record of Jeremiah Stover: to the Committee on Military Affairs.

By Mr. BURNETT: A bill (H. R. 11121) for the relief of the heirs of Hase Burns; to the Committee on War Claims.

By Mr. CAMPBELL: A bill (H. R. 11122) granting an increase of pension to Lyman U. Humphrey; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11123) granting an increase of pension to

C. H. Jewett; to the Committee on Invalid Pensions.
By Mr. CANTOR: A bill (H. R. 11124) for the relief of the heirs of the late Samuel H. Donaldson; to the Committee on Claims.

By Mr. CLAYPOOL: A bill (H. R. 11125) granting an increase of pension to Emanuel Sheese; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11126) granting an increase of pension to William F. Bailey; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11127) granting an increase of pension to

Simeon Mick: to the Committee on Invalid Pensions.

By Mr. DERSHEM: A bill (H. R. 11128) granting an increase of pension to Jacob T. Yarger; to the Committee on Invalid Pensions.

By Mr. DIXON: A bill (H. R. 11129) granting a pension to Abram S. Rich; to the Committee on Invalid Pension

Also, a bill (H. R. 11130) granting a pension to Mary Jane Patrick; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11131) granting an increase of pension to John Woolley; to the Committee on Invalid Pensions

Also, a bill (H. R. 11132) granting an increase of pension to Clark Canfield; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11133) granting an increase of pension to William Rook; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11134) granting an increase of pension to Elisha D. Turner; to the Committee on Invalid Pensions.

By Mr. DOOLITTLE: a bill (H. R. 11135) granting a pension

to Alice P. Knapp; to the Committee on Pensions.

By Mr. DRISCOLL: A bill (H. R. 11136) granting a pension to Guy L. Joslin; to the Committee on Pensions.

By Mr. FERRIS: A bill (H. R. 11137) for the relief of J. P. Clark; to the Committee on War Claims.

Also, a bill (H. R. 11138) granting an increase of pension to Thomas Clark; to the Committee on Invalid Pensions.

By Mr. FOSTER: A bill (H. R. 11139) granting an increase of pension to Joseph M. Ashcraft; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11140) granting a pension to Oscar Sweeten; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11141) granting a pension to Clifford Swee-

ten; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11142) for the relief of Peter Helfman; to

the Committee on Claims. Also, a bill (H. R. 11143) to remove the charge of desertion from the record of Frederick Feninger; to the Committee on

Military Affairs. Also, a bill (H. R. 11144) to remove the charge of desertion

from the record of Herman Kneofler; to the Committee on War By Mr. GOEKE: A bill (H. R. 11145) granting an increase of

pension to James Liggit; to the Committee on Invalid Pensions. Also, a bill (H. R. 11146) granting an increase of pension to George W. Larsh; to the Committee on Invalid Pensions.

By Mr. HENSLEY: A bill (H. R. 11147) granting an in-

crease of pension to Bruce Myers; to the Committee on Invalid Pensions.

By Mr. KENNEDY of Rhode Island: A bill (H. R. 11148) granting a pension to Michael E. Fogarty; to the Committee on

By Mr. LAFFERTY: A bill (H. R. 11149) granting an increase of pension to Frederick H. Rix; to the Committee on Invalid Pensions.

By Mr. LANGHAM: A bill (H. R. 11150) granting an increase of pension to Francis S. Altman; to the Committee on Invalid Pensions

By Mr. LENROOT: A bill (H. R. 11151) granting an increase of pension to John Q. Adams; to the Committee on Invalid Pensions.

By Mr. LONERGAN: A bill (H. R. 11152) granting a pension to William Gilligan; to the Committee on Pensions.

Also, a bill (H. R. 11153) granting a pension to Arthur Demers; to the Committee on Pensions.

Also, a bill (H. R. 11154) granting an increase of pension to Fannie Davis; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11155) granting an honorable discharge to

George D. Tracy; to the Committee on Military Affairs

Also, a bill (H. R. 11156) granting an honorable discharge to Patrick Kennedy; to the Committee on Military Affairs.

By Mr. MITCHELL: A bill (H. R. 11157) for the relief of John A. Gauley; to the Committee on Claims.

Also, a bill (H. R. 11158) for the relief of Thomas C. Hyde; to the Committee on Claims.

Also, a bill (H. R. 11159) for the relief of John McGrail; to the Committee on Military Affairs.

By Mr. FERRIS: A bill (H. R. 11160) granting a pension to

O. A. Spencer; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11161) granting an increase of pension to Samuel Blair; to the Committee on Invalid Pensions.

By Mr. MITCHELL: A bill (H. R. 11162) granting an increase of pension to Margaret Gallagher; to the Committee on Invalid Pensions

By Mr. PARKER: A bill (H. R. 11163) for the relief of Lewis Wood; to the Committee on Military Affairs,
By Mr. PATTON of Pennsylvania: A bill (H. R. 11164)
granting an increase of pension to David Tanyer; to the Com-

mittee on Invalid Pensions.

By Mr. STEPHENS of Mississippi: A bill (H. R. 11165) for the relief of the heirs of Thomas F. Clayton; to the Committee

on War Claims

By Mr. SMITH of New York: A bill (H. R. 11166) for the relief of Wilhelmina Rohe; to the Committee on Military Affairs.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid

on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Petition of directors of the Washington Board of Trade, the Chamber of Commerce, and the Retail Merchants' Association, protesting against any change in the half-and-half principle of the act of 1873; to the Committee on the District of Columbia.

By Mr. BALTZ: Petition of the Grundy County (Ill.) Bar Association, favoring the passage of a certain amendment to House bill 9573, rearranging the Federal court districts in the State of Illinois; to the Committee on the Judiciary.

By Mr. BURKE of Wisconsin: Papers to accompany bill (H. R. 10090) granting an increase of pension to Edgar A. Bullis; to the Committee on Invalid Pensions.

By Mr. BURNETT: Petition of citizens of the seventh congressional district of the State of Alabama, favoring the passage of the Lindquist pure-fabric law; to the Committee on In-

terstate and Foreign Commerce.

By Mr. CARLIN: Papers to accompany bill (H. R. 11041) for the relief of L. C. Reid and Fannie B. Betts; to the Com-

mittee on War Claims.

By Mr. COOPER: Memorial of the Advancement Association of Pacific Junction, Wis., protesting against the passage of the seamen's bill in its present form; to the Committee on the Merchant Marine and Fisheries.

By Mr. DIXON: Petition of citizens of Hartsville and Taylorsville, Ind., favoring the passage of the Lindquist pure-fabric and leather bill; to the Committee on Interstate and Foreign

By Mr. EDMONDS: Petitions of Business Science Club, Philadelphia, and Employees' Association of Philadelphia, favoring the Philadelphia Navy Yard as location for a new dry dock;

to the Committee on Naval Affairs.

By Mr. ESCH: Petition of the directors of the Washington Board of Trade, the Chamber of Commerce, and the Retall Merchants' Association, protesting against any change in the half-and-half principle of the act of 1873; to the Committee on the District of Columbia.

By Mr. GARDNER: Memorial of the Beverly Board of Trade, indorsing the movement for the purpose of designating the Boston Navy Yard as the place for building a ship; to the Committee on Naval Affairs.

By Mr. GRAHAM of Pennsylvania: Petitions of the Business Science Club of Philadelphia and the Employees' Association, Philadelphia, favoring the Philadelphia Navy Yard as the location for the new dry dock; to the Committee on Naval Affairs.

By Mr. KIESS of Pennsylvania: Petition of citizens of Lycoming County, Pa., favoring legislation to pension emergency men:

to the Committee on Pensions.

By Mr. LAFFERTY: Papers to accompany bill (H. R. 11149) granting an increase of pension to Frederick H. Rix; to the Committee on Invalid Pensions.

By Mr. LANGHAM: Memorial of the Federation of Jewish Farmers of America, favoring the passage of a bill for adequate rural credit facilities; to the Committee on Banking and

By Mr. MAHAN: Petition of the Chamber of Commerce of New Haven, Conn., favoring the passage of House bill 6282, relative to the restriction of narcotics; to the Committee on Ways and Means.

Also, petition of the German-American Alliance of New York, protesting against the passage of the Burnett immigration bill; to the Committee on Immigration and Naturalization.

By Mr. McCLELLAN: Petition of the common council of the city of Hudson, N. Y., relative to the location of the deep-water terminal of the Hudson River at Hudson, N. Y.; to the Committee on Rivers and Harbors.

By Mr. SELLS: Petition of the business men of Newport, Tenn., favoring the passage of House bill 5308, relative to mailorder houses; to the Committee on Ways and Means,

By Mr. SCULLY: Petitions of Patent and Enameled Leather Manufacturers' Association, and committee on manufactures of the board of trade of Newark, N. J., favoring bill to compel concerns to properly label goods; to the Committee on the Judiciary.

Also, petition of C. B. McLaury, of New Brunswick, N. J., protesting against the passage of the seamen's bill; to the Committee on the Merchant Marine and Fisheries.

Also, petition of citizens of Navesink, Sea Bright, Elberon, and Long Branch, protesting against the passage of the seamen's bill in its present form; to the Committee on the Merchant Marine and Fisheries.

By Mr. WILLIS: Petition of Mrs. J. E. Myers and 90 others, members of the Woman's Missionary Society of the First Presbyterian Church of Bucyrus, Ohio, favoring an amendment to the Constitution to prohibit polygamy; to the Committee on the Judiciary.

SENATE.

Monday, December 22, 1913.

The Senate met at 12 o'clock m. The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the

following prayer:

We bless God for the light and glory of a new day. Thou hast not been satisfied to unveil Thy face to show us Thy glory alone, but Thou hast been pleased to make us partners with Thyself in the execution of a great plan and coworkers together with God in that which works out the design of the divine mind. So with our hands full of this divine commission, with our lives full of the divine plan, we must give ourselves day by day to the execution of the task that God has committed to us.

In so far as Thou hast given us in trust a personal influence may it be for the establishment of the highest and the best among men. In so far as Thou hast committed unto us power may it be to restrain evil and to help on the good. In so far as Thou hast committed to us wisdom may it be used for the working out of the wise designs of God among men, so that our whole life with all its energies may be consecrated to the plan that God has revealed to us through His Son, our Lord and Savior, Jesus Christ. We ask the blessing of God upon us this day, for His holy name's sake. Amen. The Journal of the proceedings of Saturday last was read

and approved.

TELEPHONE SERVICE IN THE DISTRICT.

The VICE PRESIDENT. The Chair presents a communication from the Public Utilities Commission of the District of Columbia, transmitting information relative to telephone service in the District, which information was requested by the Senate in a resolution of November 13, 1913.

Mr. GALLINGER. I think the communication should be

printed and referred to the Committee on the District of

Columbia.

The VICE PRESIDENT. If the Senator from New Hampshire will bear with the Chair, he will state that it is a very large document and contains a great deal of matter the printing of which the Chair is in doubt about, and the Chair would prefer to refer it first to the Committee on Printing.

Mr. GALLINGER. I think that reference first would be

proper under the circumstances.

Mr. NORRIS. I was going to make an inquiry in regard to the disposition of the report. I could not hear what the Chair said.

The VICE PRESIDENT. The Chair stated that, in the first instance, he would refer the communication to the Committee on Printing, as it appears to be a very voluminous document, and the Chair is in doubt as to whether it should be printed. It will be referred to the Committee on Printing, and the Senator from Nebraska can consult with the members of that committee in reference to the printing.

Mr. NORRIS. That course is satisfactory, I will say to the

FEDERAL RESERVE CITIES.

Mr. POINDEXTER. Mr. President, I present several telegrams, including one from the mayor of the city of Seattle, Wash., setting forth the claims of the city of Seattle to be designated as a Federal reserve city under the currency act which is about to be enacted. I ask that they be printed in the RECORD.

Mr. SMOOT. I did not hear the request of the Senator.

Mr. POINDEXTER. There are several telegrams that I submit, and I ask that they be printed in the RECORD.

Mr. SMOOT. Upon what subject?
Mr. POINDEXTER. Upon the subject of the city of Seattle being made a Federal reserve city under the national banking

Mr. SMOOT. If there is not any real desire on the part of the Senator that they be printed in the RECORD, I wish that he would withdraw the request. The bill has passed, the subject is settled, and it is only filling the Record with the views of indi-

Mr. POINDEXTER. I could not hear quite clearly what the

Mr. SMOOT. I say if there is not any good reason why the telegrams should be printed in the RECORD and if the Senator is not particularly interested in having them printed, I wish he would withdraw the request.

Mr. POINDEXTER. I would be very glad to comply with the wish of the Senator from Utah, and would comply if I were not particularly interested in having these telegrams printed. I will say to the Senator that they are not altogether telegrams from private citizens. The principal telegram is from the mayor of Seattle. It is not a matter which has been settled; it is a public matter now before the country, and undoubtedly one

which will be publicly discussed.

Mr. SMOOT. Would it not do just as well, I ask the Senator, to have the telegrams referred to the Committee on Banking

and Currency and let that committee consider them?

Mr. POINDEXTER. I have no objection to their being referred to the Committee on Banking and Currency; I would be very glad if they were so referred; but I should like very much to have the statement contained particularly in the telegram of the mayor of the city of Seattle printed in the RECORD. It is not very long.

Mr. GALLINGER. I will ask the Senator from Washington

whether he knows how many banks will probably be established.

Mr. POINDEXTER. I am sorry to say that I do not know.

Mr. GALLINGER. Of course if there are to be but four, it is manifest that Seattle would not probably get one, whatever the wishes of the mayor and citizens of that city might be.

Mr. POINDEXTER. That is very true. My understanding was that there would be not less than eight.

Mr. GALLINGER. I quite agree with the Senator from Utah,

My understanding

Mr. President, that it would seem hardly necessary to commence burdening the RECORD now with telegrams and letters from citireserve city, but, of course, I am not in the habit of objecting, and personally I will not object, although if the Senator could persuade himself that the same purpose would be reached by keeping them out of the Recerp I wish he would do it.

Mr. CHAMBERLAIN. Mr. President—
Mr. POINDEXTER. If the Senator will allow me to make a statement with reference to the point made by the Senator from New Hampshire, I agree entirely with the Senator from New Hampshire in the general policy of not burdening the CONGRESSIONAL RECORD with unimportant and extraneous matter, and for that reason as to two of the telegrams which I have presented I withdraw the request which I have made. One of them, from the mayor of Seattle, I should like to have printed in the RECORD.

Mr. CHAMBERLAIN. Mr. President, I simply wish to say in this same connection that my colleague and I have received a number of telegrams and letters on the same subject in reference to our city. As is well known, we are measurably a rival of the magnificent city on the Sound; but we have not felt it advisable to present them and to encumber the Record with them. While I do not want to object, if these matters are going in the RECORD we feel that our citizens should not be forgotten in the matter.

Mr. POINDEXTER. I withdraw the request with the exception of that as to the telegram from the mayor of Seattle.

Mr. BURTON. Mr. President, I regard this as a rather serious matter. The great danger to the proposed plan for a Mr. President, I regard this as a rather system of regional banks is local influence and political manipulation. In my judgment the plan is in a measure handicapped already by exemption from the civil-service rules. ought to be so established and managed as to command the utmost confidence of the people.

I really should be glad to see a resolution introduced here and adopted to the effect that no Senator or Representative shall exert any influence for the making of selections for the location of regional banks. A free hand ought to be given to the organization committee and the Federal reserve board to act according to their judgment after full hearings. If requests like this are thrust in here, and every Senator must advocate his own city or some other city in his State, and every Repre-

sentative some town in his district, we can readily see where we will land.

I do not know that I ought to make any suggestion to any Senator. It is for each Senator to decide for himself. But my hope is that this problem is to be worked out independently of political influence.

Mr. CLAPP. Senators and Representatives could not resist the pressure to make an effort to get these regional associations in cities in their own States. I believe that if we should pass such a resolution it could not be honestly and in spirit carried out, as much as it may be deplored.

Mr. POINDEXTER. With reference to the proposition of the Senator from Ohio, it seems to me that this is peculiarly a matter of public concern in which individuals are not primarily interested, but involving entire regions of the country, involving

interested, but involving entire regions of the country, involving only the principal cities of the country. I do not think this is an appropriate time, however, to settle or to discuss the propriety or ethics of the question whether Senators should use any influence in reference to the selection of the regional reserve cities. Should the Senator from Ohio introduce such a resolution it would be appropriate then to be discussed. It being not now before the Senate, I only desire to take this occasion to state that I do not altogether agree with the views the Senator

from Ohio has expressed.

Mr. SMOOT. Mr. President, I am not going to object to this telegram, but I give notice now that I shall object to the next

one which is presented here.

There being no objection, the telegram was referred to the Committee on Banking and Currency and ordered to be printed in the RECORD, as follows:

SEATTLE, WASH., December 21, 1913.

Hon. MILES POINDEXTER, Senate, Washington, D. C .:

Hon. MILES POINDEXTER,

Senate, Washington, D. C.:

Request prompt united action of Washington delegation and other influential friends presenting claims of Seattle for designation of Pacific Northwest regional reserve bank. Seattle banking capital deposits exceed Portland one-third. Washington banking statistics double Oregon. Seattle more convenient and logical banking center for three-fourths Northwest than possible at Portland. Seattle clearing house constantly showing substantial increasing lead over Portland despite division of territory with Tacoma, Everett, Bellingham, other Washington banking centers, whereas Portland without large vicinity banking nelghbors. Also impress important bearing of Seattle with existing Government revenues and disbursements, remembering regional reserve bank becomes Government depositary and disbursing agency. Emphasize facts that all expenditures of Alaska, Puget Sound Navy Yard, coast-defense forts, large postal contracts, forestry, and other Government services now made from Seattle. Also revenues assay office, Puget Sound customs district, internal revenue, and income tax are concentrated here. These Government revenues and disbursements centering at Seattle vastly exceed similar relations at Portland. Am confident all substantial business considerations and geographical relations amply support selection of Seattle as regional reserve center of Pacific Northwest. Any necessary detail figures promptly furnished. Please present copies of this message to other members of Washington delegation, also my personal friends, Senators Owen and Lewis, urging their assistance. Congratuations all along the line for great accomplishment in passage of people's currency measure.

Geo. S. Cottrell, Mayor.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House had disagreed to the amendment of the Senate to the bill (H. R. 7837) to provide for the establishment of Federal reserve banks, to furnish an elastic currency, to afford means of rediscounting commercial paper, to establish a more effective supervision of banking in the United States, and for other purposes, agrees to the conference asked for by the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. Glass, Mr. Korbly, and Mr. HAYES managers at the conference on the part of the House.

The message also announced that the House had passed a bill (H. R. 8142) to authorize the construction, maintenance, and operation of a bridge across Bayou Bartholomew, at or near Wilmot, Ark., in which it requested the concurrence of the

PETITIONS AND MEMORIALS.

The VICE PRESIDENT presented resolutions adopted by the Board of Trustees of Crescent City, Cal., favoring the construc-tion of a breakwater and for certain harbor improvements at or near that city, which were referred to the Committee on Commerce.

Mr. BURLEIGH presented a petition of Local Union No. 11, International Brotherhood of Paper Makers of the United States and Canada, of Livermore Falls, Me., praying for the enactment of legislation to make lawful certain agreements between employers and laborers, and persons engaged in agriculture or horticulture, and to limit the issuing of injunctious in certain cases, and for other purposes, which was referred to the Committee on the Judiciary.

Mr. BURTON presented a petition of the Methodist Ministers' Association of Cincinnati, Ohio, praying for the adoption of an international agreement for the suspension of naval construction, which was referred to the Committee on Naval Affairs.

Mr. SMITH of Arizona. I have a resolution in the nature of a petition from the Board of Common Council of Tempe, Ariz., in favor of a grant of certain lands lying near that city. It is very short and contains facts that I am afraid of losing in ref-erence to the matter. For that reason alone, for the preservation of the facts, I ask that the resolution be printed in the RECORD, and I purpose at the earliest convenient moment to introduce a bill on the subject.

There being no objection, the matter was referred to the Committee on Public Lands and ordered to be printed in the RECORD,

as follows:

Resolution 2, by the Common Council of Tempe.

Resolution 2, by the Common Council of Tempe.

Whereas it is desirable that Tempe should secure title to land in the vicinity thereof containing deposits of material suitable for macadamizing streets and roads; and

Whereas large and very desirable deposits of calich suitable for macadamizing streets and roads are found in the southwest quarter of the southeast quarter of section 10 in township 1 north, range 4 east, of the Gila and Salt River base and meridian; and

Whereas said land adjoins the north boundary line of the corporate limits of Tempe and is accessible and desirable for the purpose above mentioned; and

Whereas the title of said land is in the United States, and said land was on December 4, 1908, withdrawn from entry under the first form of withdrawal provided for in section 3 of the act of Congress of June 17, 1902; and

Whereas it is believed by the common council of Tempe that said land will not in any way be needed or required by the United States for any of the purposes contemplated by said act of June 17, 1902; and Whereas said land and no part thereof is suitable for agricultural purposes and is valuable only for the deposits suitable for road construction contained therein: It is therefore

Resolved by the Common Council of Tempe:

Resolved by the Common Council of Tempe:

(1) That Joseph T. Birchett, the mayor of Tempe, be, and he is hereby, authorized and directed to take any and all such action as he may deem proper to secure the title of the above-described land for Tempe, either by a special act of Congress or otherwise, as he may be advised or deem best

(2) That a copy of these resolutions be forwarded by the clerk of Tempe to Hon. Carl Hayden, the Representative in Congress for Arizona, and that like copies be forwarded to Hon. Marcus A. Smith and Hon. Henry F. Ashurst, the United States Senators from Arizona, and that they and each of them be, and are hereby, petitioned to use their best efforts to secure the title to the above-described land for Tempe, either through a special act of Congress or by such other means as they may deem proper.

I, Curt W. Miller, town clerk of Tempe, do hereby certify that the above and foregoing is a true and correct copy of a resolution passed by the common council of Tempe at a meeting thereof held on December 1, 1913.

In witness whereof I have hereunto set my hand as town clerk of Tempe and the corporate seal of Tempe this 2d day of December, A. D. 1913.

[SEAL.]

Curt W. MILLER, Town Clerk.

CURT W. MILLER, Town Clerk.

Mr. BRANDEGEE. I send to the desk a memorial which the Senator from Pennsylvania [Mr. OLIVER] left for me to present. I will ask that it be read.

There being no objection, the memorial was read and ordered to lie on the table, as follows:

PHILADELPHIA BOARD OF TRADE, Philadelphia.

To the honorable the Senate and House of Representatives of the United States in Congress assembled:

This memorial of the Philadelphia Board of Trade respectfully repre-

Attest:

That the urgency of the situation, as a blow to our American merchant marine, again compels the Philadelphia Board of Trade to address you in protest against the passage of Senate bill No. 136, known as the seamen's bill;

you in protest against the passage of Senate bill No. 136, known as the seamen's bill;

That its provisions are so radically wrong and will affect so seriously our fast disappearing deep-sea tonnage, and will equally cripple the lake and coast tonnage, that Congress should take counsel from the practical experience of shipowners and agents before committing the Government to another death-dealing blow to the interests of our mercantile marine;

That the provision as to the employment of able-bodied seamen for manning lifeboats, it is claimed by those best equipped to pass judgment upon same, is impracticable, as the number required could not be secured; nor is such a provision necessary, as firemen and those employed regularly on steamship lines are well qualified to discharge the duties now assigned them;

That the board of trade is deeply interested in every proper provision for the safety of passengers at sea, and believes that every wise effort should be made to that end, but Congress owes a duty to deal justiy by all interests and should halt the proposed legislation until shipowners and others interested be given, either by hearings or through the investigation of a commission, an opportunity to represent the character of legislation needed for the upbuilding of the American merchant marine, now so badly handicapped in its competition for the world's commerce: Therefore

Your memorialist, the Philadelphia Board of Trade, most earnestly profests to your honorable bodies against the passage of Senate bill No. 136, known as the seamen's bill, without radically amending the same to meet the objections urged against its provisions.

And your memorialist will ever pray.

[SEAL.]

President Philadelphia Board of Trade.

WM. M. COATES.
President Philadelphia Board of Trade.

W. R. TUCKER, Secretary,

Mr. BRANDEGEE. I asked for the reading of the memorial because the bill is not before this branch of Congress now; it is in the other House, and that was the only way the matter could be brought to the attention of the people.

SUITS AGAINST COMMON CARRIERS.

Mr. SHIELDS. From the Committee on the Judiciary I report back favorably, with an amendment in the nature of a substitute, the bill (8. 3484) to amend paragraph 8, section 24, chapter 2, of the Judicial Code, and I submit a report (No. 146) thereon. I ask unanimous consent for the present consideration of the bill.

Mr. SMOOT. Mr. President, will the Senator from Tennessee, in as brief a statement as possible, tell the Senate what changes

are proposed by the bill and what its effect will be if passed?

Mr. SHIELDS. Mr. President, the object of this bill is to prevent the removal of causes brought in courts of the State against transportation companies under the commerce laws of the United States involving less than \$3,000 to district courts of the United States. Section 28 of the Judicial Code, in defining the jurisdiction of district courts, confers on those courts jurisdiction of all suits arising under any law regulating commerce regardless of the amount involved. This bill relates to that particular jurisdiction.

The statute in question is the Carmack amendment to the interstate commerce law which, as all Senators will remember, provides that the initial carrier shall be liable to the shipper for any damage caused by loss, delay, or injury to the property after it has been received for transportation. Under section 28 of the Judicial Code the district courts are given jurisdiction of such cases regardless of the amount or value involved. Therefore all cases arising under the commerce laws may be removed from the State courts to the district courts of the United States. It has become a custom of the transportation companies against which suits of this character are brought to remove them even if the amount is but \$25, thus entailing cost and delay, which amount to practically a denial of all remedy and absolutely emasculating the Carmack amend-

ment making the initial carrier liable.

The object of this amendment is to prevent removals of these cases from the State courts where the amount involved

is under \$3,000.

To refresh the memory of Senators, I will read section 28 of the Judicial Code:

SEC. 28. Any suit of a civil nature, at law or in equity, arising under the Constitution or laws of the United States, or treaties made, or which shall be made under their authority, of which the district courts of the United States are given original jurisdiction by this title, which may now be pending or which may hereafter be brought in any State court, may be removed by the defendant or defendants therein to the district court of the United States for the proper district."

That covers the particular class of cases to which I have referred. This section provides for the removal of other cases not pertinent to the present issue. The concluding clause is in these words:

Provided, That no case arising under an act entitled "An act relating to the liability of common carriers by railroad to their employees in certain cases," approved April 22, 1908, or any amendment thereto, and brought in any State court of competent jurisdiction, shall be removed to any court of the United States.

The proposed amendment is simply another provision to the effect that no suit brought under the commerce laws involving less than \$3,000 in a court of competent jurisdiction shall be removed to a district court, but shall remain in the State courts, to be there finally determined.

Mr. SMOOT. I will say to the Senator from Tennessee that

his explanation is perfectly satisfactory to me, and I agree that the bill ought to be passed. I have no objection to it.

Mr. SHIELDS. I wish to say that the bill was introduced by the junior Senator from Iowa [Mr. KENYON], who can, if it be thought necessary, more fully and clearly explain it than I have done.

The VICE PRESIDENT. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The amendment of the Committee on the Judiciary was to strike out all after the enacting clause and to insert:

strike out all after the enacting clause and to insert:

That the act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911, being chapter 231 of Thirty-sixth Statutes at Large, be amended by inserting at the conclusion of section 28, chapter 3, of said act, the following:

"And provided further, That no suit brought in any State court of competent jurisdiction against a railroad company or other corporation or person engaged in and carrying on the business of a common carrier to recover damages for delay, loss of, or injury to property received for transportation by such common carrier, under section 20 of the act to regulate commerce, approved February 4, 1887, as amended June 29, 1906, April 13, 1908, February 25, 1909, and June 18, 1910,

shall be removed to any court of the United States where the matter in controversy does not exceed, exclusive of interest and costs, the sum or value of \$3,000."

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading,

read the third time, and passed.

The title was amended so as to read: "A bill to amend an act entitled 'An act to codify, revise, and amend the laws relating to the Judiciary,' approved March 3, 1911, being chapter 231 of Thirty-sixth Statutes at Large."

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. POINDEXTER:

A bill (S. 3844) granting a pension to John Snider; to the Committee on Pensions.

By Mr. JOHNSON:

A bill (S. 3845) granting a pension to Ada Cary McKenney (with accompanying papers); and

A bill (S. 3846) granting a pension to Arria S. Sargent (with accompanying papers); to the Committee on Pensions.

By Mr. SHEPPARD:

bill (S. 3847) to provide for a public building at Big Tex.; to the Committee on Public Buildings and Grounds.

By Mr. SMITH of Arizona:

A bill (S. 3848) authorizing the Secretary of War, in his discretion, to deliver to the city of Tucson, State of Arizona, two condemned bronze or brass cannon, with their carriages and outfit of cannon balls; to the Committee on Military Affairs.

By Mr. BURLEIGH:

A bill (S. 3849) for the relief of Thomas C. Jones; to the Com-

mittee on Military Affairs.

A bill (S. 3850) to provide for the purchase of a site and the erection of a public building thereon at Pittsfield, Me.; and

A bill (S. 3851) to provide for the purchase of a site and the erection of a public building thereon at Fairfield, Me.; to the Committee on Public Buildings and Grounds.

A bill (S. 3852) granting a pension to Caroline E. Remick; A bill (S. 3853) granting an increase of pension to William

O. Steele A bill (S. 3854) granting an increase of pension to Cornelius

T. Ham; and

A bill (S. 3855) granting an increase of pension to John H. Thorn; to the Committee on Pensions.

By Mr. JACKSON:

bill (S. 3856) granting an increase of pension to Lucinda Holmes; to the Committee on Pensions.

By Mr. BORAH:

A bill (S. 3857) granting an increase of pension to Michael Reynolds (with accompanying papers); to the Committee on

By Mr. SHIVELY: A bill (S. 3858) granting a pension to Edna E. Mead (with accompanying papers):

A bill (S. 3859) granting an increase of pension to Annie T. La Tourrette Romeyn (with accompanying paper);

A bill (S. 3860) granting an increase of pension to Amelia

Raschig (with accompanying papers);
A bill (S. 3861) granting an increase of pension to Henry C. Byers; and

A bill (S. 3862) granting a pension to Anna O. Stanton; to the Committee on Pensions,

By Mr. ROBINSON:

A bill (S. 3863) granting lands to Hot Springs Lodge, No. 62, Ancient Free and Accepted Masons, of Hot Springs, Ark.; to the Committee on Public Lands.

By Mr. MYERS:

A bill (S. 3864) to amend an act entitled "An act to protect the birds and animals in the Yellowstone National Park and to punish crimes in said park, and for other purposes"; to the Committee on the Judiciary.

By Mr. POINDEXTER:

A bill (S. 3865) providing for the enployment of an engineer to take charge of the work of caring for the flood waters of the Puyallup, White, and Stuck Rivers, and other streams in King and Pierce Counties, State of Washington; to the Committee on Commerce.

By Mr. DU PONT:

A bill (S. 3866) for the relief of the heirs of John W. Massey; to the Committee on Claims.

COST OF LIVING IN THE DISTRICT OF COLUMBIA.

Mr. KENYON. I introduce a joint resolution, and ask that it be read.

The joint resolution (S. J. Res. 93) relative to the cost of living in the District of Columbia was read the first time by its title and the second time at length, as follows:

Resolved, etc. That the Department of Labor be, and hereby is, authorized and directed to make an inquiry into the cost of living in the District of Columbia, and to report thereon to Congress as early as practicable, and that there be appropriated for this purpose the sum of \$6,000; and be it further

Resolved, That the special agents and clerks employed under this appropriation shall be selected from among the persons eligible on any civil-service register.

Mr. KENYON. I ask that the resolution may be referred to the Committee on Education and Labor.

Mr. SMOOT. Inasmuch as the resolution carries an appropriation, I believe, under the law, it ought to go to the Committee to Audit and Control the Contingent Expenses of the Senate.

Mr. KENYON. I assumed it would have to go to the Commit-

tee on Education and Labor first, and then possibly to the Committee to Audit and Control the Contingent Expenses of the

enate. I have no objection, however.
The VICE PRESIDENT. The resolution will go to the Committee to Audit and Control the Contingent Expenses of the

Senate.

AMENDMENTS TO INDIAN APPROPRIATION BILL.

Mr. GORE submitted an amendment proposing to appropriate \$500,000 in aid of the common schools in the Cherokee, Creek, Choctaw, Chickasaw, and Seminole Nations, etc., intended to be proposed by him to the Indian appropriation bill, which was referred to the Committee on Indian Affairs and ordered to be printed.

He also submitted an amendment authorizing the Secretary of the Interior to make a per capita payment to the enrolled members of the Choctaw and Chickasaw Tribes of Indians, etc., intended to be proposed by him to the Indian appropriation bill, which was referred to the Committee on Indian Affairs

and ordered to be printed.

OMNIBUS CLAIMS BILL.

Mr. SMITH of Georgia submitted an amendment intended to be proposed by him to the omnibus claims bill, which was referred to the Committee on Claims and ordered to be printed.

Mr. RANSDELL submitted an amendment intended to be proposed by him to the omnibus claims bill, which was referred to the Committee on Claims and ordered to be printed.

AGRICULTURAL EXTENSION WORK.

Mr. O'GORMAN submitted an amendment intended to be proposed by him to the bill (8, 3091) to provide for cooperative agricultural extension work between the agricultural colleges in the several States receiving the benefits of an act of Congress approved July 2, 1862, and of acts supplemental thereto, and the United States Department of Agriculture, which was ordered to lie on the table and be printed.

HATTIE A. KRUEGER AND LIZZIE KRUEGER,

Mr. SMITH of Arizona submitted the following resolution (S. Res. 237), which was rend and referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Secretary of the Senate be, and he hereby is, authorized and directed to pay out of the contingent fund of the Senate to Hattle A. Krueger and Lizzie Krueger, sisters of Paul A. Krueger, late a clerk to the Committee on Irrigation and Reclamation of Arid Lands of the United States Senate, a sum equal to six months' salary, at the rate he was receiving by law at the time of his death, the said sum to be considered as including funeral expenses and all other allowances. allowances.

COMPENSATION FOR INJURIES TO WORKMEN.

Mr. KERN submitted the following resolution (S. Res. 238) which was read, considered by unanimous consent, and agreed

Resolved, That the Secretary of War be, and hereby is, directed to supply the Senate with such information as is available on the subject of the laws of the various States of the United States and of foreign countries providing for systems of compensation of workmen for in-

ADDITIONAL CLERKS TO SENATORS.

Mr. JONES. I ask to have taken from the calendar Senate resolution 116, providing for an extra clerk for each minority Senator having fewer than three employees, and that it be indefinitely postponed.

The VICE PRESIDENT. Without objection, the resolution

will be indefinitely postponed.

Mr. JONES. I also ask that Senafe resolution 117, authorizing the Vice President to appoint a committee of five Senators to consider what clerical help should be allowed Senators and Senate committees, be taken from the calendar and that it be referred to the Committee on Rules.

The VICE PRESIDENT. If there be no objection, that action will be taken.

RELATIONS BETWEEN THE GOVERNMENT AND THE DISTRICT.

Mr. GALLINGER. Mr. President, I have been handed an article which appeared in the Sunday Star of yesterday, the headlines of which are as follows:

The workshop of the Nation—Review of the Federal course in creating a Capital—Significance of the "organic act"—Present District establishment the culmination of process of evolving a seat of government.

The article is by Henry E. Davis, a prominent member of the District bar, and as this matter, Mr. President, is being acutely discussed at the present time in another body and will doubt-less be transferred to this body, I ask that this communication be referred to the Committee on Printing with a view to having it published as a Senate document, if the committee thinks it of

sufficient importance.

The VICE PRESIDENT. In the absence of objection, that action will be taken.

HOUSE BILL REFERRED.

H. R. 8142. An act to authorize the construction, maintenance, and operation of a bridge across Bayou Bartholomew at or near Wilmot, Ark., was read twice by its title and referred to the Committee on Commerce.

SAN FRANCISCO WATER SUPPLY.

Mr. MYERS. Mr. President, as the introduction of bills appears to have ceased, I desire to take occasion at this time to make a few remarks.

On Saturday last the Senator from California [Mr. Works] introduced a bill (S. 3839) to repeal the Hetch Hetchy grant, which has been enacted into law and approved by the President. I desire to make some remarks in connection therewith. I have sent word to the Senator from California that I intended doing so and would be pleased if he should be on the floor, although my remarks will be very brief.

Mr. SMOOT. Mr. President, I will ask the Senator if it would not be just as well to have morning business closed, and

then for him to make his remarks?

Mr. MYERS. I thought the morning business was about to be closed, and I desire to speak before it is closed. I will ask if the order of reports of committees has been reached?

The VICE PRESIDENT. It has been passed.
Mr. MYERS. I thought that the morning business was about passed. I wanted to speak before it was entirely closed.

Mr. WALSH. Mr. President, I gave notice on Saturday that at the conclusion of the morning business this morning I intended to ask for the consideration of Senate bill 2860, providing a temporary method of conducting the nomination and election

of United States Senators.

Mr. MYERS. Mr. President, my remarks will take only a short time. I desired to get in ahead of other business while we

were yet on the morning hour.

At the time the Senator from California [Mr. WORKS] introduced his bill for the repeal of the Hetch Hetchy grant he made some remarks in connection therewith, but from where I sat I was unable distinctly to hear all he said; in fact, I heard very little of what he said. Had I heard what he said in relation to the Senate Committee on Public Lands, I would have made some brief comment at that time, but I certainly did not hear a word of what he said about the Senate Public Lands Committee, and I only learned of it by reading his remarks in the Record of Saturday's proceedings. I feel impelled by his remarks in regard to the Senate Public Lands Committee to say

a few words by way of comment and explanation.

In support of his rather unusual procedure in introducing a bill to repeal this grant, the Senator from California assigned 14 reasons for his action. I shall take no cognizance of any of them, except the thirteenth, which pertains to the Senate Committee on Public Lands, of which I am chairman, as I feel that it calls for a few words from me in connection there-

with. Reason No. 13 is as follows:

13. The bill was reported out of the Committee on Public Lands in the absence of a number of its members known to be opposed to it and without any adequate hearing, and was made a special order by unanimous consent when but a few Senators were present, thus shutting off all further hearing or investigations that were being demanded by people deeply and vitally interested in the subject.

Mr. President, I can not let that assertion go by entirely unchallenged or at least without a few words of comment and ex-

planation. In regard to the first clause of the sentence:

The bill was reported out of the Committee on Public Lands in the absence of a number of its members known to be opposed to it—

I do not deny that; that is entirely true. It is true that a number who were known to be opposed to the bill and who later opposed it were absent; but I will say, Mr. President, that from my experience here it is a very unusual thing at any committee meeting of this body for each and every Senator who is a member of the committee to be present.

Mr. CLARK of Wyoming. Mr. President, will the Senator allow me to interrupt him at that point?

Mr. MYERS. Certainly; with pleasure. Mr. CLARK of Wyoming. Is it not a fact that prior to the time this bill was taken up and considered in the committee there was an understanding between one member of the committee, who thereafter was absent, and the chairman that this bill would not be taken up in his absence?

Mr. MYERS. Does the Senator refer to the Senator from

Utah [Mr. SMOOT]?

Mr. CLARK of Wyoming. I am referring to the Senator

from Utah.

Mr. MYERS. I will tell you all I know about the understanding between the Senator from Utah and myself. going to reach that presently, but I will take it up right now. as the Senator from Wyoming has asked the question.

Very soon after the tariff bill was passed, which was about the 4th or 5th of September, the Senator from Utah [Mr. SMoot] came to me and said he was opposed to the Hetch Hetchy bill, that he wanted to be present when it was considered in the committee, and that he desired to be heard upon it before it was reported out. He said that he was compelled to go home to Utah to attend the wedding of his daughter, and asked me either that until his return I should have it not reported or that I should oppose the reporting of it—I do not remember which—but he expressed a desire that the bill should not be acted upon or reported out of the committee until he could be here. I told the Senator from Utah that, so far as I personally was concerned, I would oppose action on the bill or the report-

ing of it until he could be present and be heard.

The Senator from Utah, in some discussion of this matter during the debate on the Hetch Hetchy bill, used words to the effect that I had promised him that the bill would not be reeffect that I had promised him that the bill would not be reported until his return; but the Senator, if he meant just exactly that, was mistaken. I did not promise nor guarantee nor undertake to promise nor say that the bill would not be reported until his return. I told him that I would oppose reporting it until his return, but that I could not speak for the whole committee. I am not the committee; I am only one member of the committee, and on anything before the committee my vote only counts one, the same as the vote of any other Senator. I will say in that connection that the Senator from Utah-

Mr. SMOOT. Will the Senator yield just for a moment?

Mr. MYERS. Certainly.

Mr. SMOOT. So that there may be no misunderstanding, Mr. President, I want to state just what I understood regarding the matter. I fully believe that the Senator has stated it just as he understood it; but, Mr. President, if the Senator will remember, before leaving I called his attention to the bill and said I did not want the bill reported out of the committee.

Mr. MYERS. Certainly.

Mr. SMOOT. until I returned. That I did not want any action taken on it

Mr. MYERS. Yes. Mr. SMOOT. I told the Senator that I had to go home to be present at the marriage of my daughter, and that I would get back here just as quickly as possible; and I asked him if the bill could not remain in the committee until I returned, as I wanted to be heard upon it. The Senator told me he saw no reason why it should not remain there, and that he would see that it was not reported, and, of course, I took it for granted that it would not be reported.

I know, of course, that the Senator can not control the action of the committee, but I did think he could control calling the committee together when there were so many members of the committee absent. The Senator knows that the Senator from California [Mr. Works] was out of the city, and he knows that the Senator from Wyoming [Mr. CLARK] was out of the city. He knows that nearly everybody who was opposed to the meas-

ure was out of the city.

Of course I am not going to find any fault with the Senator in any way, shape, or form if the balance of the committee forced him to report the bill out of the committee; but I rested upon that promise, and if that promise had not been given me, or at least if I had not understood that the promise was given

me, I would not have gone to Utah.

Mr. MYERS. Mr. President, the minutes of the committee meeting show what was done in regard to the matter. The

Senator is certainly mistaken if he thinks I promised him or stated unqualifiedly to him that the bill would not be reported in his absence. I did tell him that I saw no reason why it should be considered or reported in his absence, and that I would op-

pose any such action, and I did so.

It would be absurd for me to promise what the committee would or would not do. I am not the committee. I have no desire to usurp the functions of the committee or to constitute myself the committee. Nothing could be more remote from my thoughts. When I told the Senator from Utah that I would favor such action as he desired, it applied only to such individual efforts as I could make. I never dreamed nor thought nor said that I could control the committee. I would not undertake to usurp the functions of the committee veder any circum-

I will say, further, that in our conversation the Senator from Utah told me that his daughter was going to be married on the 17th of September, and that that was what was taking him home, and that he would start back immediately after the 17th of September. The Senator from Utah also told me that we could have a meeting of the committee within any reasonable time after the 17th of September. He told me he would start back immediately after the 17th of September, and would be here soon after that to consider the bill, and said that within any reasonable time, giving him time to get back after the 17th, the bill could be considered in the committee. certainly left me under the impression that he was going to start back immediately after the 17th, and that all he needed was time to get back from Utah after the 17th of September.

Mr. SMOOT. Mr. President, I wish to say to the Senator that I did say to him that the marriage of my daughter would take place on the 17th of the month, but I do not remember telling the Senator that I intended to come right back after the

marriage.

Mr. MYERS. I am quite sure of that, because I asked about it.

Mr. SMOOT. I do not want to carry this discussion along

any further, as far as I am concerned. Mr. MYERS. I do not think it is profitable to go very far

into these things.

Mr. SMOOT. All I know is that the impression the Senator made upon me—I may be wrong, of course, in my construction of his words-was that the bill would not be reported out of

the committee until I returned.

Mr. MYERS. I wish to assure the Senator before closing this phase of the matter that I asked him when he expected to be back. I took pains to make that inquiry. I have a distinct recollection of it. He told me he intended to start back right after the 17th and would be ready to attend the meeting of the committee and participate in it as soon as he could get back after the 17th. I had that very distinctly in mind.

Resuming where I left off when I was asked the question, I will say in regard to the first clause of this reason, numbered

The bill was reported out of the Committee on Public Lands in the absence of a number of its members known to be opposed to it—

That is true. There is no doubt about that. I think it is very seldom that all the membership of a committee is present. As to the next clause, however-

And without any adequate hearing-

I must deny the correctness of that assertion. I think there was reasonable hearing and every reasonable facility afforded for hearing before the committee.

Mr. CLARK of Wyoming. Mr. President—
The VICE PRESIDENT. Does the Senator from Montana yield to the Senator from Wyoming?

Mr. MYERS. Certainly.

Mr. CLARK of Wyoming. I should like to ask the Senator what rule the committee adopted as to the length of the hear-

Mr. MYERS. They had several conferences about hearings. I will enumerate them as I come to them. I will read them.

Mr. CLARK of Wyoming. Let me ask whether it is not a

fact that they fixed a certain day upon which they should take up the bill and consider it, and that in that consideration they limited the hearings on behalf of those opposed to it to 1 hour

Mr. MYERS. I do not think so. I have no recollection of at. The minutes will show the fact about it; but I do not remember it.

Mr. NORRIS. Mr. President, will the Senator yield to me on that point?

Mr. MYERS. Certainly.

Mr. NORRIS. I think the records of the committee will show that when the matter came up first, both sides being repre-

sented, it was agreed unanimously that the hearings of the House committee should be considered by the Senate commit-tee, and that each side should file written briefs. As I remember, there were representatives there both in favor of and in opposition to the bill, and that was agreed to. I think the subsequent hearing, which perhaps the Senator has in mind, occurred after that date-after the committee had voted at a preceding meeting that at the next meeting they should proceed to vote upon the bill and all amendments that might be offered. When that time arrived Mr. Johnson and several other parties appeared, and at their request that order was set aside and they were given a limited time—I do not remember what it was—which, as a matter of fact, went practically to an unlimited time; and the chairman did not call them down at the time, or at least he did not call down a good many of them. So I think the meeting to which the Senator from Wyoming refers was a couple of weeks after the hearings had been formally closed.

Mr. CLARK of Wyoming. Mr. President, I know nothing about it except what the records of the committee show. have no special fault to find with anything that occurred when the members of the committee were not there, because we all should have been there. Unfortunately, I was detained and was not there; and I was opposed to the bill. I had been opposed to it from its inception.

However, the records of the committee show that when the committee met the first time the bill came up there was a lack of a quorum and that one member was represented by a proxy, making a quorum, and that at that time the question came up on the resolution offered by the Senator from Oregon that the bill should be taken up at the next meeting, seven days there-That vote disclosed a quorum, three members of the committee being against the resolution—among others, the chairman of the committee himself voting against taking it up the following week; but an order was entered at that meeting or at the meeting when it was taken up that hearings upon this bill should be limited, and the opponents of the bill were limited to 1 hour and 45 minutes.

That is what the record of the committee shows. Whether or not it shows the facts in the case of course I am unable to say,

because I was not there.

Mr. NORRIS. Was that the last meeting—the day the bill was reported?

Mr. CLARK of Wyoming. That was the day the bill was ordered reported, and an order was made by unanimous consent, or something of the sort.

Mr. NORRIS. I will say to the Senator that, as I remember, referring to the day upon which the bill was reported, that being the day to which the Senator has reference-

Mr. CLARK of Wyoming. Yes. Mr. NORRIS. I think that is correct; but at a preceding

meeting the hearings had been closed, as I stated before.

Mr. CLARK of Wyoming. But there is no record of any hearings having been had before that time, and no oppor-

Mr. NORRIS. Not at the preceding meeting, but perhaps at the second one preceding that meeting there were representatives there on both sides, and they filed briefs and agreed, since there had been such extensive hearings in the House, that the Senate committee should consider the House hearings and that there should be no further hearings.

Mr. CLARK of Wyoming. That may be, Mr. President.
Mr. NORRIS. So the meeting to which the Senator has reference was in addition to what had been agreed to prior thereto.

Mr. CLARK of Wyoming. I do not suppose there was any necessity for an agreement to consider hearings that had been already had.

Mr. NORRIS. No. I have reference to the agreement that there would not be any further hearings. I think all the members went to the meeting at which the report was made with the understanding that there would be no hearings, or at least they had that understanding until a short time before the meeting; but when they got there people wanted to be heard, and I think we agreed practically unanimously that if they wanted further hearings we should open up the matter and let whited in the heard, and they were heard for the entire day.

Mr. CLARK of Wyoming. How could that be when an order was made right then and there to report the bill?

Mr. NORRIS. The order to report the bill came after the hearings. They were perhaps limited to an hour, but I have an idea that they ran nearly four hours, because I know it was practically night when the hearings were finished and we reported the bill.

Mr. THOMAS. Mr. President-

The VICE PRESIDENT. Does the Senator from Montana yield to the Senator from Colorado?

Mr. MYERS. Certainly. Mr. THOMAS. I atter I attended the last meeting of the committee, and I think the Senator from Wyoming has correctly stated the situation. During the course of the hearing a Mr. Le Hane appeared, and his statement was so comprehensive that it was necessary to give him further time. With the exception of the extension of time which was given to him, I think the situation was precisely as stated by the Senator from Wyoming.

Mr. MYERS. I will try to cover all phases of this matter briefly, because I do not want to take long. I have already been on the floor longer than I intended. If I state anything incorrectly, when I get through I shall be glad to have my atten-

tion called to it.

I think the Senator from Wyoming [Mr. Clark] correctly stated the principle of the matter when he said that members of the committee are supposed to be here, and, if they are not, a majority of the committee is not blamable for going ahead and disposing of business, although I endeavored in this instance to postpone matters still further than they were post-

As to the hearings, however, and the opportunity for hearings to be had on this matter, bills for this grant were introduced almost simultaneously in the House and in the Senate early in the special session of the Sixty-third Congress. The first reference I find to either Hetch Hetchy bill on the minutes of the proceedings of the Senate Committee on Public Lands is on the 4th of June. So it appears that one of these bills—in that instance it was the Senate bill—was before this committee on the 4th of June; and the committee, the minutes say, considered the advisability of holding hearings on the subject of a water supply for San Francisco, but took no action. It was discussed, however. The clerk of the committee was directed to secure copies of House Document No. 54 of this Congress and to send each Member a copy. I understand that document is the House hearings.

On the 2d of July there was a meeting. The minutes close by saying that the matter was discussed and that the committee would meet on the following Wednesday for the purpose of considering the measure if the House should make a report on a similar measure on Saturday, as was apprehended.

Again, they held a meeting on the 9th of July, at which the committee considered the advisability of holding hearings on the measure, but concluded to await action on the part of the House committee, which was considering a similar measure

section by section.

So at meeting after meeting through the summer this matter was before the Senate committee, and anyone interested had a right to be there and to express his views whether he was a member of the committee or not. As a matter of fact, views were expressed and the matter was discussed in various ways. I am very positive in my recollection that it was decided by the Senate committee at one time during the summer not to have separate hearings of its own, but to have printed copies of the House hearings laid before it and sent to each member, such to be considered the hearings before the Senate committee. I believe that was not objected to by either .side, but was acquiesced in.

The House committee held very extended hearings, occupying many pages of printed matter and making a pamphlet of quite considerable size. At those hearings both sides were heard, and there was extended discussion; a great deal of testimony was had, and many views were expressed. The hearings were printed and made quite a pamphlet, as I have stated. were supplied to each member of the Senate committee, in order that each member might have the opportunity of reading them and making them the hearings of the Senate committee, and getting the benefit of them. Matters ran along in that way

until September.

As to the reason for holding a meeting on the 17th of September, when the Senator from Utah could not be here, I will state that there were other matters before the committee that were pressing for consideration. Almost weekly there were coming up appointments to office as to which other Senators would There is an appointment made in my State, and there can be no objection to it. I want a meeting of the committee called to report it out." Appointments were being referred to the committee all fall, right along. Many bills were before the committee, and Senators were requesting meetings of the committee for various purposes. There was a meeting of the committee held, generally speaking, almost every week, whether there was anything of consequence done or not; so it was nothing unusual to have a meeting called on the 17th of September.

A meeting was had on the 17th of September, and I had distinctly in mind the fact that the Senator from Utah could not be there and wanted time to get back. I also had it distinctly in mind that he had said to me that he would start back immediately after the 17th of September and would be here soon after that. On the 4th of September, I see, there was a meeting held, and another on the 17th of September.

At the meeting on the 17th of September a quorum of the committee was present, and a resolution was offered and adopted which I will read. There were people there demanding a hearing on Hetch Hetchy at that time. The advocates of the bill were there in force, very strongly urging a hearing and some action and disposition of the matter. I explained to them very fully the request of the Senator from Utah, and urged them to put the matter over and give him time to be here, and expressed the opinion that no action ought to be taken on that day. As a result, it did go over, in response to my urgent request. It was my personal representation that caused the committee to allow the matter to go over, and the following resolution was offered and adopted:

Resolved, That the bill H. R. 7207 be taken up for consideration on Wednesday, the 24th day of September, and that the same and all amendments pending to, or to be offered thereto, be voted upon and disposed of before the adjournment of the committee.

I voted against that resolution, but nevertheless it was carried, setting the hearing over one week. I wired the Senator from Utah the result of it. I felt confident that, as his daughter was to be married on the 17th, if he was going to start back immediately after the 17th he could be here on the 24th. felt sure of it. Nevertheless, to be more than sure and more than fair, if possible, I voted against the resolution; but when it prevailed I notified him by wire that the matter would come up on the 24th and that I did not believe I could get it put over any further at that time.

On the 24th of September there was a quorum of the committee actually and corporeally present—not by proxy, nor on paper, nor by request to be counted "present," nor anything of that kind; but there was a corporeal quorum present, consisting of Senators Myers, Chamberlain, Pittman, Thompson, RANSDELL, NORRIS, HUGHES, and THOMAS-8 members out of the 15 constituting the committee-and the Senator from Arizona [Mr. SMITH] was present by written proxy, requesting that his vote be cast for reporting the bill favorably and for the

bill generally in all matters.

But, exclusive of that proxy, there were 8 members actually present, a quorum of the committee. A motion was made that the committee proceed to the hearings. I voted against that motion. There were only 2 Senators present who voted against it—Senators Myers and Thomas. The other 6 who were presented the communication of the communica ent voted in favor of it, and the hearing necessarily had to proceed.

That is all there was to it. The wishes of absent members had been laid before the committee and the committee had voted to proceed, and, of course, it had to proceed. There was nothing else for the committee to do. That hearing occupied one entire day. I think the committee met at 10 o'clock in the morning, and it was after 5 o'clock in the afternoon when the worthing, and it was after 5 o clock in the afternoon when the vote was taken on reporting the bill. So one whole day was devoted to the hearings, and the greater part of that time—I think four-fifths or nine-tenths of it—was taken up by parties who were opposed to the bill. No one asked for any further hearing. All expressed themselves as satisfied with the length of time which had been allotted to them. Nobody asked to At the end of the have the hearing continue for a longer time. hearing a motion was made to report the bill favorably, and it was unanimously adopted by the vote of every one of the eight Senators present.

Now, with all due regard to the 7 Senators who were absent, if they had been there I do not see what more they could have done than to have voted against reporting the bill favorably. The vote, anyway, would have stood 8 to 7, but 2 of the absent Senators had sent word that they wanted to be counted for the bill. So, if all had been present, the vote would have been 10 for the bill and 5 against it.

As to the Senator from California [Mr. Works], I will not say anything in particular about his absence from the committee meeting at that time because the Senator is not here. I sent him word before I began making these remarks that I was going to make some remarks, and if he cared to be present I would be glad to have him present. But he has not come in. have not much to say about his absence from the committee meeting, and if I am not correct in what little I may say about it he can correct me some time in the future.

The Senator from California [Mr. Works] went home some time before this committee meeting, I think right away after the tariff bill had been disposed of, early in September, and he stayed until the 1st of December, I think. I am quite sure that before departing he made no request of me that the consideration of the bill be postponed until after his return. The only remark he ever made to me about the bill, I am quite sure, was that he had offered an amendment, and that unless his amendment should be adopted he was opposed to the bill and would oppose it.

When a Senator goes away early in September and remains at home until December 1, whatever the cause may be—and I know nothing about the cause in this instance and have nothing to say about it—I hardly think the proceedings of a committee of the Senate ought to be held in abeyance for nearly three months because a Senator interested in the bill and opposed to it is absent. I am quite sure the Senator from California never made any request of me, as did the Senator from Utah [Mr. Smoot], to have the bill stand until his return. I believe the Senator from California would verify me in that statement if he were here. I have no recollection of any conversation about it except his statement that he was going home, and that he was opposed to the bill unless an amendment were made to it.

I claim that there was fair and adequate opportunity offered for the consideration of the bill by everyone who was for it and everyone who was against it, and while I regret that some Senators were away when the committee acted, and while I voted against action by the committee at the time it was taken, yet, as the Senator from Wyoming [Mr. Clark] says, I do not and did not believe that to be a sufficient reason for indefinite postponement nor any valid objection to prompt consideration of a bill by committee or Senate. The Senators who were here, attending to their duties and attending committee meetings and ready to act, were entitled to some consideration.

Now, as to the next clause in paragraph 13:

The bill * * * was made a special order by unanimous consent when but a few Senators were present, thus shutting off all further hearing or investigations that were being demanded by people deeply and vitally interested in the subject.

When that bill was made a special order there was a quorum of the Senate present. There was a quorum transacting business; frequently calls for a quorum were made, establishing the fact that there was a quorum every day in attendance. That quorum was authorized to do business. What the Senator meant by saying there were only a few Senators here, I do not know. There was more than a majority present. The fact that the bill was set down for a special order, to be voted on upon the 6th of December, was due to the opponents of the bill, not to the advocates of the bill. Two or three days before that order was made, a quorum being called for and being found present, a majority of this body by an affirmative vote ordered that the bill be taken up and made the unfinished business of the Senate. That was done, and the debate ran along for a day or two in a desultory sort of way. There was a good deal of opposition to the bill, and much manifestation of lengthy opposition to it. The advocates of the bill realized that there was no chance of bringing it to a reasonably speedy vote. Then, owing to the opposition of certain Senators, a unanimous-consent agreement was entered into. The bill would have been acted on sooner had it not been for that order, and that order would not have been made had it not been for the Senators who were opposed to the bill. So the making of the order was the result of the action of opponents of the bill. They brought it about, not the advocates of the bill. It was by unanimous consent agre. I that the bill should be made a special order, beginning the 1st day of December, and should be voted upon on the 6th of December. There were opponents of the bill present, and all agreed to it. It seemed to suit everybody, and I think it gave reasonable and ample time for debate upon the measure. So all present seemed to think. In fact it was the common talk before the end of the debate that there was a plethora of debate, a surfeit of debate, on it, and everybody seemed to tire of it.

That bill was then debated a whole week. The banking and currency bill which involved the welfare of one hundred millions of people, presenting one of the most vital questions which has ever been before this body in the present or at a past session, was debated only two weeks.

was debated only two weeks.

The Hetch Hetchy bill was debated one-half as long as the banking and currency bill was debated. If there was anybody at the time who wished for further debate. I falled to hear of it. Everybody seemed to think it had been debated fully.

As far as the chance for investigation was concerned, an order for the date of voting on the bill was made in October and notice of it was wired to absent Senators and to other people opposing the bill and to the nature lovers and to the irrigators of the San Joaquin Valley and to others interested in all sec-

tions of the country. Everybody had an opportunity to come here.

Mr. SUTHERLAND. Mr. President, I rise to a point of order. What is the matter before the Senate?

The VICE PRESIDENT. Nothing.

Mr. SUTHERLAND. I demand the regular order.

Mr. MYERS. I am sorry that I have trespassed on the patience of the Senate so long, but I was about to close. Will the Senator allow me a couple of minutes longer?

Mr. SUTHERLAND. Very well; I withdraw the demand. Mr. MYERS. I claim, Mr. President, that there was ample opportunity granted to everybody to appear here the first week in December and bring statistics and arguments both for and

against this bill to be used in the debate upon it.

As to other reasons assigned as to why the act should be repealed, amongst them it being charged that the majority of the Senators did not understand what they were doing when they voted and that they voted unadvisedly, and that there was a gigantic and insidious lobby here influencing Members of this body, I leave those charged to the Members of this body. I have nothing to say about them; but as chairman of the Committee on Public Lands I desire to disclaim that there was any disposition in that committee to railroad the bill. There was nothing done surreptitiously or stealthly or in any underhand manner by the committee. Everything was done openly and above board; absent Members were notified of what was being done, and the committee endeavored to act in a perfectly fair and upright and straightforward and honorable manner.

I do not believe there is any reason in any action or conduct of the committee for the bill introduced last Saturday by the Senator from California or any ground for any reflection in any way whatsoever upon the committee or any member of the committee.

That is all I care to say.

ELECTION OF SENATORS.

The VICE PRESIDENT. The morning business is closed. Mr. WALSH. I ask unanimous consent that the Senate resume the consideration of Senate bill 2860.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 2860) providing a temporary method of conducting the nomination and election of United States Senators.

The VICE PRESIDENT. The pending question is on the amendment offered by the Senator from Utah [Mr. Suther-

LAND

Mr. SMOOT. I know that there are one or two Senators out of the Chamber who desire to be here when this question is discussed. For that purpose, and that only, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst Hitchcock Hollis O'Gorman Overman Shively Bacon Bankhead Simmons Smith, Ariz. Smith, Ga. Smith, Md. Smith, Mich. Smith, S. C. James Johnson Jones Kenyon Owen Page Perkins Pittman Borah Bradley Brady Brandegee Bristow Kenyon Kern La Follette Lane Lea Lewis McCumber Martin, Va. Martine, N. J. Myers Nelson Poindexter Pomerene Ransdell Reed Robinson Smoot Sutherland Bryan Burton Swanson hamberlain Thomas Root Saulsbury Shafroth Sheppard Sherman Chilton Clapp Clark, Wyo. Dillingham Thomas Thompson Townsend Vardaman Walsh Nelson Norris Warren Weeks Shields Gallinger

Mr. REED. I announce the necessary absence of my colleague [Mr. Stone] on account of illness, which makes it impossible for him to be present to-day. In his absence he is paired with the Senator from Wyoming [Mr. Clark].

Mr. MARTINE of New Jersey. I desire to state that my colleague [Mr. Hughes] is absent from the city on official business.

The PRESIDING OFFICER (Mr. Brandegee in the chair). Sixty-eight Senators having answered to their names, a quorum

of the Senate is present.

Mr. WALSH. Mr. President, when this matter was before the Senate for consideration on a prior occasion a suggestion was made that, though the Congress of the United States had power to legislate in relation to the election of Senators and Representatives, giving to that word a narrow significance, it had no authority or power to legislate in relation to the nomination of candidates for United States Senator, and that accordingly those provisions in the bill in relation to the nomination.

tion of candidates would be inoperative. One of the amendments proposed accordingly contemplates eliminating from the bill all its provisions in relation to the nomination of candidates for United States Senator. The high source from which the suggestion comes impels us to give some consideration to it, and I desire to address the Senate briefly with respect to that

When that idea was first advanced I ventured to suggest that the word "elections" as used in the section of the Constitution that is important here was broad enough in its significance to embrace and include all proceedings leading up to the final casting of the vote of the electors and the actual determination of the result thereafter, including the proceedings prescribed by law for the nomination of candidates as well as the ultimate act of choice.

The authority under which we act comes from section 4 of Article I of the Constitution, which provides that-

The times, places, and manner of holding elections for Senators and Representatives shall be prescribed in each State by the legislature thereof, but the Congress may at any time by law make or alter such regulations.

The determination of the question hinges upon the significance that is to be given to the words "elections" and "regulations" in this provision of the Constitution. I suggested, when the matter was before the Senate heretofore, that provisions in constitutions generally in relation to elections are ordinarily regarded as applying equally to primary elections and to proceedings for the nomination of candidates. I undertake to say that if by authority of any State a compilation of the election laws were made, it would always embrace the laws prescribing the method of nominating candidates. So, likewise, if one is asked as to how elections are conducted in a certain State or in a certain country, he would expect to have information in relation to the manner by which candidates are placed in nomination as well as the manner by which the choice is finally to be made. There is, however, I find upon an examination of the authorities, some diversity of opinion in the courts as to whether general provisions in constitutions in relation to the holding of elections apply to the holding of primary elections. These decisions are not by any means determinative, although perhaps they may be, in a way, persuasive, in seeking to arrive at the correct interpretation to be given to the language of the Constitution under consideration. A great many States hold that provisions in their constitutions in relation to free and equal elec-tions, or in relation to the right of the citizen to vote at elections, or in relation to the right of the chizen to vote at election; others hold that they do not; usually, however, by reason of some attendant language in which the significance of the word is restricted. If the matter should be deemed of any particular interest, the investigator will find notes in the Eighteenth Lawyers' Reports, Annotated, and in the Twenty-sixth American and English Annotated Cases which cover the subject. For instance, in the work first referred to, the following résumé is made:

in the work first referred to, the following resume is made:

A primary election for the purpose of placing in nomination candidates for public offices is an "election" within a constitutional provision prescribing the qualifications of electors at "all elections authorized by law." (Spier v. Baker, 120 Cai., 370.)

Or within a provision of the State bill of rights providing that "all elections shall be free and equal." (People ex rel. Breckon v. Election Comrs., Chicago, 221 Ill., 9: 77 N. E., 321; 5 A. & E. Ann. Cas., 562. See Montgomery v. Chell., infra, contra.)

Or within a constitutional provision prescribing the qualification of voters at "any election." (Johnson v. Grand Forks County, 16 N. Dak., 353; 113 N. W., 1071.)

Or within a constitutional reference to "any election." (Leonard v. Com., 112 Pa., 622; 4 Atl., 220.)

So, a primary election is within the letter and spirit of a statute prohibiting the sale of intoxicating liquors on "the day of any election." (State v. Hirsch, 125 Ind., 207; 9 L. R. A., 170; 24 N. E., 1062.) The court said: "The words 'primary election,' we may say, are as well understood to mean the act of choosing candidates by the respective political parties to fill the various offices as the word 'election' is to mean the final choice of all the electors of the persons to fill such offices. So that the words 'any election' clearly include primary elections, and such elections come within the letter of the statute."

But, on the other had, it has been held that a primary election is not

But, on the other had, it has been held that a primary election is not needs and it is not necessary malifications of electors. (State ex rel. Gulden v. Johnson, 87 Minn.,

A word there. Decisions of that character have been rendered in quite a good many States. In the State of Tennessee it was so held in the case of Ledgerwood against Pitts, a leading case, which reviews the authorities upon the subject and holds that a primary election is not an "election" within the meaning of the provision of the Constitution which lays down the qualifications of electors who are entitled to vote at any election. It has been held in cases of that class that the legislature may add qualifications and prescribe limitations upon those who are permitted to vote at the primary election other and different from those that are fixed by the Constitu-

tion as controlling in the matter of those who may vote at the general election.

The State of Nevada holds that within the meaning of their constitution a primary election is not an election, and yet its court holds as well that the right to participate in the choice of candidates who are to be voted for at the final election is so much of the essence of the right to vote at all that it is beyond the power of the legislature to add to or take away from the qualifications that are prescribed by the constitution, except to provide that those participating in the primary must belong to the party holding it, or that no one can be permitted to vote except for a choice among the candidates of the party to which he belongs

Mr. BORAH. Mr. President—
The PRESIDING OFFICER. Does the Senator from Montana yield to the Senator from Idaho?

Mr. WALSH. I do. Mr. BORAH. It has been a little difficult, owing to the noise in the Chamber, distinctly to understand the Senator; but, as I take it, the Senator's argument is to the effect that the word election" reaches back to all the steps which lead up to the final result which constitutes the election?

Mr. WALSH. I take that position. I think, Mr. President, that entirely aside, however, from the question as to whether within the meaning of the language of particular constitutions the word "election" shall be deemed to include primary elections, there are other considerations which easily extend the meaning of the term as it is used in the Constitution of the United States to embrace all preliminary steps. I might say, by way of illustration, that in a Kentucky case it was held that the provision did not apply to the case of primary elections, because it was provided in the constitution of that State that no more than one election should be held in a certain district within any one year, and that, if a primary election was held, there would of necessity be two elections, unless the primary elections were held in the preceding year.

On the general question of power I desire to refer the Senate. however, to some comments of the Supreme Court of the State of Illinois, showing how necessary it is wherever the Australian ballot system exists, how indispensible it is, indeed, to have regulations concerning nominations in order that regulations concerning elections—using the term in the restricted sense can have any force or significance at all.

Indeed, it will appeal at once to everyone that wherever the Australian ballot system is in existence every comprehensive law in relation to elections must of necessity make some provision in relation to nominations; otherwise it would be impossible to get the name of the candidate upon the ballot at all. The case to which I have referred, People against Board (77 N. E., 321), says as follows, speaking of the Australian ballot law of the State of Illinois:

That act provides for an official ballot, and in connection with it regulates the nomination of candidates whose names shall be placed on the ballot, the filing of nomination papers and certificates of nomination, and for the printing and distribution of ballots at public expense. No other ballot can be used, and the provisions and restrictions of the act as to what parties and names and other matters shall appear upon it are regulations of elections equally with those provisions which relate to the actual conduct of the election on election day.

I refer to this language particularly because it so happens that it uses the very language of section 4 of Article I of the Constitution-"Regulations in relation to elections"-and the provisions of the law, it is said here, in relation to nominations are just as much regulations of elections as those provisions of the law which prescribe what shall actually be done on the final vote.

final vote.

No other ballot can be used, and the provisions and restrictions of the act as to what parties and names and other matters shall appear upon it are regulations of elections equally with those provisions which relate to the actual conduct of the election on election day. It is manifest that, if an official ballot must be used, nominations of candidates whose names shall appear upon the ballot must be regulated in some way, otherwise the whole scheme would become incapable of execution. The right of the legislature to provide for an official ballot is not questioned, and it follows that the legislature may prescribe reasonable requirements concerning it which will not subvert or injuriously restrict the right of suffrage or conflict with the provisions of the Constitution. The act of 1905, which is now under consideration, makes further extensions and regulations for choosing candidates whose names shall be printed on the official ballot, and the legislation is of the same character as the ballot law. All these acts relate to the same subject, and in combination are designed to constitute a single and harmonious system, under which the people may exercise the elective franchise and make their choice between the candidates for public offices. They all relate to elections and are within the meaning of that word as used in the Constitution.

It seems clear that the elections protected by the Constitution are all the Constitution.

the Constitution.

It semes clear that the elections protected by the Constitution are all such elections as are held under authority of law, at which qualified electors may vote; and when statutes are enacted which regulate the form of the ballot to be used, what shall appear upon the ballot, and how the candidates whose names shall so appear shall be chosen, the provision of the Bill of Rights applies to the new condition.

The right to choose candidates for public offices whose names will be placed on the official ballot is as valuable as the right to vote for them after they are chosen, and is of precisely the same nature. There is scarcely a possibility that any person will or can be elected to office under this system unless he shall be chosen at a primary election, and this statute, which provides the methods by which that shall be done and prescribes and limits the right of voters and of parties, must be regarded as an integral part of the process of choosing public officers, and as an election law.

Whatever view may be taken, as I have said, as to the significance to be given to the word "elections" in particular constitutions, there can be no doubt that, when power is given to regulate elections, it must of necessity, wherever the Australian ballot system is in vogue, include regulations by which the names of various candidates may find a place upon the official ballot which is to be used at the final election. That is all I care to say with reference to the general subject of the power to legislate in relation to nominations.

The particular matter before the Senate is the amendment offered by the Senator f.om Utah [Mr. SUTHERLAND], and I trust very much, indeed, that the amendment will not be adopted.

Mr. SHIELDS. Mr. President-

The PRESIDING OFFICER. Does the Senator from Montana yield to the Senator from Tennessee?

Mr. WALSH. Certainly.

Mr. SHIELDS. Before proceeding to a new branch of the question, I should like to inquire if I am correct in understanding that there is an amendment pending striking out the clause in regard to nominations?

Mr. WALSH. There is such an amendment pending, it having been offered by the Senator from Georgia [Mr. BACON].

Mr. SHIELDS. I had not noticed it, and I merely wanted to

know if I understood it correctly.

Mr. WALSH. The committee having this matter under consideration gave very careful consideration to the question of the particular State laws to be made applicable, those in relation to the election of State officers or those concerning Members of Congress. Which ought to be followed as guides in the

matter of the election of United States Senators?

The original act prescribed that the provisions of law applicable to the election of Representatives in Congress should be That is a very reasonable provision, and would ordinarily, without reflection, receive acceptance at once; but when you come to think about it, Representatives in Congress are ordinarily elected by single districts; indeed, the statute of the United States now requires that they shall be so elected, except in cases where there is a Representative at large. The regulations, then, applicable to Members of Congress have reference only to single districts, and we can very well conceive that there might be some provisions of law in some State providing a certain method for the nomination and election of a Representative in one district quite different from the regulations in another district. I apprehend that it will be found that in some of the States there are provisions applicable to the nomination and election of candidates for Representatives in Congress in some of the densely populated cities that are not required at all in some of the remote country districts; at least, it is readily conceivable that some provision of that kind would

Likewise, the election for Representative in Congress is to be conducted only in a single district. Of course, there must be some provision for proclaiming the election, for giving notice to the electorate, and for publication of the notice of election. You will at once see that any provision of a State statute which has application to a single district and provides for the publication of the notice of election within a particular district, or even within any of the districts in a State, would be quite inapplicable in the case of the election of a United States Senator, who is to be chosen by the electors of the State at large. The Representatives being chosen by a single district, the laws would ordinarily be found rather inapplicable to the case of the election that is to be conducted through the State at large.

Mr. CHAMBERLAIN. Mr. President-

The PRESIDING OFFICER. Does the Senator from Montana yield to the Senator from Oregon?

Mr. WALSH. I do.

Mr. CHAMBERLAIN. Is it the opinion of the Senator, and was it the opinion of the committee, that this proposed measure would supply all the necessary qualifications for the election of a Senator in those States which have not enacted any law on this subject since the adoption of the seventeenth amendment?

Mr. WALSH. That was the intention of the act; it is to be made applicable only in those States which have not adopted any specific provision. Those States which have already pro-

vided for the specific case will not be affected by the proposed statute at all.

Mr. CHAMBERLAIN. In the State of Oregon, for instance, the law that is now in force was in force before the adoption of the seventeenth amendment, and there is some question now as to what procedure must be followed for the filling of the coming vacancy. The Senator thinks that this bill, if enacted, will meet all of the requirements in any case?

Mr. WALSH. I think so. Mr. President, the amendment proposed by the Senator from Utah, recognizing that these conditions of which I speak will exist, provides-

That if the manner of such nomination or election is not applicable to the case of a nomination or election by the people of the entire State the laws respecting the manner of nominating or electing the governor shall be followed.

I shall advert to the particular language of the proposed amendment directly, but, speaking generally, it is intended to provide that the method provided for the election of a governor shall be applicable, while the bill as reported by the committee provides that the methods provided by the State statute for the nomination and election of the general administrative and executive officers of the State shall control. The idea of the committee was that some States might have some provisions of law specially applicable to the case of the nomination and election of a governor simply because he is the governor, and different provisions in regard to the general administrative and executive officers of the State; and we wanted the general provisions of law to govern rather than the provisions of the law applicable to any particular officer, because the considerations which took that particular officer out of the provisions of the general statute would have no force in all probability in the case of the selection of a United States Senator.

Mr. SHIELDS. Mr. President—
The PRESIDING OFFICER. Does the Senator from Montana yield to the Senator from Tennessee?

Mr. WALSH. I do. Mr. SHIELDS. I should like to ask the Senator what would be the effect of this provision in regard to primary elections in States that have no legalized primaries?

Mr. WALSH. It would have no effect whatever.

Mr. SHIELDS. That is what I understood. It can not be a general law applying to all the States of the Union, then.

Mr. WALSH. It is a general law applicable to all the States

of the Union which have laws on these subjects. Every State, of course, has a law in relation to elections. Every State has a law in relation to the election-that is, the final choice-of general administrative and executive officers. If it has not any law in relation to the nomination of candidates for offices, of course there will be no law, then, applicable to the nomination of candidates for United States Senator.

Another thing to which I wish to advert in connection with the amendment offered by the Senator from Utah [Mr. SUTHERLAND] is this: Section 1 of the bill as reported by the committee provides for the time of holding the election. It provides that it shall be held at the general election next preceding the expiration of the time for which any Senator was elected, at which general election Members of Congress will be voted for. did that because in some States they elect a governor only every four years, and if it were not specified particularly it would be necessary to elect the Senator at the time the governor and other State officers were elected, which in some cases might be three years before the time he would take his seat. It was our purpose to make it as close as seemed practicable to the time when he would actually assume the duties of his office.

The next section, section 2, covers the case of the place and the manner of conducting the elections, and says that the place and the manner shall be exactly the same as the place and the manner of electing Representatives in Congress at large, 1f there is any such provision. If there is no such provision, then as is provided in the case of the general executive and administrative officers.

Section 2, Senators will observe, covers both place and manner. The amendment offered by the Senator from Utah [Mr. SUTHERLAND] provides:

That if the manner of such nomination or election is not applicable to the case of a nomination or election by the people of the entire State, the laws respecting the manner of nominating or electing the governor shall be followed.

This leaves the matter of place to be controlled by the preceding provision. In other words, the Senator, I think, recognize that at least the amendment should be amended so as to include the place, if he desires to have that method followed. As it is now the place would be prescribed in one way by one law and the manner would be prescribed by a

Mr. SUTHERLAND. Mr. President, I think all of us want to have a law passed here that will be workable. so far as I am concerned, I have not any pride of opinion about any amendment I have offered, and I offered it only because I think the bill as reported by the committee is not workable. If it is, then there is no need of my amendment, because it is a matter of no particular concern whether the law with reference to the nomination and election of Representatives at large or with reference to the nomination and election of Representatives by districts is to be followed, or the law with reference to

administrative officers. The whole object of the amendment is to provide a workable scheme. Therefore the first inquiry it is necessary to make is whether or not the bill as reported from the committee requires any amendment. Is the bill sufficient to cover the matter we have sought to cover?

the nomination and election of governor, or that with reference

to the nomination and election of the ordinary executive and

The bill provides in the first section that the regular election for United States Senators shall be held at a certain time. We all agree about that. It applies only to the regular election and in no manner affects a special election.

The second section covers not only the matter of the general election so far as the place and manner are concerned, as the Senator from Montana has stated, but it also covers the question of time so far as a special election is concerned. If it does not do that, then there is no provision in the law fixing the time for a special election. The second section does not deal with the question of time so far as general elections are concerned, because the question of time with reference to general elections is covered by the first section, but it deals with the question of time and place and manner, all three of them, so far as special elections are concerned.

The provision of the second section is that the nomination of candidates and their election to the office of United States Senator shall conform as nearly as may be to the laws of the State regulating the nomination and election of candidates for Members at Large of the National House of Representatives.

My criticism about that is that there are many States where the law is not applicable to the election of a Member at Large. The language of some statutes will be applicable to the election of Representatives by districts, but not to the election of a Member at Large; so that in those States there would be no rule laid down which can be followed. The language is, I repeat, that the nomination and election shall conform to the law of the State "regulating the nomination and election of candidates for Members at Large of the National House of Representatives.

When Congress has provided a new apportionment, there generally has been a provision that temporarily the Member at Large shall be elected in the State at large; but there are many State statutes that do not deal in terms with the question of the election of Members at Large at all. So it seems to me we must find some other language in place of that which is used in the bill so far as that feature is concerned.

To cover that, I have provided in my amendment that we shall conform to the law of the State with reference to the election and nomination of Representatives in Congress, without specifying whether at large or by districts.

The next part of the bill which, it seems to me, is faulty is the proviso:

Provided, That in case no provision is made in any State for the case of the nomination or election of Representatives at Large—

You see, the bill itself concedes that there may be such casesthe procedure shall be in accordance with the laws of such State respecting the ordinary executive and administrative officers thereof who are elected by the vote of the people of the entire State.

There are two objections to that. First, there may be in different States—and I have no doubt that is the case—different provisions made for the election of different executive and administrative officers. The auditor may be nominated and elected in one way; the secretary of state may be nominated and elected in another way. So that will introduce an element of confusion. Whenever a State undertakes to comply with this law it will have to determine whether it shall follow the manner of nominating and electing an auditor or the manner of nominating and electing a secretary of state or some other officer.

The second objection to it is that in many States-for ex-The second objection to it is that in many states—for example, in my own State—in case of vacancies no executive or administrative officer of the State is elected at all. When a vacancy occurs in the office of auditor, attorney general, secretary of state, or any of the other executive or administrative

offices of the State, that vacancy is filled by an appointment. So we will find cases in many of the States to which that proviso will not apply. We will have cases arising in the various States where the substantive provision of the section will not apply, because there is no statute regulating the nomination and election of Members at Large of the House of Representatives; and the proviso will not apply in the case of a special election, because no executive or administrative officer is elected at a special election. He is appointed when a vacancy occurs.

It being apparent, therefore, as it seems to me, that the bill in its present form is faulty, and that it must be amended in some way, the question arises, How shall it be amended?

The Constitution provides that the legislatures of the various States shall regulate the time and place and manner of the election of Representatives and Senators; and it provides, further, that Congress may from time to time make or alter such regulations. As I said the other day in discussing this matter, those three words—"time" and "place" and "manner" include every possible element of an election; and it is necessary in any bill which we enact into law that those three elements shall be covered.

There never can be any trouble about the question of time and place. The provision of the law that the statutes of the States, with reference to the nomination and election of Representatives by districts, shall govern in this respect will cover the question of time and place, because the time of the election of a Representative in a district clearly can be made applicable to the time of electing a Senator in the whole State. The place also can be made applicable, because the place is only the voting precinct or the voting district.

Mr. POINDEXTER. There would not be any question about

Mr. SUTHERLAND. No; there never could be any question about those two things. The only matter that can ever trouble us at all is the question of manner; and that answers the suggestion of the Senator from Montana that the amendment I have proposed is not sufficiently broad because it does not include place as well as manner. There is no need of dealing with the question of time or place at all in the proviso. We provide that the laws with reference to the nomination and election of Representatives shall be followed.

That fully covers the question of time and place, and we need

not consider those questions any further. I provide, further,

having passed that point:

Provided, That if the manner of such nomination or election is not applicable to the case of a nomination or election by the people of the entire State, the laws respecting the manner of nominating or electing the governor shall be followed.

Mr. CHAMBERLAIN. Mr. President, may I interrupt the Senator?

Mr. SUTHERLAND. I yield to the Senator. Mr. CHAMBERLAIN. I rather like the language of the amendment of the Senator from Utah, but I can see one difficulty even in that. Take the case of the State of Oregon. have no Member of Congress at Large.

Mr. SUTHERLAND. No.
Mr. CHAMBERLAIN. So your bill provides for that?
Mr. SUTHERLAND. Yes.
Mr. CHAMBERLAIN. It provides for the nomination and election of a Senator as Representatives in Congress are nominated and elected? nominated and elected?

Mr. SUTHERLAND. Yes.
Mr. CHAMBERLAIN. In Oregon, for instance, a different rule is provided for the nomination of a Congressman in a particular district from the rule which is provided for a general State officer-for instance, the governor.

Mr. SUTHERLAND. In Oregon you have a primary law with reference to the nomination of United States Senators.

Mr. CHAMBERLAIN. There is some question in some quar-Mr. CHAMBERGAIN. There is some question in some quarters there about that. I think, myself, our laws are sufficient; but while this matter is being fixed up, I should like to have it broad enough to cover that, if it is going to cover some other

Mr. SUTHERLAND. This is only temporary, Mr. President. It is to tide over the period which will intervene between now and the time when the various legislatures can meet in regular session and adopt laws in reference to this matter.

Mr. CHAMBERLAIN. In Oregon there will be

In Oregon there will be no session

of the legislature until 1915.

Mr. SUTHERLAND. I know that; but there will be no difficulty about proceeding under this law in Oregon. If you have a law in Oregon which deals with the subject of nominating United States Senators, that law will apply, because the provision of the bill is that until or unless otherwise specially

provided by the legislature this shall go into operation. If you have not such a law, then this bill furnishes you a plan upon which you can operate until you have a law.

Mr. CHAMBERLAIN. I think probably the last clause of the proposed amendment of the Senator would cover even Oregon, where it provides that the laws providing for the election of a governor shall be followed in case the laws for the election of a Congressman do not apply.

Mr. POINDEXTER. Mr. President-

Mr. SUTHERLAND. I yield to the Senator from Wash-

Mr. POINDEXTER. The statement made by the Senator from Oregon will illustrate the proposition involved in the So I should like to ask the Senator from Oregon why the laws of that State with reference to the nomination and election of Representatives could not be applied to the nomination and election of a Senator throughout the entire State?

The VICE PRESIDENT. The hour of 2 o'clock having arrived, the Chair lays before the Senate the unfinished business,

which will be stated.

The SECRETARY. A bill (S. 48) to authorize the President of the United States to locate, construct, and operate railroads in the Territory of Alaska, and for other purposes

Mr. CHAMBERLAIN. I ask that the unfinished business be

temporarily laid aside.

PRESIDING OFFICER. The Senator from Oregon asks unanimous consent that the unfinished business be temporarily laid aside. Is there objection? The Chair hears none, and

it is so ord-red.

Mr. CHAMBERLAIN. In reply to the Senator from Washington I will state that there is only one reason why there might be a difference. For instance, the petitions filed for the nominations for Representatives in Congress have to be signed by the voters of the certain counties in the particular district, while petitions for the nomination of general officers of the State are signed by not only the members of the particular congressional district, but of the others as well.

Mr. POINDEXTER. Of course it seems to me perfectly obvious that administrative officers would construe the law so as to make it applicable to the entire State, simply applying the

method and the manner that are used in the district.

Mr. CHAMBERLAIN. I will state to the Senator that so far as I am concerned I believe that the Oregon laws are sufficient, but there is some question about it, and while it is attempted to correct conditions I thought I would raise the question in that respect.

Mr. SUTHERLAND. I suggest to the Senator from Washington that if the law of any State, with reference to the nomination and election of a Representative from a district, can be made applicable to the case of the nomination and election of a Senator, then the bill permits that to be done. The proviso is only put in by way of precaution in case there shall be such a law in any State that is not applicable to the case of the nomination and election of a Senator; then we could be with reference to the nomination and election of a governor.

Mr. NORRIS. Mr. President—

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Nebraska?

Mr. SUTHERLAND. I do.

Mr. NORRIS. It seems to me that the Senator would simplify the situation very much—and I am speaking as a friend of the amendment; I like it better than the bill—if he would apply it only to one officer. In the case the Senator from Oregon suggests the question would arise, if there were a vacancy in Oregon, whether the law applicable to Members of the House of Representatives would apply, and difficulty might arise as to the very proposition as to whether the law was applicable or not, that law being different from the law that applies to the nomination and election of a governor. I want to suggest to the Senator that he eliminate in his amendment everything except the nomination and the election of a governor. I take it that in all the States they have a regulation as to that, and it would make it general and prevent that kind of a difficulty.

Mr. SUTHERLAND. The difficulty with that is that we are not only providing for general elections, but we are providing for special elections as well. I do not know of any State where, when a vacancy occurs in the office of governor, a special election is held. When a vacancy occurs in the office of governor in State the secretary of state succeeds under the law. other States the lieutenant governor succeeds. So the bill would

not cover the case of a special election. That is the difficulty.

Mr. NORRIS. But why not by this law have the nomination and election of a governor at the regular election apply both to

the special and regular election of a Senator?

Mr. SUTHERLAND. Because when you call a special election you have to fix the time. The time is not fixed by statute. The statute will provide, for example, that the governor shall issue a notice 30 days or 60 days before the election. If you provide for adopting the law of the State with reference to the nomination and election of a governor, there being no governor elected at a special election, there would be no provision of law which would govern the matter of time. That is the difficulty with that.

The Senator will find the more he looks into it the more complex the subject becomes. If we were dealing by the bill only with general elections, it would be a very simple matter. Then we could adopt the law with reference to the election of governors. But we are dealing with the question of special elec-

tions as well.

As I have said, the law with reference to the nomination and election of Representatives, so far as time and place are concerned, will always apply, because in every State there is a provision for holding a special election to fill a vacancy caused by the death or resignation of a Representative in Congress, although there is no law with reference to the case of a vacancy in the office of governor. Here the element of time and place will be amply taken care of. If we adopt a law wherever the general law of the State with reference to the election of Representatives is not applicable, then we will simply adopt, as is suggested in my amendment, a provision that we shall follow the law of the State with reference to the manner of nominating and electing a governor, we will cover the whole field, it seems to me.

Mr. ROBINSON. Mr. President—
The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from Arkansas?

Mr. SUTHERLAND. I do.

Mr. ROBINSON. The language reported by the committee does appear to be somewhat indefinite. It is-

That in case no provision is made in any State for the nomination or election of Representatives at Large, the procedure shall be in accordance with the laws of such State respecting the ordinary executive and administrative officers thereof.

I ask the attention of the Senator from Montana [Mr. Walsh] to this language. It occurs to me that it might be quite difficult to determine how the election should be held in States where the manner of choosing the executive officers differs from the manner of choosing the administrative officers or where the manner of choosing one executive officer of the State differs from the manner of choosing another executive officer of the State.

Mr. SUTHERLAND. That I stated a moment ago.

Mr. ROBINSON. It seems to me that it might open a conflict as to the manner of making this choice. In my State the law is uniform as to the manner of choosing both executive and administrative officers. Still there might be some States where a controversy growing out of the difference in the provision as to choosing administrative and executive officers would arise.

I want to call the attention of the Senator from Utah to a feature of his amendment and ask his opinion about its practical operation. If it be limited to the manner of choosing a governor, it would give the approval of Congress in some cases, under the existing manner of choosing governors, for instance, in the State of Louisiana, to a choice expressed four years before the beginning of the term of the Senator to be chosen.

While, if Congress is to legislate on the subject at all, I am heartily in sympathy with the general principle that runs through the bill and through the Senator's amendment of recognizing the preference of the States in those matters, I wonder if it is desired by this legislation to approve of a nomination made in that way? Take the case of Louisiana, for instance. It is possible, if the Senator's amendment prevails, that a Senator from Louisiana may be nominated practically four years before his term will begin. That would not be possible under the election if conducted in the same way that Representatives are chosen, but it would be possible both under the amendment reported by the committee and under the amendment introduced by the Senator from Utah.

If the Senator will pardon me for just one moment further, my idea is to make the system of popular elections harmonious, so that the nomination and the election may be within a reasonable time of the beginning of the service of the Senator, and that it is inconsistent with the spirit of the amendment to say that a Senator may be chosen four years before he shall actu-ally begin his service. That would result, as I think I have already pointed out, in some of the States, notably the State of Louisiana. A Senator might be chosen, for instance, to succeed Senator RANSDELL four years in advance of the expiration

of Senator Ranspell's term, because under the law of Louisiana a governor is chosen only once in four years. It has happened once in the recent past that the choice has been made in that

Mr. SUTHERLAND. The situation which the Senator speaks of could not arise under this bill because, in the first place, express provision is made with reference to the regular election in the first section, namely:

That at the regular election held in any State next preceding the expiration of the time—

Mr. ROBINSON. I understand that-

Mr. SUTHERLAND (reading):

for which any Senator was elected to represent such State in Congress, and at which election a Representative to Congress is regularly by law to be chosen.

That makes it necessary for the State to hold the election for United States Senator to fill the regular term at the November preceding the March at which the term of office expires.

Mr. ROBINSON. Yes; but as the governor is elected only once in four years, it could not be done in that way.

Mr. SUTHERLAND. The bill does not adopt the law with reference to the election of governor, so far as time is concerned. It is limited to the manner of election. As the Senator will see, if the manner of such election is not applicable to the case of a nomination and election by the people of the entire State, the laws respecting the manner of nominating or electing the governor shall be followed, leaving the element of time and place to be governed in all cases by the law with reference to the nomination and election of Representatives

Mr. ROBINSON. If that is the correct construction of it, I think the amendment is more definite than that reported by

the committee.

Mr. SUTHERLAND. As I use only the word "manner," there can be no confusion of the kind to which the Senator calls attention.

Mr. POINDEXTER. The amendment of the committee, speaking with reference to the suggestion made by the Senator from Arkansas, contains this language:

Until or unless otherwise specially provided by the legislature thereof. It is not intended either by the amendment offered by the committee or by the amendment offered by the Senator from Utah [Mr. SUTHERLAND] to interfere in any way with the right of the State, acting through its legislature, to make such regulations on the subject as are not inconsistent with or in conflict with the seventeenth amendment to the Constitution. So before the four years, which the Senator from Arkansas speaks of as in some States, such as Louisiana, elapsing between the election and beginning of the term, the Legislature of Louisiana would have had an opportunity to make such regulations on the

Mr. ROBINSON. I am inclined to think from the statement made by the Senator from Utah that the objection which I have suggested is obviated by the language which he has carefully

subject as it might see fit under either form proposed for the

Mr. SUTHERLAND. Mr. President, with the criticism which is made by the Senator from Arkansas upon the proviso as contained in the reported bill I quite agree. I had already stated it, perhaps before the Senator came into the Chamber, namely, that if we conform to the law respecting the ordinary execu tive and administrative officers, confusion is certain to result in some States where the different administrative and executive

officers are nominated and elected in different ways

I also call the attention of the Senator from Arkansas to the other criticism which I made, which seems to me to be more important, that in many, if not all, the States—I do not know whether there is an exception to it, but I know in many of the States, in my own State, as I have already stated, henever a vacancy occurs in the office of an executive or administrative officer an appointment to fill the vacancy is made by the governor. So we never could have an election at a special election if we conform to that rule, because there is no special election with reference to executive and administrative officers.

Mr. President, as I said in the beginning, my only anxiety, and that is the anxiety of the Senator from Montana ac well, is to have a scheme that will be workable; and it does seem to me we adopt the bill as reported by the committee we are bound to run into some difficulties and confusion. I think the

amendment which I have suggested will obviate that.

Mr. BRANDEGEE. Mr. President, I am strongly in favor of the amendment proposed by the Senator from Utah [Mr. Sutherland], but I do not care to discuss that question. The Senator has made it clear to me, and I have nothing to say about it. I wanted to ask the Senator in charge of the bill, however, to turn his attention to page 2 of the bill, looking at

the first line on page 2, and then follow me as I call his attention to another feature of it. It provides

That at the regular election held in any State next preceding the expiration of the term for which any Senator has been chosen to represent such State in Congress, at which election a Representative to Congress is regularly by law to be chosen, a United States Senator from said State shall be elected by the people thereof for the term commencing on the 4th day of March next thereafter.

The first line of that section speaks of this election as a regular election. In line 10, where the section refers to what I assume is the same thing, it describes it as a general election, "elected either at a general election or at any special election." It occurs to me that in the first line of the bill it would be better to say "that at the general election held in any State" instead

of at the regular one.

Then I wanted to ask the Senator whether in the case of Louisiana, which has been referred to by the Senator from Arkansas [Mr. Robinson], if it is true that they have a general election only once in four years, what would happen if the provision contained in lines 7 and 8 of page 2 were in force, to wit, "a United States Senator from said State shall be elected by the people thereof for the term commencing on the 4th day of March next thereafter"?

After the election, which had been held perhaps four years

previously, would there not be a conflict about it?

Mr. WALSH. It could not possibly be so, Mr. President, because the election for Senator is to be held at the regular election at which Representatives in Congress are chosen next preecding the expiration of the term, regardless of what the provision says in relation to the election of State officers.

Mr. BRANDEGEE. I think the Senator is correct about that, Mr. WALSH. I will say to the Senator that I find the words "regular" and "general" are interchangeable with reference to those elections which occur at stated times. I dare say it might probably be more advisable to use the same word in both connections

Mr. BRANDEGEE. Would it not be better to describe the official as the Representative "in Congress" rather than "to

Mr. WALSH. I followed in the framing of the bill the language of the statute as it is already framed. I think I had it so framed.

Mr. BRANDEGEE. Does the statute so describe the officer?

Mr. WALSH. That is my recollection.

Mr. BRANDEGEE. It is almost universally printed the other way, Mr. President. This print is so confused and interlined with amendments that it is impossible for me to tell, not having been here on the day when it was previously considered, which have been adopted and which are pending.

Mr. WALSH. None of them have been adopted. Mr. BRANDEGEE. They are all pending then upon the same basis as to precedence in consideration?

Mr. WALSH. I am not posted as to the order of them.

Mr. BRANDEGEE. I will wait then until they are proposed

in their order.

Mr. WALSH. Mr. President, I merely wish to say, on the amendment under consideration, because it was adverted to by the Senator from Arkansas [Mr. Robinson], of course we can conceive that there would be some provision in the State applicable to one or more executive or administrative officers and other provisions applicable to some other administrative or executive officers. But that is so remote a chance that we ought not to hesitate about passing the bill speedily because of the possibility of confusion there.

I do desire, however, to suggest in connection with the amendment offered by the Senator from Utah [Mr. Sutherland], that there is, it seems to me, much force in the suggestion made by the Senator from Nebraska [Mr. Norris]. The amendment proposed makes applicable, in the first place, the provisions of law in relation to the nomination and election of Representatives in Congress, but if those provisions are not applicable, then the provision in relation to the nomination and election of candidates for governor. In other words, the question will always come up and be an ever-recurring question of controversy that will have to be settled in the courts as to whether the laws in relation to nomination and election of Representatives in Congress are or are not applicable. I undertake to say that in some States it will be found and held that they are applicable and in some other States the courts will hold that they are not applicable, and I am very much afraid confusion will ensue.

Now, I have no personal interest in this matter at all, because we have already made special provision in my State for the case of the nomination and election of candidates for United States Senator. So the act would not affect my State at all. I think, however, that we spend too much time upon this matter, because, as suggested by the Senator from New York some time

ago, in all reasonable probability the States will speedily take this thing up and legislate themselves in respect to the matter, and we are not likely to find any great amount of controversy arising. I think we might well have allowed the bill to pass as reported.

Mr. VARDAMAN. Before the Senator from Montana takes his seat, I wish to ask him a question:

And provided further, That in any case the candidate for Senator receiving the highest number of votes shall be deemed elected.

Does that have any reference to the nomination?

Mr. WALSH. I would say not. Mr. VARDAMAN. It does not? Mr. BACON. Will the Senator from Montana allow me to ask him a question in that connection? If we have the right under the law to regulate the manner of the nomination, why have we not just as much right to determine what vote shall be sufficient in the nomination as we have to determine what vote shall be sufficient to constitute an election?

Mr. WALSH. I should say so unquestionably.

Mr. BACON. Therefore the contention of the Senator is— Mr. WALSH. Excuse me. I should say it would be exceedingly unwise to legislate on the matter; but we have the power to do it, I think.

Mr. VARDAMAN. Does not the Senator from Montana think it should be made sufficiently clear to prevent any possible complication resulting from it as to whether it shall or shall not apply in any State which requires a majority to nominate for the office?

Mr. WALSH. I should say there could be no reasonable doubt about it.

Mr. VARDAMAN. I do not think the Federal Government has any right to legislate upon the question of nomination at all, and it should not exercise it if it has the power. But certainly it ought to be made very clear.

Mr. BRADLEY obtained the floor.

Mr. JONES. I understand that the Senator from Kentucky has given this matter a great deal of thought and he has a particular proposition which he wants to present to the Senate. Therefore I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Norris O'Gorman Overman Page Perkins Poindexter Ashurst Bacon Bankhead Gronna James Johnson Smith, Ariz. Smith, Ga. Smith, Md. Smith, S. C. Bradley Jones Brady Bristow Kenyon Kern Lane Smoot Sutherland Bryan Burton Reed Robinson Swanson Thomas Thompson Lea Burton Catron Chamberlain Chilton Clark, Wyo. Dillingham Fletcher Gallinger Lewis McCumber Martin, Va. Martine, N. J. Root Saulsbury Sheppard Townsend Vardaman Sherman Shields Walsh Myers Nelson Newlands Warren Weeks Williams Shively Simmons

Mr. REED. I desire to renew my announcement regarding the illness of the Senator from Missouri [Mr. STONE], and I will let this statement stand for the day.

The VICE PRESIDENT. Sixty Senators have answered to the roll call. There is a quorum present. The Senator from

Kentucky will proceed.

Mr. BRADLEY. Mr. President, I am satisfied that the bill now pending authorizing and regulating the election of United States Senators, at any rate in so far as the filling of vacancies is concerned, is unconstitutional, and in proof of this assertion I desire to call the attention of the Senate to my reasons therefor.

In determining this question, we must take into consideration above all other things the seventeenth amendment to the Constitution; and in construing that amendment we must consider the purpose of its proposal and ratification, and the circumstances existing at the time. We very frequently hear the expression that the people adopted this amendment. In one sense of the word that is true. The people have adopted it through their agents, to wit, the legislatures of the States.

It is also frequently said that we must do what the people desire. There is no Senator on this floor who bows with more becoming submission to the will of the people than do I, nor is there one who has more respect for their will, nor who would more cheerfully comply with it when it can be done without violence to the organic law. I deny that it is their will that we should enact this law. When we undertake to ascertain what the will of the people is we must consider the amendment itself in order to determine, for through it they have spoken. We have no authority to go outside of the language it contains.

At the time when this question was being agitated, there was

in the terms of the old Senators-I call them "the old Senators" to designate the Senators who were elected before the seventeenth amendment became valid as a part of the Constitution-there was absolutely no discussion on that point. whole discussion was on the right of the people thereafter to elect their Senators. So when the State legislatures ratified the amendment, they very clearly indorsed the language therein contained, thereby expressing their purpose. To say that something was intended more than was expressed in the amendment is merely idle; to say that it does not express the will of the people is to say that the people and their agents had not sufficient intelligence to make known their desire.

I voted for it when it was before the Senate. I did so with very grave doubt as to whether or not such an innovation should be adopted. But believing that the great majority of the people of the country demanded it, I yielded my opinion and voted for it. I am in favor of complying with the will of the people, but I am not in favor of doing something for which the people have made no request, merely to cater to what may be thought by some to be their wish or to play the demagogue in order to acquire cheap notoriety. I prefer to confine myself to the written law of the land in the performance

of duty in this body.

In the first place, we must consider the mischief attempted to be remedied. What was it? The further election of Senators by the legislatures of the States. That was the only mischief, and it was to be remedied by giving the people the right to elect. We must take into consideration, too, the provisions of the Constitution as they stood before the amendment was adopted and ratified. Sections 3 and 4 of Article I of the Constitution clearly lay down the rule concerning vacancies. Under these sections of the old Constitution-and we will call it that in order to distinguish it from the Constitution after the seventeenth amendment was adopted-Senators were elected for a period of six When a vacancy occurred during the term of any Senator, if the legislature was in recess the governor of the State was empowered to fill it temporarily until the legislature met. when that body was authorized to fill the remainder of the unexpired term by election.

Let us see when we proposed this amendment and when it was ratified what we necessarily took into consideration. In the first place, it was not absolutely certain that it would be ratified, though such was the general belief. In the second place, if it should be ratified, it was not known how much time would be consumed in its ratification by the various State legislatures. In the third place, it was reasonable to suppose that during that period vacancies would occur in the Senate. Consequently, the question directly presented itself as to how these vacancies should be filled. It was known by this body, and it was known by the legislatures of the States, that some of the State legislatures met annually, some biennially, some triennially, and some quadrennially. All these matters were taken into consideration in the preparation of the amendment, and it was the intention that ample time should be given for carrying its provisions into effect. At all times we had in view that section of the Constitution—the only section—that can not be amended, section 1, Article V, which provides "that no State, without its consent, shall be deprived of its equal suffrage in the Senate.'

We all knew, Senators, the mighty struggle which took place in the Constitutional Convention on the question of equal senatorial representation among the States; we knew that intense excitement prevailed in the discussion of that question, and that it seemed to be imminent at one time that there would be an irreconcilable disagreement. Finally, after mature consideration and much deliberate and acrimonious debate, it was determined that each State should have two Senators, who should serve for six years. Fearing future action might change this basis by way of constitutional amendment, a prohibition was placed in the organic law that:

No State, without its consent, shall be deprived of its equal suffrage in the Senate.

That section did not mean that no State should be prevented from having its equal suffrage for the whole six years; it meant exactly what it said, that no State should be prevented from

exercising its right of equal suffrage in the Senate without its consent for any part of the time.

The State of Alabama did not ratify the seventeenth amendment, and hence did not consent to a deprivation of equal suffrage. We had presented here from that State a certificate of appointment by the governor; but I will come to that further along.

If the seventeenth amendment has the effect, or if it was its purpose to deprive any State in the Union of its equal suffrage in the Senate for any length of time, then it is absolutely void; absolutely no discussion as to how vacancies should be filled but I contend that such was not its intention and that such is not its effect. We have presented before us this peculiar state of case; Senator Johnston died on the 8th of last August, over four months ago. Since that time we have had before this body more important legislation, possibly, than has ever been before it during the same length of time. During all that period the State of Alabama had but one Senator, when she was entitled to two. The governor promptly made an appointment of Senator Johnston's successor and sent him here. The matter was referred to the Committee on Privileges and Elections, but before that committee acted the gentleman who had been appointed withdrew. Now, the governor of Alabama has certified another appointment, and his action only accentuates the condition of affairs.

I say it was not the intention that we should have this hiatus; yet we have it. Why? Because, if the seventeenth amendment controls, as contended, the State of Alabama has not passed any law empowering the governor to appoint or any law directing an election. Consequently, when he made the appointment, it was contended by some Senators that he had no right to make it, because he had not been empowered by the Legislature of Alabama to do so. This, I contend, was unnecessary, because the amendment contemplated nothing of the kind, the object being to leave in force the third and fourth sections of Article I of the Constitution as to all the Senators who had been elected before the amendment became valid as a part of the Constitution. In no other way could this hiatus be avoided, Under the old Constitution the present vacancy could be supplied by temporary appointment, and then the legislature could elect for the remainder of the term, but it never was the intention when there was such a great uncertainty as to whether the amendment would be ratified or, if ratified, when that ratification would occur, and after that as to how long it would require to have the proper legislation under it, give notice of the time of holding the election and receive the certificate, that there should be a vacancy on the floor of the Senate and the State prevented from having equal representation.

The governor of Alabama believed that he had the right to appoint a Senator under the old Constitution, and he had a right to that opinion. The nonaction of the governors of the different States in failing to call special sessions of the legislatures shows that they thought it was unnecessary, as vacancies in the terms of old Senators would be filled under the provisions of the old Constitution. If I remember correctly, not a single governor in the United States has called the legislature of his State together, notwithstanding all were bound to know that vacancies might occur at any moment in the offices of the old Senators chosen before the amendment became valid

as a part of the Constitution.

The governor of Alabama, I say, is entitled to his opinion as to what the law is. Suppose he had called a session of the legislature-

Mr. WALSH. Mr. President, may I interrupt the Senator? The VICE PRESIDENT. Does the Senator from Kentucky yield to the Senator from Montana?

Mr. BRADLEY. Certainly.

Mr. WALSH. Mr. President, the discussion which the remarks of the Senator provokes is an intensely interesting one. Of course, as I understand him, he is now arguing in favor of the power of the governor of Alabama to fill the vacancy.

Mr. BRADLEY. That is merely incidental, I will say to the

Mr. WALSH. I was going to say, suppose, now, that we concede, for the purpose of the discussion, that vacancies of that kind ought to be filled in accordance with the old Constitution and not by election under the provisions of the new Constitu-tion, what is there in the bill that the Senator finds objectionable?

Mr. BRADLEY. I am coming to that in a very few moments. I will try to make myself understood.

WALSH. I thought possibly the Senator might have overlooked it.

Mr. BRADLEY. I am traveling in broken stages.

Mr. WALSH. Not at all; but I thought possibly the Senator might have overlooked the fact that, at his suggestion, I have said to the Senate that it was my purpose to propose the following amendment-

Mr. BRADLEY. I understand that perfectly; and I am coming to that.

Mr. WALSH. The amendment is:

That nothing herein contained shall be construed to affect the right of any person to a seat in the Senate under any election held or appoint-ment made since the ratification of the seventeenth amendment to the

Mr. BRADLEY. I remember that very distinctly.

Mr. WALSH. Section 2 provides:

That in any State wherein a United States Senator is hereafter to be elected, either at a general election or at any special election—

And so on

So that, if the Senator is right, and those vacancies are not to be filled at elections, then this proposed statute will not be

applicable.

Mr. BRADLEY. Mr. President, I will go out of my way to take that matter up at this time. The position I assume is that under this law as proposed elections can be held, either general or special, to elect Members of the Senate, and that there is no exception in the law which applies to Senators who are elected to fill vacancies in the terms of Senators who were in office when the amendment became valid as part of the Constitution

I proposed the amendment referred to by the Senator and never heard before that he approved it. Besides, even with

that amendment included, the bill is unconstitutional.

Mr. WALSH. Mr. President, I feel that the Senator ought to be corrected, for evidently he is laboring under the impression that the bill provides that in all cases hereafter when a vacancy occurs, the vacancy shall be filled by election. That is not the bill at all. The bill simply provides that whenever hereafter an election is to be held it is to be conducted in this The bill does not purport to control any elections at all except those that are to be held pursuant to this legislation.

Mr. BRADLEY. I trust the Senator will bear with me and I will try to make myself understood. The position I take is this: It is true that an amendment has been offered to the effect that this bill shall not be construed to affect any appointment that has been made heretofore, but that amendment is an empty delusion and a snare, because whenever the Senate passes a bill providing for special elections when called to fill vacancies in the offices of the old Senators, then the Senate declares in so many words that the governor of Alabama had no right to make that appointment, because if we have the right to pass such a law, then he had no right to make that appointment, and the saving clause that is put into the bill is absolutely worthless. I will try to make myself understood as I proceed. I am doing so for the purpose, in one way, of reaching the intention of Congress in proposing and of the legislatures in ratifying the amendment.

I was about to show where the enforcement of the amendment as to filling vacancies in the terms of the old Senators. would carry us. Suppose the governor should call the legislature of his State together and that legislature should not feel that it had authority under the constitutional amendment to authorize him to make an appointment; or suppose the legislature should have the same opinion of the amendment that he has, it follows they would decline to act. Then what would be the condition? Still another delay would ensue and a hiatus exist in the representation of Alabama. Or suppose, on the other hand, they should conclude that they did have the right to act, but refused to empower the governor to appoint because of the struggle in that State among the various aspirants for the place, then again you have delay and a continued hiatus. Or suppose they should provide for an election, then considerable time would be consumed in giving notice, in holding the election, and in certifying the returns, and all this time the State of Alabama would be deprived of her equal suffrage in the Senate. When we appreciate the difficulties that present themselves or that manifestly might present themselves they show conclusively what the intention of the seventeenth amendment is.

I call your attention to the fact that the seventeenth amendment is not self-executing. It provides that Senators shall be elected; it provides that in case of certain vacancies the governor may appoint, provided the legislature authorizes him to do so, and that the election is to be held under the direction of the legislature. Does it mean that elections to fill vacancies in the offices of the old Senators are to be held? Clearly not. When we take the whole amendment together it shows two things: First, that it was not intended to affect those elections, and, secondly, that no election can be held in any State to supply a vacancy in the office of a United States Senator except under the direction of the State legislature. I will refer to this phase of the discussion further along.

The construction that I contend for removes every uncertainty and prevents any hiatus. Every moment of the term of a Senator from any State can be filled when the governor appoints temporarily until the legislature elects a successor, who can serve the remainder of the term.

The language of the amendment in regard to vacancies was intended to apply to vacancies in the offices of Senators who are to be elected under its provisions and is not intended to apply to

others. It seems to me that Congress, in framing the amendment, and the legislatures, in ratifying it, spoke as plainly as they could have spoken. It provides, first:

The Senate of the United States shall be composed of two Senators from each State, elected by the people thereof for six years, and each Senator shall have one vote. The electors in each State shall have the qualifications requisite for electors of the most numerous branch of the State legislatures.

When vacancies happen in the representation of any State in the Senate the executive authority of such State shall issue writs of election to fill such vacancies.

If the amendment had stopped there, it might with some slight reason be contended that under its provisions sections 3 and 4 of Article I were repealed and the old Senators made subject to its provisions. But the following proviso is added:

Provided, That the legislature of any State may empower the executive thereof to make temporary appointment until the people fill the vacancles by election as the legislature may direct.

We have it settled here how vacancies in the office of Senators who are elected under this amendment are to be filled. Now, let us go a little further:

This amendment shall not be so construed as to affect the election term of any Senator chosen before it becomes valid as part of the

What is the meaning of this language? Could it be more clearly or plainly expressed in English that the old senatorial terms are not to be affected, changed, or impaired? Had the object been otherwise, it might have been provided that the election shall not be affected; but the significant words are added that it shall not be construed to affect "the term of any Senator chosen."

It was not necessary to insert the word "term" if the amendment was to apply only to the election, because the Senator, having been elected under the Constitution, could not be ousted from his office when his election was excepted. The word "term" was inserted for a specific purpose.

Again, the words "term of any Senator" are followed by the

word "chosen.'

Why was the word "chosen" used? Simply to prevent interference with any Senator who had been temporarily appointed by the governor to fill a vacancy in the term of one of the old Senators, for it might be said he was not elected. That word embraces both an election and an appointment. Again, if it was desired to affect the portion of the term unexpired, why not provide that it should not affect the "election or tenure" of

Constitution-

We are compelled to assume that both the Congress of the United States and the legislatures of the States knew the difference in meaning of the two words. Evidently the amendment meant exactly what it says; and when I come to the conclusion of my argument I desire to call your attention to a construction of the amendment which I think unquestionably set-

tles the whole matter. •
Mr. SUTHERLAND. Mr. President-

The VICE PRESIDENT. Does the Senator from Kentucky yield to the Senator from Utah?

Mr. BRADLEY. Certainly.

Mr. SUTHERLAND. Before the Senator passes from the question which he is now discussing-

Mr. BRADLEY. I have not passed from it; I am just getting

Mr. SUTHERLAND. I understood the Senator had not passed from it, but I was anxious to get in a word before he did pass from it.

Mr. BRADLEY. Certainly; I am always willing to give the Senator a chance to do that, because he rarely gets one.

Mr. SUTHERLAND. The Senator has plenty of chances, but he rarely avails himself of them.

The provision to which the Senator is calling attention, that-This amendment shall not be so construed as to affect the election term of any Senator chosen before it becomes valid as a part of the

has been before Congress in various proposed amendments for many years. I invite the Senator's attention to a report made by Mr. Tucker, who was a very eminent lawyer, from the Committee on the Election of President and Vice President and Representatives in Congress in February, 1892. The report was upon substantially the same amendment as is now embodied in the seventeenth amendment, and it contained the precise clause to which the Senator has called attention and which I have just read. In that report Mr. Tucker says, referring to

this particular provision: That the title of no Senator may be affected who at the time of the adoption of the amendment holds his seat at the hands of the legislature of his State ns now provided by the Constitution, the last provision is inserted out of abundant caution.

So it seemed to have been the view of the committee which originally reported the amendment that the language was inserted simply in order to prevent any Senator then holding his seat from being legislated out of his seat. I want to ask the Senator whether or not since 1892, a period of many years, during which time this same amendment has been before Congress many times, he has heard suggested anywhere any dissent from

the view thus expressed by Mr. Tucker?
Mr. BRADLEY. Really, Mr. President, I have not had time to examine that report, but I do not think it has anything to do with this discussion. That is a matter of ancient history. It occurred in 1892. We all know that the amendment since that time has been changed in various ways. When it was first proposed it was defeated, and afterwards what was called the Bristow amendment, which is the amendment we now have before us, was adopted. I will not be turned aside to notice that matter now, because, as I have said, I am not through with the proposition I am undertaking to advance. That may have been the opinion of Mr. Tucker and his committee—and Mr. Tucker is a very eminent man; yet other eminent men differ

Mr. BANKHEAD. Mr. President-

The VICE PRESIDENT. Does the Senator from Kentucky yield to the Senator from Alabama?

Mr. BRADLEY. Certainly.

with him.

Mr. BANKHEAD. I desire to say, for the information of the Senator from Utah, that Mr. Tucker-Mr. St. George the Senator from Utah, that Mr. Tucker—Mr. St. George Tucker, the same gentleman who filed this report, not his father—has filed a brief, and I will present it here when this question comes before the Senate, which is as strong, or perhaps stronger, than any brief which any Senator or any other lawyer has filed, and in which he says there can be no question whatever about the right of the governor of Alabama

to make this appointment,
Mr. BRADLEY. I thank the Senator.
Mr. BANKHEAD. He has stated it frequently to other Senators.

Mr. BRADLEY. Proceeding in the line from which I was deflected by my good friend from Utah, the question is now, What is the meaning of the word "term"? It is unquestionably true that under the amendment the term is not to be affected. Now, if the term can not be affected, how can part of it be affected? The word "term" embraces all of its parts. It is a unit, and not susceptible of partition. When the amendment says "the term shall not be affected," it means the whole

term—the six-year term to which the Senator was elected.

We come now to the meaning of the word "affect." That is passed over very lightly by those who favor this legislation and by those who object to the action of the governor of Alabama. It is passed over with the observation that the word "affect" means that the term can not be lengthened or shortened. The word is used in its common acceptation. It is used with the meaning that is applied to it by all lexicographers and synonymists; and in addition to that, as I propose to show in a very brief way, it is used with the meaning that the courts of this country have given it.

First, we will take the definitions of the word, and see whether it shall be confined to the narrow and restricted limit which is given it by those who favor this election law and by those who oppose the appointment by the governor of Alabama.

I have said from the beginning that this bill should not have been brought before the Senate until we passed on that case; that it would necessarily prejudice the right of the gentleman who had been appointed. It has been brought in, however, by the direction of every member of the committee, except myself.

I now desire to take up the definitions of this word and then

its synonyms.

Webster's Unabridged Dictionary says the word "affect" means "to act upon," "to produce an effect or change."

Mr. Webster gives the synonyms of the word "affect" as "influence," "operate," "act on," "concern," "move," "overcome," and "impair."

Soulé, in his work on synonyms, gives the synonyms of this word as "influence on," "act upon," "work upon," "concern." Now, for a moment allow me to call attention to some of the

decisions of the courts.

In the case of Home Building Loan Association v. Nolan (21 Mont., 205) the word "affect," used in an act relating to building and loan associations, providing that except as to taxation the act should not "affect" any association "heretofore organized," was held to be used in the sense of "operate," "act upon," or "concern."

The act of June 13, 1812, relating to rights of property in the territory acquired from France by treaty of 1803, and providing that the rights, title, and claims to certain lots, and so forth, in or adjoining and belonging to towns and villages in the Territory of Missouri, are confirmed to the inhabitants, and so forth, provided-

That nothing herein contained shall be so construed as to affect-The exact language of the seventeenth amendment-

The rights of any persons claiming the same

And so forth.

The word "affect" was construed by the court as "having been used in the sense of acting injuriously upon persons and

Such interpretation-

Said the court-

accords with the reason and manifest intention of the proviso, unsettles no confirmed title, and secures to the inhabitants the protection that Congress thought proper to afford.

This is the decision of the Supreme Court of the United States

in Ryan v. Carter (93 U. S., 78).

In Missouri, in the case of Baird v. St. Louis Hospital (116 Mo., 419), the act construed provided that nothing contained therein should be construed to affect the rights of any person, and so forth. The court held that the word "affect" meant that it should not be so construed as to "prejudice or injuriously affect such rights."

In Copplian Client (A. F. P. Chairle, 1982)

In Conniff v. City (4 E. D. Smith, 430), where the language under consideration was:

Nothing herein contained shall be so construed as to affect any appointment heretofore made under other acts-

The New York court said that the meaning of the word "af-ect" was to "act upon" or "produce a change."

In Iowa the court held, in Clark v. Riddle (101 Iowa, 270) :

"Affect" means to "act upon," "to change," and hence a statute applying generally can not affect the charters or laws of cities organized under special charters, the general law providing that no general law shall be construed to "affect" charters or laws of cities having special charters.

Again, in Iowa, it was held:

"To affect does not necessarily mean to impair, but to work a change upon. A right is affected if it is enlarged or abridged."

Hence it was held that under section 50, Code (Iowa) 1873, the repeal of existing statutes, providing that it should not affect any act done, right accrued or accruing before the time the repeal takes effect, "does not change preexisting rights." (Holland v. Dickerson, 41 Iowa, 767.)

At page 1159 of the Cyclopedia of Law and Procedure we find it laid down as a general rule that the word "affect" means—

To have effect upon, to influence; but often used in the sense of acting injuriously upon persons and things and sometimes in the sense of "vary."

According to all these definitions, this amendment says in so many words that the election or term of any Senator chosen before the same becomes valid as part of the Constitution shall be acted upon, shall not be affected, or concerned, or enlarged, or overcome, or abridged, or prejudiced, or injuriously affected, or changed, or impaired, or worked upon, or varied, or aimed at, or produce an effect, or influence, or operate upon.

One of two things is self-evident. These vacancies which have occurred or that may occur during the terms of Senators who were in office and who had been elected or chosen at the time the amendment became valid as a part of the Constitution must be filled either under the terms of the old Constitution or under the terms of the seventeenth amendment. I suppose no

one will controvert this assertion.

If they are to be filled under the terms of the old Constitution, then the governor temporarily appoints and the legislature elects; and that being true, the Congress of the United States has no power to pass a law providing for an election by

the people. Hence the bill is unconstitutional.

But let us take the other horn of the dilemma. Let us agree for argument's sake that the seventeenth amendment controls, and that under its provisions the vacancies that are to be filled are not vacancies in the offices of Senators elected by the people, but vacancies in the offices of Senators elected before the amendment became valid. Then Congress has no right to pass a law providing for an election to fill such vacancies, because the States alone can perform that office, and hence the law proposed is unconstitutional.

Under the old Constitution it was provided that the

Times, places, and manner of holding elections for Senators shall be prescribed in each State by the legislature thereof, but the Congress may at any time by law make or alter such regulations, except as to the places of choosing Senators.

But when this amendment became part of the Constitution the power to provide for the election of Senators to fill vacancies is conferred exclusively on the legislatures. The selection of a specific agency to enforce the amendment is the exclusion of every other agency. When these vacancies were referred to in the seventeenth amendment the framers and the ratifiers omitted studiously and carefully the right of Congress to legis-

late upon the subject. This action was and is significant. The amendment provides-

That the legislature of any State may empower the executive thereof to make temporary appointment until the people fill the vacancies by election as the legislature may direct.

What authority have we to intervene when this amendment, which is the last utterance of the people, requires the legisla-

tures alone to direct such elections?

Either the old Constitution governs or the amendment governs. If the old Constitution governs, we can not enact the law, because under its provisions the people can not elect, and the legislatures alone can act. If the amendment governs, we can not enact the law, because that power is distinctly conferred upon the legislature. Hence we are absolutely without any power to enact any law on this subject. Possibly we might enact a law providing for the regular election of Senators whose terms begin after the amendment became valid. It would seem, however, that the intent of the amendment is to empower the legislature to direct the manner of holding all elections.

I have conversed with some of the Senators about this proposed law, and have met with this response: "Oh, well, what difference does it make? The Senate is the judge of the qualifications and election of its Members. If we pass this law, and Senators are elected under it, why we will just go ahead and

recognize them."

I do not understand such reasoning. That means in so many words, in the first place, that we may violate our oaths by passing a law which is not constitutional. In the second place, when Senators are elected under it, we may violate our oaths again by giving them seats in this body. I do not believe that any honorable man would be guilty of such action. I do not believe in the propriety of the remark made by some, "What is the Constitution among friends?"

Why, the other night at the Gridiron Club I noticed that the Constitution was mentioned, when some gentleman remarked that it "had not spoken above a whisper for seven years. When I stood at that desk and took an oath without mental reservation that I would support the Constitution of the United States, I believed it right and have felt it was my duty to comply with it. The time has come in this country when the man who proposes the most amendments to the Constitution is thought by many people to be the greatest statesman. We are asked to propose an amendment for woman suffrage, and I saw the other day where some man proposed we should allow the children to vote. Well, I do not know and there is no telling how far this thing will go. The next proposition will be a constitutional amendment proposed to prevent tuberculosis from being contagious.

I do not believe the Constitution should be so lightly regarded. I am an old-fashioned American, and believe in the Constitution of my country. I believe in its enforcement; I believe every citizen is bound by it. We should revere it, we should honor it, we should love it, for it is the fruit of the terrible struggles of our ancestors. It represents the blood and tears that were shed by the fathers and mothers in that supreme struggle for liberty and constitutional government; it is not only cemented with the blood but it has been made sacred by the prayers of our ancestors. So help me God, I will never knowingly violate it. I will cling to it as the article of our faith, the ark of our safety, our haven in every storm.

Mr. SHIELDS obtained the floor.

Mr. BRADLEY. Mr. President, if the Senator will permit me. I will explain that I have offered an amendment to the bill providing that if it shall pass it shall not have any effect on the filling of vacancies in the terms of Senators who were elected prior to the time the amendment became valid as a part of the Constitution. If the bill is to pass, I think that amendment should be adopted; but my argument necessarily leads to the conclusion, if I am correct, that the bill should not be passed.

Mr. SHIELDS. Mr. President, what I have to say is in be-

half of the amendment offered by the Senator from Georgia [Mr. BACON] to strike out all of the second section of the bill relating to the nomination of candidates for Senator.

My opposition to these provisions is based upon several grounds. The Congress, in my opinion, has no power to legislate upon this subject; and if it had, such legislation is unwise and an unnecessary interference with local self-government by the people and the internal affairs of the States,

I do not wish to be understood as opposing primary elections for the nomination of Senators. On the contrary, I favor primary elections for the nomination of Senators and Representatives in Congress and all State officers, ordinarily called political officers, when authorized and protected by laws similar to those controlling regular elections. I believe that by this method the will of the people and their choice of representatives and rulers can be expressed and executed with greater certainty than in any other way. It conforms more with the theory and spirit of popular government and makes the domination of bosses more difficult than the old way of nominating by tumultuous conventions.

Chief Judge Parker, in sustaining the validity of a statute of New York providing for nominating primaries, well said:

New York providing for nominating primaries, well said:

The dominant idea pervading the entire statute is the absolute assurance to the citizen that his wish as to the conduct of the affairs of his party may be expressed through his ballot, and thus given effect, whether it be in accord with the wishes of the leaders of his party or not, and that thus shall be put in effective operation in the primaries the underlying principle of democracy which makes the will of an unfettered majority controlling. In other words, the scheme is to permit the voters to construct the organization from the bottom upward instead of permitting the leaders to construct it from the top downward.

Primeron elections are recognized without the selection of

Primary elections are peculiarly suited to the relection of candidates for Senator in order to effect the purposes of the seventeenth amendment, ordaining that these officers shall be elected by the people. The States, however, have the sole power to provide for primaries. They must be trusted to do so.

But neither the wisdom of a law nor the necessity of the

occasion can ever furnish justification for Congress exceeding its powers or invading those of the States.

The question here is not whether nominations by primary elections are the best procedure in the selection of candidates, but one of constitutional power in the Congress to legislate upon the subject and the propriety of leaving the method of the selection of Senators to the people of the several States, who have exercised it without let or hindrance from the Federal Government

for more than a hundred years. The power of the general assemblies of the several States of the Union to enact reasonable primary laws and otherwise regulate the nomination of candidates for State offices and Senators and Representatives in Congress is now well established. majority of the States have passed such legislation, and its

operation has in the main proven satisfactory

But it does not follow that the Congress of the United States has the same power. The constitutional powers and limitations of the Federal and State Governments are inherently and fundamentally different. These differences are elementary, and every Senator is familiar with them, but it will do no harm to briefly

The States are sovereign powers, having all the governmental powers of free and independent States which they have not delegated to the United States in the Federal Constitution, the chief of which is the power to enact laws. The legislatures of the States are the reservoirs of the reserve powers of the States. Their power to enact laws extends to every possible subject, save those over which the Federal Government has been given control and such limitations as the State constitution may contain, while the power of Congress to legislate is confined to the subjects expressly or impliedly confided to it by the Constitution of the United States. When the legislatures of the States have in contemplation the enactment of a law, the inquiry is not whether they have the power to do so but is there any constitutional provision, Federal or State, which prohibits them from doing so, while the Congress must always examine the Constitution to see whether the power to enact the proposed legislation has been vested in it. Therefore, unless the Congress can place its finger upon some provision of that instrument authorizing it to enact a primary law for the nomination of United States Senators, it is without such authority, and the provisions of this bill upon that subject, if enacted into law, will be absolutely

The entire provisions of the original Constitution for the election of Senators are as follows:

ARTICLE I.

ARTICLE I.

SEC. 3. The Senate of the United States shall be composed of two Senators from each State, chosen by the legislatures thereof for six years, and each Senator shall have one vote. * * * And if vacancies happen by resignation, or otherwise, during the recess of the legislature of any State the executive thereof may make temporary appointments until the next meeting of the legislature, which shall then fill such vacancies.

SEC. 4. The times, places, and manner of holding elections for Senators and Representatives shall be prescribed in each State by the legislature thereof, but the Congress may at any time, by law, make or alter such regulations, except as to the places of choosing Senators.

The joint resolution proposing the seventeenth amendment upon the subject, recently adopted, is in these words:

That in lieu of the first paragraph of section 3 of Article I of the Constitution of the United States, and in lieu of so much of paragraph 2 of the same section as relates to the filling of vacancies, the following be proposed as an amendment to the Constitution, which shall be valid to all intents and purposes as part of the Constitution when ratified by the legislatures of three-fourths of the States:

"The Senate of the United States shall be composed of two Senators from each State, elected by the people thereof, for six years; and each Senator shall have one vote. The electors in each State shall have the qualifications requisite for electors of the most numerous branch of the State legislatures.

"When vacancles happen in the representation of any State in the Senate, the executive authority of such State shall issue writs of election to fill such vacancles: Provided, That the legislature of any State may empower the executive thereof to make temporary appointments until the people fill the vacancles by election as the legislature may direct.

"This amendment shall not be so construed as to affect the election or term of any Senator chosen before it becomes valid as a part of the Constitution."

The power of Congress, then, to regulate the nomination of candidates for Senator, if it exists, must be found in the provision of section 4, authorizing it to alter the time and manner provided by the States for the election of Senators, understand is the contention of the advocates of this bill.

This presents the concrete question whether the power here vested over the election of Senators extends to the selection of candidates who may be voted for in such elections. words, is the power to regulate conventions and primary elections-for both methods must be included, if either-for the nomination of candidates included in that given by this section

to control the election of Senators'

When the incontrovertible fact that nominating conventions and primary elections were things unknown at the time the Constitution was written and adopted, and therefore could not have been contemplated by the framers of that instrument when they worded section 4 of Article I is considered, I can not see how it can be urged with reason that it was intended to include the control of the selection of candidates by such methods in the provision for elections. There had never been an election for Senator at that time. The manner of election provided in the Constitution almost excluded the idea of a previous party nomination. Political parties were not then known, certainly not defined and organized so as to make nominations by any method either advisable or necessary. To now extend the provisions concerning elections of officers so as to include candidates for office seems to me wholly unwarranted by any known rule of constitutional interpretation or construction.

I have not found any determination of the question by the Federal courts, doubtless because no statute of this character has ever been enacted by Congress, although many of the States have for years had legalized primary elections for the nomina-

tion of Senators.

The courts of last resort of several of the States, however, have been called upon to decide the analogous question, whether or not primary elections are included in the provisions in their respective constitutions in regard to elections for both State and Federal officers. There is some conflict in these decisions, but the majority of these courts have held that primary elections were not included in the constitutional provisions for the election of officials, and I believe these opinions are better supported by reason and authority than those which have held otherwise.

One of the latest cases was decided by the Supreme Court of Tennessee, the opinion of the court being delivered by Judge William K. McAlister, a member of that court for 16 years and one of the ablest judges of the day. The style of the case is Ledgerwood against Pitts, and it is found reported in One hundred and twenty-second Tennessee.

The court sustained the power of the legislature to enact a primary election law for State officers and Senators and Repsentatives in Congress and approved the policy of it, although I may say, in passing, the policy of the law was a thing it had nothing to do with, that being solely a question for the legislative branch of the Government. The direct question was made that the compulsory primary election provided for by the statute was an election within the meaning of the constitution of Tennessee, and hence must be tested by the provisions of of Tennessee, and hence must be tested by the provisions or that constitution relating to elections and qualifications of voters therein prescribed, with which the provisions of the law were claimed to be in radical conflict. This is the direct ques-tion here presented by the bill under consideration, and all the arguments made here in support of this legislation were there made and pressed upon the court. The court, in disposing of this contention, said:

this contention, said:

The first inquiry therefore presented for our examination is whether or not these provisions of the constitution have any application at all to primary elections. Admittedly no such thing could have been in contemplation by the framers of the constitution when they came to formulate the election and suffrage clauses of that instrument, for at that time no such thing as a primary election had ever been suggested. The object of this modern invention of political parties is primarlly for the purpose of permitting and requiring the entire electorate of that party to participate in the nomination of candidates for political office. The plan is simply a substitution for the caucus or convention. It is true, as stated, it is a part of the political machinery that starts the candidate on his way, and the political party is thereby enabled to crystallize and concentrate its vote on that particular candidate who is chosen as the representative and expositor possibly of their political yiews; but the limitations and safeguards of the constitution apply exclusively to the final election when the officer is chosen in the mode required by the constitution.

Judge McAlister, in this opinion, in regard to the weight of authority on this question, says:

authority on this question, says:

The right of the legislature to require that nominations shall be by primary and to prescribe additional qualifications for the voters participating in same has been recognized by the weight of authority in the States of the Union. (Runge v. Anderson, 100 Wis., 533, 76 N. W., 482, 42 L. R. A., 239; State, ex rel. McCarthy, v. Moore, 97 Minn., 308, 92 N. W., 4, 59 L. R. A., 447, 94 Am. St. Rep., 702; State v. Drexel, 74 Nebr., 776, 105 N. W., 174; Hopper v. Stack, 69 N. J. Law, 662, 56 Atl., 1; Coffey v. Dem. Gen. Com., 164 N. Y., 335, 58 N. E., 124; Healey et al. v. Wipf (S. Dak.), 117 N. W., 521; Griffin v. Gesner, 78 Kans., 669, 97 Pac., 794; Walling v. Lansdon, 15 Idaho, 282, 97 Pac., 396; State v. Nichols, 50 Wash., 508, 97 Pac., 728.) **

An examination of many of these cases has disclosed the fact that they are bottomed on two propositions, namely:

(1) That such primaries are not in reality elections, but merely nominating devices; and

(2) That they are valuable auxiliaries for the promotion of good government and are regulated by legislative enactment for the public welfare.

weifare.

As against the array of authorities to the contrary, counsel cites the following cases, which hold that compulsory primary elections are "elections" within the purview of the constitution, and that the qualifications for voters in the primaries must be the same as the constitution of the State prescribes.

The Judge then cities the cases referred to by the Senator from Montana [Mr. Walsh].

Johnson v. Grand Forks Co. (16 N. D., 363); Spier v. Baker (120 al., 370; 59 S. E., 145); People v. Board of Commissioners (221 Cal., 370; 59 S. E., 145); People v. Board of Commissioners (221 III., 9).
We do not subscribe to the reasoning of these cases, and, moreover, they are opposed to the great weight of authority.

I have not had an opportunity to examine all of the cases referred to and will not attempt a digest of them, but will quote from a few of them.

In the case of The State v. Dillon (32 Fla., 545) the supreme court of that State held:

That the suffrage provision of the constitution of that State prescribing the qualifications of electors at all elections under it does not apply to elections for municipal officers, but such elections are subject to statutory regulations; and, further, that it is competent for the legislature to prescribe the qualifications of voters at the same.

The Court of Appeals of Maryland, speaking through Chief Justice McSherry, in Hanna v. Young (84 Md., 183), said:

It is only at elections which the constitution itself requires to be held, or which the legislature under the mandate of the constitution makes provision for, that persons having the qualifications set forth in section 1, article 1, are by the constitution of the State declared to be qualified electors.

The same court, in a later case, Kenneweg v. Allegany Co. (102 Md., 122), involving the validity of a State primary election law for the nomination of State and congressional candi-

tion law for the nomination of State and congressional candidates, through the same distinguished jurist, said:

The general assembly possesses all legislative power and authority except in such instances and to such extent as the Constitutions of the State and of the United States have imposed limitations and restraints thereon. In this respect the legislature differs from the Congress of the United States, which has and can exercise only such power as the Federal Constitution expressly or by necessary implication confers upon it. In the general assembly plenary power to legislate is vested, unless restrained by the Constitution. In the State constitution we look not for the power of the general assembly to adopt an enactment but for a prohibition against its adoption. In the Federal Constitution we look not for the prohibition but for the delegated power to enact a measure. The general assembly being, then, the depository of all legislative power, except when restrained by the organic law, it follows that it is clothed with full power to cnact a primary election law, if there is no such provision in the Constitution depriving it of that authority. There is no such provision to be found in the constitution of the State. It is true that section 42 of Article III of the Constitution provides: "The general assembly shall pass laws for the preservation of the purity of elections," but the power to enact a primary election law lies back of and beyond this provision and is not derived from it at all.

The Court of Appeals of Kentucky, in the case of Montgom-

The Court of Appeals of Kentucky, in the case of Montgomery v. Chelf (118 Ky., 774), held that the constitutional provisions of that State concerning elections of officers had no application to legalized primary elections. It is there said:

These sections clearly recognize that the committee has the authority to prescribe conditions to be complied with before the candidate is entitled to have his name printed on the ballot in addition to the submission of his name to the committee. We are unable to perceive what these conditions could be, except the payment of a due portion of the cost of the primary. But it is urged that if the statutes mean this it conflicts with the constitution (sec. 6), which provides that "all elections shall be free and equal." That section of the constitution has no reference to primary elections, but applies only to general elections. Section 148 of the constitution provides that not more than one election can be held in any district in each year except as otherwise provided in the constitution. The constitution nowhere makes provision for holding primaries. Therefore if the word "election." as used in the constitution, includes primary elections, the constitution effectually prohibits the holding of primary elections at all. There is a general election every year, and if a primary can not be held in the same year with a general election it can not be held at all. To make it more plain, if the constitution only authorizes one election to be held within a year and a primary election is an election within the meaning of the constitution, then to hold a primary election and a general election the same year would be violative of this provision of the constitution. the constitution.

The case of State v. Felton (77 Ohio Stat., 577) is also instructive as well as directly in point:

The next contention is that section 2919-1, enacted April 20, 1904 (97 O. L., 107), which provides that "no person shall be allowed to

vote at any primary election except he be an elector resident of the precinct, ward, or township in which he desires to vote, and except he voted with the political party holding such primary election at the last general election, provided he voted at all at such election, unless he be a first voter; nor shall any person vote more than one time or at any other than the polling place in that precinct, ward, or township in which he resides," conflicts with section 1, Article V, of the constitution, which prescribes that "every male citizen of the United States of the age of 21 years who shall have been a resident of the State one year next preceding the election, and of the county, township, or ward in which he resides such time as may be provided by law, shall have the qualifications of an elector and be entitled to vote at all elections." In this that it adds to the qualifications that entitle an elector to vote. If this contention is sound, then every elector has the constitutional right to vote at the primary election of every party. If the election is one at which merely the candidates of a party are to be selected, it can not be an objection that electors who do not belong to that party are not permitted to take part. That was one of the evils that the legislation was intended to prevent, and as to the test prescribed for determining an elector's partisanship it is impossible to conceive of a political party without the possession by its members of some qualifications, and the test prescribed by the statute is the usual one and is not unreasonable. But a primary election held merely to name the candidates of a political party is not an election within the meaning of this section of the constitution. That section refers to an election of officers, and not to the nomination of candidates.

The two cases cited last emphasize the incongruity of elections to nominate candidates of political parties and those provided for in the constitution for the election of officers. It is absolutely necessary that different qualifications of electors be provided for and various other regulations be made which can not be applicable to both kinds of elections, and therefore a law providing for a primary election must contain provisions in conflict with constitutional safeguards of elections for officials.

I have stated there are cases of equally high authority which are in conflict with those from which I have quoted. Some of them are by courts of States whose constitutions were framed long after those of the older States of Maryland, Kentucky, Tennessee, and Ohio, and it may be that their constitutions contemplated the modern popular method of nominating candidates. I have not had time to examine them to ascertain whether this be so. But, in any event, I think it can not be denied, in view of the authorities upon the subject, that the question is free from doubt. It is said that the provisions which I challenge can do no harm, because they merely provide for the application of State primary laws. I think they go further by applying those laws to elections to which the States have not applied them. The principle involved in the legislation, however, is what I object to. If the Congress can require the laws of a State to be applied to an election, it can enact other laws applicable to such elections. The one necessarily follows the other once the power be conceded. If the legislation really amounts to nothing and is of doubtful constitutionality, it should not be enacted. It is a rule of all courts that where the constitutionality of a statute is challenged every reasonable doubt must be resolved in favor of its validity, and I think it equally wise for legislators to refrain from legisand I think it equally wise for legislators to refrain from legislation where the power to enact it is a matter of serious doubt. Another rule of universal application is that courts will not decide a constitutional question when unnecessary for the decision of the particular case, and it seems to me it would be equally wise for legislators never to enact a law of debatable validity where no great necessity requires such action.

The argument that the provisions of this bill merely provide for the enforcement of State laws, and therefore do not really interfere with the domestic concerns of the States, is, I think, without merit. It evades the real objection to the law. There should be no semblance of the control of State affairs of this kind by Congress. This bill, however harmless it may be in its operations, is the first step toward such control and should not be allowed to become a law.

The supremacy and permanency of republics depend upon the maintenance of the fundamental law as written in constitutions adopted by the people in its integrity, and it is the solemn duty of all those temporarily vested with the power, in all departments of the State, to do this. The necessities of a particular case will not justify a departure from the organic law. It is by such insidious process and gradual encroachment that constitutional limitations and government by the people are weakened and eventually destroyed. It has been well said:

One step taken by the legislature or judiciary in enlarging the powers of government opens the door for another, which will be sure to follow, and so the process goes until all respect for the fundamental law is lost and the powers of government are just what those in authority please to make or call them.

Mr. President, I have said this much as a protest aga/nst taking a further step, for I regretfully admit that man; of this kind have already been taken in favor of paternalism and against the right of the people of the States of this Union to control their own affairs in local and domestic matters as they deem best to promote their prosperity, happiness, and personal liberty. I have not attempted to go as exhaustively into

the questions discussed as their great importance would justify.

Mr. President, I again call attention to the bad policy of
this legislation, if it be conceded that Congress has the power
to enact it. The political parties in the several States have for many years selected their candidates for Senator without any assistance or restraint upon the part of the Federal Government. There is no demand for the proposed interference in these local affairs. Many of the States have enacted primary laws for this purpose, and it is apparent that soon all of them will do so. I believe that no necessity for this legislation exists. The people of the States can be trusted to take care of this matter satisfactorily, and unquestionably are doing so.

It has been said of the personnel of this Senate by many men familiar with the history of this branch of Congress, and even by some of its own Members here on the floor at the cost of being somewhat egotistical, that it more fully represents the people than ever before. The Senate of the United States has been the great force that has protected the people, especially those of some of the States, from unjust and improper election laws which the Congress has the power to enact but which were unnecessary and oppressive, on more than one notable occasion in the past. Will it now make a precedent for notable occasion in the past. Will it now make a precedent for not only enacting laws of that character but go into debatable ground and legislate upon matters of a mere local character and which will eventually lead to the absolute control of all State elections? It is directly in the face of the last declaration of the Democratic Party in the Baltimore platform, where it is said:

Believing that the most efficient results under our system of government are to be attained by the full exercise by the States of their reserved sovereign powers, we denounce as usurpation the efforts of our opponents to deprive the States of any of the rights reserved to them and to enlarge and magnify by indirection the powers of the Federal Government.

Mr. President, there is another ground upon which I oppose this legislation. It will establish a precedent for the enactment of primary laws by Congress. The questions here involved, if not directly in point, are analogous to those involved in the proposed legislation for presidential primaries. The questions of constitutional power and of public policy necessarily involved in that measure are of the gravest and most serious character, vitally affecting all the States, and especially the group constituting the great South, and all those of comparatively small population in every part of the Union. The enormous cost of holding such a primary and the necessary disturbance and tur-moil that will inevitably attend two national elections in the same year are of small importance to the other questions involved. I do not propose to venture into any discussion of them at this time. I believe I can assert without fear of contradiction from any Member of this Chamber that these questions should not be decided until they have been exhaustively debated and had the most deliberate consideration by the Congress, and that no action of the Congress should be had which will in any way commit it upon those questions. The case should not be prejudged in the disposition of a comparatively unimportant and unnecessary measure. I believe that the questions involved in that legislation are closely akin to those presented by the present bill to regulate senatorial primaries, and we should refrain from any action which can be cited as a precedent for it.

I see no objection to the presidential electors in the several States being elected and, if desired, instructed by the people of the respective States under primary laws enacted by the It would perhaps be well for this to be done, if it can be, without violating the fundamental law. The Democratic Party stands committed to this by the Baltimore platform.

The movement toward more popular government should be promoted through legislation in each State which will permit the expression of the preference of the electors for national candidates at presidential primaries.

We direct that the national committee incorporate in the call for the next nominating convention a requirement that all expressions of preference for presidential candidates shall be given and the selection of delegates and alternates made through a primary election conducted by the party organization in each State where such expression and election are not provided for by State law.

The present method of nominating candidates for President has secured wise and able Chief Executives for this Nation. The rulers of no country in the world will favorably compare with those of this country. The Senators upon this side of the Chamber can not complain that the late Democratic convention at Baltimore was not a success in selecting a President, and it has been a pleasure to me to hear the compliments paid him from the other side of the Chamber by distinguished Senators on more than one occasion. The Senators who represent the Republican Party have little ground upon which to complain in the result of their conventions, for they have placed in the presidential chair some of the greatest men the Nation has

produced. I admit that some of them may not have pleasant memories of what occurred at Chicago in 1912, but others have, as they were there and approved what was done. I have heard of no Democrat complaining of the action of that convention.

I will not support the proposed legislation for a presidential primary if introduced into Congress, but will stand on the Democratic platform. I am unable to see how Congress can, directly or indirectly, control the election of the Electoral College, composed of State officers appointed or elected in such manner as the States may provide under provisions of the Federal Constitution. The object of a presidential primary will be to do this. In my opinion it would destroy to a large extent the voice and influence guaranteed to the smaller States of the Union by the provisions of the Constitution granting them equal representation in this body in national affairs. There are other constitutional questions involved, but I will say nothing of them now.

There is general opposition to such legislation in all the Southern States.

I read an extract from the Houston Daily Post, which has been reproduced approvingly in a recent editorial in the Commercial Appeal, of Memphis, Tenn., one of the largest daily newspapers published in my State. The Post says:

THE NATIONAL PRIMARY AND THE SOUTH.

Looking further into President Wilson's recommendation of a national primary to select candidates for President and the result of such a policy upon southern political power and influence, we ascertain some interesting facts.

The old South-Virginia, North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Louisiana, Texas, Arkansas, and Tennessee—had in 1910 a total population of 22,400,934, or 24.3 per cent of the total population.

The old South—Virginia, North Carolina. South Carolina, Georgia, Florida, Alabama, Mississippi, Louisiana, Texas, Arkansas, and Tenessee—had in 1910 a total population of 22,400,934, or 24.3 per cent of the total population.

In the Electoral College of 1912 these States cast 126 votes, or 23.7 per cent of the whole.

In the Baltimore convention they possessed 23.7 per cent of the voting strength of the States.

In the election of November, 1912, these 11 States of the old South polled a total vote of 1.542,855, or 10.3 per cent of the whole.

In the election of 1912 the single State of New York—population 3,113,279, 10 per cent of all, electoral vote 45, couvention vote 90—cast 1.587,983, or 10.5 per cent of the total.

In other words, New York, with 10 per cent of the total population, less than 8.3 per cent of the electoral vote, the same proportion of the convention vote, cast 45,000 more votes than the 11 States of the old South.

Without regard to party considerations at all, therefore, the national primary would reduce the power of the South in the nomination of Presidents from 23.7 per cent to 10.3 per cent, or less than the single State of New York.

From the Democratic standpoint the change would be even more radical. The South is the backbone of the Democracy. Going back to 1908, when the fight was between the two old parties and the Democratic candidate received a larger vote than Mr. Wilson received last year, the 11 States mentioned above gave the ticket all the electoral votes it received, save 42 from the States of Colorado, Kentucky, Nevada, Nebraska, Maryland, and Oklahoma.

And yet the States of New York and Ohio, one of which went Democratic for President last year for the first time in 20 years and the other for the first time since the Civil War, cast more Democratic votes than the 11 States of the old South.

If therefore the national primary election law is enacted and the other for the first time since the Civil War, cast more Democratic Party in all the vicissitudes it has encountered

A leading paper of the State of Florida, the Florida Times-Union, editorially said:

The Democratic Party has always stood for State supervision of elections. Especially is this true of the South. Our people have always insisted on control of their own affairs.

If the Federal Government may supervise and control a primary, why not an election? There is no difference in principle, and the one is a step to the other. We do not believe the Democrats in Congress will reverse the position their party has held from the beginning. We feel certain that southern Senators and Representatives will not vote to turn over their primaries to the Federal Government.

The other leading papers of the South, so far as I have read them, are in full accord in their opposition to the measure.

Mr. President, I only call attention to these objections to primary elections in order to emphasize the great importance of the questions involved in such radical innovations in our form of government and the division in opinion of the people of the States in regard to it, and to also emphasize the importance of Congress not now taking any action which will in any way interfere with an untrammeled and proper decision of those questions when they are properly presented to Congress.

Mr. WALSH. Before the Senator from Tennessee takes his seat—I have been very much edified by the discussion of the very interesting questions involved in which he has indulged, and I am disposed to attach a good deal of weight to his views concerning the lack of power of the National Government to legislate in relation to primaries for the nomination of a candidate for President of the United States—I should like to have a clearer idea than I have of the views of the Senator in relation to what power there is to regulate elections of United States Senators.

Clearly there i; some power. The fourth section of the first article of the Constitution contemplates that such regulations shall ordinarily be made by the State legislatures. Then, it provides that Congress may at any time make or alter such regulations. What regulations could Congress make with refer-

ence to the election of a United States Senator?

Mr. SHIELDS. My views are very clear upon that subject. I think the Constitution meant to vest the power in Congress to make regulations in regard to elections by which men are vested with the power of Senators.

Mr. WALSH. Let me inquire, specifically, then, could Congress, for instance, prescribe that the elections shall be by ballot; that the voter must vote a written or a printed ballot; and that he can not vote by going up and announcing his choice personally, as was formerly done in England?

Mr. SHIELDS. I do not think there is any question but what

it could.

Mr. WALSH. Congress has already so legislated.

Mr. SHIELDS. I think Congress can legislate in any matter coming within the purview of the election of the official; but I do not believe that it can go back and legislate and bind the people of the State as to what candidates shall run or who they

shall select to be voted for in that election.

Mr. WALSH. Let me follow the inquiry a little further. Congress has legislated with reference to the election of Representatives. The vote must be by written or printed ballot or by a voting machine; no other system can be adopted. Can not Congress further provide, then, that the voting must not only be by written or printed ballot, but that the names of the candidates of all political parties shall be printed upon the ballot, allowing the voter to make his choice among them?

Mr. SHIELDS. If that is granted, it does not follow that Congress can control the selection of candidates voted for in

the election.

Mr. WALSH. Exactly.

Mr. SHIELDS. The political parties of the country name their candidates, and others may run without being nominated and their names may be placed upon the ballot by statutory regulations, but the power of Congress does not go back to the

day they were nominated.

Mr. WALSH. I want to see how far back we can get. The Senator agrees that the Congress may prescribe not only that the voting shall be by written or printed ballot, but that that ballot shall be in accordance with the Australian system rather than the old system. The old system was for every man to go and write or print whatever names he saw fit on the ballot. The Senator agrees, as I understand him now, that the Congress of the United States might prescribe that the system shall be in accordance with the Australian ballot system, namely, that the names of the candidates shall be printed on the ballot and the voter can mark a cross upon it. If that is the case, then you must have some provision by which the names of the candidates of the various parties shall get on the ballot. Is that not correct?

Mr. SHIELDS. No; that is not necessarily so at all. The candidates themselves provide for that. Citizens may be candidates without the permission of anyone in this country.

Mr. WALSH. Undoubtedly.

Mr. SHIELDS. In this country everyone has a right to run for office, and there is a broad distinction between nominating

men for office and electing them to office.

Mr. SUTHERLAND. Mr. President, I should like to ask the Senator from Tennessee a question. As I remember, several years ago Congress passed an election law, and among other things included certain provisions regulating the registration of voters. I think it was never doubted that Congress had the power to do that. Is not the registration of voters a matter preliminary to an election, as much as the nomination of candidates?

Mr. SHIELDS. I think not. Registration relates to electors of elections and not to the candidates.

Mr. SUTHERLAND. It is not a regulation of the election, if the Senator please, but it is a step preliminary to an election; that is, it provides for voters who may vote at the election. Now, if Congress has the power to regulate the method

of registering voters in order that they may vote at an election, upon what theory, if that be sound, does the Senator think that Congress may not also provide the method of nominating men to be voted for by those voters? What difference in principle is

there between the two things?

Mr. SHIELDS. It is plain to me, because candidates are no part of the election, while voters are necessary. Candidates are necessary, but it is not necessary that the law should provide candidates. The nomination of candidates is not necessary in any sense to hold a regular election for officials. We do have a great many elections in which there are no nominations. In some States they have no primary elections now.

Mr. WALSH. But you do not have the Australian system.
Mr. SHIELDS. The Australian system is for the purpose of
effecting the election of officials, of controlling the votes in an
official election, and Congress has the right to regulate that;
but it is far away from the power to name who shall be the
candidates for office in the election to be provided for. But
whether or not Congress should have the power is not the question here. My position is that the word "election" was used
in the fourth clause in the sense of electing officials to hold
office and serve the people, and that it was not used in the sense
of selecting candidates who might never become officials.

Mr. SUTHERLAND. Mr. President, I think the Senator is quite correct in saying that the nomination of candidates is not a necessary prerequisite to an election; but when they are nominated, that action constitutes a preliminary step to the election in precisely the same way, it seems to me, that the registration of voters constitutes a preliminary step to an election.

Mr. BACON. If the Senator from Tennessee [Mr. Shields] will allow me, I should like to ask the Senator from Utah [Mr. SUTHERLAND] a question in connection with what the Senator from Utah suggests. The idea presented by the Senator from Utah, as I understand, is that that which leads up to an election and constitutes a connecting part in it is necessarily a part of the proceedings which may be described as "the manner." Now, the question I wish to ask the Senator is this: Under the Constitution as it previously existed Senators were elected by the legislatures of the States. If it be true that the present law would justify the regulation of a nomination on the ground that the nomination was but a preceding step to the election, why was it not true in all these years that, under the power which Congress had to regulate the manner of electing a Senator, except as to the place of election-why was it not true, if that same principle were applied, that Congress did not have the power to regulate the manner in which the legislature should be elected, the legislators being the authority at last which would select the Senator? If it be true that the authority to select a candidate in a nominating convention could be regulated as a part of "the manner," why was it not equally true, under the old law, that the manner of electing a legislature fell within the power of Congress, it being but a precedent step to the election of a Senator? I should like to ask the view of the Senator from Utah on that point, for I know the fertility of his resource

Mr. SUTHERLAND. I think, Mr. President, that the difference would be that Congress would then be prescribing the qualifications of the members of the legislature.

Mr. BACON. No; I am not speaking of the qualifications; I am speaking of the manner in which they shall be elected.

Mr. SUTHERLAND. I am not certain that within limits Congress might not do that.

Mr. BACON. Logically the Senator could not come to any other conclusion; yet in more than 120 years no such suggestion has ever been made or entertained for a moment; and if any suggestion had been so made, as suggested by my colleague [Mr. Smith of Georgia], it would have shocked men of all parties throughout the United States; and yet that is a legitimate and logical conclusion.

Mr. SUTHERLAND. Some legislation which Congress passed a few years ago regulating elections shocked my friend from Georgia very much.

Mr. BACON. Yes; it did.

Mr. SUTHERLAND. And it shocked a great many others in the United States; but, nevertheless, Congress passed the law, and it was upheld by the Supreme Court of the United States. It was a period of 80 years before the Congress undertook to provide for a written ballot, and the fact that Congress has not exercised the power for 80 years or 125 years does not constitute a very strong argument in favor of the nonexistence of the power.

Mr. BACON. Do I understand the Senator, then, to concede that, according to the logic of the proposition now advanced, Congress would have had the power under the old law, when a Senator was elected by the legislature, to have controlled the

manner in which the legislature which was going to elect the

Senator should be elected?

Mr. SUTHERLAND. I do not care to give a categorical answer to that question. I should like to know the sort of a law the Senator has in mind. I have answered him that I think within limits the Congress might have such power; but I should like to know what sort of law the Senator has in

mind before I would go further.

Mr. BACON. Just such a law as is now contemplated as to the way in which candidates shall be nominated. The Senator from Montana [Mr. Walsh] has in view—and I suppose the Senator from Utah also-the application of the Australian ballot to the nomination of a candidate for Senator to be elected by the

people at large on a direct vote.

Now, of course, it will be admitted by everyone that the power to designate a State law which shall control must necessarily include the power to legislate directly on the subject, and that if the Congress of the United States has the power to say that in a State a State provision which adopts the Australian ballot shall prevail in the selection of a candidate for Senator, it would be equally within the power of Congress to pass a universal law and provide that in every State the Australian ballot shall be followed in the selection of a candidate for Senator. If that be true, and if the Senator wishes to apply it to the question of the legislature, if it be true that the same principle would give the right to direct the manner in which a legislature shall be elected, and the Senator should ask me in what manner, I would say in that manner. By the same reasoning the Congress of the United States would have the right to say that a legislature under the old law, if it were still a law, should be elected by the Australian ballot system, because, for sooth, it was, after being elected itself, going to elect a United States Senator. no escape, it seems to me, from that proposition.

Mr. SUTHERLAND. Mr. President, there is this difference between the case which the Senator supposes with reference to the legislature and the cases that we have been talking about: The old constitutional provision was that the legislature should elect the United States Senator. Now, the Constitution by that recognized the legislature as an existing institution. It might have devolved the power upon the governor or upon any other official of the State, but it saw fit to devolve that power upon the legislature of the State. The legislature of the State discharges other functions; it makes laws for the State. The election of a United States Senator is only one of the things that it does; and I can see a very great difference between the case of prescribing rules for electing members of the legislature and that of prescribing methods for registering voters and prescribing methods for nominating candidates for office. The legislature is a State institution, charged with performing State functions, and there may be many reasons why Congress can not interfere with a body of that kind when it might prescribe methods of registering voters to vote for candidates either for the House or for the

Mr. BACON. In the same way, if the Senator will pardon me an interruption, a nominating election, as is frequently the case, may select at one time a dozen or two dozen or three dozen candidates for State offices, and in some cases even more than that. Exactly the same machinery is applicable to one as to the other, and at the election which is held for the purpose of selecting a nominee for Senator at the same time and under the same auspices and by the same electors a choice is made of two or three dozen other candidates.

Mr. SUTHERLAND. Yes; but nevertheless Congress has passed laws of that character, and they have been upheld.
Mr. SAULSBURY. Mr. President—

Mr. SUTHERLAND. Just another word, Mr. President, and I am through.

Mr. BACON. I should like to know what the Senator means when he says that Congress has passed a law of that kind which

Mr. SUTHERLAND. Congress passed many years ago, as I recall, a law which provided for inspectors at elections.

Mr. BACON. Yes; those were elections.

Mr. SUTHERLAND. And it provided for regulating the registration.

Mr. BACON. Of course that was in the case of elections for Representatives. Nobody disputes that.

Mr. SUTHERLAND. That is all I have been saying,

Mr. BACON. But the Senator contends that we can go back of the election and control the question as to how those who are to be elected shall be nominated.

Mr. SUTHERLAND. I can see no difference between the two cases; I can see no difference between Congress prescribing methods for registering voters and prescribing methods for nominating candidates for the voters to vote for.

Mr. SAULSBURY. Mr. President-

Mr. SUTHERLAND. I have been diverted, if the Senator will pardon me; I wanted to make just one further observation.

The Senator from Tennessee [Mr. Shields], as I understood him, seemed to think that legislation of this character might hereafter be regarded as a precedent for passing a general presidential primary law. I do not think so. The language of the Constitution with reference to the appointment of electors and that with reference to Representatives and Senators is altogether different. The language of the Constitution with reference to the election of Representatives and Senators is that Congress may from time to time make or alter these regulations with reference to the time, the place, and the manner that gives Congress plenary authority over all the elements of such an election, while in the case of electors for President the power of Congress is limited to fixing the time when the electors may be elected or chosen and the day upon which they shall cast their votes. By the express terms of the Constitution the manner of their appointment is left exclusively to the legislature.

So Congress might have power, under the broader terms of the Constitution, in fixing the time and the place and the manner of electing Senators and Representatives and to regulate the nominations; but under the single power to regulate the time for appointing electors it would have no such power

with reference to the electors for President and Vice President. Mr. SAULSBURY. Mr. President, I think a statement which I understood the Senator from Utah [Mr. Sutherland] to make should not pass unchallenged. If I understood him correctly, he said that with respect to the election of Senators Congress might prescribe regulations requiring the registration of electors. I am not sure I understood the Senator correctly.

Mr. SUTHERLAND. I said to regulate the registration of

voters.

Mr. SAULSBURY. The registration of voters at such an election?

Mr. SUTHERLAND. Yes.

Mr. SAULSBURY. In view of the words of the seventeenth amendment of the Constitution, and in view of the very great care which was taken by the framers of our Constitution and the great jealousy of the States regarding their representation in this body, it seems to me such a statement as that should not be passed quietly and unchallenged.

In the very seventeenth amendment which we are discussing I desire to call the attention of the Senator from Utah to this

provision:

The electors-That is, the electors for Senators-

in each State shall have the qualifications requisite for electors of the most numerous branch of the State legislatures.

Clearly providing that the States themselves should regulate the elections by their laws, in so far as to provide who should vote for Senators.

Mr. SUTHERLAND. Oh, yes; there is no doubt about that.
Mr. SAULSBURY. Now, I put this question to the Senator
from Utah: In case the laws of any State should not provide for registration of electors before an election, but should leave it to be determined at the election itself, on that day, when and where the elections were held, or should prescribe that all males above the age of 21, for example, might vote at such elections without any previous registration, would the Senator contend that the Congress might prescribe a previous registration which was not necessary for the electors of the most numerous branch of the State legislature?

Mr. SUTHERLAND. The provision of the Constitution, to which the Senator has called attention, would preclude Congress from fixing the qualifications of the voters in any State. Congress has never claimed any such power, and under the language of the Constitution I think very clearly it has no

such power.

Mr. SAULSBURY. Then surely it could not provide for the registration of voters at such an election unless the State did so.

Mr. SUTHERLAND. I think it could, to see that the people who were qualified to vote in the State were properly registered; to surround the registration with such safeguards as would prevent fraud, just as it surrounded the polls with supervisors at one time to prevent fraud at the polls.

Mr. SAULSBURY. I am entirely satisfied with having protested against such a construction of the provision of the Constitution as that given to it by the Senator from Utah. I thought such a statement as that should not pass unchallenged, and each time it is made in this body I think it will be challenged.

Mr. SUTHERLAND. Mr. President, let me call the attention of the Senator from Delaware to the provisions of the act to which I referred. It was repealed, I think, about 1891, or perhaps a little later—perhaps in 1893. The language of the act, however, is contained in section 2016 of the Revised Statutes. It is as follows:

sec. 2016. The supervisors of election, so appointed, are authorized and required to attend at all times and places fixed for the registration of voters who, being registered, would be entitled to vote for a Representative or Delegate in Congress and to challenge any person offering to register; to attend at all times and places when the names of registered voters may be marked for challenge and to cause such names registered as they may deem proper to be so marked; to make, when required, the lists, or either of them, provided for in section 2026 and verify the same; and upon any occasion and at any time when in attendance upon the duty herein prescribed to personally inspect and scrutinize such registry, and for purposes of identification to affix their signature to each page of the original list and of each copy of any such list of registered voters at such times upon each day when any name may be received, entered, or registered, and in such manner as will, in their judgment, detect and expose the improper or wrongful removal therefrom or addition thereto of any name.

There is a provision of our statute which recognizes the

There is a provision of our statute which recognizes the power of Congress to supervise these registrations made under the authority of the State.

Mr. SAULSBURY. I am quite familiar with the statute to which the Senator has referred and have had some experience in connection with it. That statute, I think, was repealed in 1893 or 1894. It was certainly in force, and there was an attempt to enforce it in 1892; but as I recall that statute, it was a remnant of the old post-bellum period. I sincerely hope, and I think every lover of his country hopes, that no attempt will be made to reenact such legislation as that. Certainly an attempt to do so will be always challenged here and will have to pass the scrutiny of the Supreme Court of the United States before it is submitted to.

Mr. SUTHERLAND. I quite agree with the Senator. I should not be in favor of passing any such law as that today. I simply refer to it as indicating the power of Congress to do it.

Mr. SAULSBURY. In which I do not believe. Mr. ROBINSON. Mr. President, I am heartily in sympathy with the seventeenth amendment, conferring upon the people the right to choose their representatives in this body. I very much fear the passage of this bill will add to the confusion that has already arisen concerning its provisions and its proper enforcement.

In the first place, the bill seeks to regulate the manner of nominating Senators. Under the seventeenth amendment that power does not exist in the Congress. The language of the amendment is:

The Senate of the United States shall be composed of two Senators from each State, elected by the people thereof, for six years; and each Senator shall have one vote. The electors in each State shall have the qualifications requisite for electors of the most numerous branch of the State legislatures.

This provision plainly indicates that it was the intention of Congress to limit the matter to elections, and not to permit Congress to limit the matter to elections, and not to permit the regulation of primaries, for the reason that it defines the qualifications of those who are entitled to participate in the elections. If the word "election" means "primary" as well as what we commonly understand by the word "election," then it necessarily follows that under this provision of the Constitution either a Republican or a Democrat is entitled to vote in a primary choosing a nominee of a political party, because the qualification of the electors entitled to vote in the election provided for in this amendment is that-

The electors in each State shall have the qualifications requisite for electors of the most numerous branch of the State legislatures.

In the next place, it appears to invade the power expressly reserved to the States by the amendment itself. In the matter of filling vacancies, the language is:

When vacancies happen in the representation of any State in the Senate, the executive authority of such State shall issue writs of election to fill such vacancies: Provided, That the legislature of any State may empower the executive thereof to make temporary appointment until the people fill the vacancies by election—

Not "as the Congress may prescribe," butas the legislature may direct.

That is a limitation upon the manner in which the election shall be held.

It is true that the bill as reported here contemplates that the primaries and the elections to fill such vacancies shall be held in the manner that primaries and elections are held for choosing certain State officers, yet the legislature might not want to adopt that rule. It adds nothing whatever to the power of

the legislature already existing under the Constitution itself.

Again, suppose this bill should become a law, and in any State in the Union the grossest frauds were perpetrated in the election of a United States Senator. I want to ask the Senator from Montana and the Senator from Utah what penalty would attach or could be imposed for the practice of those frauds?

You can not attach the penalties existing under State laws for violations of the State laws, because you are proceeding upon the theory that the States have made no provision for the election of Senators. You can not attach a penalty by implication.

That is a well-established rule of law. There is nothing in this bill that even seeks to attach any penalty for the violation either of the Federal law or of the State law. You are proceeding upon the theory that the States have not made their election laws applicable to the election of United States Senators, and therefore you are passing a law here for the violation of which in any particular no penalty can be imposed. The mere statement of the proposition, it seems to me, is the argu-

Take the case, for instance, of an election in the State of Maryland or in the State of Arkansas to fill a vacancy that may hereafter arise if the bill is passed. What court would have jurisdiction and what offense could be charged for the practice of any kind of fraud?

It seems to me, too, that another vice in this bill is found in the fact that it constitutes an implied legislative construction of the seventeenth amendment in violation of what I understand to be the true construction and import of the amendment. That is a very broad field. It is a well-known fact that Senators differ gravely concerning the import of the amendment. Senator from Montana [Mr. Walsh], whose ability and distinction as a lawyer is widely known and well recognized here and elsewhere, has said that this is not intended to affect any case that has heretofore arisen, and he has offered an amendment especially exempting from its provisions cases that have heretofore arisen. I call his attention, however, to the fact that there is no exemption in his amendment of the cases that may hereafter arise.

Will it not be said, Senators, if this bill passes, that it constitutes an implied construction of the saving clause of the seventeenth amendment? That clause says:

This amendment shall not be so construed as to affect the election or term of any Senator chosen before it becomes valid as part of the Constitution.

Will it not be said that the bill impliedly construes that language to mean that in so far as cases may hereafter arise within the terms of Senators already chosen, and where vacancles may occur, elections must be held, when under the plain import of the Constitution an election can not be held for the filling of a vacancy during any term where the initial Senator was chosen before the amendment became valid?

The construction of the saving clause is important in that no election can be held under that clause to fill a vacancy where the Senator originally chosen for the term was chosen before the amendment became valid as a part of the Constitution. If it had been intended to make the saving clause applicable to the seats of Senators, and to exempt, as suggested by the Senator from Utah, only Members sitting—an I he reenforced his argument by an opinion expressed by Mr. Tucker, set forth many years ago in a report in which the question was not directly at issue—why did not the framers of the amendment use the word "seat"?

That word is used in the Constitution in another clause, in which it is said that the seats of Senators of the first class shall be vacated at the end of two years, those of the second class at the end of four years, and those of the third class at the end of six years, so that one-third may be chosen every two years. The word "seat" has a fixed meaning in the Constitu-tion of the United States. If the word "term" is synonymous with the word "seat," why did not the framers of the amendment, who are presumed to have used apt words to express their meaning, use a word which was apt and which could have

had no other construction?

The word "term," however, does not mean "seat," and it does not mean "election." It means a fixed and definite period of six years. All the courts so hold. The term of a Senator is six years, and it is an entity distinct from the Senator himself.

That argument is reinforced by the fact that in framing the Constitution a great battle was waged about the creation of a definite senatorial term. The State owns the senatorial term. It may remain vacant, but it still exists.

Nor can I concur in the construction of the word "affect" which I believe is impliedly given to the language in the saving clause of the amendment by this bill. The word "affect" has a definite and fixed meaning in law. It means "shall not act upon." To give to the word "affect" the construction which some Senators have urged, to say that it only means "shall neither lengthen nor shorten," is to restrict the usual and ordinary meaning of the word "affect," which is, "shall not act upon." If you substitute the usual meaning of the word "affect" for the language used and say that "this amendment shall not act upon the term of a Senator chosen," you reach the conclusion that it was the intention of the framers of this provision of the Constitution to save not only the cases which have heretofore arisen, but the cases which may hereafter arise, within the terms of Senators chosen when the amendment became valid as a part of the Constitution.

I am aware of the fact that the language of the bill is:

In any State wherein a United States Senator is hereafter to be elected, either at a general election or at any special election called by the executive authority thereof to fill a vacancy—

And so forth. I am also aware that the bill does not expressly declare that hereafter vacancies shall be filled only by election; but the exemption of the two cases that have already arisen under the saving clause of this amendment, and the failure to exempt other cases that may hereafter arise, might constitute and be urged as an implied construction of this provision of the Constitution.

Mr. WALSH. Mr. President-

The VICE PRESIDENT. Does the Senator from Arkansas yield to the Senator from Montana?

Mr. ROBINSON. I yield.

Mr. WALSH. I signified my purpose to offer that amendment simply because the distinguished Senator from Kentucky [Mr. Bradley], who entertains the same views concerning the amendment as the Senator from Arkansas, desired that it should be put there. If the Senators do not desire to have it, I have no disposition at all to ask its incorporation in the bill. own view about the matter is that it does not change the meaning of it at all; but if the Senator from Arkansas and the Senator from Kentucky can get together on the subject and agree that it shall go out, we shall all be glad to leave it out

Mr. ROBINSON. I have no objection to the exemption. point I make is that the exemption should be broader than is stated within the amendment offered by the Senator from Montana. It is good as far as it goes, but it ought not to be limited to the right of any person to a seat in the Senate under an election held or appointment made since the ratification of the seventeenth amendment. It ought to be applied also to the cases which may hereafter arise under the saving clause in the seven-

teenth amendment.

Mr. WALSH. Let me say to the Senator from Arkansas that the Senator from Kentucky [Mr. Bradley] has proposed as a substitute for this that we incorporate the language of the seventeenth amendment to the Constitution, so that it will apply as the Senator desires. I do not see why we should incorporate the language of the amendment in this bill, because, of course,

it would be read there anyway.

Mr. ROBINSON. That suggestion would have great force if this were an ordinary lawsuit to be determined in a court; but this is the court that must finally determine the specific cases which arise under the amendment. A legislative act giving force and effect to the amendment might constitute-and I believe in this instance it does constitute partially in some sense a legislative construction of the amendment; and I believe that construction is at variance with the true meaning of the amend-

Mr. President, the history of this proposed legislation in the Senate of the United States discloses the necessity for a more careful consideration of the subject. An examination of the bill and the amendments that have been tacitly agreed to discloses the fact that the subject is one which calls for very careful consideration and treatment. The passage of this bill with the language that it now carries may, instead of relieving

the subject from confusion, greatly increase it.

Mr. VARDAMAN. Mr. President, I was just about to make from Montana if he will not be willing now to consent that this bill may go over until after the recess? The discussion this afternoon clearly indicates a great variety of opinion on this bill, and I know a number of Senators who desire to discuss it. Some of them are absent from the Chamber at this time, and some others who are present are not quite prepared yet. time would be lost, I am sure, by permitting the bill to go over until after the recess.

Mr. VARDAMAN. Mr. President, I was just about to make the same request that the Senator from Alabama has made. There are some phases of this question which are of vital importance to certain sections of the Republic. I myself wish to submit some observations upon it, and I am not prepared to do so at this time. I hope therefore the Senator from Montana may consent to the postponement of the bill until after the

Mr. WALSH. Mr. President, I am altogether willing to accede to the reasonable request of the Senator from Alabama. I

have no disposition to crowd the matter or to shut off anybody who desires to canvass it, and I apprehend that no great evil will result from a reasonable continuance of the consideration of the bill. I am desirous, however, that something shall be done, and that it shall not be simply left for consideration when nothing else is before the Senate.

I am quite willing to agree to lay the matter temporarily aside if we can fix a day upon which it shall be taken up and disposed of. If the Senator has any suggestion to make in that

respect, I shall be very glad to meet it.

Mr. BANKHEAD. Mr. President, of course I quite agree with the Senator from Montana that the matter should be decided as speedily as it can be done with proper consideration of a subject which is so important as this appears to me; but I do not think it is quite the proper thing to do now to agree to a day on which we shall vote on this bill after the recess. I have no doubt, however, that the Senator from Montana can reach such an agreement very soon after Congress convenes after the holidays

Mr. BRANDEGEE. Mr. President—
The VICE PRESIDENT. Does the Senator from Alabama

yield to the Senator from Connecticut?

Mr. BANKHEAD. I do.

Mr. BRANDEGEE. I think the suggestion of the Senator from Alabama is a wise one. The question is complicated, and there are a good many Senators who are not upon the floor at the present time.

With reference to fixing a particular day, I wish to ask the Senator from Montana a question. The bill is now the unfin-

ished business; is it not?

Mr. SUTHERLAND. No; the Alaska bill is the unfinished

Mr. BRANDEGEE. I am informed that another matter is the unfinished business. Does the Senator from Montana think it would be desirable, in view of the importance of the bill, that we should attempt now to fix a particular day after the recess

when we would have to vote upon it?

Mr. WALSH. I will say to the Senator from Connecticut that my idea about the matter was that it might be appropriately given a place immediately after the disposition of the matter that is the unfinished business-the Alaska railroad bill. If, by any parliamentary procedure or agreement, it could be set down for disposition immediately after the disposition of that matter, I should be very glad to accede to a suggestion of that character.

Mr. BACON. Mr. President, I was going to suggest to the Senator that it is always within the power of a majority to take up a bill at any time it sees fit to do so; and I have no doubt a majority of the Senate will realize the importance of acting upon this measure. I imagine the Senator will have no difficulty in having the Senate agree to a motion to proceed to its consideration.

I think we have had some experiences of late as to the inconvenience which may flow from endeavoring to preempt a time too far in advance. This is not a matter which it will require unanimous consent to take up. Only a majority vote is necessary for the purpose. In the absence of something which should have precedence and which we do not now anticipate, there would not be any difficulty in taking it up.

I think the Senator could very safely let the matter go over, with confidence that it would be at least taken up for consideration. Of course, the Senator does not now desire, as I understand, to fix any day for voting. That would not be proper

under the circumstances.

I hope the matter may go over. We recognize it as a case of emergency only within certain limits. It is a subject which should receive attention, in view of the fact that in some States there is no provision for bringing on elections, and we should make some provision; but I imagine it is not a matter of such urgency as to require that we should do so before the holidays. There will be ample time afterwards.

The matter is a most important one. It is a matter of importance and also of some difficulty, as is shown by the debate here, and the vista opens as we proceed a little further into it.

I sincerely hope the bill may go over, and for one I shall not offer any obstacle to its being taken up for consideration whenever the Senate is through with whatever it now has before it as unfinished business, unless some unforeseen emergency should make it imperative that we should consider something else.

Mr. BRANDEGEE. In this connection I was going to ask the Senator from Georgia, if I may be permitted-I mean with-

out occupying some one else's time—
The VICE PRESIDEN'T. The Senator from Connecticut has the floor.

Mr. BRANDEGEE. Very well. I wish to ask the Senator from Georgia and the Senator from Montana whether the same arrangement which has resulted in making the Alaska railroad bill the unfinished business would not suit the Senators; that is, may we not now agree that upon the legislative day following the final disposition of the present unfinished business, the Alaska railroad bill, we shall make this bill relative to the election of Senators a special order for that day. I realize that Senators would dislike to bind themselves to vote upon the bill at a particular time, and I myself would not want to do that, but making it a special order for a day in the future would simply guarantee its coming up on that day, and then Senators being better informed as to the urgency of various measures could make such further order for its consideration as might be necessary if not finished on that day.

Mr. VARDAMAN. Mr. President, I thought I made respect-

fully a very reasonable request of the Senator from Montana. that this matter go over, because I myself desire to have something to say on the subject, and I am not prepared to speak this afternoon. The Senator did not seem to hear that request; he

passed it over absolutely,

Mr. WALSH. On the contrary-

Mr. VARDAMAN. The Senator's remarks were addressed to the Senator from Alabama [Mr. BANKHEAD], and my request was altogether ignored. I have no desire in the world to delay the consideration of this measure, but I want to say now that the bill will not be passed without further debate, whether it is agreed to postpone it or not.

Mr. WALSH. Mr. President, I regret exceedingly that the Senator from Mississippi, for whom I have the very highest regard, as he knows, felt in any way that I had been discourteous to him. I understood, when the Senator rose, that he simply joined in the request that had already been preferred by the Senator from Alabama. I remember now that I spoke only with reference to the request made by the Senator from Alabama. The answer to the request was that I was quite willing that the matter should go over, so that those who desired to speak on it would have an opportunity to do so, having in mind at the time the request made by the Senator from Mississippi.

I regret very much that I did not include the Senator from Mississippi in answering the request that was made, but I signified then my willingness, and I will say now to the Senator from Mississippi that I am desirous to arrange this matter so

that he may be heard upon the measure.

Mr. SUTHERLAND. Mr. President, I think it is quite apparent that the bill can not be disposed of to-day, or probably during the sessions that will be held between now and the holiday adjournment. I think, therefore, it may as over: but I should like to suggest to the Senator from Montana whether it would not be well to ask to have it made the special order to follow the Alaska railroad bill, because that, I think, will probably take some time. I do not know-none of us knows-how long that bill will take; but if the pending bill goes over there will be practically two hours every day measure of this kind can be considered. I think we will make better headway and finish the consideration of the bill much sooner if every morning after the conclusion of the routine business this bill can be taken up and considered until we reach the unfinished business, two hours after the meeting. In that way we will dispose of it in the course of two or three days. I suggest to the Senator from Montana that, in my opinion at any rate, we would make better headway by that course rather than by having it made a special order to follow the Alaska railroad bill.

Mr. WALSH. I desire to say to the Senator from Utah with respect to the matter that I have observed when the routine business is ended each morning the unfinished business is then ordinarily laid before the Senate to the exclusion of everything

Mr. SUTHERLAND. That can only be done by an agreement of the Senate.

Mr. GALLINGER. It can only be done by unanimous con-

Mr. WALSH. Very well. Under the suggestion made I will ask that the bill be temporarily laid aside.

THE CRISIS IN CONSTITUTIONALISM.

Mr. BRANDEGEE. Mr. President, I take this opportunity to make an observation upon a matter which I regard as of great importance, a matter not before the Senate at the present time in any legislative way, but concerning the Constitution of this country and its form of government with relation to the proba-bilities of the future and what certain existing tendencies may lead to.

I am going to read a short article appearing in the North American Review for this month by David Jayne Hill, entitled "The Crisis in Constitutionalism." The North American Review comments upon this article as follows:

"FOR CONSTITUTIONAL CLUBS.

"The foremost American diplomat now living-barring Mr. Charles Francis Adams, Mr. Wayne MacVeagh, Mr. Choate, and Gen. Porter as of another generation-is undoubtedly Dr. David Jayne Hill, who served his apprenticeship under Secretary Hay and won the respect and admiration of European statesmen while representing his country abroad. Just as Mr. John Bassett Moore and Mr. Adee stand preeminent as masters, respectively, of international law and the technique of diplomacy, so is Dr. Hill without a peer in the shaping of national policies. It is, then, a matter of sincere congratulation that he has returned to his own country at a time when the wisdom derived from thought and experience is sadly needed.
"We wish that every thinking American might read the

article on 'The Crisis of Constitutionalism' which appears in this Review. Dr. Hill writes, of course, as a scholar and philosopher rather than as a diplomat, but the marked advantage which he has acquired, from long and thorough training, over others who have treated of the subject becomes quickly apparent to the reader. We can not recall in recent years a setting forth of the basic principles peculiar to our Government so incomplex and understandable, nor, better yet, so convincing a statement of the reasons for their more rigid application and

of the true methods of accomplishment.
"'What is our political future to be?' is the question with which Dr. Hill finds the United States is now brought face to That the answer will be found ultimately in the reason and conscience of the people he has no doubt, but first, he declares with emphasis, must be determined the lines on which the answer is to be given. 'What we need at present is not so much leaders as a statement of the principles by which we should be led.' And here the choice must be made 'between experience and experiment; between arbitrary decisions and fundamental principles; in a word, between political anarchy and constitutional government.' If any corroboration of this declaration were needed, it can be found readily in the present tendency of legislation, in the constant expanding of the powers of government, in the growth of paternalistic sentiment, in the resentment against law 'because it is law,' in the encroachment upon the prerogatives bestowed upon others, in the development of positive dictation or 'bossism' in the guise of 'leadership,' and in the ready assurance of those holding or seeking authority that they are, indeed, tribunes of the people rather than the administrative officers they were designed by the Constitution to be. Dr. Hill might well have enlarged, and may yet, we trust, expand his thought along these lines.

"Of his own judgment that the Constitution itself is 'the one overmastering issue,' Dr. Hill leaves no room for doubt. And he is firmly convinced that now, of all times, the preservation of constitutional government hangs upon 'cultivation of respect for the spirit' of our fundamental law. To this end, speaking as a practical statesman, he advocates definite organization. 'If we are to defend the Constitution, we who believe in it must act together.' Finally, recalling that 'in the days of our Civil War much aid was afforded to the cause of preserving the Union by the formation of clubs of citizens,' he urges the inauguration of a similar movement, feeling certain that the opposition sure to arise would at least 'furnish surprising proofs that we are at present passing through a crisis of constitutionalism in which the great structure of liberty and justice erected by our fathers is being insidiously undermined.

"The suggestion well deserves thoughtful consideration. is probably not too much to say that, to the adoption of this method many years ago England to-day owes her national existence. Surely, at any rate, to the influence of the clubs may safely be attributed many far-reaching reforms and a higher order of politics generally. If so successful there, why should Dr. Hill's suggestion fail here? Is it not worth while and

worth trying?

"We invite opinions from the press."

THE CRISIS IN CONSTITUTIONALISM.

"Thoughtful men in all countries of the world are united in the conviction that constitutional government embodies the highest ideal for the regulation of human affairs over conceived

by man.
"With regard to the attainability and permanence of this ideal, opinions differ widely. Most men agree in the belief that certain peoples are not ripe for it. Others consider it necessary to combine with it some vestiges of absolutism, as a means of rescuing society from the anarchy that would follow upon Its possible failure. Still others openly oppose it, because, for

various reasons, it is their personal interest to do so.

"The dangers to constitutional government, however, do not arise from the open opposition of its enemies, for in the field of free debate it is abundantly able to defend itself. Its real foes—and they are not a few—are those who do not avowedly attack or resist it, but who, while professing to be its friends and its advocates, secretly repudiate or intentionally pervert its fundamental principles.

"In contrast with the political absolutism which it was intended to destroy, and which it has endeavored to supersede, constitutional government is based upon the principle of equal guaranties for the rights of all citizens, without distinction of persons or classes, under the protection of coordinate and distributed powers, exercised by public officers freely chosen by the people, and revocable after fixed periods of office. Recognizing life, personal liberty, and property as elements of inalienable right, constitutional government aims to guard these from every form of violation.

The mere statement of the meaning of constitutional government plainly indicates who are its natural enemies. These include all those who, in any form whatever, desire to make the State their private servant, and through control of the public powers use it to serve their own personal or class interests at the expense of others.

"The division of men into friends and enemies of constitutional government must be based upon the attitude they assume toward its fundamental principle. This principle being the existence of equal and adequate guaranties, by which the life, the personal liberty, and the property of every citizen are rendered inviolate, every person and every organization that aims by means of exceptional legislation to secure advantages to the detriment of others must be classed as an enemy of constitutional government, which—although not a guaranty of equal conditions, which is impossible—is essentially a guaranty of equal rights.

"The means by which the founders of constitutional government intended to obtain this guaranty were threefold.
"First of all, the 'inalienable rights' of all citizens were to

be secured by a fundamental law which placed them beyond the reach of unequal legislation or executive violence. the advocates of constitutional government had suffered from was the exercise of absolute and arbitrary authority. This they intended to end, and in order to do so they placed certain en-croachments upon personal rights beyond the power of legislatures and executives. In brief, legislative bodies and executive officers were themselves made subject to law; and no man was to be judged except in accordance with the law. Life, liberty, and property were not to be taken away without a day in court, in the presence of responsible authorities acting under the obligations of equal laws.

"The second security afforded was a form of government in which public powers were so distributed that no public officer could commit an act of oppression without rendering himself responsible for his action. The people, through their representatives, could make new laws, but they could make no laws which encroached upon the rights already sacredly guarded by the fundamental law. The executive, when necessary, could act, but only according to law. The judiciary could judge if the law was respected, but only in accordance with those personal securities which the fundamental law provided.

"Finally, the people, standing in the place of the sovereign, and exercising sovereign power, did what no other sovereign had ever before voluntarily done in the history of the world—they freely and formally renounced the power to impose their per-sonal arbitrary will upon the organs of government or upon one another. They confided to the operation of the system they had devised and created the legislative, executive, and judicial functions necessary to the application of justice, subject to their approval or reprobation by means already provided for in that

system.
"Thus absolutism in every form was intended to be extruded from government, which aimed to be a system of just laws and principles in place of mere arbitrary will actuated by caprice, prejudice, malignity, or self-interest.

"It is easy to see how this system could be covertly attacked

by those who, consciously or unconsciously, were inspired by motives for subverting it.

"The first method of attack is through the hasty alteration of the fundamental law itself. Believing in the approximate perfection of our system, the people of the United States have, in general, desired to maintain the stability of the Constitution, and so far it has been subjected to very little change. Being essentially a restriction of arbitrary power, it presents a barrior to the aims of those who seek to derive private advantage

through the control of the State. As long as it remains intact there exists a legal obstacle to depredation. No mere demagogue ever has loved, or ever will love, the Constitution, for it is a restraint upon personal ambition and personal interests. He would much prefer to substitute for it the unrestrained will of the people,' by which he understands assent to his own proposals. With seductive simplicity he blandly asks, 'What is the Constitution between friends?

"Undoubtedly, any inflexible obstacle to a transitory popular impulse can at times be made to appear too rigid, but it is precisely this clear and definite obstruction to impulsive and illconsidered action which constitutional guaranties are intended to impose. It is always a dangerous moment for the liberties of a people when it is proposed to substitute for the deliberately established reasonableness of a constitutional provision the impromptu and uncontrolled impulses of the moment, or to open the way without serious reflection and debate for mere political

experiments.
"Two constitutional changes have been recently urged and passively accepted. The election of United States Senators by legislative bodies has sometimes been attended with corruption. and this has led to a demand for popular nominations and elections. In order to lower import duties an income tax-hitherto left to the several States, which can levy no import taxeshas been urged as a means of supporting the Federal Govern-To accomplish this a constitutional change was necessary, since an unequal tax was prohibited, and an equal tax was not deemed practicable. It is, perhaps, too early to demonstrate the results of these changes, but it remains to be seen how the people, if they can not succeed in choosing trustworthy legislators from among their own immediate neighbors, will be able to select worthier Senators from among persons whom they know only by reputation; nor is it certain that the power to impose a Federal income tax without any kind of restriction may not eventually become the instrument of mere class and sectional legislation. It will be gratifying if these experiments result in an elevation of political morals or in greater social equity, but it is not yet certain that these results will

"A second point of attack upon the Constitution is through the encroachment of one or more of the three divisions of public power upon the legitimate domain of the others. The American conception of government has always laid stress upon the balance of the public powers, which is intended to limit the excesses of all. When, however, we consider the possible effect of the power concentrated in one man both to urge and to veto new laws, backed with the enormous influence of Federal patronage, the employment of which may be so easily concealed behind the mask of apparently beneficent legislation, we contemplate the nearest approach to absolute power now to be found in any constitutional government in the world. In defense of this centralization of authority it may be said that a President of the United States is responsible to the country, and particularly to his party, for the fulfillment of promises made in the platform of the party that elected him, and this is true; but Executive urgency and Executive prohibition have not always been exercised exclusively with the purpose of fulfilling party promises, but sometimes merely upon the personal initiative of the Executive himself, who has thereby assumed the exercise of a prerogative which, however pleasing it may be to those who profit by its results, when considered from a constitutional point of view, is certainly of doubtful propriety, if not of doubtful legal-ity. Fidelity in urging the fulfillment of previously made party promises and personal ballons d'essai sent up for the purpose of securing the favor of the majority, without regard to the previously determined policies of the party, are two entirely dif-ferent methods of official procedure. The business of a President is to execute the laws and urge the fulfillment of party pledges, but it is not his prerogative to revolutionize the Government.

"But encroachments upon constitutional limitations by the Executive are not more dangerous than those of a legislative origin. For these there is always the plausible excuse that they spring more directly from the expressed will of the peo-ple, since the legislators have received a recent mandate from It is, however, a perversion of reasoning to maintain that their mandate includes an instruction to disregard the spirit of the Constitution, or to strain it to the breaking point. It is therefore essential that the judiciary be free, pure, and faithful in its interpretation of the fundamental law. It is equally important that it should have the confidence and support of the people. Nothing could so fatally affect the foundations of constitutional government as a loss of confidence on the part of the people in the purity, fidelity, and intelligence of the judiciary. By every means that will leave it free and re-

sponsible it should be placed and kept upon the highest plane of honor and authority, for it is by its essential nature the guardian of our guaranties of liberty.

"There is a third and a far more insidious form of attack

upon constitutional government which should not escape observation. It is the disposition to withdraw and annul that act of popular renunciation of each in the interest of all upon which the success of constitutional government is based. It is important that this point should be made clear, for it contains the chief justification for speaking of a 'crisis' in constitutionalism

"Attention has been called to the fact that the third step in the development of the Constitution of the United States was the voluntary surrender of arbitrary power by the sovereign people. This was not an abdication of power by the people as a whole in the interest of a majority, but a determination that absolutism in every form should be abolished altogether. It was the surrender of will to reason, of private interest to the public good, of the individual to the State as the institution of organized justice.

'The greatest present danger to constitutional government is the revocation of this splendid sacrifice of personal advantage to the common well-being; the agreement of the people not to attempt an act of conquest upon one another, but to live on

terms of equality under just laws.

"It is worthy of observation that wherever this act of patriotism has been refused constitutional government has proved an abject failure. If we consider the revolutions that have stained with blood and ruined the economic life of several of our sister Republics on this continent, we shall find ample and striking illustrations of this assertion. They, like ourselves, have had a fundamental law, often expressed in most irreproachable language, and a frame of government in which the division of powers is theoretically accepted. In fact, however, these elements of constitutional organization have not been treated as realities. Personal ambition, conspiracy, and revolution have defied the system, and frequently destroyed it. Instead of devoting themselves to the State and making a religion of vital patriotism—that is, of consecration to the State as the institution of order and justice—these unfortunate brethren have attached themselves to factions, each seeking to dominate by force the others, and thus creating a scene of constant incertitude, turmoil, lawlessness, and rapine.

"We have at the present moment a startling example of this assertion of arbitrary will and repudiation of public authority it: our nearest neighbor to the South. Everyone who personally knows the Mexican statesmen of the highest type appreciates their learning, their culture, and their sometimes great execu-What is lacking to that country? It is the spirit tive ability. of personal renunciation of arbitrary power in the interest of the public well-being. Rich in natural resources, situated in a most favorable geographical environment, and not wanting in capable men, Mexico is doomed to stagnation, poverty, and discredit because it is the prey of rival forces within the State, each claiming the right to rule, each determined to destroy the

Let us not lose the lesson of this impressive illustration of the unwillingness of men to accept the authority of principles because we ourselves are not at present harassed by banditti and visibly divided by opposing powers within the It is opportune for us to ask ourselves why we are not subjected to this anarchy, and why we enjoy a high degree of peace, order, and justice in our own Republic, which is based on the same fundamental ideas as that of our unfortunate neighbors?

"The answer to this question is evident to every thoughtful We have thus far been able to maintain respect for observer. our Constitution and our judiciary. We have, in the interest of the public peace, renounced the primitive right of personal selfdefense. We have differences, but we endeavor, for the most part, to settle them by an appeal to the law and to the courts. We have thus far maintained the renunciation of arbitrary power which has made our Government a success where others have failed, and we have had, and are having, our

"Will this condition always continue? There is more than one sign that it will not unless we are on our guard. dangers arising from the first and second forms of attack on constitutional government are not unworthy of attention, but they are insignificant in comparison with the third; for further alterations can not be made in the Constitution without fresh consideration by the people, and a misuse of power by the legislative and executive, or even by the judicial, authorities is at least subject to correction. But the third form of attack is of a

different nature. It results from a social transformation that may affect constitutionalism at its source by perverting the minds of the people.

"For a long time the chief danger to constitutionalism in our country was the menace of conflict between the States. That peril seems now to have passed, for their interests are so nearly identical and their populations are so homogeneous that a divergence of purposes sufficiently wide to lead to armed conflict is altogether improbable.

"But there is another source of antagonism which would have an equally disastrous effect upon constitutional govern-ment, the possibility of which is not entirely excluded from

consideration.

"We have in recent years developed in the United States a spirit of class antagonism which is peculiarly disquieting. In stating this point it is not at all necessary to cast the blame on any particular stratum of society, and a careful analysis might distribute responsibility in a manner that would not be welcome in quite opposite quarters. The one undeniable fact is that this antagonism exists and that it has been stimulated by political ambitions that have found their advantage in creating unrest and in deepening the hostility of certain conditious of life toward others.

"The peril of this situation is that it does not consist merely in opposing personal sentiments entertained by isolated individuals, but that it aims to control the State by massing its forces in powerful organizations with the purpose of changing the laws, and even the Constitution, in the interest of special

"Books have recently been written with the endeavor to make it appear that the Constitution of the United States is a belated eighteenth-century construction, devised in the interest of a property-possessing class, and at present an anachronism. For the first time since it was adopted the Constitution has within very recent years been treated with open disrespect. What is the reason for this opposition? It is that the Constitution presents an obvious barrier to the designs of those who oppose it. If we seek the actuating principle of this opposition, we find it in the doctrine that the unregulated will of the majority is a more desirable form of authority than deliberately accepted principles of government sanctioned by general assent and tried and tested by experience.

Should this tendency become further accentuated by combinations of power able eventually to control the State in their own interest, we should find ourselves in a position not dissimilar from that in which Mexico is placed to-day-divided into hostile factions, one class plundered by another, and the country utterly powerless to defend its interests or maintain its

dignity in the field of international relations.

"The means of preventing this calamity, or the remedy for it, if it is already in some degree upon us, is evidently a determination on the part of the people that arbitrary power in every form must be renounced; that life, liberty, and property shall still enjoy protection against any form of absolutism that

may be asserted within the State.

"To apply this remedy the country needs two things: First, to consider seriously the drift of the social forces now operating among us, with a view to forming a clear conception of the degree in which we are adhering to or departing from the spirit of conformity to just and equal laws; and, second, an active movement on the part of thoughtful citizens to arrest an anticonstitutional tendency.

"In considering the drift of the social forces now in operation, one is struck by the diminished respect for law simply because it is law. This is, no doubt, in part owing to the changed conception of the source of legal authority. When men sincerely believed in 'inalienable rights' and conceived of law as the guardian of those rights, it was esteemed worthy of a sentiment of reverence. At present the importation of a conception of law as the decree of a dominating will, without relation to fundamental rights, which are alleged to have no demonstrable existence, has made it difficult to respect law in and for itself. If, after all, it is merely arbitrary, if it proceeds from no moral principle, if, in short, it is the expression of mere will and not of reason, it is difficult, it is even unreasonable, to demand that it be respected.

"It is necessary in the life of every nation that from time to time it be called upon to reflect upon the principles that underlie its existence. The present generation has been confronted with no great national crisis that has called for such reflection. The shock that has been given to the party system of government in the United States may prove to be such a crisis. We have suddenly been brought face to face with the question, 'What is our political future to be?' It is for the reason and

the conscience of the people to answer, but it remains to be

determined on what lines the answer is to be given.

"Naturally in moments of indecision men look for leaders, but unless they look also for principles they look in vain. The choice must be made between experience and experiment, between arbitrary decisions and fundamental principles; in a word, between political anarchy and constitutional government.

"The one thing most certain is that if we are to preserve and justify constitutional government we must be ever ready to defend it. If we are to defend it, we who believe in it must act together. To many minds it seems at this moment the one overmastering issue. When principles have been settled men have always been found to render them effective. What we need at present is not so much leaders as a statement of the principles by which we should be led and which we should then insist upon having applied in practice. In seeking for these we can not do better than to revert to the great doctrines of our fathers, which, in the midst of revolutions on every side, have brought us to great power as a Nation, and which, if faithfully applied, will continue to give us great presperity as a people.

"If from the dissolution of party ties, which has brought

"If from the dissolution of party ties, which has brought home to us the problem of our political future, we are able to rally about the one rock of salvation, the rights of the individual citizen as guaranteed by the Constitution, the atmosphere will clear. We shall see that a State can not be built upon private interests of any kind, and that our prosperity as a Republic consists in the readiness to renounce the control of the State for our own advantage, by giving to each individual not only full liberty to exercise and develop all his powers in his own way, but protection in preserving that liberty by preventing the public powers from falling under the domination of any class or combination of men having for its object the subjection of others to their private will.

"In the days of our Civil War much aid was afforded to the cause of preserving the Union by the formation of clubs composed of citizens who perceived in that movement the great issue of the hour. It is possible that the time has come when a similar interest in the preservation of constitutional government, through the cultivation of respect for the spirit of the Constitution, may be desirable and even necessary.

"Such a movement would, undoubtedly, be stoutly opposed, but the intensity of the opposition and the comments that would attend it would, perhaps, furnish surprising proofs that we are at present passing through a crisis of constitutionalism in which the great structure of liberty and justice erected by our fathers is being insidiously undermined, not in the interest of the people, of whose rights it is the only guaranty, but in the interest of private powers within the State, which, for purposes of their own, wish to dominate it and employ it as the instrument of their designs

"DAVID JAYNE HILL."

Mr. President, I ask that this article may be printed as a public document.

The VICE PRESIDENT. Is there objection to the request of the Senator from Connecticut?

Mr. OWEN. I object. I ask that it be referred to the Committee on Printing.

The VICE PRESIDENT. The article will be referred to the Committee on Printing.

ELECTION OF SENATORS.

Mr. POINDEXTER. Mr. President, I ask as a parliamentary inquiry, what disposition has been made of the bill which the Senate was considering this afternoon in relation to a temporary method of electing Senators? I was paying close attention to the proceedings, but was unable to tell whether any order was made in regard to the matter.

The VICE PRESIDENT. By unanimous consent it went back to the calendar.

Mr. POINDEXTER. I understand that a request was made to lay it aside temporarily. I have no objection, however.

CONFERENCE REPORT BANKING AND CURRENCY.

(H. REPT. 163.)

Mr. OWEN submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 7837) to provide for the establishment of Federal reserve banks, to furnish an elastic currency, to afford means of rediscounting commercial paper, to establish a more effective supervision of banking in the United States, and for other purposes, having

met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate and agree to the same with an amendment as follows:

In lieu of the amendment proposed by the Senate insert the following:

Be it enacted, etc., That the short title of this act shall be the "Federal reserve act."

Wherever the word "bank" is used in this act, the word shall be held to include State bank, banking association, and trust company, except where national banks or Federal reserve banks

are specifically referred to.

The terms "national bank" and "national banking association" used in this act shall be held to be synonymous and interchangeable. The term "member bank" shall be held to mean any national bank, State bank, or bank or trust company which has become a member of one of the reserve banks created by this act. The term "board" shall be held to mean Federal reserve board; the term "district" shall be held to mean Federal reserve district; the term "reserve bank" shall be held to mean Federal reserve bank.

FEDERAL RESERVE DISTRICTS.

Sec. 2. As soon as practicable the Secretary of the Treasury, the Secretary of Agriculture and the Comptroller of the Currency, acting as "the reserve bank organization committee," shall designate not less than 8 nor more than 12 cities to be known as Federal reserve cities, and shall divide the continental United States, excluding Alaska, into districts, each district to contain only one of such Federal reserve cities. The determination of said organization committee shall not be subject to review except by the Federal reserve board when organized: Provided, That the districts shall be apportioned with due regard to the convenience and customary course of business and shall not necessarily be coterminous with any State or States. The districts thus created may be readjusted and new districts may from time to time be created by the Federal reserve board, not to exceed 12 in all. Such districts shall be known as Federal reserve districts and may be designated by number. A majority of the organization committee shall constitute a quorum with authority to act.
Said organization committee shall be authorized to employ

Said organization committee shall be authorized to employ counsel and expert aid, to take testimony, to send for persons and papers, to administer oaths, and to make such investigation as may be deemed necessary by the said committee in determining the reserve districts and in designating the cities within such districts where such Federal reserve banks shall be severally located. The said committee shall supervise the organization in each of the cities designated of a Federal reserve bank, which shall include in its title the name of the city in which it is situated, as "Federal Reserve Bank of Chicago."

Under regulations to be prescribed by the organization committee, every national banking association in the United States is hereby required, and every eligible bank in the United States and every trust company within the District of Columbia, is hereby authorized to signify in writing, within 60 days after the passage of this act, its acceptance of the terms and provisions hereof. When the organization committee shall have designated the cities in which Federal reserve banks are to be organized, and fixed the geographical limits of the Federal reserve districts, every national banking association within that district shall be required within 30 days after notice from the organization committee, to subscribe to the capital stock of such Federal reserve bank in a sum equal to 6 per cent of the paid-up capital stock and surplus of such bank, one-sixth of the subscription to be payable on call of the organization committee or of the Federal reserve board, one-sixth within three months and one-sixth within six months thereafter, and the remainder of the subscription, or any part thereof, shall be subject to call when deemed necessary by the Federal reserve board, said payments to be in gold or gold certificates.

The shareholders of every Federal reserve bank shall be held

The shareholders of every Federal reserve bank shall be held individually responsible, equally and ratably, and not one for another, for all contracts, debts, and engagements of such bank to the extent of the amount of their subscriptions to such stock at the par value thereof in addition to the amount subscribed, whether such subscriptions have been paid up in whole or in part, under the provisions of this act.

Any national bank failing to signify its acceptance of the terms of this act within the 60 days aforesaid, shall cease to act as a reserve agent, upon 30 days' notice, to be given within the discretion of the said organization committee or of the Federal reserve board.

Should any national banking association in the United States now organized fail within one year after the passage of this act to become a member bank or fail to comply with any of the provisions of this act applicable thereto, all of the rights, privileges, and franchises of such association granted to it under the national-bank act, or under the provisions of this act, shall be thereby forfeited. Any noncompliance with or violation of this act shall, however, be determined and adjudged by any court of the United States of competent jurisdiction in a suit brought for that purpose in the district or territory in which such bank is located, under direction of the Federal reserve board, by the Comptroller of the Currency in his own name before the association shall be declared dissolved. In cases of such noncompliance or violation, other than the failure to become a member bank under the provisions of this act, every director who participated in or assented to the same shall be held liable in his personal or individual capacity for all damages which said bank, its shareholders, or any other person shall have sustained in consequence of such violation.

Such dissolution shall not take away or impair any remedy against such corporation, its stockholders or officers, for any liability or penalty which shall have been previously incurred.

Should the subscriptions by banks to the stock of said Federal reserve banks or any one or more of them be, in the judgment of the organization committee, insufficient to provide the amount of capital required therefor, then and in that event the said organization committee may, under conditions and regulations to be prescribed by it, offer to public subscription at par such an amount of stock in said Federal reserve banks, or any one or more of them, as said committee shall determine, subject to the same conditions as to payment and stock liability as provided for member banks.

No individual, copartnership, or corporation other than a member bank of its district shall be permitted to subscribe for or to hold at any time more than \$25,000 par value of stock in any Federal reserve bank. Such stock shall be known as public stock and may be transferred on the books of the Federal reserve bank by the chairman of the board of directors of such bank.

Should the total subscriptions by banks and the public to the stock of said Federal reserve banks or any one or more of them, be, in the judgment of the organization committee, insufficient to provide the amount of capital required therefor, then and in that event the said organization committee shall allot to the United States such an amount of said stock as said committee shall determine. Said United States stock shall be paid for at par out of any money in the Treasury not otherwise appropriated, and shall be held by the Secretary of the Treasury and disposed of for the benefit of the United States in such manner, at such times, and at such price, not less than par, as the Secretary of the Treasury shall determine.

Stock not held by member banks shall not be entitled to vot-

ing power.

The Federal reserve board is hereby empowered to adopt and promulgate rules and regulations governing the transfers of

said stock.

No Federal reserve bank shall commence business with a subscribed capital less than \$4,000,000. The organization of reserve districts and Federal reserve cities shall not be construed as changing the present status of reserve cities and central reserve cities, except in so far as this act changes the amount of reserves that may be carried with approved reserve agents located therein. The organization committee shall have power to appoint such assistants and incur such expenses in carrying out the provisions of this act as it shall deem necessary, and such expenses shall be payable by the Treasurer of the United States upon voucher approved by the Secretary of the Treasury, and the sum of \$100,000, or so much thereof as may be necessary, is hereby appropriated, out of any moneys in the Treasury not otherwise appropriated, for the payment of such expenses.

Sec. 3. Each Federal reserve bank shall establish branch banks within the Federal reserve district in which it is located and may do so in the district of any Federal reserve bank which may have been suspended. Such branches shall be operated by a board of directors under rules and regulations approved by the Federal reserve board. Directors of branch banks shall possess the same qualifications as directors of the Federal reserve banks. Four of said directors shall be selected by the reserve bank and three by the Federal reserve board, and they shall hold office during the pleasure, respectively, of the parent bank and the Federal reserve board. The reserve bank shall designate one of the directors as manager.

FEDERAL RESERVE BANKS.

Sec. 4. When the organization committee shall have established Federal reserve districts as provided in section 2 of this

act, a certificate shall be filed with the Comptroller of the Currency showing the geographical limits of such districts and the Federal reserve city designated in each of such districts. The Comptroller of the Currency shall thereupon cause to be forwarded to each national bank located in each district, and to such other banks declared to be eligible by the organization committee which may apply therefor, an application blank in form to be approved by the organization committee, which blank shall contain a resolution to be adopted by the board of directors of each bank executing such application, authorizing a subscription to the capital stock of the Federal reserve bank organizing in that district in accordance with the provisions of this act.

When the minimum amount of capital stock prescribed by this act for the organization of any Federal reserve bank shall have been subscribed and allotted, the organization committee shall designate any five banks of those whose applications have been received, to execute a certificate of organization, and thereupon the banks so designated shall, under their seals, make an organization certificate which shall specifically state the name of such Federal reserve bank, the territorial extent of the district over which the operations of such Federal reserve bank are to be carried on, the city and State in which said bank is to be located, the amount of capital stock and the number of shares into which the same is divided, the name and place of doing business of each bank executing such certificate, and of all banks which have subscribed to the capital stock of such Federal reserve bank and the number of shares subscribed by each, and the fact that the certificate is made to enable those banks executing same, and all banks which have subscribed or may thereafter subscribe to the capital stock of such Federal reserve bank, to avail themselves of the advantages of this act.

The said organization certificate shall be acknowledged before a judge of some court of record or notary public; and shall be, together with the acknowledgment thereof, authenticated by the seal of such court, or notary, transmitted to the Comptroller of the Currency, who shall file, record and carefully preserve the same in his office.

Upon the filing of such certificate with the Comptroller of the Currency as aforesaid, the said Federal reserve bank shall become a body corporate and as such, and in the name designated in such organization certificate, shall have power—

First. To adopt and use a corporate seal.

Second. To have succession for a period of 20 years from its organization unless it is sooner dissolved by an act of Congress, or unless its franchise becomes forfeited by some violation of law.

Third. To make contracts.

Fourth. To sue and be sued, complain and defend, in any

court of law or equity.

Fifth. To appoint by its board of directors, such officers and employees as are not otherwise provided for in this act, to define their duties, require bonds of them and fix the penalty thereof, and to dismiss at pleasure such officers or employees. Sixth. To prescribe by its board of directors, by-laws not

Sixth. To prescribe by its board of directors, by-laws not inconsistent with law, regulating the manner in which its general business may be conducted, and the privileges granted to

it by law may be exercised and enjoyed.

Seventh. To exercise by its board of directors, or duly authorized officers or agents, all powers specifically granted by the provisions of this act and such incidental powers as shall be necessary to carry on the business of banking within the limitations prescribed by this act.

Eighth. Upon deposit with the Treasurer of the United States of any bonds of the United States in the manner provided by existing law relating to national banks, to receive from the Comptroller of the Currency circulating notes in blank, registered and countersigned as provided by law, equal in amount to the par value of the bonds so deposited, such notes to be issued under the same conditions and provisions of law as relate to the issue of circulating notes of national banks secured by bonds of the United States bearing the circulating privilege, except that the issue of such notes shall not be limited to the capital stock of such Federal reserve bank.

But no Federal reserve bank shall transact any business except such as is incidental and necessarily preliminary to its organization until it has been authorized by the Comptroller of the Currency to commence business under the provisions of this act

Every Federal reserve bank shall be conducted under the supervision and control of a board of directors.

The board of directors shall perform the duties usually appertaining to the office of directors of banking associations and all such duties as are prescribed by law.

Said board shall administer the affairs of said bank fairly and impartially and without discrimination in favor of or against any member bank or banks and shall, subject to the provisions of law and the orders of the Federal reserve board, extend to each member bank such discounts, advancements and accommodations as may be safely and reasonably made with due regard for the claims and demands of other member banks.

Such board of directors shall be selected as hereinafter specified and shall consist of nine members, holding office for three years, and divided into three classes, designated as classes A, B, and C.

Class A shall consist of three members, who shall be chosen

by and be representative of the stock-holding banks.

Class B shall consist of three members, who at the time of their election shall be actively engaged in their district in com-

merce, agriculture or some other industrial pursuit.

Class C shall consist of three members who shall be designated by the Federal reserve board. When the necessary subscriptions to the capital stock have been obtained for the organization of any Federal reserve bank, the Federal reserve board shall appoint the class C directors and shall designate one of such directors as chairman of the board to be selected. Pending the designation of such chairman, the organization committee shall exercise the powers and duties appertaining to

serve bank.

No Senator or Representative in Congress shall be a member of the Federal reserve board or an officer or a director of a Federal reserve bank.

the office of chairman in the organization of such Federal re-

No director of class B shall be an officer, director, or em-

ployee of any bank.

No director of class C shall be an officer, director, employee, or stockholder of any bank.

Directors of class A and class B shall be chosen in the fol-

lowing manner:

The chairman of the board of directors of the Federal reserve bank of the district in which the bank is situated or, pending the appointment of such chairman, the organization committee shall classify the member banks of the district into three general groups or divisions. Each group shall contain as nearly as may be one-third of the aggregate number of the member banks of the district and shall consist, as nearly as may be, of banks of similar capitalization. The groups shall be designated by number by the chairman.

At a regularly called meeting of the board of directors of each member bank in the district it shall elect by ballot a district reserve elector and shall certify his name to the chairman of the board of directors of the Federal reserve bank of the district. The chairman shall make lists of the district reserve electors thus named by banks in each of the aforesaid three groups and shall transmit one list to each elector in each group.

Each member bank shall be permitted to nominate to the chairman one candidate for director of class A and one candidate for director of class B. The candidates so nominated shall be listed by the chairman, indicating by whom nominated, and a copy of said list shall, within 15 days after its completion, be furnished by the chairman to each elector.

Every elector shall, within 15 days after the receipt of the said list, certify to the chairman his first, second, and other choices of a director of class A and class B, respectively, upon a preferential ballot, on a form furnished by the chairman of the board of directors of the Federal reserve bank of the district. Each elector shall make a cross opposite the name of the first, second, and other choices for a director of class A and for a director of class B, but shall not vote more than one choice for any one candidate.

Any candidate having a majority of all votes cast in the column of first choice shall be declared elected. If no candidate have a majority of all the votes in the first column, then there shall be added together the votes cast by the electors for such candidates in the second column and the votes cast for the several candidates in the first column. If any candidate then have a majority of the electors voting, by adding together the first and second choices, he shall be declared elected. If no candidate have a majority of electors voting when the first and second choices shall have been added, then the votes cast in the third column for other choices shall be added together in like manner, and the candidate then having the highest number of votes shall be declared elected. An immediate report of election shall be declared.

Class C directors shall be appointed by the Federal reserve board. They shall have been for at least two years residents of the district for which they are appointed, one of whom shall be designated by said board as chairman of the board of directors of the Federal reserve bank and as "Federal reserve bank."

agent." He shall be a person of tested banking experience; and in addition to his duties as chairman of the board of directors of the Federal reserve bank he shall be required to maintain under regulations to be established by the Federal reserve board a local office of said board on the premises of the Federal reserve bank. He shall make regular reports to the Federal reserve board, and shall act as its official representative for the performance of the functions conferred upon it by this act. He shall receive an annual compensation to be fixed by the Federal reserve board and paid monthly by the Federal reserve bank to which he is designated. One of the directors of class C. who shall be a person of tested banking experience, shall be appointed by the Federal reserve board as deputy chairman and deputy Federal reserve agent to exercise the powers of the chairman of the board and Federal reserve agent in case of absence or disability of his principal.

Directors of Federal reserve banks shall receive, in addition to any compensation otherwise provided, a reasonable allowance for necessary expenses in attending meetings of their respective boards, which amount shall be paid by the respective Federal reserve banks. Any compensation that may be provided by boards of directors of Federal reserve banks for directors, officers or employees shall be subject to the approval of the Federal

reserve board.

The reserve bank organization committee may, in organizing Federal reserve banks, call such meetings of bank directors in the several districts as may be necessary to carry out the purposes of this act, and may exercise the functions herein conferred upon the chairman of the board of directors of each Federal reserve bank pending the complete organization of such bank.

At the first meeting of the full board of directors of each Federal reserve bank, it shall be the duty of the directors of classes A, B and C, respectively, to designate one of the members of each class whose term of office shall expire in one year from the 1st of January nearest to date of such meeting, one whose term of office shall expire at the end of two years from said date, and one whose term of office shall expire at the end of three years from said date. Thereafter every director of a Federal reserve bank chosen as hereinbefore provided shall hold office for a term of three years. Vacancies that may occur in the several classes of directors of Federal reserve banks may be filled in the manner provided for the original selection of such directors, such appointees to hold office for the unexpired terms of their predecessors.

STOCK ISSUES; INCREASE AND DECREASE OF CAPITAL.

SEC. 5. The capital stock of each Federal reserve bank shall be divided into shares of \$100 each. The outstanding capital stock shall be increased from time to time as member banks increase their capital stock and surplus or as additional banks become members, and may be decreased as member banks reduce their capital stock or surplus or cease to be members. Shares of the capital stock of Federal reserve banks owned by member banks shall not be transferred or hypothecated. When a member bank increases its capital stock or surplus, it shall thereupon subscribe for an additional amount of capital stock of the Federal reserve bank of its district equal to 6 per cent of the said increase, one-half of said subscription to be paid in the manner hereinbefore provided for original subscription, and one-half subject to call of the Federal reserve board. A bank applying for stock in a Federal reserve bank at any time after the organization thereof must subscribe for an amount of the capital stock of the Federal reserve bank equal to 6 per cent of the paid-up capital stock and surplus of said applicant bank, paying therefor its par value plus one-half of 1 per cent a month from the period of the last dividend. When the capital stock of any Federal reserve bank shall have been increased either on account of the increase of capital stock of member banks or on account of the increase in the number of member banks, the board of directors shall cause to be executed a certificate to the Comptroller of the Currency showing the increase in capital stock, the amount paid in, and by whom paid. When a member bank reduces its capital stock it shall surrender a proportionate amount of its holdings in the capital of said Federal reserve bank, and when a member bank voluntarily liquidates it shall surrender all of its holdings of the capital stock of said Federal reserve bank and be released from its stock subscription not previously called. In either case the shares surrendered shall be canceled and the member bank shall receive in payment therefor, under regulations to be prescribed by the Federal reserve board, a sum equal to its cash-paid subscriptions on the shares surrendered and one-half of 1 per cent a month from the period of the last dividend, not to exceed the book value thereof, less any liability of such member bank to the Federal reserve Sec. 6. If any member bank shall be declared insolvent and a receiver appointed therefor, the stock held by it in said Federal reserve bank shall be canceled, without impairment of its liability, and all cash-paid subscriptions on said stock, with one-half of 1 per cent per month from the period of last dividend, not to exceed the book value thereof, shall be first applied to all debts of the insolvent member bank to the Federal reserve bank, and the balance, if any, shall be paid to the receiver of the insolvent bank. Whenever the capital stock of a Federal reserve bank is reduced, either on account of a reduction in capital stock of any member bank or of the liquidation or insolvency of such bank, the board of directors shall cause to be executed a certificate to the Comptroller of the Currency showing such reduction of capital stock and the amount repaid to such bank.

DIVISION OF EARNINGS.

Sec. 7. After all necessary expenses of a Federal reserve bank have been paid or provided for, the stockholders shall be entitled to receive an annual dividend of 6 per cent on the paid-in capital stock, which dividend shall be cumulative. After the aforesaid dividend claims have been fully met, all the net earnings shall be paid to the United States as a franchise tax, except that one-half of such net earnings shall be paid into a surplus fund until it shall amount to 40 per cent of the paid-in capital stock of such bank.

The net earnings derived by the United States from Federal reserve banks shall, in the discretion of the Secretary, be used to supplement the gold reserve held against outstanding United States notes, or shall be applied to the reduction of the outstanding bonded indebtedness of the United States under regulations to be prescribed by the Secretary of the Treasury. Should a Federal reserve bank be dissolved or go into liquidation, any surplus remaining, after the payment of all debts, dividend requirements as hereinbefore provided, and the par value of the stock, shall be paid to and become the property of the United States and shall be similarly applied.

Federal reserve banks, including the capital stock and surplus therein, and the income derived therefrom shall be exempt from Federal, State, and local taxation, except taxes upon real

SEC. 8. Section 5154, United States Revised Statutes, is hereby amended to read as follows:

Any bank incorporated by special law of any State or of the United States or organized under the general laws of any State or of the United States and having an unimpaired capital sufficient to entitle it to become a national banking association under the provisions of the existing laws may, by the vote of the shareholders owning not less than 51 per cent of the capital stock of such bank or banking association, with the approval of the Comptroller of the Currency be converted into a national banking association, with any name approved by the Comptroller of the Currency: Provided, however, That said conversion shall not be in contravention of the State law. case the articles of association and organization certificate may be executed by a majority of the directors of the bank or banking institution, and the certificate shall declare that the owners of 51 per cent of the capital stock have authorized the directors to make such certificate and to change or convert the bank or banking institution into a national association. A majority of the directors, after executing the articles of association and the organization certificate, shall have power to execute all other papers and to do whatever may be required to make its organization perfect and complete as a national association. shares of any such bank may continue to be for the same amount each as they were before the conversion, and the directors may continue to be directors of the association until others are elected or appointed in accordance with the provisions of the statutes of the United States. When the comptroller has given to such bank or banking association a certificate that the provisions of this act have been complied with, such bank or banking association, and all its stockholders, officers, and employees, shall have the same powers and privileges, and shall be subject to the same duties, liabilities, and regulations, in all respects, as shall have been prescribed by the Federal reserve act and by the national banking act for associations originally organized as national banking associations.

STATE BANKS AS MEMBERS.

SEC. 9. Any bank incorporated by special law of any State, or organized under the general laws of any State or of the United States, may make application to the reserve bank organization committee, pending organization, and thereafter to the Federal reserve board for the right to subscribe to the stock of the Federal reserve bank organized or to be organized within the Federal reserve district where the applicant is located. The organization committee or the Federal reserve board, under such rules

and regulations as it may prescribe, subject to the provisions of this section, may permit the applying bank to become a stockholder in the Federal reserve bank of the district in which the applying bank is located. Whenever the organization committee or the Federal reserve board shall permit the applying bank to become a stockholder in the Federal reserve bank of the district, stock shall be issued and paid for under the rules and regulations in this act provided for national banks which become stockholders in Federal reserve banks.

The organization committee or the Federal reserve board shall establish by-laws for the general government of its conduct in acting upon applications made by the State banks and banking associations and trust companies for stock ownership in Federal reserve banks. Such by-laws shall require applying banks not organized under Federal law to comply with the reserve and capital requirements and to submit to the examination and regulations prescribed by the organization committee or by the Federal reserve board. No applying bank shall be admitted to membership in a Federal reserve bank unless it possesses a paid-up unimpaired capital sufficient to entitle it to become a national banking association in the place where it is situated, under the provisions of the national banking act.

Any bank becoming a member of a Federal reserve bank under the provisions of this section shall, in addition to the regulations and restrictions hereinbefore provided, be required to conform to the provisions of law imposed on the national banks respectin; the limitation of liability which may be incurred by any person, firm, or corporation to such banks, the prohibition against making purchase of or loans on stock of such banks, and the withdrawal or impairment of capital, or the payment of unearned dividends, and to such rules and regulations as the Federal reserve board may, in pursuance thereof, prescribe.

Such banks, and the officers, agents, and employees thereof,

Such banks, and the officers, agents, and employees thereof, shall also be subject to the provisions of and to the penalties prescribed by sections 5198, 5200, 5201, and 5208, and 5209 of the Revised Statutes. The member banks shall also be required to make reports of the conditions and of the payments of dividends to the comptroller, as provided in sections 5211 and 5212 of the Revised Statutes, and shall be subject to the penalties prescribed by section 5213 for the failure to make such report.

If at any time it shall appear to the Federal reserve board that a member bank has failed to comply with the provisions of this section or the regulations of the Federal reserve board, it shall be within the power of the said board, after hearing, to require such bank to surrender its stock in the Federal reserve bank; upon such surrender the Federal reserve bank shall pay the cash-paid subscriptions to the said stock with interest at the rate of one-half of 1 per cent per month, computed from the last dividend, if earned, not to exceed the book value thereof, less any liability to said Federal reserve bank, except the subscription liability not previously called, which shall be canceled, and said Federal reserve bank shall, upon notice from the Federal reserve board, be required to suspend said bank from further privileges of membership, and shall within 30 days of such notice cancel and retire its stock and make payment therefore in the manner berein provided. The Federal reserve board may restore membership upon due proof of compliance with the conditions imposed by this section,

FEDERAL RESERVE BOARD.

SEC. 10. A Federal reserve board is hereby created which shall consist of seven members, including the Secretary of the Treasury and the Comptroller of the Currency, members ex officio, and five members appointed by the President of the United States, by and with the advice and consent of the Senate. In selecting the five appointive members of the Federal reserve board, not more than one of whom shall be selected from any one Federal reserve district, the President shall have due regard to a fair representation of the different commercial, industrial and geographical divisions of the coun-The five members of the Federal reserve board appointed by the President and confirmed as aforesaid shall devote their entire time to the business of the Federal reserve board and shall each receive an annual salary of \$12,000, payable monthly together with actual necessary traveling expenses, and Comptroller of the Currency, as ex officio member of the Federal reserve board, shall, in addition to the salary now paid him as Comptroller of the Currency, receive the sum of \$7,000 annually for his services as a member of said board.

The members of said board, the Secretary of the Treasury, the Assistant Secretaries of the Treasury, and the Comptroller of the Currency shall be ineligible during the time they are in office and for 2 years thereafter to hold any office, position, or employment in any member bank. Of the five members thus appointed by the President at least two shall be persons expe-

rienced in banking or finance. One shall be designated by the President to serve for 2, one for 4, one for 6, one for 8, and one for 10 years, and thereafter each member so appointed shall serve for a term of 10 years unless sooner removed for cause by the President. Of the five persons thus appointed, one shall be designated by the President as governor and one as vice governor of the Federal reserve board. The governor of the Federal reserve board, subject to its supervision, shall be the active executive officer. The Secretary of the Treasury may assign offices in the Department of the Treasury for the use of the Federal reserve board. Each member of the Federal reserve board shall within 15 days after notice of appointment make and subscribe to the oath of office.

The Federal reserve board shall have power to levy semiannually upon the Federal reserve banks, in proportion to their capital stock and surplus, an assessment sufficient to pay its estimated expenses and the salaries of its members and employees for the half year succeeding the levying of such assessment, together with any deficit carried forward from the pre-

ceding half year.

The first meeting of the Federal reserve board shall be held in Washington, D. C., as soon as may be after the passage of this act, at a date to be fixed by the reserve bank organization The Secretary of the Treasury shall be ex officio chairman of the Federal reserve board. No member of the Federal reserve board shall be an officer or director of any bank, banking institution, trust company, or Federal reserve bank nor hold stock in any bank, banking institution, or trust company; and before entering upon his duties as a member of the Federal reserve board he shall certify under oath to the Secretary of the Treasury that he has complied with this requirement. Whenever a vacancy shall occur, other than by expiration of term, among the five members of the Federal reserve board appointed by the President, as above provided, a successor shall be appointed by the President, with the advice and consent of the Senate, to fill such vacancy, and when appointed he shall hold office for the unexpired term of the member whose place he is selected to fill.

The President shall have power to fill all vacancies that may happen on the Federal reserve board during the recess of the Senate, by granting commissions which shall expire 30 days after

the next session of the Senate convenes.

Nothing in this act contained shall be construed as taking away any powers heretofore vested by law in the Secretary of the Treasury which relate to the supervision, management, and control of the Treasury Department and bureaus under such department, and wherever any power vested by this act in the Federal reserve board or the Federal reserve agent appears to conflict with the powers of the Secretary of the Treasury, such powers shall be exercised subject to the supervision and control of the Secretary.

The Federal reserve board shall annually make a full report of its operations to the Speaker of the House of Representatives, who shall cause the same to be printed for the information of

the Congress

Section 324 of the Revised Statutes of the United States shall be amended so as to read as follows: There shall be in the Department of the Treasury a bureau charged with the execution of all laws passed by Congress relating to the issue and regulation of national currency secured by United States bonds, and, under the general supevision of the Federal reserve board, of all Federal reserve notes, the chief officer of which bureau shall be called the Comptroller of the Currency and shall perform his duties under the general directions of the Secretary of the Treasury.

SEC. 11. The Federal reserve board shall be authorized and

empowered:

(a) To examine at its discretion the accounts, books and affairs of each Federal reserve bank and of each member bank and to require such statements and report; as it may deem necessary. The said board shall publish once each week a statement showing the condition of each Federal reserve bank and a consolidated statement for all Federal reserve banks. Such statements shall show in detail the assets and liabilities of the Federal reserve banks, single and combined, and shall furnish full information regarding the character of the money held as reserve and the amount, nature and maturities of the paper and other investments owned or held by Federal reserve banks. (b) To permit, or, on the affirmative vote of at least five mem-

bers of the reserve board to require Federal reserve banks to rediscount the discounted paper of other Federal reserve banks at rates of interest to be fixed by the Federal reserve board.

(c) To suspend for a period not exceeding 30 days, and from time to time to renew such suspension for periods not exceeding 15 days, any reserve requirement specified in this act: Pro-

vided, That it shall establish a graduated tax upon the amounts by which the reserve requirements of this act may be permitted to fall below the level hereinafter specified: And provided further, That when the gold reserve held against Federal reserve notes falls below 40 per cent, the Federal reserve board shall establish a graduated tax of not more than 1 per cent per annum upon such deficiency until the reserves fall to 321 per cent. and when said reserve falls below 32½ per cent, a tax at the rate increasingly of not less than 1½ per cent per annum upon each 2½ per cent or fraction thereof that such reserve falls below 32½ per cent. The tax shall be paid by the reserve bank, but the reserve bank shall add an amount equal to said tax to the rates of interest and discount fixed by the Federal reserve board.

(d) To supervise and regulate through the bureau under the charge of the Comptroller of the Currency the issue and retirement of Federal reserve notes, and to prescribe rules and regulations under which such notes may be delivered by the comptroller to the Federal reserve agents applying therefor.

(e) To add to the number of cities classified as reserve and central reserve cities under existing law in which national banking associations are subject to the reserve requirements set forth in section 20 of this act; or to reclassify existing reserve and central reserve cities or to terminate their designation as such.

(f) To suspend or remove any officer or director of any Federal reserve bank, the cause of such removal to be forthwith communicated in writing by the Federal reserve board to the removed officer or director and to said bank.

(g) To require the writing off of doubtful or worthless assets upon the books and balance sheets of Federal reserve banks.

(h) To suspend, for the violation of any of the provisions of this act, the operations of any Federal reserve bank, to take possession thereof, administer the same during the period of suspension, and, when deemed advisable, to liquidate or reorganize such bank.

(i) To require bonds of Federal reserve agents, to make regulations for the safeguarding of all collateral, bonds, Federal reserve notes, money or property of any kind deposited in the hands of such agents, and said board shall perform the duties, functions, or services specified in this act, and make all rules and regulations necessary to enable said board effectively to perform the same.

(j) To exercise general supervision over said Federal reserve banks.

(k) To grant by special permit to national banks applying therefor, when not in contravention of State or local law, the right to act as trustee, executor, administrator, or registrar of stocks and bonds under such rules and regulations as the said board may prescribe.

(1) To employ such attorneys, experts, assistants, clerks, or other employees as may be deemed necessary to conduct the business of the board. All salaries and fees shall be fixed in advance by said board and shall be paid in the same manner as the salaries of the members of said board. All such attorneys, experts, assistants, clerks, and other employees shall be appointed without regard to the provisions of the act of January 16, 1883 (vol. 22, U. S. Stat. L., p. 403), and amendments thereto, or any rule or regulation made in pursuance thereof: *Provided*, That nothing herein shall prevent the President from placing said employees in the classified service.

FEDERAL ADVISORY COUNCIL.

SEC. 12. There is hereby created a Federal advisory council, which shall consist of as many members as there are Federal reserve districts. Each Federal reserve bank by its board of directors shall annually select from its own Federal reserve district one member of said council, who shall receive such compensation and allowances as may be fixed by his board of directors subject to the approval of the Federal reserve board. The meetings of said advisory council shall be held at Washington, D. C., at least four times each year, and oftener if called by the Federal reserve board. The council may in addition to the meetings above provided for hold such other meetings in Washington, D. C., or elsewhere, as it may deem necessary, may select its own officers and adopt its own methods of procedure, and a majority of its members shall constitute a quorum for the transaction of business. Vacancies in the council shall be filled by the respective reserve banks, and members selected to

The Federal advisory council shall have power, by itself or through its officers, (1) to confer directly with the Federal reserve board on general business conditions; (2) to make oral or written representations concerning matters within the jurisdiction of said board; (3) to call for information and to make recommendations in regard to discount rates, rediscount business, note issues, reserve conditions in the various districts, the purchase and sale of gold or securities by reserve banks, openmarket operations by said banks, and the general affairs of the reserve banking system.

POWERS OF FEDERAL RESERVE BANKS.

Sec. 13. Any Federal reserve bank may receive from any of its member banks, and from the United States, deposits of current funds in lawful money, national-bank notes, Federal reserve notes, or checks and drafts upon solvent member banks, payable upon presentation; or, solely for exchange purposes, may receive from other Federal reserve banks deposits of current funds in lawful money, national-bank notes, or checks and drafts upon solvent member or other Federal reserve banks.

payable upon presentation.

Upon the indorsement of any of its member banks, with a waiver of demand, notice and protest by such bank, any Federal reserve bank may discount notes, drafts, and bills of exchange arising out of actual commercial transactions; that is, notes, drafts, and bills of exchange issued or drawn for agricultural, industrial, or commercial purposes, or the proceeds of which have been used, or are to be used, for such purposes, the Federal reserve board to have the right to determine or define the character of the paper thus eligible for discount, within the meaning of this act. Nothing in this act contained shall be construed to prohibit such notes, drafts, and bills of exchange, secured by staple agricultural products, or other goods, wares, or merchandise from being eligible for such discount; but such definition shall not include notes, drafts, or bills covering merely investments or issued or drawn for the purpose of carrying or trading in stocks, bonds, or other investment securities, except bonds and notes of the Government of the United States. Notes, drafts, and bills admitted to discount under the terms of this paragraph must have a maturity at the time of discount of not more than 90 days: Provided, That notes, drafts, and bills drawn or issued for agricultural purposes or based on live stock and having a maturity not exceeding six months may be discounted in an amount to be limited to a percentage of the capital of the Federal reserve bank, to be ascertained and fixed by the Federal reserve board.

Any Federal reserve bank may discount acceptances which are based on the importation or exportation of goods and which have a maturity at time of discount of not more than three months, and indorsed by at least one member bank. The amount of acceptances so discounted shall at no time exceed one-half the paid-up capital stock and surplus of the bank for

which the rediscounts are made,

The aggregate of such notes and bills bearing the signature or indorsement of any one person, company, firm, or corporation rediscounted for any one bank shall at no time exceed 10 per cent of the unimpaired capital and surplus of said bank; but this restriction shall not apply to the discount of bills of exchange drawn in good faith against actually existing values.

Any member bank may accept drafts or bills of exchange drawn upon it and growing out of transactions involving the importation or exportation of goods having not more than six months sight to run; but no bank shall accept such bills to an amount equal at any time in the aggregate to more than one-

half its paid-up capital stock and surplus.

Section 5202 of the Revised Statutes of the United States is hereby amended so as to read as follows: No national banking association shall at any time be indebted, or in any way liable, to an amount exceeding the amount of its capital stock at such time actually paid in and remaining undiminished by losses or otherwise, except on account of demands of the nature following: First. Notes of circulation,

Second. Moneys deposited with or collected by the asso-

ciation.

Third. Bills of exchange or drafts drawn against money actually on deposit to the credit of the association, or due thereto.

Fourth. Liabilities to the stockholders of the association for dividends and reserve profits.

Fifth. Liabilities incurred under the provisions of the Federal reserve act,

The rediscount by any Federal reserve bank of any bills receivable and of domestic and foreign bills of exchange, and of acceptances authorized by this act, shall be subject to such restrictions, limitations, and regulations as may be imposed by the Federal reserve board.

OPEN-MARKET OPERATIONS.

SEC. 14. Any Federal reserve bank may, under rules and regulations prescribed by the Federal reserve board, purchase and sell in the open market, at home or abroad, either from or to domestic or foreign banks, firms, corporations, or individuals,

cable transfers and bankers' acceptances and bills of exchange of the kinds and maturities by this act made eligible for rediscount, with or without the indorsement of a member bank.

Every Federal reserve bank shall have power:

(a) To deal in gold coin and bullion at home or abroad, to make loans thereon, exchange Federal reserve notes for gold, gold coin, or gold certificates, and to contract for loans of gold coin or bullion, giving therefor, when necessary, acceptable security, including the hypothecation of United States bonds or other securities which Federal reserve banks are authorized to hold:

(b) To buy and seil, at home or abroad, bonds and notes of the United States, and bills, notes, revenue bonds, and warrants with a maturity from date of purchase of not exceeding six months, issued in anticipation of the collection of taxes or in anticipation of the receipt of assured revenues by any State, county, district, political subdivision, or municipality in the continental United States, including irrigation, drainage and reclamation districts, such purchases to be made in accordance with rules and regulations prescribed by the Federal reserve board;

rules and regulations prescribed by the Federal reserve board;
(c) To purchase from member banks and to sell, with or without its indorsement, bills of exchange arising out of com-

mercial transactions, as hereinbefore defined;

(d) To establish from time to time, subject to review and determination of the Federal reserve board, rates of discount to be charged by the Federal reserve bank for each class of paper, which shall be fixed with a view of accommodating commerce and business:

(e) To establish accounts with other Federal reserve banks for exchange purposes and, with the consent of the Federal reserve board, to open and maintain banking accounts in foreign countries, appoint correspondents, and establish agencies in such countries wheresoever it may deem best for the purpose of purchasing, selling, and collecting bills of exchange, and to buy and sell with or without its indorsement, through such correspondents or agencies, bills of exchange arising out of actual commercial transactions which have not more than 90 days to run and which bear the signature of two or more responsible parties.

GOVERNMENT DEPOSITS.

SEC. 15. The moneys held in the general fund of the Treasury, except the 5 per cent fund for the redemption of outstanding national-bank notes and the funds provided in this act for the redemption of Federal reserve notes may, upon the direction of the Secretary of the Treasury, be deposited in Federal reserve banks, which banks, when required by the Secretary of the Treasury, shall act as fiscal agents of the United States; and the revenues of the Government or any part thereof may be deposited in such banks and disbursements may be made by checks drawn against such deposits.

No public funds of the Philippine Islands, or of the postal savings, or any Government funds, shall be deposited in the continental United States in any bank not belonging to the system established by this act: Provided, however, That nothing in this act shall be construed to deny the right of the Secretary of the

Treasury to use member banks as depositories.

NOTE ISSUES.

SEC. 16. Federal reserve notes, to be issued at the discretion of the Federal reserve board for the purpose of making advances to Federal reserve banks through the Federal reserve agents as hereinafter set forth and for no other purpose, are hereby authorized. The said notes shall be obligations of the United States and shall be receivable by all national and member banks and Federal reserve banks and for all taxes, customs, and other public dues. They shall be redeemed in gold on demand at the Treasury Department of the United States, in the city of Washington, D. C., or in gold or lawful money at any Federal reserve bank.

Any Federal reserve bank may make application to the local Federal reserve agent for such amount of the Federal reserve notes hereinbefore provided for as it may require. Such application shall be accompanied with a tender to the local Federal reserve agent of collateral in amount equal to the sum of the Federal reserve notes thus applied for and issued pursuant to such application. The collateral security thus offered shall be notes and bills, accepted for rediscount under the provisions of section 13 of this act, and the Federal reserve agent shall each day notify the Federal reserve board of all issues and withdrawals of Federal reserve notes to and by the Federal reserve bank to which he is accredited. The said Federal reserve board may at any time call upon a Federal reserve bank for additional security to protect the Federal reserve notes issued to it.

Every Federal reserve bank shall maintain reserves in gold or lawful money of not less than 35 per cent against its deposits and reserves in gold of not less than 40 per cent against its Federal reserve notes in actual circulation, and not offset by gold or lawful money deposited with the Federal reserve agent. Notes so paid out shall bear upon their faces a distinctive letter and serial number, which shall be assigned by the Federal reserve board to each Federal reserve bank. Whenever Federal reserve notes issued through one Federal reserve bank shall be received by another Federal reserve bank they shall be promptly returned for credit or redemption to the Federal reserve bank though which they were originally issued. No Federal reserve bank shall pay out notes issued through another under penalty of a tax of 10 per cent upon the face value of notes so paid out. Notes presented for redemption at the Treasury of the United States shall be paid out of the redemption fund and returned to the Federal reserve banks through which they were originally issued, and thereupon such Federal reserve bank shall, upon demand of the Secretary of the Treasury, reimburse such redemption fund in lawful money or, if such Federal reserve notes have been redeemed by the Treasurer in gold or gold certificates, then such funds shall be reimbursed to the extent deemed necessary by the Secretary of the Treasury in gold or gold certificates. and such Federal reserve bank shall, so long as any of its Federal reserve notes remain outstanding, maintain with the Treasurer in gold an amount sufficient in the judgment of the Secretary to provide for all redemptions to be made by the Treasurer. Federal reserve notes received by the Treasury, otherwise than for redemption, may be exchanged for gold out of the redemption fund hereinafter provided and returned to the reserve bank through which they were originally issued, or they may be returned to such bank for the credit of the United States. eral reserve notes unfit for circulation shall be returned by the Federal reserve agents to the Comptroller of the Currency for cancellation and destruction.

The Federal reserve board shall require each Federal reserve bank to maintain on deposit in the Treasury of the United States a sum in gold sufficient in the judgment of the Secretary of the Treasury for the redemption of the Federal reserve notes issued to such bank, but in no event less than 5 per cent; but such deposit of gold shall be counted and included as part of the 40 per cent reserve hereinbefore required. The board shall have the right, acting through the Federal reserve agent, to grant in whole or in part or to reject entirely the application of any Federal reserve bank for Federal reserve notes; but to the extent that such application may be granted the Federal reserve board shall, through its local Federal reserve agent, supply Federal reserve notes to the bank so applying, and such bank shall be charged with the amount of such notes and shall pay such rate of interest on said amount as may be established by the Federal reserve board, and the amount of such Federal reserve notes so issued to any such bank shall, upon delivery, together with such notes of such Federal reserve bank as may be issued under section 18 of this act upon security of United States 2 per cent Government bonds, become a first and paramount lien on all the assets of such bank.

Any Federal reserve bank may at any time reduce its liability for outstanding Federal reserve notes by depositing, with the Federal reserve agent, its Federal reserve notes, gold, gold certificates, or lawful money of the United States. Federal reserve notes so deposited shall not be reissued, except upon compliance with the conditions of an original issue.

The Federal reserve agent shall hold such gold, gold certificates, or lawful money available exclusively for exchange for the outstanding Federal reserve notes when offered by the reserve bank of which he is a director. Upon the request of the Secretary of the Treasury the Federal reserve board shall require the Federal reserve agent to transmit so much of said gold to the Treasury of the United States as may be required for the exclusive purpose of the redemption of such notes.

Any Federal reserve bank may at its discretion withdraw collateral deposited with the local Federal reserve agent for the protection of its Federal reserve notes deposited with it and shall at the same time substitute therefor other like collateral of equal amount with the approval of the Federal reserve agent under regulations to be prescribed by the Federal reserve board.

In order to furnish suitable notes for circulation as Federal reserve notes, the Comptroller of the Currency shall, under the direction of the Secretary of the Treasury, cause plates and dies to be engraved in the best manner to guard against counterfeits and fraudulent alterations, and shall have printed therefrom and numbered such quantities of such notes of the denominations of \$5, \$10, \$20, \$50, \$100, as may be required to supply the Federal reserve banks. Such notes shall be in form and tenor as directed by the Secretary of the Treasury under the

provisions of this act and shall bear the distinctive numbers of the several Federal reserve banks through which they are issued.

When such notes have been prepared, they shall be deposited in the Treasury, or in the subtreasury or mint of the United States nearest the place of business of each Federal reserve bank and shall be held for the use of such bank subject to the order of the Comptroller of the Currency for their delivery, as provided by this act.

The plates and dies to be procured by the Comptroller of the Currency for the printing of such circulating notes shall remain under his control and direction, and the expenses necessarily incurred in executing the laws relating to the procuring of such notes, and all other expenses incidental to their issue and retirement, shall be paid by the Federal reserve banks, and the Federal reserve board shall include in its estimate of expenses levied against the Federal reserve banks a sufficient amount to cover the expenses herein provided for.

The examination of plates, dies, bed pieces, etc., and regulations relating to such examination of plates, dies, etc., of national-bank notes provided for in section 5174 Revised Statutes, is hereby extended to include notes herein provided for.

Any appropriation heretofore made out of the general funds of the Treasury for engraving plates and dies, the purchase of distinctive paper, or to cover any other expense in connection with the printing of national-bank notes or notes provided for by the act of May 30, 1908, and any distinctive paper that may be on hand at the time of the passage of this act may be used in the discretion of the Secretary for the purposes of this act, and should the appropriations heretofore made be insufficient to meet the requirements of this act in addition to circulating notes provided for by existing law, the Secretary is hereby authorized to use so much of any funds in the Treasury not otherwise appropriated for the purpose of furnishing the notes aforesaid: Provided, however, That nothing in this section contained shall be construed as exempting national banks or Federal reserve banks from their liability to reimburse the United States for any expenses incurred in printing and issuing circulating notes.

Every Federal reserve bank shall receive on deposit at par from member banks or from Federal reserve banks checks and drafts drawn upon any of its depositors, and when remitted by a Federal reserve bank, checks and drafts drawn by any depositor in any other Federal reserve bank or member bank upon funds to the credit of said depositor in said reserve bank or member bank. Nothing herein contained shall be construed as prohibiting a member bank from charging its actual expense incurred in collecting and remitting funds, or for exchange sold to its patrons. The Federal reserve bank from its patrons whose checks are cleared through the Federal reserve bank and the charge which may be imposed for the service of clearing or collection rendered by the Federal reserve

The Federal reserve board shall make and promulgate from time to time regulations governing the transfer of funds and charges therefor among Federal reserve banks and their branches, and may at its discretion exercise the functions of a clearing house for such Federal reserve banks, or may designate a Federal reserve bank to exercise such functions, and may also require each such bank to exercise the functions of a clearing house for its member banks.

SEC. 17. So much of the provisions of section 5159 of the Revised Statutes of the United States and section 4 of the act of June 20, 1874, and section 8 of the act of July 12, 1882, and of any other provisions of existing statutes as require that before any national banking association shall be authorized to commence banking business it shall transfer and deliver to the Treasurer of the United States a stated amount of United States registered bonds is hereby repealed.

REFUNDING BONDS.

Sec. 18. After two years from the passage of this act, and at any time during a period of 20 years thereafter, any member bank desiring to retire the whole or any part of its circulating notes, may file with the Treasurer of the United States an application to sell for its account, at par and accrued interest, United States bonds securing circulation to be retired.

The Treasurer shall, at the end of each quarterly period, furnish the Federal reserve board with a list of such applications, and the Federal reserve board may, in its discretion, require the Federal reserve banks to purchase such bonds from the banks whose applications have been filed with the Treasurer at least 10 days before the end of any quarterly period at which the Federal reserve board may direct the purchase to be made: Provided, That Federal reserve banks shall not be permitted to

purchase an amount to exceed \$25,000,000 of such bonds in any one year, and which amount shall include bonds acquired under section 4 of this act by the Federal reserve bank: Provided fur-ther, That the Federal reserve board shall allot to each Federal reserve bank such proportion of such bonds as the capital and surplus of such bank shall bear to the aggregate capital and surplus of all the Federal reserve banks.

Upon notice from the Treasurer of the amount of bonds so sold for its account, each member bank shall duly assign and transfer, in writing, such bonds to the Federal reserve bank purchasing the same, and such Federal reserve bank shall, there-upon, deposit lawful money with the Treasurer of the United States for the purchase price of such bonds, and the Treasurer shall pay to the member bank selling such bonds any balance due after deducting a sufficient sum to redeem its outstanding notes secured by such bonds, which notes shall be canceled and permanently retired when redeemed.

The Federal reserve banks purchasing such bonds shall be permitted to take out an amount of circulating notes equal to

the par value of such bonds.

Upon the deposit with the Treasurer of the United States of bonds so purchased, or any bonds with the circulating privilege acquired under section 4 of this act, any Federal reserve bank making such deposit in the manner provided by existing law, shall be entitled to receive from the Comptroller of the Currency circulating notes in blank, registered and countersigned as provided by law, equal in amount to the par value of the bonds so deposited. Such notes shall be the obligations of the Federal reserve bank procuring the same, and shall be in form prescribed by the Secretary of the Treasury, and to the same tenor and effect as national-bank notes now provided by law. shall be issued and redeemed under the same terms and conditions as national-bank notes except that they shall no be limited to the amount of the capital stock of the Federal reserve

Upon application of any Federal reserve bank, approved by the Federal reserve board, the Secretary of the Treasury may issue, in exchange for United States 2 per cent gold bonds bearing the circulation privilege, but against which no circulation is outstanding, 1-year gold notes of the United States without the circulation privilege, to an amount not to exceed one-half of the 2 per cent bonds so tendered for exchange, and 30-year 3 per cent gold bonds without the circulation privilege for the remainder of the 2 per cent bonds so tendered: Provided, That at the time of such exchange the Federal reserve bank obtaining such 1-year gold notes shall enter into an obligation with Secretary of the Treasury binding itself to purchase from the United States for gold at the maturity of such 1-year notes, an amount equal to those delivered in exchange for such bonds, if so requested by the Secretary, and at each maturity of 1-year notes so purchased by such Federal reserve bank, to purchase from the United States such an amount of 1-year notes as the Secretary may tender to such bank, not to exceed the amount issued to such bank in the first instance, in exchange for the 2 per cent United States gold bonds; said obligation to purchase at maturity such notes shall continue in force for a period not to exceed 30 years.

For the purpose of making the exchange herein provided for, the Secretary of the Treasury is authorized to issue at par Treasury notes in coupon or registered form as he may prescribe in denominations of \$100, or any multiple thereof, bearing interest at the rate of 3 per cent per annum, payable quarterly, such Treasury notes to be payable not more than 1 year from the date of their issue in gold coin of the present standard value, and to be exempt as to principal and interest from the payment of all taxes and duties of the United States except as provided by this act, as well as from taxes in any form by or under State, municipal, or local authorities. And for the same purpose, the Secretary is authorized and empowered to issue United States gold bonds at par, bearing 3 per cent interest payable 30 years from date of issue, such bonds to be of the same general tenor and effect and to be issued under the same general terms and conditions as the United States 3 per cent bonds without the circulation privilege now issued and outstanding.

Upon application of any Federal reserve bank, approved by the Federal reserve board, the Secretary may issue at par such 3 per cent bonds in exchange for the 1-year gold notes herein provided for.

BANK RESERVES.

Sec. 19. Demand deposits within the meaning of this act shall comprise all deposits payable within 30 days, and time deposits shall comprise all deposits payable after 30 days, and all savings accounts and certificates of deposit which are subject to not less than 30 days' notice before payment.

When the Secretary of the Treasury shall have officially announced, in such manner as he may elect, the establishment of Federal reserve bank in any district, every subscribing member bank shall establish and maintain reserves as follows

(a) A bank not in a reserve or central reserve city as now or hereafter defined shall hold and maintain reserves equal to 12 per cent of the aggregate amount of its demand deposits and 5 per cent of its time deposits, as follows:

In its vaults for a period of 36 months after said date fivetwelfths thereof and permanently thereafter four-twelfths.

In the Federal reserve bank of its district, for a period of 12

months after said date, two-twelfths, and for each succeeding 6 months an additional one-twelfth, until five-twelfths have been so deposited, which shall be the amount permanently required.

For a period of 36 months after said date the balance of the reserves may be held in its own vaults, or in the Federal reserve bank, or in national banks in reserve or central reserve cities

as now defined by law.

After said 36 months' period said reserves, other than those hereinbefore required to be held in the vaults of the member bank and in the Federal reserve bank, shall be held in the vaults of the member bank or in the Federal reserve bank, or in both, at the option of the member bank.

(b) A bank in a reserve city, as now or hereafter defined, shall hold and maintain reserves equal to 15 per cent of the aggregate amount of its demand deposits and 5 per cent of its

time deposits, as follows:

In its vaults for a period of 36 months after said date sixfifteenths thereof, and permanently thereafter five-fifteenths.

In the Federal reserve bank of its district for a period of 12 months after the date aforesaid at least three-fifteenths, and for each succeeding 6 months an additional one-fifteenth, until six-fifteenths have been so deposited, which shall be the amount permanently required.

For a period of 36 months after said date the balance of the reserves may be held in its own vaults, or in the Federal reserve bank, or in national banks in reserve or central reserve

cities as now defined by law.

After said 36 months' period all of said reserves, except those hereinbefore required to be held permanently in the vaults of the member bank and in the Federal reserve bank, shall be held in its vaults or in the Federal reserve bank, or in both, at the option of the member bank.

(c) A bank in a central reserve city, as now or hereafter defined, shall hold and maintain a reserve equal to 18 per cent of the aggregate amount of its demand deposits and 5 per cent of its time deposits, as follows

In its vaults six-eighteenths thereof.

In the Federal reserve bank seven-eighteenths.

The balance of said reserves shall be held in its own vaults or in the Federal reserve bank, at its option.

Any Federal reserve bank may receive from the member banks as reserves, not exceeding one-half of each installment, eligible paper as described in section 14 properly indorsed and acceptable to the said reserve bank.

If a State bank or trust company is required by the law of its State to keep its reserves either in its own vaults or with another State bank or trust company, such reserve deposits so kept in such State bank or trust company shall be construed, within the meaning of this section, as if they were reserve deposits in a national bank in a reserve or central reserve city for period of three years after the Secretary of the Treasury shall have officially announced the establishment of a Federal reserve bank in the district in which such State bank or trust company is situate. Except as thus provided, no member bank shall keep on deposit with any nonmember bank a sum in excess of 10 per cent of its own paid-up capital and surplus. No member bank shall act as the medium or agent of a nonmember bank in applying for or receiving discounts from a Federal reserve bank under the provisions of this act except by permission of the Federal reserve board.

The reserve carried by a member bank with a Federal reserve bank may, under the regulations and subject to such penalties as may be prescribed by the Federal reserve board, be checked against and withdrawn by such member bank for the purpose of meeting existing liabilities: Provided, however, That no bank shall at any time make new loans or shall pay any dividends unless and until the total reserve required by law is fully restored.

In estimating the reserves required by this act, the net balance of amounts due to and from other banks shall be taken as the basis for ascertaining the deposits against which reserves shall be determined. Balances in reserve banks due to member banks shall, to the extent herein provided, be counted as reserves.

National banks located in Alaska or outside the continental United States may remain nonmember banks, and shall in that event maintain reserves and comply with all the conditions now provided by law regulating them; or said banks, except in the Philippine Islands, may, with the consent of the reserve board, become member banks of any one of the reserve districts, and shall, in that event, take stock, maintain reserves, and be subject to all the other provisions of this act.

SEC. 20. So much of sections 2 and 3 of the act of June 20, 1874, entitled "An act fixing the amount of United States notes, providing for a redistribution of the national-bank currency and for other purposes," as provides that the fund deposited by any national banking association with the Treasurer of the United States for the redemption of its notes shall be counted as a part of its lawful reserve as provided in the act aforesaid, is hereby repealed. And from and after the passage of this act such fund of 5 per cent shall in no case be counted by any national banking association as a part of its lawful reserve.

BANK EXAMINATIONS.

SEC. 21. Section 5240, United States Revised Statutes, is

amended to read as follows:

The Comptroller of the Currency, with the approval of the Secretary of the Treasury, shall appoint examiners who shall examine every member bank at least twice in each calendar year and oftener if considered necessary: Provided, however, That the Federal reserve board may authorize examination by the State authorities to be accepted in the case of State banks and trust companies and may at any time direct the holding of a special examination of State banks or trust companics that are stockholders in any Federal reserve bank. The examiner making the examination of any national bank, or of any other member bank, shall have power to make a thorough examination of all the affairs of the bank and in doing so he shall have power to administer oaths and to examine any of the officers and agents thereof under oath and shall make a full and detailed report of the condition of said bank to the Comptroller of the Currency.

The Federal reserve board, upon the recommendation of the Comptroller of the Currency, shall fix the salaries of all bank examiners and make report thereof to Congress. The expense of the examinations herein provided for shall be assessed by the Comptroller of the Currency upon the banks examined in proportion to assets or resources held by the banks upon the

dates of examination of the various banks.

In addition to the examinations made and conducted by the Comptroller of the Currency, every Federal reserve bank may, with the approval of the Federal reserve agent or the Federal reserve board, provide for special examination of member banks within its district. The expense of such examinations shall be borne by the bank examined. Such examinations shall be so conducted as to inform the Federal reserve bank of the condition of its member banks and of the lines of credit which are being extended by them. Every Federal reserve bank shall at all times furnish to the Federal reserve board such information as may be demanded concerning the condition of any member bank within the district of the said Federal reserve

No bank shall be subject to any visitatorial powers other than such as are authorized by law, or vested in the courts of justice or such as shall be or shall have been exercised or directed by Congress, or by either House thereof or by any committee of

Congress or of either House duly authorized.

The Federal reserve board shall, at least once each year, order an examination of each Federal reserve bank, and upon joint application of 10 member banks the Federal reserve board shall order a special examination and report of the con-

dition of any Federal reserve bank.

SEC. 22. No member bank or any officer, director, or employee thereof shall hereafter make any loan or grant any gratuity to any bank examiner. Any bank officer, director, or employee violating this provision shall be deemed guilty of a misdemeanor and shall be imprisoned not exceeding one year or fined not more than \$5,000, or both; and may be fined a further sum equal to the money so loaned or gratuity given. Any examiner accepting a loan or gratuity from any bank examined by him or from an officer, director, or employee thereof shall be deemed guilty of a misdemeanor and shall be imprisoned not exceeding one year or fined not more than \$5,000, or both; and may be fined a further sum equal to the money so loaned or gratuity given; and shall forever therebe disqualified from holding office as a national-bank examiner. No national-bank examiner shall perform any other service for compensation while holding such office for any bank or officer, director, or employee thereof.

Other than the usual salary or director's fee paid to any officer, director, or employee of a member bank and other than a reasonable fee paid by said bank to such officer, director, or employee for services rendered to such bank, no officer, director, employee, or attorney of a member bank shall be a beneficiary of or receive, directly or indirectly, any fee, commission, gift, or other consideration for or in connection with any transaction or business of the bank. No examiner, public or private, shall disclose the names of borrowers or the collateral for loans of a member bank to other than the proper officers of such bank without first having obtained the express permission in writing from the Comptroller of the Currency, or from the board of directors of such bank, except when ordered to do so by a court of competent jurisdiction, or by direction of the Congress of the United States, or of either House thereof, or any committee of Congress or of either House duly authorized. Any person violating any provision of this section shall be punished by a fine of not exceeding \$5,000 or by imprisonment not exceeding one year, or both.

Except as provided in existing laws, this provision shall not take effect until 60 days after the passage of this act.

SEC. 23. The stockholders of every national banking association shall be held individually responsible for all contracts, debts, and engagements of such association, each to the amount of his stock therein, at the par value thereof in addition to the amount invested in such stock. The stockholders in any national banking association who shall have transferred their shares or registered the transfer thereof within 60 days next before the date of the failure of such association to meet its obligations, or with knowledge of such impending failure, shall be liable to the same extent as if they had made no such transfer, to the extent that the subsequent transferee fails to meet such liability; but this provision shall not be construed to affect in any way any recourse which such shareholders might otherwise have against those in whose names such shares are registered at the time of such failure.

LOANS ON FARM LANDS.

SEC. 24. Any national banking association not situated in a central reserve city may make loans secured by improved and unencumbered farm land, situated within its Federal reserve district, but no such loan shall be made for a longer time than five years, nor for an amount exceeding 50 per cent of the actual value of the property offered as security. Any such bank may make such loans in an aggregate sum equal to 25 per cent of its capital and surplus or to one-third of its time deposits; and such banks may continue hereafter as heretofore to receive

time deposits and to pay interest on the same.

The Federal reserve board shall have power from time to time to add to the list of cities in which national banks shall not be permitted to make loans secured upon real estate in the

manner described in this section.

FOREIGN BRANCHES.

Sec. 25. Any national banking association possessing a capital and surplus of \$1,000,000 or more may file application with the Federal reserve board, upon such conditions and under such regulations as may be prescribed by the said board, for the purpose of securing authority to establish branches in foreign countries or dependencies of the United States for the furtherance of the foreign commerce of the United States, and to act, if required to do so, as fiscal agents of the United States. Such application shall specify, in addition to the name and capital of the banking association filing it, the place or places where the banking operations proposed are to be carried on, and the amount of capital set aside for the conduct of its foreign business. The Federal reserve board shall have power to approve or to reject such application if, in its judgment, the amount of capital proposed to be set aside for the conduct of foreign business is inadequate, or if for other reasons the granting of such application is deemed inexpedient.

Every national banking association which shall receive authority to establish foreign branches shall be required at all times to furnish information concerning the condition of such branches to the Comptroller of the Currency upon demand, and the Federal reserve board may order special examinations of the said foreign branches at such time or times as it may deem best. Every such national banking association shall conduct the accounts of each foreign branch independently of the accounts of other foreign branches established by it and of its home office, and shall at the end of each fiscal period transfer to its general ledger the profit or loss accruing at each branch as a separate

SEC. 26. All provisions of law inconsistent with or superseded by any of the provisions of this act are to that extent and to that extent only hereby repealed: Provided, Nothing in this act contained shall be construed to repeal the parity provision or provisions contained in an act approved March 14, 1900, entitled "An act to define and fix the standard of value, to maintain the parity of all forms of money issued or coined by the United States, to refund the public debt, and for other purposes," and the Secretary of the Treasury may for the purpose of maintaining such parity and to strengthen the gold reserve, borrow gold on the security of United States bonds authorized by section 2 of the act last referred to or for one-year gold notes bearing interest at a rate of not to exceed 3 per cent per annum, or sell the same if necessary to obtain gold. When the funds of the Treasury on hand justify, he may

purchase and retire such outstanding bonds and notes. Sec. 27. The provisions of the act of May 30, 1908, authorizing. national currency associations, the issue of additional nationalbank circulation, and creating a National Monetary Commission, which expires by limitation under the terms of such act on the 30th day of June, 1914, are hereby extended to June 30, 1915, and sections 5153, 5172, 5191, and 5214 of the Revised Statutes of the United States, which were amended by the act of May 30, 1908, are hereby reenacted to read as such sections read prior to May 30, 1908, subject to such amendments or modifications as are prescribed in this act: Provided, however, That section 9 of the act first referred to in this section is hereby amended so as to change the tax rates fixed in said act by making the portion applicable thereto read as follows:

National banking associations having circulating notes secured otherwise than by bonds of the United States, shall pay for the first three months a tax at the rate of 3 per cent per annum upon the average amount of such of their notes in circulation as are based upon the deposit of such securities, and afterwards an additional tax rate of one-half of 1 per cent per annum for each month until a tax of 6 per cent per annum is reached, and thereafter such tax of 6 per cent per annum upon

the average amount of such notes.

SEC. 28. Section 5143 of the Revised Statutes is hereby amended and reenacted to read as follows: Any association formed under this title may, by the vote of shareholders owning two-thirds of its capital stock, reduce its capital to any sum not below the amount required by this title to authorize the formation of associations; but no such reduction shall be allowable which will reduce the capital of the association below the amount required for its outstanding circulation, nor shall any reduction be made until the amount of the proposed reduction has been reported to the Comptroller of the Currency and such reduction has been approved by the said Comptroller of the Currency and by the Federal reserve board, or by the organization committee pending the organization of the Federal reserve

Sec. 29. If any clause, sentence, paragraph, or part of this act shall for any reason be adjudged by any court of competent jurisdiction to be invalid, such judgment shall not affect, impair, or invalidate the remainder of this act, but shall be confined in its operation to the clause, sentence, paragraph, or part thereof directly involved in the controversy in which such judgment shall have been rendered.

SEC. 30. The right to amend, alter, or repeal this act is

hereby expressly reserved.

ROBT. L. OWEN, J. A. O'GORMAN, JAS. A. REED, ATLEE POMERENE, J. F. SHAFROTH, HENRY F. HOLLIS,

Managers on the part of the Senate. CARTER GLASS, CHARLES A. KORBLY, Managers on the part of the House.

Mr. OWEN. I ask that the report lie on the table and be

The VICE PRESIDENT. The report will lie on the table and be printed.

PECESS.

Mr. KERN. Mr. President, I move that the Senate take a

recess until 9 o'clock this evening.
The motion was agreed to, and (at 5 o'clock and 45 minutes p. m.) the Senate took a recess until 9 o'clock p. m.

EVENING SESSION.

The Senate reassembled at 9 o'clock p. m. EXECUTIVE SESSION.

Mr. OVERMAN. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 37 minutes spent in executive session the doors were reopened.

MISSISSIPPI RIVER FLOODS.

Mr. VARDAMAN. I have taken from the report of the Mississippi River Commission for 1912 a description of the flood of 1912 of the Mississippi River, the changes made in the river bed, the outlets, levees, and flood losses, which I desire to have printed as a public document. I ask that the article be referred to the Committee on Printing with the request.

The VICE PRESIDENT. If there be no objection, that action

will be taken.

BANKING AND CURRENCY.

Mr. GALLINGER. Mr. President, I should like to inquire of the chairman of the Banking and Currency Committee as to the probability that the conference report on the currency bill will reach the Senate this evening, and at what hour.

Mr. OWEN. The conference report should reach the Senate

between 10 and 11 o'clock.

Mr. GALLINGER. Then, I will venture to inquire further, if the Senator is at liberty to state, what the procedure probably will be. Will the report go over until to-morrow?

Mr. OWEN. We should like to have a unanimous

We should like to have a unanimous-consent agreement to dispose of the matter at some convenient hour to-

morrow-say, at 12 o'clock or at 1 or 2.

Mr. GALLINGER. I was thinking of my own comfort in making the inquiry. I assumed, without having had a consultation with any other Senator, that the report would not be seriously taken up for discussion this evening.

Mr. OWEN. Not unless the unanimous consent is refused. Mr. GALLINGER. I imagine it will not be refused. I can hardly conceive of its being refused, provided satisfactory arrangements can be made for proper debate, which doubtless

Mr. OWEN. I ask for unanimous consent to dispose of the conference report on the currency bill by a vote at 2 o'clock to-morrow

Mr. WILLIAMS. Meeting at 10 o'clock and beginning to

vote at 2 o'clock?

Mr. OWEN. Beginning at 10 o'clock to-morrow morning, and having the final vote at 2.

Mr. GALLINGER. Would the Senator make it not later

Mr. OWEN. We are willing to give three-fourths of the four hours to the opposition, leaving the time to be controlled by the Senator from Minnesota [Mr. Nelson], who is the senior Republican conferee.

Mr. GALLINGER. I somewhat question the propriety of adopting the methods of the other House, and dividing up time. I somewhat question the propriety of

Still, I shall not object.

Mr. OWEN. We can have a gentlemen's agreement without

any record of the matter.

Mr. GALLINGER. That is right; without having it stated in the agreement. The Senator will make it not later than 2 o'clock?

Mr. OWEN. Not later than 2 o'clock.

Mr. GALLINGER. I hope consent will be granted.

Mr. THOMAS. Mr. President, do I understand that that divides the time so that only 1 hour will be taken on this side, and 3 hours on the other side?

Mr. GALLINGER. I should object if that were to go into the unanimous-consent agreement, as a part of it; but it seems to me the chairman can arrange that matter with the other members of the conference committee.

Mr. THOMAS. I would suggest 4 o'clock to-morrow after-noon, instead of 2 o'clock. ["No!" "No!"]

Mr. JAMES. Our train leaves here at 3 o'clock. Mr. THOMAS. I am not going to take any train. worrying about the train myself. I have been here all summer. I do not think this report should go through without some debate from some of us on this side who are not satisfied

Mr. BRISTOW. I desire to say that in the preliminary conferences that have been had in the Chamber during the last hour I suggested that we should vote not later than 4 o'clock to-morrow afternoon. Then it was suggested that that would give six hours for debate, approximately three hours on each side, as the debate would usually run. Then the suggestion was made from the other side that they did not care to occupy much time and that if this side did not want to use that much time the hour of voting might be moved up.

So far as I am concerned, I do not know how much time will

be used. I know that a number of Senators wish to speak, but not at much length. Personally, I should prefer that we meet to-morrow at 10 o'clock and get through as quickly as we can. That would suit me better. If we can get through by 12, we will be through; if we can not, we will go along just as rapidly as possible. That course is always more satisfactory to me, and it would be now, but I am amenable to suggestions.

Mr. OWEN. I suggested that the vote be taken not later than 2 o'clock in order to allow the matter to be concluded at the convenience of the Senate if it should prove to be desirable to take a vote earlier than 2; and I propose meeting at 10 o'clock in the morning, so as to give an abundance of time.

The VICE PRESIDENT. The Secretary will state the pro-

posed agreement.

The Secretary. It is agreed by unanimous consent that on to-morrow, December 23, 1913, immediately upon the approval of the Journal, the Senate will proceed to the consideration of the conference report on the bill (H. R. 7837) to provide for the establishment of Federal reserve banks, etc., and that at not later than 2 o'clock p. m. the Senate will proceed. without further debate, to vote upon the question of the adoption of the said conference report.

Mr. WILLIAMS. That request does not provide for the hour

of meeting.

Mr. KERN. A clause can be added stating that we shall meet at 10 o'clock.

Mr. GALLINGER. We do meet at 10.

The VICE PRESIDENT. It is the understanding of the Chair that the regular hour of meeting is 10 o'clock.

Mr. KERN. But we changed it the other day.

Mr. GALLINGER. We changed it for only one day, however. The VICE PRESIDENT. It was changed for one day, but the understanding of the Chair is that the former order has not yet been set aside. Ten o'clock is the regular time of meeting.

Mr. MARTIN of Virginia. It is easy enough to add at the end of the order as read, "and that the Senate shall meet at 10 o'clock a. m. to-morrow."

The VICE PRESIDENT. Is there any objection to the pro-

posed agreement?

Mr. BRISTOW. Mr. President, I know there is objection to incorporating in the agreement an understanding that this side shall have three hours of the time to debate the subject tomorrow. Subject to that understanding, however, I have no objection to it.

Mr. OWEN. The Senator, in referring to "this side," means those opposed to the report. The Senator from Colorado [Mr. THOMAS] opposes the omission of the provision for guarantee of bank deposits, and would like to be heard.

Mr. CLARK of Wyoming. He is not opposed to the report,

however?

Mr. OWEN. He opposes the omission of that feature.

Mr. CLARK of Wyoming. But he is not opposed to the conference report?

I do not know what his attitude is upon that subject. I understand he is opposed to dropping the provision for the guarantee of bank deposits.

Mr. BRANDEGEE. I should like to have the proposed unani-

mous-consent agreement restated.

The VICE PRESIDENT. The Secretary will restate it.

The Secretary. It is agreed by unanimous consent that on to-morrow, December 23, 1913, the Senate will meet at 10 o'clock a. m.; that immediately upon the approval of the Journal the Senate will proceed to the consideration of the conference report on the bill (H. R. 7837) to provide for the establishment of Federal reserve banks, etc., and that at not later than 2 o'clock p. m. the Senate will proceed without further debate to vote upon the question of the adoption of the said conference report.

The VICE PRESIDENT. Is there any objection?

Mr. BRISTOW. Mr. President, I do not want to agree to that until we have an understanding with regard to the length of the debate. If there is opposition to the report on the other side of the Chamber, I do not want that time to be taken out of the time we shall need on this side. I am willing to agree to an adjournment not later than 4 o'clock, and to get through

with the report as quickly as we can.

Mr. OWEN. I will say that, as far as the chairman of the committee is concerned, he would not ask for more than one

hour of the time for those who are with him.

VICE PRESIDENT. Is there any objection to the unanimous-consent agreement?

Mr. BRISTOW. Mr. President, I temporarily object. I do not wish to make a permanent objection.

Mr. BRANDEGEE. If a little time is given to consider the matter, does not the Senator from Oklahoma think that, by a conference with Senators on his side of the Chamber, he can

give some assurance about the total amount of time they will take?

Mr. OWEN. I can say now that, as far as our side is concerned, a vote at 3 o'clock will allow all the time the Senator from Colorado [Mr. Thomas] will want. I am willing to ask that the hour for voting shall be fixed at 3 o'clock.

Mr. BRANDEGEE. Of course, the Senator from Colorado will not want all the time to be taken by the other side?

Mr. OWEN. No; I hardly think he will, but he is willing to have the vote taken at 3 o'clock.

Mr. JAMES. That will give three hours for the other side.
Mr. BRANDEGEE. The first proposition would have met
favor upon this side, I understand, except that the Senator
from New Hampshire did not like to have a unanimous-consent agreement to an absolute division of time in the Senate.

Mr. OWEN. I understand.

Mr. BRANDEGEE. That aroused the opposition of the Senator from Kansas [Mr. Bristow], because he wanted some assurance that he should have sufficient time to-morrow. If the Senator from Oklahoma could give some assurance about the total amount of time required on the other side, I think the Senator from Kansas might take the assurance without having it incorporated in the unanimous-consent agreement.

Mr. BRISTOW. Yes; I am willing to take the statement of

the chairman of the committee.

Mr. BRANDEGEE. Can not the Senator from Oklahoma, so far as he can control the matter, agree that his side shall not take over two hours out of the five hours, and give this side

Mr. OWEN. The suggestion is made by various Senators who live in the South that unless they can leave the Senate Chamber not later than half past 2 it will cause them a delay of a day; they will not be able to get the train leaving here at 3 o'clock. Can we not meet at 9.30 in the morning?

Mr. WILLIAMS. No; let us meet at 10.

Mr. OWEN. I ask that the agreement be to take a vote not later than half past 2.

Mr. GALLINGER. Yes; try it at half past 2. The VICE PRESIDENT. The Secretary will restate the proposed agreement.

The Secretary. It is agreed by unanimous consent that on to-morrow, December 23, 1913, the Senate will meet at 10 o'clock a. m.; that immediately upon the approval of the Journal the Senate will proceed to the consideration of the conference re-port on the bill (H. R. 7837) to provide for the establishment of Federal reserve banks, etc.; and that at not later than 2.30 o'clock p. m. the Senate will proceed without further debate to vote upon the question of the adoption of the said conference

The VICE PRESIDENT. Is there any objection? The Chair

hears none, and unanimous consent is given.

RECESS.

Mr. KERN. I move that the Senate take a recess until 11.15 o'clock to-night.

The motion was agreed to, and (at 10 o'clock p. m.) the Senate took a recess until 11.15 o'clock p. m., when it reassembled.

PRESIDENTIAL APPROVAL.

A message from the President of the United States, by Mr. Latta, executive clerk, announced that the President had on this day approved and signed an act (S. 2689) amending an act entitled "An act to increase the limit of cost of certain public buildings, to authorize the enlargement, extension, remodeling, or improvement of certain public buildings, to authorize the erection and completion of public buildings, to authorize the purchase of sites for public buildings, and for other purposes, approved March 4, 1913.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 7837) to provide for the establishment of Federal reserve banks, to furnish an elastic currency, to afford means of rediscounting commercial paper, to establish a more effective supervision of banking in the United States, and for other pur-

The message also announced that the House had agreed to a concurrent resolution providing that when the two Houses adjourn December 23, 1913, they stand adjourned until 12 o'clock meridian, Monday, January 12, 1914, in which it requested the concurrence of the Senate.

The message further communicated to the Senate the intelligence of the death of Hon. IRVIN ST. CLAIR PEPPER, late a

Representative from the State of Iowa, and transmitted resolutions of the House thereon.

LAWS OF ALASKA.

The VICE PRESIDEN's laid before the Senate the following message from the President of the United States, which was read and, with the accompanying paper, referred to the Committee on Territories:

To the Senate and House of Representatives:

In accordance with section 20 of the act of Congress entitled "An act to create a legislative assembly in the Territory of Alaska, to confer legislative power thereon, and for other purposes," approved August 24, 1912, I transmit herewith a bound volume of the session laws, duly authenticated, containing the acts and resolutions of the first session of the 1913 Territorial Legislature of Alaska.

WOODROW WILSON.

THE WHITE House, December 22, 1913.

HOLIDAY RECESS.

The VICE PRESIDENT laid before the Senate the following concurrent resolution (H. Con. Res. 26) of the House of Representatives, which was read and referred to the Committee on Appropriations:

Resolved by the House of Representatives (the Senate concurring). That when the two Houses adjourn December 23, 1913, they stand adjourned until 12 o'clock meridian on Monday, January 12, 1914.

BANKING AND CURRENCY (S. DOC. NO. 835).

Mr. OWEN. I ask that the conference report on House bill 7837 be printed for the information of the Senate.

The VICE PRESIDENT. Is there any objection? The Chair hears none, and it is so ordered.

EXECUTIVE SESSION.

Mr. BACON. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After eight minutes spent in executive session the doors were reopened, and (at 11 o'clock and 27 minutes p. m.) the Senate adjourned until to-morrow, Tuesday, December 23, 1913, at 10 o'clock a. m.

NOMINATIONS.

Executive nominations received by the Senate December 22, 1913.

COLLECTORS OF INTERNAL REVENUE.

Fred C. Kirkendall, of Pennsylvania, to be collector of internal revenue for the ninth district of Pennsylvania, in place of Henry

L. Hershey, superseded.

Isaac R. Strouse, of Indiana, to be collector of internal revenue for the seventh district of Indiana, in place of Charles G.

Covert, superseded.

Peter J. Kruyer, of Indiana, to be collector of internal revenue for the sixth district of Indiana, in place of Elam H. Neal, superseded.

PROMOTIONS IN THE ARMY.

INFANTRY ARM.

First Lieut. Morris M. Keck, Twelfth Infantry, to be captain from December 21, 1913, vice Capt. Frank H. Kalde, Eighteenth Infantry, dismissed December 20, 1913.

Second Lieut. George R. Harrison, Twenty-fifth Infantry, to be first lieutenant from December 21, 1913, vice First Lieut. Morris M. Keck, Twelfth Infantry, promoted.

CAVALRY ARM.

Second Lieut. Augustin M. Prentiss, Thirteenth Cavalry, to be second lieutenant in the Coast Artillery Corps, with rank from October 4, 1913.

RECEIVER OF PUBLIC MONEYS.

H. Clay Sharkey, of Jackson, Miss., to be receiver of public moneys at Jackson, Miss., vice Thomas V. McAllister, resigned.

REGISTER OF THE LAND OFFICE.

William F. Cummins, of Yazoo City, Miss., to be register of the land office at Jackson, Miss., vice John J. White, whose term will expire January 5, 1914.

POSTMASTERS.

ALABAMA.

Robert Boyd to be postmaster at Dothan, Ala., in place of Byron Trammell, removed.

Jesse B. Hearin to be postmaster at Demopolis, Aia., in place

of Buckner L. Garber, deceased.

B. L. Perry to be postmaster at Union Springs, Ala., in place of Sterling P. Rainer, resigned.

John C. Routon to be postmaster at Luverne, Ala., in place of James W. McNeill, removed.

Dora A. Speer to be postmaster at Ashland, Ala., in place of James L. Carwile, resigned.

ARIZONA.

A. T. Pancrazi to be postmaster at Yuma, Ariz., in place of Claus Y. Meeden, deceased.

ARKANSAS.

William E. Brown to be postmaster at Nashville, Ark., in place of Edward I. Stevens, removed.

A. B. McKinney to be postmaster at Corning, Ark., in place of Charles T. Bloodworth, resigned.

G. R. Pendleton to be postmaster at Junction City, Ark., in place of Charles L. Jones, removed. H. C. Pernot to be postmaster at Van Buren, Ark., in place of John L. Smith, resigned.

Levi B. Sharp to be postmaster at Black Rock, Ark., in place of S. A. Isaminger, deceased.

CALIFORNIA.

A. G. Sawin to be postmaster at Loyalton, Cal., in place of

G. E. Arnold, resigned.

F. V. Dewey to be postmaster at Hanford, Cal., in place of William A. Long. Incumbent's commission expired December 16, 1913.

E. E. Drees to be postmaster at Petaluma, Cal., in place of James E. Olmsted. Incumbent's commission expired February 4, 1912.

George T. Fissell to be postmaster at Davis, Cal., in place of J. J. Gallager. Incumbent's commission expired January 30, 1913.

Emily Gavin to be postmaster at Concord, Cal., in place of P. M. Soto. Incumbent's commission expired January 26, 1913. T. S. Kemble to be postmaster at Alturas, Cal., in place of

James T. Negley. Incumbent's commission expired December 16, 1913.

R. W. Lockridge to be postmaster at Delano, Cal., in place of Guy S. Turner, deceased.

Flora B. Reynolds to be postmaster at Mill Valley, Cal., in place of Flora B. Reynolds. Incumbent's commission expired March 29, 1913.

Walter Staley to be postmaster at Selma, Cal., in place of George W. Holmes. Incumbent's commission expires January 12 1914.

COLORADO.

E. C. McAnelly to be postmaster at Fort Collins, Colo., in place of Marshall Moore. Incumbent's commission expired February 9, 1913.

Thomas McCunniff to be postmaster at La Jara, Colo., in

place of Mahala E. Mosier, removed.

Nephi O. Palmer to be postmaster at Farmington, Utah. Office became presidential October 1, 1913.

J. C. Twaddle to be postmaster at Sunnyside, Utah, in place of Albert E. Hopkinson. Incumbent's commission expired June 16, 1913,

VERMONT.

Frank A. Burditt to be postmaster at Putney, Vt., in place of Lyman P. Bailey. Incumbent's commission expired December

Herbert S. King to be postmaster at Manchester Depot, Vt. Office became presidential October 1, 1913.

Carl A. Mattison to be postmaster at Manchester Center, Vt. Office became presidential October 1, 1913.

VIRGINIA.

Charles A. Funkhouser to be postmaster at Dayton, Va., in place of John W. Thompson. Incumbent's commission expired December 16, 1913.

William C. Menefee to be postmaster at Rockymount, Va., in place of Beverly A. Davis, resigned.

Hay T. Thornton to be postmaster at Richmond, Va., in place of Edgar Allan, jr. Incumbent's commission expired December 16, 1913.

WASHINGTON.

Ethel R. Hanks to be postmaster at Port Orchard, Wash., in place of W. T. Pitcher, resigned.

James H. Schneckloth to be postmaster at Pomeroy, Wash., in place of T. B. Keirnan, deceased.

WEST VIRGINIA.

A. D. Smith, jr., to be postmaster at Fayetteville, W. Va., in place of Charles A. Goddard. Incumbent's commission expired December 16, 1913.

Jesse D. Wilson to be postmaster at Fairview, W. Va., in place of Zephaniah J. Martin, deceased.

WISCONSIN.

H. J. Kinne to be postmaster at Amery, Wis., in place of John G. Burman. Incumbent's commission expired February

9, 1913.
T. D. Pluck to be postmaster at Horicon, Wis., in place of Edward C. Rehfeld. Incumbent's commission expired December 21, 1913.

Michael J. Rice to be postmaster at Kewaunee, Wis., in place of Albert B. Leyse, resigned.

Frank B. Schutz to be postmaster at Milwaukee, Wis., in place of David C. Owen, removed.

A. T. Swedborg to be postmaster at Prentice, Wis., in place of Frank J. Salter. Incumbent's commission expired February 9, 1913.

WYOMING.

R. J. McGinnis to be postmaster at Cody, Wyo., in place of Frank O. Thompson. Incumbent's commission expired December 16, 1913.

CONFIRMATIONS.

Executive nominations confirmed by the Senate December 22, 1913. MINISTERS.

George Fred Williams to be envoy extraordinary and minister plenipotentiary to Greece and Montenegro.

Brand Whitlock to be envoy extraordinary and minister plenipotentiary to Belgium.

CONSULS.

Ezra M. Lawton to be consul at Tegucigalpa, Honduras. Clarence Carrigan to be consul at Grenoble, France.

ASSISTANT APPRAISER OF MERCHANDISE.

George W. Wolf to be assistant appraiser of merchandise in the district of New York.

COLLECTORS OF INTERNAL REVENUE.

Paul A. Hemmy to be collector of internal revenue for the first district of Wisconsin.

Peter J. Kruyer to be collector of internal revenue for the sixth district of Indiana.

Isaac R. Strouse to be collector of internal revenue for the seventh district of Indiana.

UNITED STATES ASSAYER.

Charles Gammon to be assayer in charge of the United States assay office at Salt Lake City, Utah.

SUPERVISING STEAMBOAT INSPECTOR.

Eugene E. O'Donnell, of Massachusetts, to be supervising inspector, fifth district, Steamboat-Inspection Service, vice John D. Sloane, resigned.

PROMOTION IN THE REVENUE-CUTTER SERVICE.

Third Lieut. Roy Ackerman Bothwell to be second lieutenant in the Revenue-Cutter Service.

UNITED STATES ATTORNEYS.

John W. Preston to be United States attorney for the northern district of California.

James L. McClear to be United States attorney, district of Idaho.

PROMOTIONS IN THE ARMY.

CORPS OF ENGINEERS.

Maj. Charles Keller to be lieutenant colonel.

INFANTRY ARM.

Maj. André W. Brewster to be lieutenant colonel.

Capt. John Howard to be major.
First Lieut. William H. Patterson to be captain.
First Lieut. Leonard J. Mygatt to be captain.
First Lieut. Elliott M. Norton to be captain.

Second Lieut. Bruce B. Buttler to be first lieutenant. Second Lieut. Evan E. Lewis to be first lieutenant. Second Lieut. Paul A. Larned to be first lieutenant. Second Lieut. Seth W. Scofield to be first lieutenant.

Maj. John C. Waterman to be lieutenant colonel. FIELD ARTILLERY ARM.

First Lieut. Henry S. Kilbourne, jr., to be captain. Second Lieut, Albert K. C. Palmer to be first lieutenant. CHAPLAIN.

Rev. John E. Rochford to be chaplain with the rank of first lieutenant.

PROMOTIONS AND APPOINTMENTS IN THE NAVY.

Lieut. (Junior Grade) Garrett K. Davis to be a lieutenant. Norman M. McClelland to be an assistant surgeon in the Medical Reserve Corps.

Assistant Civil Engineer Kirby Smith to be a civil engineer. Assistant Civil Engineer David G. Copeland to be an assistant civil engineer (junior grade).

Lieut. (Junior Grade) John A. Monroe to be a lieutenant. Lieut. (Junior Grade) William F. Newton to be a lieutenant. Ruskin M. Lhamon to be an assistant surgeon in the Medical Reserve Corps.

Jerome M. Lynch to be an assistant surgeon in the Medical

Reserve Corps.

Naval Constructor Horatio G. Gillmor to be a naval constructor, with rank of commander.

Medical Inspector George B. Wilson to be a medical director. Medical Inspector Charles F. Stokes to be a medical director. Surg. Sheldon G. Evans to be a medical inspector.

RECEIVERS OF PUBLIC MONEYS.

Ashley G. Dawley to be receiver of public moneys at Elko, Nev.

Fred A. King to be receiver of public moneys at Cass Lake, Minn.

Gratton D. Little to be receiver of public moneys at Eureka, Cal.

REGISTERS OF LAND OFFICES.

John E. Robins to be register of the land office at Elko, Nev. Mrs Mary Wolfe Dargin to be register of the land office at Denver, Colo

Peter M. Ringdal to be register of the land office at Crookston, Minn.

A. G. Swindlehurst to be register of the land office at Cass Lake, Minn.

POSTMASTERS. ALASKA.

Albert Wile, Iditarod.

CALIFORNIA.

J. W. Heard, Oilcenter.

CONNECTICUT.

Dennis C. Murphy, Taftville.

ILLINOIS.

Margaret Keegan, Loda.

MASSACHUSETTS.

Thomas H. Hackett, Westboro.

MICHIGAN.

Edwin S. Noble, Elk Rapids.

MINNESOTA.

Bernard P. Eagan, Spooner. Joseph Huelskamp, Gaylord. T. F. Oneill, Gilbert. Axel Ringborg, Bagley William F. Roche, Lakeville.

James J. McCarthy, Greeley.

NEW JERSEY.

Edward F. Higgins, Bloomfield.

WISCONSIN.

Simon Skroch, Independence.

WITHDRAWAL.

Executive nomination withdrawn December 22, 1913.

POSTMASTER.

ARKANSAS.

C. A. Harris to be postmaster at Junction City, in the State of Arkansas.

HOUSE OF REPRESENTATIVES.

Monday, December 22, 1913.

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the fol-

lowing prayer:

O Thou Infinite, Eternal, whose footsteps may be traced on land and sky and sea; whose creative and re-creative hand, guided by infinite wisdom, power, and goodness, has left its impress on everything that is. All that we think or do are but imperfect imitations of what Thou hast done to perfection. The architect, the sculptor, the painter, the musician, the poet finds his model and receives his inspiration in the works of Thy hands. The real scientist, philosopher, statesman, philan-thropist, teacher, all are students at Thy feet, and happy is the man who catches truth as it falls from Thy lips. In the thunderings of Sinai, in the Sermon on the Mount, in the parables of the Master, in the love poured out on Calvary is the heart of God writ in characters of living light. May we read with undimmed eyes, hear with unstopped ears, and feel the thrill of Thy presence in our hearts, and departing leave behind us footprints on the sands of time to the honor and glory of Thy holy name. And now, O Father, Thou hast touched deeply our hearts in the death of one of our Members, comfort us, and be especially near to his stricken family, inspire them with the hope of the immortality of the soul, that they may look forward to an everlasting reunion in the realms of joy and happiness. In His name. Amen.

The Journal of the proceedings of Saturday, December 20,

1913, was read and approved.

QUESTION OF PERSONAL PRIVILEGE.

Mr. JOHNSON of Kentucky. Mr. Speaker, I rise to a question of personal privilege.

The SPEAKER. The gentleman will state it.

Mr. JOHNSON of Kentucky. Mr. Speaker, day before yesterday the Washington Times contained, in substance, under large headlines which extended entirely across the front page, the bold statement that certain interests in the District of Columbia had effected an organization in order to defeat me and other Members of this House who would not do their bidding.

Very recently the whole country awoke one morning to find that a gigantic conspiracy was abroad in the land to defeat Members of Congress for reelection who were unwilling to be-tray their constituents that a monster "trust" might continue to extort from the people of the whole United States. That conspiracy was organized for the purpose of fixing an exorbitant price upon practically all articles manufactured in the United States. These articles included hats, clothing, shoes, housebuilding material, household effects, and even the implements with which the soil is cultivated in order that our people may be fed.

From the sworn admissions of those who were brought before an investigating committee of this House we learned that the now infamously notorious Mulhall was sent from State to State of this Union to find some man willing to make the race for Congress upon money furnished by him, against such Members of Congress as would not yield to the demands made upon them by the conspirators allied with Mulhall. For years they kept the operations of this organization secret. But now, Mr. Speaker, we are boldly and defiantly told by the Washington Times, a paper which has been vilifying me and other Members of this House who have attempted and are attempted. of this House, who have attempted and are attempting to stand as a barrier between the Treasury of the United States and those here at Washington who would scrape it to the very bottom, that unless I and they would stand aside we are to be defeated for reelection.

That paper, more desperate than the others, just at the time when the District appropriation bill was under consideration, through which its patrons get the money with which to pay their taxes; money with which to build sidewalks and driveways in front of their houses; money with which to send their children to school; money with which to buy loys and procure amusements for their children; money with which to build auto-mobile roads through great parks of hundreds and even thousands of acres in extent; money with which to build engine houses and buy fire engines for sections of the District where there are almost no houses; money with which to build asphalt streets for those who would convert the primeval forests and cornfields into city lots 7 and 8 miles from the Capitol building; money with which to put electric or gas lights upon the rural mail routes in the District of Columbia, as well as money with which to pay Washington papers for carrying advertisements of proceedings by which the Washingtonian is to be paid for the very land taken upon which driveways and sidewalks are to be built, in order that his undeveloped holdings may be brought into market; that paper, I say, just at that momentous time threatens to defeat me and others unless we desist in our efforts to keep plundering arms out of the Treasury of our constituents. Copies of that paper, with its threatening headlines, were brought upon this floor, bearing the news that a gigantic and powerful organization was forming almost at the very doors of this Chamber, to defeat for reelection those who dared vote in favor of saving the Public Treasury from pillage at the hands of the organization, the members of which are patrons of this paper.

I charge, Mr. Speaker, that I, as a representative of the people who sent me here, have been menaced even in this Chamber. I further charge, Mr. Speaker, that other Members of this body, in the same way, upon the floor of this House, have been challenged in the performance of their constitutional duties.

Mr. Speaker, the very first vote taken upon any feature of the District of Columbia appropriation bill after the appearance of that paper in this Hall was taken upon an amendment offered by me, through which it was proposed to take away the public money with which streets were to be paved for those who composed the menacing organization described by that paper. That vote disclosed the eventful fact that only 62 Members were left in the Chamber out of 355 who had answered to the call of their names but a short while before.

A preceding issue of the same paper, as did current issues of other Washington papers, contained misquoted and distorted interviews with Members of this House, the Speaker, and the gentleman from North Carolina [Mr. Page], who had charge of the appropriation bill then under consideration. The same papers also bore statements, alleged to have come from the White House, to the effect that the cautious and patriotic Woodrow Wilson had agreed in advance to veto a bill, if passed,

which they admit he had never seen.

The same papers, at the same time, bore the infamously false statement that the committee of which I am chairman, and which is made up of men of the highest integrity, had resorted to questionable methods to prematurely report that bill out of the committee, when the facts are that the bill was introduced in the House on the 20th day of November, took the regular course, was printed, and the next day referred and delivered to the committee of which I am chairman. The bill was before the committee and the House from that date until December 17 (21 days), was considered; and, when amended, approved by the committee in the usual way.

On the day before its consideration written notices were sent out by the clerk of the committee to each and every member of the committee, notifying them that there would be a meeting of the committee the next day at 10 o'clock a. m. In addition to these notices the clerk, on the morning of the day when the bill was considered, and before it was considered, telephoned each and every member of the committee that the meeting was to be held at 10 o'clock. To these notices a quorum of the committee responded and was present. Those who misrepresent the matter are fully aware that if the full committee had been present the vote for and against the bill would have been nearly proportionately the same, and that the result would have been the

During the time which elapsed between the introduction of the bill and its consideration no one asked for a hearing, notwithstanding that the local papers had carried notices of its introduction. The printed statements of Capt. James S. Oyster and others of the threatening organization were unwarranted, and carried implied falsehood for the purpose of creating false sentiment among those who might read those statements, whether the readers be the President, Members of the House, or others.

Neither the long-continued libelous assaults of the Washington papers upon me, nor the threats to defeat me for reelection made by the powerful organization which the Washington Times says will undertake to do, shall shake me in the least in my devotion to a well-conceived duty. [Applause.] I much prefer to be a free and respected private citizen among the people who have put their trust in me than to be a Member of Congress and a slave to those who seek to plunder.

At the proper time I shall say to those in good old Kentucky who have placed their confidence in me that I challenge all the world, even the unscrupulous who continuously assail me here, to point to a single act of mine which has not been in the in-

terest of those whose commission I bear.

It is now my determination to go back to Kentucky and ask those there to place in my hands their standard—a standard upon which is inscribed "Loyalty to the people"—and let me meet in the political arena him who bears the standard of this organization here—a standard upon which must be written "Betrayal of the people."

I do not know how much they will have to put up in order to find some one who will undertake to carry out the will of this organization, which is bent upon the mission of destroying all but those who do their infamous will; but whatever sum it be I will double if he will go over the congressional district with me and appear upon the same platform with me, and let honest people look at him while I draw a true picture of him after he shall have come to Washington to do the bidding of those who have tried, but who can not control my vote or silence my voice in proclaiming my enmity to the arrogant, purse-proud here who have grown rich at the expense of their humble neighbors and the people back in the States.

These arrogant few who compose this threatening organization here have for many years dominated this community and ruled it with a merciless hand. Former Presidents have put machinery in their hands, with which they have driven the help-less Government clerk to distress, and with which they have impoverished their native neighbors. Congresses past and almost present have poured the Public Treasury into their laps. One of their local railroads even now, through the agency of professional witnesses and elastic consciences of habitual jurors, is taking a profit of about \$887,000 out of one opportunity, which, to say the least, a nonresisting Congress has made pos-

sible

Only a few months ago I heard a man who was a prominent witness in recent condemnation suits admit under oath, in substance, that his business was to swear for landowners in condemnation proceedings. These are the people who threaten to retire me from Congress because I will not do their bidding.

A recent President of the United States has given the District of Columbia officers who have made up a hundred and forty condemnation juries by using only a hundred and fifty-two men. Some of those who compose this threatening organization, which the Washington Times tells us about, have served upon these juries, while others are fraudulent beneficiaries of those official acts.

So powerful have they become that they do not hesitate to use public offices for their private purposes, and public officials to carry into execution their infamous plans. [Applause.]

But recently one of their hirelings was driven out of what had theretofore been a permanent desk in the Treasury Building, where the confidential affairs of the country's banks were kept. And this is the crowd which says it will drive me out of public life yeless. of public life unless I betray the trust which my constituents

have imposed in me.

More recently still their domination of all about them led them to induce a Treasury official to all but destroy the savings of nearly 60,000 humble people in Washington, all because a few men had the temerity to venture in the banking business in Washington without putting a majority of the clan upon the board of directors. In the dead of night 'hey had an official who is protected by civil service to meet them in a Government office, and expose to them a list of the assets of a rival institution and then had him to treat as insolvent a lot of paper of this institution, and throw out as such, paper sufficient to have the capital stock of the concern appear to be impaired.

While this was being done one of the directors of the institution thus being destroyed in order to gratify the avarice and spleen of the ringleaders of this organization which threatens to destroy me was not permitted to enter the office and defend his institution and its clients from ruthless destruction, but he was taken by the arm and led away by another civil-service Government employee while the havoc to securities went on within by his destructive business rivals. Next, they went into their own places of business and there, by word of mouth and by the use of the telephone, started a movement which would have swept away millions of dollars if another, not of their own, had not appeared upon the scene and said to them, "Thou shalt not."

And these are the men who compose the organization which is to destroy me because, in part, I have introduced a bill which, if passed, will break up their system of interlocking directorates, by which they control every big financial institution in the city except the one just mentioned, and which they failed to grab

and against which their efforts still are active.

A little more than a year ago the committee of which I have the honor to be chairman made an exhaustive investigation into the conditions of taxation and assessment prevailing in the District of Columbia. That investigation disclosed that 40,000 humble homes here in Washington were valued for taxation far more than they were worth. In this way the poor were overtaxed in order that those who are members of this threatening organization, who live in other sections of the city, might be undertaxed. I and the other members of that committee brought to Congress and to public notice the fact that this organized gang had absolute control of two of the three assessors of real estate.

two assessors have been driven from their official positions, and these positions are now being filled by men who will, I hope, make honest efforts to value property in accordance with law.

This is another of their grievances against me.
Only a few days ago one of the Washington papers, in criticizing the present District of Columbia Committee, charged that former District Committees had been in partnership with the big business interests of the District of Columbia. Notwithstanding its continued disposition to villify me and others of the committee, it was compelled to admit that there is now no partnership between that committee and the big business interests of the District of Columbia.

When I became chairman of the District Committee the poor were being plundered by the loan sharks, who were collecting interest at a rate as high as 275 per cent from the unfortunates who had fallen into their clutches. I have succeeded in get-ting upon the statute books a law which fixes as the highest rate of interest these sharks may charge 1 per cent per month. I have no doubt that they, too, are full-fledged members of this threatening organization, forming under the very Dome of the Capitol to defeat me because I look more to the interest of the helpless than I do to those who need to be curbed and not

helped. [Applause.]

One of the laws which a former Congress has placed upon the statute books, and one for the repeal of which there is a crying demand coming to Washington from every State in the Union. is the statute which, in effect, compels the United States to offer a reward to the District of Columbia of \$1.000 for each and every saloon license which the officers of the District nay issue. This law says to the officers of the District of Columbia: Go, issue all the saloon licenses which are within your limit, and for every one that you issue the United States will give you \$1,000 of the people's money. This is the case, while there are millions of people in the United States who are protesting against this subsidy to a business which they disapprove. I have communications even from distillers, saloon keepers, and hundreds of men and women in other occupations all over the United States entering their vehement protests against being taxed in order to subsidize this business in the Nation's Capital, which costs the United States about four and a half million dollars They are unwilling to have the clothes upon their annually. backs bear a tax in order to subsidize this business here.

Early in this session I drafted a bill which would do away

with this subsidy. That bill a few days ago passed this House without a dissenting voice. It has now gone over to the Senate for their consideration. I wait with much interest to see whether or not the members of this threatening organization here will menace Members of the Senate in order to deter them from passing it. I have no doubt that this bill, too, has its enemies in this organized gang which seeks my political destruc-

The Congressional Record contains every word that I have uttered since I have been in Congress. It also shows all of my votes. I challenge those who are dissatisfied with my public career to show to Kentuckians, or to anybody else, that I have ever uttered a word or have ever cast a vote which has not been in the interest of the people and against the enemies of the people.

When I commenced this fight several years ago I was alone in Many, many times when viva voce votes were taken upon motions made by me, my voice would be the only one to answer in the affirmative, while a roar of negative votes deluged in defeat that which I proposed. In order to emphasize my position, and in order to demonstrate that I could make a losing fight without being in the least dismayed, I asked for rising votes. Many, many times I have been the only one to rise in support of a motion which I was making in defense of my constituents against this organized gang here, while a floor full of people would rise in order to cast a negative vote, which clearly demonstrated that the hold of this organization upon the Congress was tight and secure. But, two years ago when I renewed the old fight, repeating my theretofore often-defeated motions, a few voted with me; sometimes 3 or 4 would vote with me; again 12 or 15 would vote with me; again 30 or 40 would vote with me; and sometimes as many as a hundred would support my motions.

During all of the early stage of this fight I was ridiculed and derided by the press of Washington, owned and controlled by those who now make up this threatening organization. Recently a great number of the Members of the present Congress have seen their duty to their constituents, and have not been intimi-dated to the extent that they were not willing to perform it.

Since the present situation has arisen, and since this gang sees their hold upon the Treasury being about to be shaken loose, they arise and 'hreaten Congress as no other Congress has

been threatened since one was almost invaded by a mob when Congress met in the city of Philadelphia years ago.

Only a few days ago this organized gang boasted that at one time they had nearly a thousand men in the galleries which overlooked this Chamber, by their presence to menace Members of this body.

I am not entirely sanguine that this Congress will pass such measures as will divorce the Treasury of the United States from this crowd, fattened at public expense. I am, however, absolutely confident that the beginning of the end to this awful

condition of affairs is at hand.

It has been said that a similar organization which preceded the present one laid their hands upon all the organized forces of the community; that they captured every source of influence, public and private; that they dictated the conduct of the press, controlled the legislature, and manipulated the courts; that they demanded the irresponsible disbursement of the public funds; that they secured the arbitrary appointment of all officials, high and low; that they cultivated congressional officials, high and low; that they cultivated congressional committees; that they debauched public servants; that they surrounded the President; that they patronized the rowdy element; that they intimidated the primary assemblages of the people; that they packed political meetings; that they conspired to overthrow political organizations; that they imposed their candidates upon the people and drove voters to their support through threats of starvation; that they suppressed freedom of speech in the District of Columbia and made liberty of political action an offense; that they seduced made liberty of political action an offense; that they seduced the wealthy, tyrannized over the poor, ostracized the honest, and persecuted the independent; that they retained the leading members of the bar, subsidized the churches, and schemed for the control of the school and charitable fund; that they sought the power of appointment of judges to be the ministers, and have made the police agents of their will; that they organized a militia establishment on the basis of an army corps.

I am proud that I can say that when I am defeated for Congress it shall not be because I have not done my duty by the people. I much prefer to be defeated, when my defeat comes, because I would not do the will of an infamous gang who

are plundering the Treasury of the United States.

I say to you, conspirators, that I want the people to see him whom you select to carry your standard of destruction into Kentucky! [Applause.]

Mr. PROUTY. Mr. Speaker, I desire to offer and ask for the present consideration of the privileged resolution which I send

to the Clerk's desk.

The SPEAKER. The Clerk will report the same.

The Clerk read as follows:

House resolution 358.

Whereas on Saturday, December 20, 1913, there appeared in the Washington Times, a paper published in the city of Washington and having a very large circulation throughout the United States, an article headed in large type clear across the front page, the following:

NATION-WIDE FIGHT ON CRISP-BILL BACKERS—DISTRICT CHAMPIONS UNITZ IN EFFORT TO PREVENT RELECTION.

NATION-WIDE FIGHT ON CRISP-BILL BACKERS—DISTRICT CHAMPIONS UNITZ IN EFFORT TO PREVENT RELLECTION.

Plans for a concerted fight against the reelection of the Members who voted for the measure are already under way. Their respective districts will be flooded with letters protesting against their unparticular clark toward the National Capital. Voters throughout the country will be appealed to in the hope that Congressmen will be urged to take the welfare of this District at heart and aid in making the capital city of the United States the queen metropolis of the world. Members of the executive committee of the joint committee of Chamber of Commerce, the Board of Trade, and the Retail Merchants' Association have been notified by Chairman William H. Singleton of the committee that they must be ready at a moment's notice to answer a call to meet and determine on some concerted action immediately; and Whereas said alleged threat, if carried into effect, would menace the freedom of action of the Members of this body in the discharge of their legislative duties: Therefore be it

*Resolved by the House of Representatives, That the Committee on the District of Columbia, or a subcommittee thereof appointed by the chairman, be instructed and empowered to make a full and thorough investigation of the truth of the facts set out and alleged in said article.

That said committee or subcommittee be instructed and empowered to ascertain whether there is now or at any time in the past has been any organization in the District of Columbia or elsewhere that has or has had as its purpose or object the securing or preventing of legislation affecting the relation between the Federal Government and the District of Columbia or the citizens or institutions thereof;

That said committee or subcommittee be instructed and empowered to ascertain whether there is now being raised or whether at any time in the past there has been raised any money by the citizens, residents, property owners, corporations, or organizations of Washington or the Di

same:
That said committee or subcommittee be instructed and empowered to ascertain whether there is now or in the past has been maintained a lobby in the city of Washington for the purpose of influencing or affect-

Ing legislation or appropriations for and on behalf of the District of Columbia or the people, corporations, or institutions thereof, and said committee or subcommittee will ascertain methods and agencies employed for the purpose of affecting said legislation;

That said committee or subcommittee be, and is hereby, authorized to issue subpeans and call for books, papers, and records; that the chairman of said committee, or any member thereof in his absence, is hereby authorized to administer oaths and to compel the attendance upon the committee of any person or persons whom said committee may wish to interrogate relative to the matters set out in this resolution;

That said committee or subcommittee in conducting this investigation is authorized to use the official committee stengraphers.

Upon the conclusion of its investigation the said committee shall report fully to this House the results of its investigation and findings thereon.

Mr. MANN. Mr. Speaker, I make the point of order that the resolution is not a privileged resolution.

The SPEAKER. What is the gentleman's point?

The mere fact that some organization may Mr. MANN. exist, if such be the case, for the purpose of influencing the election or defeat of Members of Congress does not constitute a matter of privilege in the House. That is what the Democratic congressional committee is for. That is what the Republican congressional committee is for. That is what the national committees are for, and that is what the Progressive committee is for, if one exists.

Mr. MURDOCK. And the National Association of Manufac-

turers also. [Laughter.]
Mr. MANN. I do not know about that. [Laughter.] The National Association of Manufacturers has not done as much work in that direction as the gentleman from Kansas [Mr. Murdock] has done on the Chautauqua circuit, I expect. [Laughter.]

Now, the mere organization to defeat the election of Members of Congress does not constitute a matter of privilege in the House. We have a law on the statute books providing that if any organization or committee shall ever attempt to influence the election of Members of Congress in more than one State it must make a report of its receipts and expenditures under penalty of the law. There is no charge of corruption here, nor is there anything improper in having an organization in the District of Columbia to look after legislation in Congress. The only method the people here have of influencing legislation in Congress is by appeals through organizations of the District. That does not constitute a question of privilege.

Mr. PROUTY. Mr. Speaker, Rule IX provides:

Questions of privilege shall be, first, those affecting the rights of e House collectively, its safety, dignity, and the integrity of its proceedings.

I submit to the Chair and to gentlemen of this House the proposition that if an organization that is directly affected by this legislation issues a threat which is promulgated through this House at the time that votes are being cast upon an important measure affecting that organization it does interfere with the dignity and the integrity of this House.

The comparison that my distinguished friend from Illinois [Mr. Mann] made is no comparison at all. I admit that any one's constituents have a perfect right to organize to defeat him if he does not carry out their wishes. But that is not the proposition here. Here is an organization that is not a constituent of any Member, and yet they stand here threatening to mass their influence and their money to defeat any man who votes for a measure that they think ought not to pass.

Mr. DYER. Mr. Speaker, will the gentleman yield?

The SPEAKER. Does the gentleman yield? Mr. PROUTY. Yes.

Mr. PROUTY.

Mr. DYER. The gentleman states that the people of the District of Columbia are not the constituents of any Member of this House.

Mr. PROUTY. I said that.

Mr. DYER. I would like to have the gentleman state whom they are the constituents of, if they have any representative in the House?

Mr. PROUTY. They have no representative. The gentleman knows that full well, and I have no objection whatever to their appealing to us in the manner they have the right to appeal. But it is another proposition to say that these people, who receive \$7,000,000 a year out of the Public Treasury, have the right to use that or a part of it to intimidate men in their votes in this House.

I beheld a sad spectacle the other day, while we were taking a vote in this House, of the very article I am calling attention to being in the hands of perhaps half of the Members of this Do you say it does not interfere with the dignity of this House? It is not a threat that they will appeal to the judgment and integrity of these people or of their constituencies, but they say frankly that they are going to flood the district of for five minutes at least.

every man who has the courage and the nerve to stand on this floor and vote for and say that which he believes in.

I do not want you to consider that there is anything personal in this matter for me. Every man who knows my feeling knows that I have no desire to return to Congress, and they will be wasting their money in my district, so far as I am concerned. But while I am here I am going to do everything I can to relieve this House from the pressure and corrupting influence that is constantly being brought to bear upon this House in behalf of certain measures and in opposition to certain other

The SPEAKER. The Chair is inclined to think that the position of the gentleman from Iowa [Mr. Prouty] is correct, and overrules the point of order. [Applause.] Those in favor of the resolution will say "aye."

Mr. FITZGERALD. Mr. Speaker, I move that the resolution be referred to the Committee on Rules, or at least to some com-

mittee, for examination and consideration.

Mr. PROUTY. I think the gentleman is too late in making the request.

The SPEAKER. Oh, the Chair does not think he is too late. Mr. MURDOCK. The House was dividing.

The SPEAKER. The gentleman from New York moves to refer this resolution to the Committee on Rules.

Mr. JOHNSON of Kentucky. I move to lay that motion on the table.

Mr. CRISP. That will take the resolution with it.

The SPEAKER. Yes; it will take the resolution with it. Mr. JOHNSON of Kentucky. Then, Mr. Speaker, I withdraw that motion.

Mr. MANN. Mr. Speaker, this seems to me a rather peculiar proposition to come from my distinguished friend from Iowa [Mr. PROUTY].

Charges are made reflecting upon the integrity of the gentleman from Iowa and of other Members of the House, and especially upon the Committee on the District of Columbia, and it is proposed to have the Committee on the District of Columbia investigate the charges. If charges were made against me, I should want somebody else to investigate them. I would never ask that I investigate charges reflecting upon my personal integrity; and if charges have been made against the District Committee—and propositions are made affecting the members of the District Committee—they ought to be the first ones to ask for an impartial committee of this House to make the investigation, instead of proposing that they investigate charges made against themselves.

Mr. HAY. Mr. Speaker, I offer the following amendment-Mr. FITZGERALD. Mr. Speaker—

The SPEAKER. The gentleman from Virginia [Mr. Hav] offers an amendment which the Clerk will report. The motion to refer is pending.

Mr. HAY. If there is a motion to refer, I withdraw my

motion. I did not understand that there was.

Mr. FITZGERALD. Mr. Speaker, I suggest that this resolution be referred to the Committee on Rules, because that is the orderly and proper manner to dispose of such a resolution.

This resolution, referring to a report in one of the local papers, and assuming the report to contain an accurate statement of facts, proposes that an investigation as outlined in this resolution be conducted by the Committee on the District of Columbia.

I do not know how many Members of the House have had an opportunity to see this resolution and examine it, to ascertain the extent of the investigation proposed, or whether, if an investigation be necessary, the resolution is sufficiently com-prehensive in its terms to insure the investigation which ought to be made.

It seems to me, Mr. Speaker, that this House can well afford to do what sensible men would do under such circumstances, and that is, permit the committee that has jurisdiction of such matters to have an opportunity to examine the resolution and to make a report to the House as to what should be done. I hope it will be referred, and I demand the previous question on my motion.

Mr. STAFFORD. Will the gentleman allow me— The SPEAKER. The gentleman from New York moves the previous question on his motion to refer.

The question being taken, the previous question on the motion to refer was refused.

Mr. STAFFORD. Mr. Speaker-

Mr. STAFFORD. Mr. Speaker
The SPEAKER. For what purpose does the gentleman rise?
Mr. STAFFORD. I should like to debate the motion to refer

The SPEAKER. The motion to refer is before the House, and it is debatable in the discretion of the Chair.

Mr. STAFFORD. Mr. Speaker, before the House takes ac-tion on this resolution I hope that the second thought of every Member here will be to refer it to some duly constituted com-

mittee to give it good consideration.

We have just received the report of the so-called House lobby investigation committee. That committee worked during the summer months for some six or eight weeks consecutively. do not suggest that this resolution go to that committee, but certainly we all know that the District Committee is charged with many matters of legislation that deserve consideration, and if you delegate this investigation to the District Committee you will interfere with their regular duties of considering the legislation with which they are charged. If they go ahead with the investigations sincerely and conscientiously, you may rest assured they will not do any other thing except investigate for the next two months. Your committee that was delegated to investigate all the lobbies that were in the air, some of which were substantial, were engaged continuously for two months in that line of investigation. I am not seeking further work, nor is any member of that committee seeking further work along this line; but I have never refrained, and I do not believe any member of that committee has ever refrained, from performing a duty that the House has charged it to perform.

Now, if the Committee on Rules should see fit to have this matter investigated by the committee that was appointed under the former resolution, I think every Member of this House can say that that committee may properly be charged with that additional duty; but to delegate this important duty of investigation to the Committee on the District of Columbia will mean that they will not do anything else for the next two months, if they go ahead conscientiously with that work. I believe I express the judgment of the Members of this House-those who sympathize with the District chairman and those who opposethat we expect, and the people of the District of Columbia have a right to expect, some affirmative legislation from the District of Columbia Committee without their going into an omnibus endeavor to ferret out every little newspaper report casting reflection upon the chairman or members of that committee. hope the motion of the gentleman from New York, to refer this resolution to the Committee on Rules, will be adopted, so that they can determine what is best under the ordinary procedure

Mr. HOWARD. Mr. Speaker, I would like to address myself to this resolution for about three minutes.

The SPEAKER. All gentlemen must address themselves to

the motion to refer.

Mr. HOWARD. That is what I expect to do. Mr. Speaker, I am heartily in favor of the immediate passage of this resolution without referring it to the Committee on Rules. I doubt to some extent the wisdom of the District of Columbia Committee being made the inquisitors of the conduct of certain organizations in the city of Washington. But, Mr. Speaker, there is not a Member in this House who has heard the resolution read who does not thoroughly understand its import. The conduct of the Washington papers within the last two weeks relative to The conduct legislation pending before this House has been, in my humble judgment, an outrage and a disgrace. [Applause.] It has been an insult to the intelligence and the integrity of every Member upon the floor of this House. It has brought upon my colleague from Georgia, Judge Crisp, criticism, ridicule, and abuse which he did not deserve, for the very good reason he was discharging what he conceived to be his patriotic duty. So far as he is concerned, in his district this ridicule, abuse, and sarcasm on the part of the Washington press will in no manner affect his return to this body by his appreciative constituency for the splendid services he has rendered them as their Representative.

Mr. MOORE. Will the gentleman yield?

Mr. HOWARD. I will.

Mr. MOORE. If the comments of the Washington newspapers had been entirely favorable to the gentleman from Georgia, Judge Crisp, or to any other Member of the House, would the gentleman have raised any objection to that?

Mr. HOWARD. If it had been entirely favorable, of course not; the question is silly.

Silly?

Mr. HOWARD. Of course it is silly and no sense in it.

Mr. MOORE. Why does the gentleman from Georgia object

to fair criticism of a public man in a public place?

Mr. HOWARD. Because of the fact that these papers seek to influence Members of the House by intimidation.

Mr. MOORE. Would the gentleman favor an investigation now of any of the labor unions which send their circulars to Members of Congress?

Mr. HOWARD. If the labor unions resorted to the methods of intimidation that the Washington newspapers have, I would; but I have yet to receive my first circular or letter intimating even a threat. Labor unions are usually very grateful for what few crumbs they receive from the legislative banquet table. [Applause.]

Mr. MOORE. Would the gentleman object to an investigation of the various waterways organizations and the good roads organizations which are being conducted in Washington?

Mr. HOWARD. They will never criticize the gentleman from Pennsylvania about anything that might be wanted for the District of Columbia. [Laughter.]

Mr. MOORE. That is because I try to be lail.

Mr. CRISP. Will the gentleman from Georgia yield? Mr. CRISP. Will the gentleman from Georgi Mr. HOWARD. I will yield to my colleague.

Mr. CRISP. Mr. Speaker, I had not intended to open my mouth, but since my name has been brought into it I want to say to my colleague and the Members of the House that I have not the slightest objection to any criticism or ridicule being heaped upon me by the Washington papers. [Applause.]
Mr. HOWARD. Well, Mr. Speaker, if I was in the impreg-

nable position in my district that my colleague is in in his district, I would not object, either. [Applause.] Speaker, that this resolution should pass immediately. only thing that could be accomplished by the reference of this resolution to the Committee on Rules would be to delay its pas-I think the resolution ought to be amended and that the members of the District of Columbia Committee ought to be eliminated from being members of the investigating committee. It should be thoroughly and speedily gone into, and if these organizations in Washington who are said to have made these statements and insinuations against Members of Congress have stated the truth we ought to vindicate them, and if they have not we ought to condemn them. I hope that this resolution will be speedily passed with the amendment suggested.

Mr. JOHNSON of Kentucky. Mr. Speaker, I would like to ask the gentleman from Georgia if he has gone sufficiently into the history of the affairs in the District of Columbia and realizes the fact that the leaders of this gang are themselves the very men who stand in the way of preventing a Delegate to Congress from the District of Columbia being on the floor?

Mr. HOWARD. That is my honest judgment; and I will say further in answer to the question of the gentleman from Kentucky that I believe that these folks, so far as the District of Columbia is concerned-and I am speaking of the District only—are doing more harm than they are good. In fact, they would probably get better and fairer treatment if they were not so unfair themselves in dealing with these questions. Mr. Speaker, I hope the resolution will be speedily passed.

Mr. GREEN of Iowa. Mr. Speaker, I hope that this resolution will pass as it stands without amendment. As I understood the resolution, it is not proposed to investigate charges made against Members of this House, but it is proposed to investigate the conduct of gentlemen who, if newspaper statements are to be credited, are proposing to influence this House by methods which are inconsistent with its dignity and selfrespect, to say the very least. For this reason I do not see why the resolution should be referred to the Committee on Rules. The Committee on the District of Columbia has cognizance of affairs in the District and is the best equipped to investigate this matter, and I think it ought to pass as it stands.

Mr. BYRNES of South Carolina. Will the gentleman yield?

Mr. GREEN of Iowa. I will.

Mr. BYRNES of South Carolina. Does the gentleman think the articles in the Washington newspapers will influence the judgment of any Member of this House?

Mr. GREEN of Iowa. Mr. Speaker, I think articles of that character ought not to influence the judgment of anyone in this

Mr. BYRNES of South Carolina. Does not the gentleman believe that these newspaper articles will be used as a political asset by a good many of these gentlemen who are now complaining of them? Would it not be a political asset for the gentleman to use them in his district? [Applause and laughter.]

Mr. GREEN of Iowa. The gentleman can address himself to the members of the committee or to the gentleman who intro-

duced this resolution.

Mr. BYRNES of South Carolina. What is the gentleman's honest opinion? Would it not help him in his district to take these newspaper articles and, using them as a text, deliver a stump speech upon them? [Laughter.]

Mr. GREEN of Iowa. The gentleman misunderstands my situation. I am not attacked by these articles.

Mr. BYRNES of South Carolina. Would it not help the gen-

tleman to do that, in his own judgment?

Mr. GREEN of Iowa. I can not say anything about that, because I have not any occasion to. I have no desire to make any such reflection on the gentlemen who have introduced or who favor the resolution. I believe that an attack of the kind described in these newspaper articles is derogatory to the dig-

nity of this body and in practical contempt of it.

Mr. KAHN. Mr. Speaker, I hope the motion of the gentleman from New York [Mr. FITZGERALD] will prevail. After all, Congress is the common council of the city of Washington. We are all members, practically, of the board of aldermen of this city, and the newspapers of any community have the right to criticize their board of aldermen. It is unfortunate, probably, for the District that such a large body of men as this should be called upon to pass ordinances for the municipality, but that is the law, and the District Committee simply takes charge of the legislation or prepares it for the benefit of the House. There is not a city in the United States in which the citizens would attempt to curb the power of the newspapers to properly criticize their aldermen; and any attempt on the part of the aldermen to curb such criticism would probably be met by an indignant people as tending to infringe the liberty of the press. Mr. MANN. Mr. Speaker, will the gentleman yield for a

question? Mr. KAHN. Certainly.

Does the gentleman think that this whole at-Mr. MANN. tempt is an attempt on the part of the newspapers to terrorize Congress, or an attempt on the part of certain Members of Congress to terrorize the Washington newspapers? [Laughter.]

Mr. KAHN. I do not believe that the attempt is that of the newspapers to terrorize Congress, because I have enough faith in my colleagues in the House to believe that they would not be terrorized by any newspaper. Long experience here has taught me that the Members of the House perform their duty as they see it, without interference from any newspaper. However, on the matter of reference, I think this resolution should go to the Committee on Rules, because an interested committeeand in this instance the Committee on the District of Columbia is an interested committee-should not have jurisdiction over the matter.

Mr. GREEN of Iowa. Mr. Speaker, will the gentleman yield?

Mr. KAHN. Certainly.
Mr. GREEN of Iowa. Does not the gentleman realize that this resolution is not aimed at the newspapers at all, but at certain organizations which are claimed to be in existence?

Mr. KAHN. Those organizations probably represent the views of the citizens of the District, and practically the only way in which they can express their views to Congress so that Congress can get a general idea of their views is through the columns of their newspapers

Mr. MacDONALD. Mr. Speaker, will the gentleman yield?

Mr. KAHN. Certainly.
Mr. MacDONALD. If the gentleman from California is opposed to this investigation, as I take it he is-

Mr. KAHN. I am not.

Mr. MacDONALD. I take it the gentleman is opposed to the investigation of these articles in the newspapers. Is not that true? Mr. KAHN. I am in favor of the motion of the gentleman from New York to refer the resolution to the Committee on

Mr. MacDONALD, But I understand from the gentleman's remarks that he is opposed to this common council, this board of aldermen, investigating these articles in the newspapers.

Mr. KAHN. Oh, I have no objection to the articles in the newspapers being investigated by some committee of this House; none whatever. I do not think the District Committee ought to attempt to investigate them, because the District Committee has an interest in the matter. But I did attempt to say that the newspapers have a right, in my judgment, to criticize the Members of this House regarding legislation affecting the District

Mr. MacDONALD. The question I wanted to ask the gentleman from California is, if he is opposed to the investigation, why not vote it down rather than refer it to the Committee on

Mr. KAHN. The Rules Committee can bring in such a report as will probably meet the views of a majority of the Members of the House.

Mr. BARNHART. Will the gentleman from California yield? The SPEAKER. Does the gentleman from California yield? Mr. KAHN. Certainly.

Mr. BARNHART. The gentleman from California elaborates on the importance of newspapers criticizing Members of Congress; but it is not a question of criticism. It is a question of absolute intimidation. Whenever a newspaper declares it is going into the districts of men who dare to stand up for what they believe is right and attack and defeat them, the very proposition to fight these men carries with it the question of intimidation

Mr. KAHN. I will answer the gentleman's question in this way: If the gentleman voted upon a question affecting his own immediate constituents, does the gentleman believe that the newspapers of his district have not the right to attack him and try to defeat him at the polls if they desire to do so? And I contend that under the existing system of government for the District of Columbia every citizen of the District is to a certain extent a constituent of every Member of this House.

Mr. GARNER. Will the gentleman yield?
Mr. KAHN. I will yield.

Mr. GARNER. Mr. Speaker, could not this matter be solved by an amendment to this resolution requiring the Speaker to appoint a select committee and let them make the investigation? Mr. KAHN. Well, the Committee on Rules can so report if it

desires to do that.

Mr. GARNER. I understand the gentleman from Iowa [Mr. PROUTY] is willing to accept that amendment to his resolution.

Mr. HAY. Will the gentleman yield?

Mr. KAHN. I do.
Mr. HAY. I have already sent to the Clerk's desk an amendment to the resolution providing that there shall be a select committee instead of the District Committee.

Mr. KAHN. I have no objection to that action, but personally I would like to see some committee other than the District Com-

mittee investigate the matter.

Mr. MONTAGUE. Mr. Speaker, I had no idea of addressing myself at all to the pending motion, save for the remarks made by the gentleman from Georgia [Mr. Howard] that we were all practically apprised of the contents of this resolution. I myself have not heard the whole resolution, though I tried to listen as best I could, and I am persuaded that many of the Members of this House are not familiar with its context.

Having said this much, Mr. Speaker, permit me to suggest— and I do it with great reluctance—that we should not be swept off our feet in this matter. I disclaim any sympathy with any attack upon any Member or upon the integrity of this House, but this is not the question now before us. The merits or demerits of the resolution are aside the question. The question is one wholly of parliamentary procedure, one of propriety and of order and of the dignity of this House; and it seems to me, therefore, that the motion made by the gentleman from New York [Mr. FITZGERALD] is the appropriate procedure. plies a proper vehicle to take care of this question at this particular juncture, and I submit to the House that this motion should be referred to the Committee on Rules, and they, in turn, can submit a report to this House upon which we can properly deliberate, or this committee might indicate another procedure more adequate or more appropriate to deal with the whole mat-[Applause.]

Mr. UNDERWOOD. Mr. Speaker, I desire to ask the gentleman from Iowa whether his resolution proposes-I did not catch the drift of it-to investigate the newspapers of Washington or to investigate certain organizations in Washington for statements that occurred in the newspapers?

Mr. PROUTY. The resolution clearly provides for an investigation as to the truthfulness or lack of truthfulness of statements in this paper that such organizations existed and were

going to do certain things.

Mr. UNDERWOOD. Now, I wish to say to the gentleman— he may have overlooked it—there was a statement made in one of the Washington papers that certain organizations intended to organize to raise funds, or something of that kind, to defeat Members of Congress. That was in an early afternoon edition. The 5.30 afternoon edition of that same paper came out and stated on the same afternoon that that statement was an unauthorized statement of this newspaper reporter; that it was a mistake; and that no such statement had been made by these organizations.

Mr. JOHNSON of Kentucky. Will the gentleman yield?

Mr. UNDERWOOD. I will.

Mr. JOHNSON of Kentucky. I want to ask the gentleman if the 5.30 o'clock edition of the Washington Times of day before yesterday did anything more than to remove the article from the front page to another page, where it was less prominent, and that another paper made the statement to which the gentleman now refers?

Mr. UNDERWOOD. Well, I am not sure which paper made the statement correcting the other statement, because I am not certain about the matter in my own mind, but I am sure of the proposition that the men who were charged in the first paper with having made this statement the same afternoon came out and denied emphatically that any such statement had been

Mr. JOHNSON of Kentucky. I ask the gentleman if he expected them to admit it any more than the Mulhall people were expected to make admissions until they were put under

Mr. UNDERWOOD. Well, I would not say that. I think, if they intended to make a statement, that a man who will publish a statement in the newspapers will stand by his state-

Mr. JOHNSON of Kentucky. The gentleman, if he will permit an interruption, must admit that these people themselves never made this statement of their own accord. A newspaper

in publishing the news published it for them. Mr. UNDERWOOD. Well, I think there is some doubt. There certainly is considerable doubt in my mind as to whether a body of citizens in the city of Washington would be so unwise and so unpatriotic as to attempt to intimidate the Congress of the United States, from which they must get their supplies with which to run this government. Now, if they have, I will say to the gentleman from Kentucky [Mr. Johnson], they ought to be brought to the bar of this House and properly disciplined for doing so. But if they have not, I should dislike very much to see this House put itself in a ridiculous attitude of attempting to run after a shadow. Now, I do not know how far these resolutions go, and neither do you. I do not know whether there is any warrant outside of a mere newspaper publication for this statement or not. You do not know. Now, there is no great haste in this matter. It is one that should be considered by this House with that deliberation, consideration, and dignity that the House of Representatives should treat any matter which reflects upon the character of the Members of this House or the dignity of the House. [Applause.] And I should very much regret to see the Members of this House, because an item had merely appeared in the newspapers that had been contradicted to some extent, rush headlong, without careful consideration, into a matter of ordering an investigation when we are not sure as to whether these charges have been made by authority of the people of this city or not.

Now, I want to say, in passing, that I not only think it unwise but absolutely unjustifiable for the newspapers of this city or any other city to reflect on the personal character or the intention of a Member of this House when he is trying to perform his duty, merely because his views happen to differ with the views of the editor of a newspaper or the sentiment which that newspaper reflects. But I do say that we must maintain our own dignity, our own poise, and our own decision. We have a committee of this House to whom all questions of investigating resolutions are referred. They have repeatedly reported to this House such resolutions. No man on the floor of this House can charge for a moment that the Committee on Rules, if this resolution goes to them, would have any desire or intention to block or defeat it if the facts will sustain the resolution and authorize an investigation. I hope at this time that the House may not be swept off its feet hastily and without due consideration, but that you will send this resolution to a committee of this House that can properly investigate it and report back its conclusions as to what should be done promptly after the Christmas holi-days. [Cries of "Vote!" "Vote!"]

The SPEAKER. The question is on the motion to refer the

Mr. PROUTY. Mr. Speaker, I should like to be heard for a

The SPEAKER. The gentleman from Iowa [Mr. Prouty]

is recognized

Mr. PROUTY. Mr. Speaker, a great deal of confusion has grown out of the discussion of this question. This article referred to is not under investigation, neither is any attack made upon any Member of Congress involved in this investigation. This paper alleged that there were certain persons of the city. of Washington that had already agreed among themselves to flood every district in the United States with letters in attempt to defeat the candidates who voted in favor of what was known as the abolition of the half-and-half rule. Now, pardon me, but what could this Committee on Rules investigate in order to determine whether or not the House should order an investigation? There is the article. If it is true, then this House ought to know that the facts alleged in that article are true. If the statements in that article are false-

Mr. MOORE. Mr. Speaker— Mr. PROUTY. Pardon me. If the statements in that article are false, then the Members of this House ought to know that, and then they will not any longer be scared by it-

Mr. FITZGERALD. Who is scared?

Mr. PROUTY. The fellows who are behind this thing are the fellows who are scared. I have not been on this floor very long, but I do know how things are hid.

Mr. FITZGERALD. Does the gentleman intimate that I am trying to hide anything in moving that his resolution go to the Committee on Rules?

Mr. PROUTY. I have noticed this-

Mr. FITZGERALD. The gentleman can answer that ques-

tion, and not hide behind some indirect statement.

Mr. PROUTY. I may be unable to understand or fathom the intricacies of a man's mental operation, but I can understand his acts. I say the apparent purpose of this move is de-We are just now on the eve of an adjournment.

This committee can not report, in decency, within the time that this House will be in session, and it will be heralded all over this country that this House was not willing to enter upon this investigation and that upon the shrewd tactics of the gentleman from New York [Mr. FITZGERALD] it was pigeonholed for the present. [Applause.]

Mr. FITZGERALD. Mr. Speaker, will the gentleman yield?

Mr. TRIBBLE. Will the gentleman yield, Mr. Speaker? The SPEAKER. To whom does the gentleman yield?

Mr. PROUTY. I will yield to my distinguished friend from

New York [Mr. FITZGERALD].

Mr. FITZGERALD. Mr. Speaker, let me say to my friend from Iowa that if I were so timid or thought that anybody had as little confidence in my integrity as he seems to think they have in his, then I would want to hide in this matter. am not so thin-skinned as to be frightened either by the criticisms of the press or by the attempts of any of the people in the District of Columbia to be afraid of any impression that they may make upon the people whom I represent in this House, however they may affect those whom the gentleman

Mr. MOORE. Mr. Speaker, will the gentleman yield?

Mr. MONDELL. Mr. Speaker, will the gentleman yield for an interruption?

The SPEAKER. To whom does the gentleman yield?

Mr. PROUTY. I will yield to the gentleman from Wyoming. Mr. Speaker, assuming that it is true that there are organizations in the District of Columbia that have threatened to bring to the attention of the constituencies of Members the fact that they are unfriendly to the District, does the gentleman contend that they have no right to do that in a legitimate way-to attempt to defeat a Member on the ground that he is unfriendly to the District? Have not the citizens of the District the right to do that?

Mr. PROUTY. My answer to that inquiry is that neither I nor any other Member of this House would have any objection to having that question fairly presented to the people of his district. But I am old enough in politics to know that whenever gigantic organizations undertake to defeat a man they never raise the question that they really have at heart, but

always start some subterfuge. [Applause.]

Mr. TRIBBLE. Mr. Speaker, will the gentleman yield? Mr. PROUTY. And this organization, if it is as strong as they say it is and Nation-wide, is capable of putting into your district another man. It is capable of furnishing him with funds to make a fight. It is capable of furnishing him with facts and things that bear upon the campaign.

Now, I am certainly disinterested in a personal way in this I repeat again that I am not personally interested in a single thing that is involved in this controversy. My name has not been mentioned in connection with this publication. Yet I feel with all the keenness of my heart that you will never

get proper legislation in the American Congress until you have divested Congress of the influence of the local press and divested

of the local influence. [Applause.]

Mr. TRIBBLE. Mr. Speaker, will the gentleman yield?
Mr. PROUTY. In a moment. I may say that, so far as this committee is concerned, I recognized in drawing the resolution the impropriety, in a sense, of having the Committee on the District of Columbia do that work, and I therefore inquired if there still existed the committee known as the Lobby Investigating Committee under resolution 198, and the best information I could get was that that committee had been discharged. I would like to inquire now if anybody knows whether that committee has been discharged or not?

Mr. MANN. That committee made a report. That dis-

charges it.

The SPEAKER. They have made their report, and without studying about it the Chair would think it was functus officio.

Mr. TRIBBLE. Now, Mr. Speaker, will the gentleman yield? The SPEAKER. Does the gentleman yield?

Mr. PROUTY. Yes. Mr. TRIBBLE. Would the gentleman be willing to accept an amendment to his resolution—an amendment which strikes out the words "District of Columbia"?

The SPEAKER. The Chair would state to the gentleman from Georgia [Mr. TRIBBLE] that no amendment is in order.

Mr. TRIBBLE. I would like to make a parliamentary in-

quiry. Is not the discussion still before the House?

The SPEAKER. The Chair knows that; but the discussion is confined to this motion about referring. [Cries of "Vote!" Vote!"

Mr. MOORE. Mr. Speaker-

The SPEAKER. Does the gentleman from Iowa yield?
Mr. PROUTY. Just a moment. If this resolution is voted down, then I intend to offer an amendment changing the committee where the matter will be investigated.

Mr. MOORE. Mr. Speaker

The SPEAKER. The gentleman from Pennsylvania [Mr. Moore] is recognized.

Mr. MOORE. In the first place, Mr. Speaker, this is a very odd spectacle-

Mr. UNDERWOOD. Will the gentleman allow me to interrupt him for a moment? There are other things to transact. How long does the gentleman want to talk?

Mr. MOORE. Not more than three minutes.

Mr. UNDERWOOD. Mr. Speaker, I ask unanimous consent

that all debate on this motion close in three minutes.

The SPE_KER. The gentleman from Alabama [Mr. Underwood asks unanimous consent that all debate on the pending motion be closed in three minutes. Is there objection? a pause.] The Chair hears none, and the gentleman from Pennsylvania [Mr. Moore] is recognized for three minutes.

Mr. MOORE. It is a very odd circumstance that this House, made up of the statesmen of the Nation, should be able to devote one hour and a half of this morning's session, on the eve of a Christmas adjournment, to the discussion of a newspaper report written by one newspaper reporter in the city of Washington affecting the personal feelings of some of the Members, when it could not give 40 minutes on Saturday last to the discussion of the great currency bill for which this Nation is waiting. [Applause.]

Second, it is very odd that the gentleman from Iowa [Mr. PROUTY] should be in such a state of mind over the ebullition of one newspaper reporter that he must delay the proceedings of this House this morning on such a trivial business as that of

investigating what a newspaper reporter has said.

There is no other way for the people of the District of Columbia to obtain a hearing except through the newspapers of their city, and it is strange indeed that Members can refuse to investigate unions of one kind or another, which have votes in the districts from which the Members come, but can still take the time of the House to move an investigation against people of the District of Columbia, who have no votes at all, Why do they not inquire as to the pretenses of certain labor leaders that Members of Congress can not come back unless they vote as the unions dictate? They do not inquire into that because there are labor votes at home. Why do they not investigate the aggressions of the good-roads boomers and the good-waterways boomers, if you please? Because they have votes back home that influence Members of Congress. But when it comes to the feeble little District of Columbia, with about 300,000 people in it, not one of whom has a vote or can speak for himself at all in this House, then Members get courageous; then they step forward and bare their breasts and talk of intimidation and of fear. [Applause and laughter.] Oh, brave men come to Congress! They are so brave on this vital day of this great session of Congress that they would investigate, at the expense of the Government, the poor little District of Columbia, where there are no votes at all. [Applause.] This is big work for the home folks to ponder over.

Mr. REED. Mr. Speaker-

The SPEAKER. For what purpose does the gentleman from New Hampshire rise?

Mr. REED. To ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from New Hampshire to extend his remarks in the

Mr. MANN. On what subject?
Mr. REED. On the subject of the civil service.

Mr. MANN. Mr. Speaker, of course that embraces everything under the Government except the military service. ment does not convey any information to my mind.

Mr. REED. That is the subject. The gentleman asked for the subject, and I have given it to him.

The SPEAKER. Is there objection?
Mr. BARNHART. Reserving the right to object-

Mr. MANN. That is too broad a subject. Until we know

more about it I shall object.

The SPEAKER. The gentleman from Illinois objects, and the question is on the motion of the gentleman from New York [Mr. Fitzgerald] to refer this resolution of the gentleman from Iowa [Mr. Prouty] to the Committee on Rules.

The question was taken; and on a division (demanded by Mr.

PROUTY and Mr. Moore) there were—ayes 171, noes 86.

Accordingly the motion to refer the resolution to the Committee on Rules was agreed to.

DISTRICT OF COLUMBIA APPROPRIATION BILL.

Mr. PAGE of North Carolina. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the District of Columbia appropriation bill, H. R. 10523.

Mr. MANN. Mr. Speaker, pending that motion, and out of order, I ask whether anyone can inform the House as to the prospect of an early report from the committee of conference on

the banking and currency bill?

Mr. UNDERWOOD. Mr. Speaker, I will say to the gentleman from Illinois that I have just heard from the gentleman from Virginia [Mr. GLASS], chairman of that committee, and he thinks it is probable that he will be able to bring in a report in about an hour and a half-not before that time.

Mr. MANN. I take it, then, that in any event it will be ex-

pected that the House dispose of that report to-day?

Mr. UNDERWOOD. Yes.

Mr. PAGE of North Carolina. I will say to the gentleman that if that report is ready to come in I shall ask that the committee rise.

Mr. MANN. I understand. I was simply trying to find out

for the benefit of Members of the House.

Mr. UNDERWOOD. I think, as everybody wants to get home for Christmas, it will be necessary for the House to pass that report to-day, and I think it advisable even for the House to stay in session late to-night in order to get through with the report, so that it may be in the Senate to-morrow. Of course, if we can not get unanimous consent for the consideration of the report when it comes in, it will be necessary to bring in a rule, and I would like to know the disposition of the gentleman from Illinois [Mr. Mann] and the gentleman from Kansas [Mr. Mur-DOCK] as to whether they will grant unanimous consent for the consideration of the conference report without compelling it to lie over for one day under the rule.

Mr. MURDOCK. You are going to permit some debate on the

conference report?

Mr. UNDERWOOD. Oh, yes.

Mr. HAYES. How much time is the gentleman willing to

allow for debate?

Mr. UNDERWOOD. While the gentleman from Virginia is not here and I would not like to enter into an agreement for any definite length of time in his absence, yet I will say that I am sure that he will agree to a reasonable time. I certainly would favor it. This matter is of too much importance not to allow a reasonable debate.

Mr. MANN. In order to see whether the House can reach an understanding, I want to say that, of course, it is within the power of the majority to bring in a report from the Committee on Rules, which might take a debate of 40 minutes. I do not know the disposition of gentlemen in the House on the subject as to whether it would be practicable at this time to make a unanimous-consent agreement that the conference report might

be disposed of without printing, under the rule.

Mr. HAYES. Mr. Speaker, before I agree to any unanimousconsent proposition, I would like some assurance as to the time

for debate.

Mr. UNDERWOOD. How much time does the gentleman want?

Mr. HAYES. An hour on a side, as this is a very important bill.

Mr. MANN. Clearly that time would be granted and perhaps more.

Mr. HAYES. I would like to have more time, but I would like to have an hour at least.

Mr. UNDERWOOD. Although I am speaking without the knowledge of the gentleman from Virginia [Mr. Glass], I will assume that if this request is granted there will be at least two hours' time for debate, if not more, one hour on a side.

Mr. MURDOCK. That would run us until half past 5.

Mr. MANN. We can sit until half past 9 or 10.

Mr. UNDERWOOD. I do not think there will be any disposition on the part of the gentleman from Virginia to unduly Mr. Speaker, I will couple with my request the further request that when the conference report comes in to-day, if it comes in to-day, on the currency bill, that it may be considered to-day without printing under the rule, with the understanding that there must be at least two hours debate on the conference report if anybody demands that much time.

Mr. ANDERSON. If the gentleman will pardon me, will the

report be printed in any form at all?

Mr. UNDERWOOD. I understand that the report is printed

Mr. HAYES. I have a copy of the report as printed.

Mr. PAYNE. Is it accessible?

Mr. HAYES. If the reports are not in the document room

at the present time they will be very shortly.

Mr. UNDERWOOD. I understand that they will be up here from the Printing Office within an hour and in sufficient numbers for all Members to have a copy.

Mr. HAYES. I am advised that only 360 copies of the report are in the document room. I would suggest to the gentleman

that there be a larger number procured immediately.

Mr. UNDERWOOD. Mr. Speaker, before my request for unanimous consent is put, I will ask unanimous consent that the Public Printer be authorized to print 500 additional copies for the use of the House of Senate Document No. 335.

The SPEAKER. The gentleman from Alabama asks unanimous consent that the Printer be authorized to print 500 additional copies for the use of the House of the conference report, which is Senate Document No. 335.

Mr. HAYES. Mr. Speaker, I am advised by the Doorkeeper

that other copies are being printed.

The SPEAKER. Is there objection to the request of the gentleman from Alabama? [After a pause.] The Chair hears

Mr. UNDERWOOD. Now, Mr. Speaker, I renew the request that when the conference report on the currency bill comes before the House to-day it may be considered without being printed in the RECORD under the rule, with the understanding that there shall be at least two hours' debate.

Mr. MANN. I think there is no need to make that part of the request. We will accept that statement.

Mr. UNDERWOOD. The gentleman from Illinois says that he is willing to accept the statement that there will be two hours' debate without making it a part of the unanimousconsent request.

The SPEAKER. Is there objection to the request of the

gentleman from Alabama?

Mr. LINDBERGH. Mr. Speaker, reserving the right to object, will the gentleman couple with that a request that all gentlemen be permitted to extend remarks in the RECORD on the currency bill? It is well known that the bill can not be considered in two hours' debate.

Mr. UNDERWOOD. I think that is correct; and I will ask unanimous consent that all Members of the House may be allowed five days in which to extend remarks in the Record on this conference report and the currency bill.

The SPEAKER. The gentleman from Alabama asks unanimous consent that all Members of the House have five days in which to print remarks in the Record on the currency bill and the conference report. Is there objection? [After a pause.] The Chair hears none. Is there objection to the request of the gentleman from Alabama that the conference report may be

considered to-day without being printed under the rule?

Mr. MURDOCK. Mr. Speaker, reserving the right to object, I want to ask if we can have a proportionate amount of the

Mr. HAYES. Yes; if I can get the time; but I would like to

have it definitely stated.

Mr. MURDOCK. We have not yet fixed on any definite time. Mr. UNDERWOOD. I will say to the gentleman from Kansas that we want to get through with this conference report to-day. Of course I recognize there are always two ways in which to get through-one is with an ax and the other is without an ax. Whenever we use the ax it usually takes as long to cut our way through as it does by unanimous consent.

Mr. MURDOCK. I realize that; and I do not want a rule.

Mr. UNDERWOOD. Neither do I. Understanding that, we have to be good-natured, and I have no doubt that the House will be good-natured and give the gentleman from Kansas time.

Mr. MURDOCK. Even the gentleman from Alabama would

see that I have some time.

Mr. MANN. How much time does the gentleman want? Mr. MURDOCK. Fifteen or twenty minutes.

The SPEAKER. The gentleman from Alabama asks unanimous consent that when the conference report on the currency bill comes before the House it shall be immediately considered, notwithstanding the rule requiring printing in the RECORD one day in advance of consideration. Is there objection?

Mr. WINGO. Mr. Speaker, reserving the right to object, I would like to know when members of the committee may hope to see a copy of the report, so that they can determine whether or not it can be disposed of in an hour's time?

Mr. UNDERWOOD. I understand that it will be here in a few minutes.

Mr. HAYES. A copy of the report will not be available until a report has been made to the House.

Mr. UNDERWOOD. But a copy of the bill agreed to in

conference is now available.

Mr. WINGO. I think the members of the committee at least should have an opportunity to know what is being done by the conferees upon that subject, and I would like to ask the gentleman from Alabama if he can assure the members of the com-mittee that they will be recognized in the division of time, and not be left as they were on Saturday, shut out without any opportunity to be heard.

Mr. UNDERWOOD. Mr. Speaker, I will say to the gentle-man from Arkansas that, of course, I shall not control the time. The time will belong to the gentleman from Virginia [Mr. Glass] and the gentleman from California [Mr. Hayes], but I have no doubt that the gentleman from Virginia will be willing to yield a reasonable amount of time to his colleagues, and that the House will be willing to agree on a reasonable amount of time, so that all may be heard, within reason; at least that is my disposition.

Mr. WINGO. Mr. Speaker, will the gentleman permit me right there? That is the situation that I do not care to get into. The presumption is that the gentleman from California [Mr. HAYES] and the gentleman from Virginia [Mr. GLASS] agree,

because each of them has signed the report.

Mr. HAYES. Oh, the gentleman is misinformed. The gen-

tleman from California has not signed the report.

Mr. WINGO. I beg the gentleman's pardon. I presumed that he was traveling the same route on this that he has traveled heretofore. He has been with the chairman of the committee. I beg his pardon, if I have misrepresented him at this juncture. The only object I have is not to be put in the attitude that I was on Saturday, of being shelved as a member of the committee, and gentlemen who knew nothing about what was in the bill being permitted to control and take the time that members of the committee, who do know something about it and who were interested in it, ought to have had.

The gentleman was in a better situation on Mr. MANN.

Saturday than this side of the House.

WINGO. Oh, I think if the gentleman had listened

closely to my remarks he would not think that.

Mr. MANN: I have listened very closely to the remarks of the gentleman whenever he has spoken. We had one minute on this side of the aisle on Saturday, and the other side of the House had considerable time.

Mr. WINGO. That is the objection I have. It may be true that there was one minute on that side, but that was more than certain members of the committee had. I suggest that the papers are not now in the possession of the House. While I would object now to any agreement, I shall not later on, as soon as that report is in, for I am anxious that it be disposed of at to-day's session.

Mr. MANN. Mr. Speaker, I would suggest to the gentleman from Alabama that he better bring in a rule, because I think

later on I shall object.

Mr. FITZGERALD. Mr. Speaker, I demand the regular

The SPEAKER. Is there objection to the request of the gentleman from Alabama that the rule compelling printing of a conference report in the RECORD one day in advance of its consideration be dispensed with and that when the conference report on the currency bill is presented to the House it shall be immediately considered? [After a pause.] The Chair hears none, and it is so ordered.

WITHDRAWAL OF PAPERS.

Mr. Townsend, by unanimous consent, was given leave to withdraw from the files of the House, without leaving copies, papers in the case of H. R. 15445, for the relief of Bayard T. Garrabrandt, Sixty-second Congress, no adverse report having been made thereon.

Mr. Hawley, by unanimous consent, was granted leave to withdraw from the files of the House, without leaving copies, papers in the case of H. R. 1701, Sixty-second Congress, no adverse report having been made thereon.

Also, papers in the case of H. R. 16938, Sixty-second Congress, or H. R. 13606, Sixty-first Congress, granting an increase of pension to George Gans, Company D, Thirty-sixth Wisconsin Infantry, no adverse report having been made thereon.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted as fol-

To Mr. Blackmon, indefinitely, on account of illness in family. To Mr. L'ENGLE, for the day, on account of illness.

To Mr. Goodwin of Arkansas, for the day, on account of illness.

To Mr. SHACKLEFORD, for 10 days, on account of sickness.

DISTRICT OF COLUMBIA APPROPRIATION BILL

The SPEAKER. The question is on the motion of the gentleman from North Carolina that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 10523.

The question was taken, and the motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 10523, with Mr. HULL in the chair. The CHAIRMAN. The House is in the Committee of the

Whole House on the state of the Union for the further consideration of the bill H. R. 10523, the District appropriation bill, the title of which the Clerk will report.

The Clerk read as follows:

A bill (H. R. 10523) making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1915, and for other purposes.

The CHAIRMAN. On Saturday a vote was being taken by a division on the motion to agree to the amendment offered by the gentleman from Kentucky, during which time a point of order of no quorum was made. The committee therefore rose, and the question again recurs on the motion to agree to the amend-

the question again recurs on the motion to agree to the amendment offered by the gentleman from Kentucky.

Mr. BORLAND. Mr. Chairman—

The CHAIRMAN. For what purpose does the gentleman rise?

Mr. BORLAND. For a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. BORLAND. As I understand it, that amendment is the amendment providing for the payment of street paying by the abutting property owners of the District of Columbia. Is that

The CHAIRMAN. That is correct.

Mr. MANN. Mr. Chairman, a parliamentary inquiry. The CHAIRMAN. The gentleman will state it.

Mr. MANN. Is not debate closed on that amendment? The CHAIRMAN. Debate is closed on the amendment.

The question was taken, and the Chairman announced the ayes seemed to have it.

Mr. PAGE of North Carolina. Division, Mr. Chairman.

The committee divided.

Mr. BORLAND. Mr. Chairman, I make the point of order of no quorum preseni. The Chair has not, I believe, announced

The CHAIRMAN. On this question the ayes are 28 and the

noes are 21.

Mr. MANN. Mr. Chairman, I make the point of order of no

The CHAIRMAN. The Chair will count. [After counting.] One hundred and one Members are present-a quorum. [Applause. l

Mr. MANN. Mr. Chairman, I ask for tellers.

Tellers were ordered.

The committee again divided; and the tellers [Mr. Page of North Carolina and Mr. Johnson of Kentucky] announced that there were-ayes 53, noes 31.

So the amendment was agreed to. [Applause.]

The Clerk read as follows:

The Clerk read as Iollows:

Under appropriations contained in this act no contract shall be made for making or relaying asphalt pavement at a higher price than \$1.80 per square yard for a quality equal to the best laid in the District of Columbia prior to July 1, 1886, and with same depth of base, nor more than \$1.80 per square yard for laying standard asphalt-block pavement equal to the best laid in the District of Columbia prior to July 1, 1904: Provided, That these conditions as to price and depth of base shall not apply to those streets on which, in the Judgment of the commissioners, by reason of heavy tradic, poor foundation, or other causes, a pavement of more than ordinary strength is required, in which case the limit of price may be increased to \$2 per square yard.

Mr. SISSON. Mr. Chairman, I offer the following committee amendment.
The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 20, after line 25, insert: "Hereafter the street designated as the Avenue of the Presidents shall be known and designated as Sixteenth Street, in accordance with the plans of the city of Washington."

Mr. JOHNSON of Kentucky. Mr. Chairman, I make the point

of order against the amendment.

The CHAIRMAN. The Chair is under the impression the point of order is well taken, and the point of order is sustained. The Clerk will read.

The Clerk read as follows:

Repaying with asphalt the granite roadway of P Street NW. tween Rock Creek and Twenty-eighth Street, 30 feet wide, \$11,500.

Mr. LEWIS of Maryland. Mr. Chairman, on Saturday last I introduced a resolution (H. Res. 355) directing the Committee on the Post Office and Post Roads to consider and report to this House a bill providing for the postalization of the telephone networks of the United States. Upon that same day, sir, a determination of the controversy between the Government and the American Telephone & Telegraph Co., under the antitrust act, reached a happy conclusion so far as the litigants were concerned. That conclusion, however, sir, does not embrace by any possibility of the well-known laws of economics any relief to the public in the matter of rates. Since competition in the telephone business is universally conceded by students of that subject to be entirely out of place, and to bring injury both to the public and to the owners of telephone property themselves, we can only regard the agreement of the defendant company with the Attorney General as establishing the primacy of the laws and a proper juridical situation for the American Telephone & Telegraph Co., not to speak of the good example afforded.

ECONOMIC PRINCIPLES.

Mr. Chairman, in approaching the subject I propose to present to the House to-day, the telegraph and the telephone agencies of the country, it is appropriate, I think, that they should be treated not as mere ephemeral incidents of legislation, but with a view to those more fundamental truths which determine our actions in disposing of the most serious problems of government.

What is the relation of the public and the post office to the telegraph and the telephone, those great agencies of communication between the people, which now equal, if they do not eclipse, the postal system in the taxes levied upon national

communication?

Do they differ from the post office in the function they per-form; and if not, how do they differ from industrial activities consigned by general consent to private control? Is there some-thing in their nature which distinguishes them from the farm and the retail store, some difference which reaches the dignity of a principle of classification, assigning one to the domain of postal action, while leaving farm and store to the field of competitive control?

Mr. Chairman, there is a science of political economy; it speaks with an authority, not to say with a thoroughness of analysis and breadth of view, which I could not claim. It speaks, too, with a responsible sense, a knowledge, of those perplexing varieties and complexities of modern societies. perplexing varieties and complexities of modern society and industry. It knows that society has never governed itself well by utilizing merely a single truth or principle, whether it be laissez faire, unqualified individualism, socialism, or communism; that society is not a one-idea or a one-fingered institution, but that it possesses aspirations and appropriate organic attributes and powers which it is its duty to utilize to promote its welfare. Now, what does it say on the subject before us, first as to the natural division defining those activities which should, and those which should not, on economic and social grounds, be assigned to the control of the individual? I quote from the work of Prof. Adams, "The State and its Relation to Industrial Action":

CLASSES OF INDUSTRY.

All industries fall into three classes, according to the relation that exists between the increment of product which results from a given increment of capital or labor. These may be termed industries of constant returns, industries of diminishing returns, and industries of increasing returns. The first two classes of industries are adequately controlled by competitive action; the third class, on the other hand, requires the superior control of State power.

FIRST CLASS-CONSTANT RETURNS.

Industries of the first class are such as demand a proportional increase in capital and labor to secure a given increase in product. That is to say, if 2x capital and labor result in 2y product, the application of 3x capital and labor would gain 3y product. The increment of return is equal to the increment of capital. All those businesses in which success depends on attention to detail and where the personal element of the laborer is brought prominently into view fall under this class. For example, the retail business of merchants is subject to the rule here stated.

e. g. Retail business: The struggle for superior success in these businesses is a struggle to depress the cost of rendering services rather than to raise the prices of services rendered.

It is not necessary for public officials to inquire if sugar is sold as low as fair dealings demand, for this business is one that admits easily of multiplication, and consequently invites competition. The step from a clerkship in a grocery to the proprietorship of a new establishment is not a difficult one to take, and for this reason we are assured that the profit of an ordinary grocer will not greatly exceed the salary which he

pays his head clerk. There can, therefore, be no motive for endeavoring to apply the rule of public financiering to businesses of this sort.

SECOND CLASS-DECREASING RETURNS.

Farming: The same conclusion applies to the second class of industries, where a given increment of product calls for a proportionally greater increment of capital and labor. Assuming the same relation to exist in an established business as before, if 2x capital is required for 2y product, an additional x of capital will not produce an additional y of product, but something less. That is to say, 3x capital may produce but 22y product. Industries of this sort are said to be subject to the law of diminishing returns, and it calls for no abstruse argument to recognize that society is quite safe in submitting such lines of industry to the control of competition. The rate of product in the new industry is greater than that in the one that is further developed, and for this reason we may rely upon individual interest to maintain a large number of separate producers. The agricultural industry is usually cited as an illustration to which the principle of diminishing returns may be said to apply, and, if we leave out of view the element of accruing rent, the conclusion which we have suggested may be applied in its most extreme form to the business of farming. There is no call for Government farming.

THIED CLASS-INCREASING RETURNS.

THIED CLASS—INCREASING RETURNS.

The peculiarity of those industries belonging to the third class, which we now come to consider. lies in the fact that they conform to the law of increasing rather than to the law of constant or decreasing returns. The increment of product from an expanding enterprise is greater than the increment of capital and labor required to secure its expansion. Adopting the algebraie formula, as before, if 2x capital give 2y product, an economic application of 3x capital will give more than 3y product. * * The important thought in this connection is that where the law of increasing returns works with any degree of intensity the principle of free competition is powerless to exercise a healthy regulating influence. This is true, because it is easier for an established business to extend its facilities for satisfactorily meeting a new demand than for a new industry to spring into competitive existence. If this analysis of industries be accepted as correct, there can be no question as to the line which marks the duties of the State. The control of the State over industries should be coextensive with the application of the law of increasing returns in industries.

There are many other lines of business which conform to the principle of increasing returns, and for that reason come under the rule of centralized control. Such businesses are by nature monopolies. We certainly deceive ourselves in believing that competition can secure for the public fair treatment in such cases or that laws compelling competition can ever be enforced. If it is for the interest of men to combine, no law can make them compete. For all industries, therefore, which conform to the principle of increasing returns, the only question at issue is whether society shall support an irresponsible extra-legal monopoly or a monopoly established by law and managed in the interest of the public. In this latter way may the benefits of organization in the form of monopoly be secured to the people, and in no other.

Thus where we have the law of increasing returns as a cause we have monopoly as a result. How shall that monopoly be rendered of the greatest service to society? Well, that, it is said, is a question of motive in financiering:

Private financiering: The relations here set forth will present themselves more clearly to our minds if we throw into comparison the rule of public and the rule of private financiering. A private business is managed to secure a profit, and, other things being equal, the higher the price secured for any service rendered, the higher will be the profit. The rule of private financiering therefore is to maintain the profit. The rule of private financiering therefore is to maintain the profit of goods or services at the highest price which has no tendency to curtail profitable business. The price of goods in this case will equal the cost of production, plus the profit to the undertaker, and the only guaranty against exorbitant rates lies in the fact that purchasers are free to choose from whom they will buy.

Public financiering: The rule of public financiering, on the other hand, conforms to an altogether different principle. It is the purpose of government to render services at the lowest price consistent with efficient service. Price equals cost. This is true, because the State, being the manager of the business, has no motive in acquiring riches. The officers of the State receive their salaries which, roughly speaking, may be said to correspond to the profit secured by the managers of private enterprises. The guaranty that price will not be more than cost of production, including salaries of officers, lies in the publicity of accounts and in all that goes to make up efficient service. In theory, therefore, we should expect parallel results from a monopoly under control of the State and from a business privately organized directed by the principle of free competition.

The public-service motive: In institutions, as with individuals, motive is everything. The motive to serve one's self is the common motive, and to impose sufficient restraint upon its operation, when unsocial, is, stated in a broad way, the principal object of government. There is much illogical complaint in this respect against what are called "public utilities." ers, who have invested their money with the purpose of gain, are expected to behave differently from investors in general. Of course they do not, but why should we expect them to? Because they have a monopoly, it is argued. Well, this may impose an inferential duty, yet who will say that it can have a decisive influence upon the normal motive of the investor to gain all he can?

Where public needs and social considerations become the principal and dominating purpose, where imperative public servprincipal and dominating purposes it is the object, the world naturally has not yet found the rethe normal action of this motive under the rule of private finan-

An English railway, some 60 years ago, had the question presented to it as to how to graduate its passenger rates to secure the best returns. Much as one adjusts his opera glass in the theater to obtain the clearest line of vision, these railway offi-

cers adjusted and readjusted their passenger rates. They tried rates all the way from 6 cents a mile to one-half a cent a mile. and found that as the rate was 31 cents a mile or one-half cent a mile, the higher charge produced 6 per cent and the lower charge only 4 per cent dividends; and, acting on the private motive, or the rule of private finance, they rejected the rate which would have produced the greater public service and adopted that yielding the higher returns.

The rule of private financiering is obviously applicable to Classes I and II of the economists, while the rule of public financiering is equally applicable to Class III, to which the publicists and economists formally assign telegraphy, the telephones, expressage, and similar services. Against this view we have only the misapplication, by the superficial or interested, of the doctrine of laissez faire. Let us see what this doctrine is.

Prof. Cairnes says:

Prof. Cairnes says:

I must ask you, in the first place, to note what this doctrine of laissez faire, if it is to be taken as a scientific principle, really means. The implied assertion, as I understand it, is this: That, taking human beings as they are, in the actual state of moral and intellectual development they have reached; taking account of the physical conditions with which they are surrounded in the world; lastly, accepting the institution of private property as understood and maintained in most modern States, the promptings of self-interest will lead individuals in all that range of their conduct which has to do with their material well-being spontaneously to follow that course which is most for their own good and for the good of all. Such is the assertion with which we have now to deal, and you will see at once that it involves the two following assumptions: First, that the interest of human beings are fundamentally the same—that which is most for my interest is also most for the interest of other people—and, secondly, that individuals know their interests in the sense in which they are coincident with the interests of others, and that, in the absence of coersion, they will, in this sense, follow them.

Applied in its extreme or absolute form Mill observes that

Applied in its extreme or absolute form, Mill observes that "it excludes some of the most indispensable and unanimously recognized functions of government," and even Cairnes, far from claiming for it finality in application, cautions us thus:

Only let us remember that it is a practical rule and not a doctrine of science; a rule in the main sound, but, like most other sound practical rules, liable to numerous exceptions; above all, a rule which must never be allowed to stand in the way of a candid consideration of any promising proposal of social or industrial reform.

Now, I think it plain that the doctrine of laissez faire has its true interpretation in the statement that society ought not to enter upon fields of activity where the forces of competition insure to consumers, who represent the social interest, the prevalence of competitive prices. It surely can not be applied to a monopoly, since the conditions for the play of individual freedom and struggle, predicated by the statement of the doctrine itself, are excluded in its very terms. But what is an industrial monopoly? The answer of the economist is: "An industrial monopoly may be defined as a business superior to the regulating control of competition." And what are its advantages and characteristics? Their answer is:

characteristics? Their answer is:

Provided a business admits of something like military organization; provided the details of its management have been well worked out; provided its extension to meet new demands may be accomplished by merely duplicating what already exists; and provided the social want which it supplies is widespread and constant, exclusiveness in management must lead to efficiency of management, if only men of adequate ability may be found to assume authority. Under such conditions a service may be rendered at less cost to the public than if the agents of the monopoly were broken up into competing groups. There are several reasons why this is true. The fact of an assured demand for services rendered admits of the closest calculations; the extent of the demand also allows of a minute application of the principle of division of labor; the absence of any rivalry between competing concerns precludes the necessity of expending more capital than is required for an economical performance of the service; and, what is perhaps of as much importance as any other consideration, there is no temptation to adopt speculative methods of management which lead to the covering of unnecessary losses of one period by the arbitrarily high profits of another. Thus the possibility of cheapness and efficiency seems to lie in the very nature of a monopoly. This is the beneficent principle of which mention was made, and the practical question is how to realize the benefits of this principle for society. (Prof. Adams, The State, etc.)

It is strongly pointed out by the sociologists that the misap-

It is strongly pointed out by the sociologists that the misapplication of this maxim of laissez faire, and the consequent neglect of society to discharge its true functions with respect to monopolies, is charged with serious dangers.

monopolies, is charged with serious dangers.

The policy of restricting public powers within the narrowest possible limits tends to render government weak and inefficient, and a weak government placed in the midst of a society controlled by the commercial spirit will quickly become a corrupt government; this in its turn reacts upon commercial society by encouraging private corporations to adopt bold measures for gaining control of government machinery. Thus the doctrine of laissez faire overreaches itself; for the application of the rule which it lays down—

Major premise: All human interests are the same.

Minor premise: Each man knows his own interest, and if left to himself, will follow it.

Conclusion: The best possible form of social relations will emerge from the unrestricted play of industrial freedom—

* Will absolutely destroy that harmony between public and private duties essential to the best results in either domain of action.

(Ibid.)

Mr. Chairman, I shall not, at this point take the time of the street of the

Mr. Chairman, I shall not, at this point, take the time of the House to point out the moral adduced in the last excerpt. I shall not compare the public morals of New York and Berlin in street railway history; nor of London and San Francisco in the matter of the telephone. Nor will it be necessary to point to the contrast presented by our untainted postal system, the peer of any postal organization in efficiency and honorable history.

It is enough, sir, to add at this point that the conclusions of these authorities are much more than mere dicta. Every important country of the world—England wholly, as to the telephone only but recently—has long adopted these views. I insert later a list of them which finds the United States looking very solitary, with only Spain for respectable company. authority of the above conclusions of science, supported by the almost unanimous examples of other countries, will be argument sufficient to most people for like postal assumption here. will intuitively liken the telegraph and the telephone with our ex; prience with the express companies and the parcel post, so long delayed by certain causes; and will feel that at least the age of constructive statesmanship has crossed the Atlantic and inspired a great party, suppressed for two generations, with its purposes to serve mankind. But, sir, I should be derelict to rest the argument on the authority of examples, however general and impressive; and so I must ask the patience of the House while I enter into a minute analysis of the facts which govern approach to businesslike conclusions on this subject.

ANALYSIS AND COMPARISON.

THE TELEGRAPH.

We have had generally stated the elements necessary in the administration of a monopoly to secure its maximum utilization for the social welfare. Let us catalogue these elements and, applying them to our subject matter, ascertain which, the privative or the postal, exploitation of our great public monopolies in the telegraph and the telephone are conducive to the greater public service. But before presenting the data on the subject let us briefly summarize the conclusions reached by the economists:

(a) That the store and farm are competitive, not monopolistic, in character as shown by the circumstances that the prices are fluctuating. But the telegraph and telephone services are not truly competitive; their prices do not tend to fluctuate. Thus they have the price characteristic of monopolies.

(b) There being no competition the rule of private financiering obtains, if the monopoly be privately owned; the higher the price secured the higher will be the profit.
(c) Conducted with this motive (private) the utilization of

(c) Conducted with this motive (private) the utilization of the monopoly is restricted to rendering only that degree of social service consistent with maintaining such prices.

(d) Accordingly, the private conduct of a monopoly is not productive of its highest utilization or greatest social service. Social efficiency: These maxims may be illustrated in the most direct way. In the United States there was up to the eighties something of competition between rival telegraph companies, and at competing points there were 10, 15, and 20 cent rates. The inevitable law is that such interests will not compete when it is more profitable to combine. There is now a complete concentration of the Western Union and Postal Telegraph Cos. with respect to rates. The result is that while

street car fares, electric lighting charges, even the price of gas, and transportation rates have, generally, gone down with the increase of business, telegraph rates remain the same as they were fixed by these companies in 1888.

In New Zealand the telegraph system is under the principle of public financiering and conducted by the post office. Since price levels there generally, as well as social and educational conditions, resemble those of the United States, it will be permissible to compare the service there with our own. As against the minimum rate under private financiering of 25 cents in the United States, the New Zealand minimum rate is 12 cents. This illustrates the normal functioning of the telegraph monopoly as publicly and privately financiered, for both rates are equally normal in relation to their facts of ownership. By which it is meant to say that if the private financier should discover that only the lowest rates would produce the maximum of profit, and the public financier that only the highest rates would insure the most extensive public service, we should immediately have the New Zealand rate in the United States and the American rate in New Zealand.

But is it equally true that the rule of private financiering prevents the highest social service or full potential use of this particular form of monopoly? In answer I will continue the comparison with New Zealand:

Country.	Rate.	Number messages for 100 popula- tion.
New Zealand	\$0.12 \$0.25 to \$1.00	809 110

Thus, under what appears to be similar price and wage levels and social and industrial conditions, we have a telegraph institution under the rule of public financiering yielding about eight times the social service attained by private financiering.

From this experience we adduce another conclusion. The New Zealand State compares with one of our own of like extent and population. Its experience indicates a potential demand of eight telegrams per capita per annum for the United States, seven-eighths of which fails to find a permissible rate, and is thus suppressed by the relatively prohibitive tariffs under private financiering. If this be the case, the defects are economically unpardonable; for in offending against the law of normal efficiency, by an almost complete failure to perform the function, the functionary's right to control becomes forfeit. A high rate, the highest rate, of profit, even at the cost of excessive prices, society may be willing to grant as a concession to the rights of the private financier; but a radical failure to consummate its function and afford effective accommodation for the normal requirements of society is to be fundamentally delinquent. At this point I shall insert a table giving the telegraph rates and the social use made of them here as compared with the postal telegraph rates and like uses in other countries.

		Mini	Minimum rate and average receipt per telegram. Telegrams per capit		per capita.	. Letter rates.		Letters per capita.				
	Number of words.											
	Per word. Each word extra. Rank. Receipt. Rank. Number. Rank.	Rank.	Rate.	Rank.	Number.	Rank.

ustria lungary ussia nited States	10	². 075 . 25	2, 025 , 02	13 14	. 224 . 251 . 390 . 360	13 14 15 17 16	.73 .59 .24 .97	13 15 17 9	.02 .02 .02 .036 .02	2 2 5 2	45 19 7 101	1
Do		.35	.02 .02 .03 .03									
Do Do		.75 1.00	.05									

It appears that we rank second in postal rates and first in utilization, while we rank seventeenth in the telegraph rate charged and ninth in resulting social service.

Mr. Chairman, having applied these economic principles as criteria to determine the social efficiency of our telegraph service, let us now apply the standards of economics to them to determine their administrative efficiency.

ADEQUACY OF ORGANIZATION.

Mr. Chairman, I present now the elements or factors laid down by the political economists as necessary in the working organization of a monopoly in order that its service be rendered at the lowest cost, and that society should realize the benefits of a monopoly in the class of enterprises for which that form of capital and labor is economically and socially adapted. The elements are stated to be:

(a) Unity and exclusiveness of organization. (b) Details of management well worked out.

(c) Facility for extension by mere duplication of existing structure.

(d) A social demand for the service which is widespread and constant.

(e) Adequate ability in authority.

Results:

(f) Service at less cost than if broken into groups, because

(g) Assured demands for service admits of closest calculations.

(h) Extent of demand admits of most minute division of labor.

(i) Absence of rivalry reduces to a minimum the amount of capital and other expenditures necessary for the performance of the service

(j) Speculative management is eliminated; (k) And thus, with public financiering motives,

(1) The maximum of cheapness and efficiency is rendered

possible Mr. Chairman, it is, of course, not a matter of criticism that

the telegraph monopoly is lacking in a main essential-the public-service motive. As a privately financiered organization, such a motive is against nature and should not be asked.

It is only by the employment of these factors that the highest utilization of the monopolistic institution can be attained. we review them let us notice which kind of financiering, the privative or the public, is most adapted to virilizing the respective factors.

(a) Unity and exclusiveness of organization: That this is a primary essential is almost a truism, admitted on all sides. The Bell Co. frankly justifies its war of capture or destruction of its rivals on this ground, and but recently in its campaign of advertising against the procedure of the Department of Justice for the enforcement of the antitrust laws declared:

We believe that the highest commercial value

In which they mean to include the element of public service can only be attained by one system under one common control, and that it can not be given by independent systems unless they are controlled by agreements in effect making them a single system—and that is what the Bell system is.

I propose to take up the challenge these advocates of private monopolies make. In another part of the advertisement they declare:

We believe that the public would in this way get all the advantages and avoid all the manifest disadvantages of public ownership.

In treating this challenge "public ownership" shall be taken as equivalent to the principle of postal control and administration of telephone and telegraph communication; and, not to be unfair, the principle of private financiering shall be treated as equivalent to the Bell Co.'s own administration of its telegraph and telephone properties. In this comparison I shall make no complaint against the Bell system for the doing of anything which the average private investor does with private property and shall only subject their claims to the tests of facts and social economic principles, with a view to determining the premises of the challenge, namely, that the private policy "gives the public all the advantages of postal administration without its disadvantages.'

THE ADVANTAGES.

Mr. Chairman, the challenger has not defined what it means by the "advantages of public ownership." I shall, therefore, be under the necessity of doing so. I shall do so as briefly as possible, and I presume it would include the following:

The postal system gives nondiscriminating service rates as low as any in the world:

(a) The 1 and 2 cent letter rates, good to all our possessions, to Canada, Great Britain, and Germany, and to the farms of the country.

(b) The cent a pound, or 2 (2.38) mills per mail piece, for educational publications consisting of the magazine, the periodical, and newspaper of the country.

(c) The parcel post, extending to the farm with rates as low as 5 cents, against the 25 cents hitherto charged by the pri-

vately financiered express service.

Besides these, it dispatches money and pays interest on deposits, insured by the indubitable security of the Nation, and performs other services. All these services it renders as cheaply as any other postal system, stated in terms of money (except Japan), and in terms of price levels performs them, along with Canada, for the lowest payments in the world. These are some of the advantages of public or postal financiering. And we ask no consideration in this comparison for the higher wages of the postal employee of the United States or of the higher price levels here, nor for the fact that railway mail transportation is paid for here, which is commonly not the case elsewhere.

THE DISADVANTAGES.

Now, Mr. Chairman, as to the "disadvantages of public ownership." The challenger has not defined them, and so I will be obliged to do so. The disadvantages would probably be alleged as:

(a) Postal deficits of the past.

(b) Alleged unsatisfactory political phases in relation to postal personnel.

With regard to the postal deficits, they assuredly represent only a small part of the amount of social service rendered under statutory public policies for which the public is not directly called upon to pay. The franking privilege (1.85 per cent of the total postal service), the carriage and handling of secondclass matter for educational purposes constitutes 29.24 per cent, carried at about one-seventh its proportional cost; these are the items which take the form of a "deficit," only because the department has no "public-service" statement showing the amount and value of service rendered, like a railway does. such a table were presented there would be no deficit, but a surplus of very many millions, quite as many millions as the telegraphs and telephones show as the profits of their private financiering. This very clearly appears when we charge to the franked matter and the second-class educational mail pieces the rates charged on other postal matter. Thus only 5.19 per cent of postal revenues are derived from the 29.24 per cent of the total postal services devoted to such second-class matter. and no revenues from the 1.85 per cent of such service given to franked and penalty matter.

It can be readily seen, therefore, that 25.90 per cent of the postal service goes unaudited, and that a correct statement of its services would credit its receipts with that additional amount. In that event the department would have shown a surplus at all times since the war, and in 1912 a surplus of more than

The classification of the postal deficit as a "disadvantage" fails, moreover, to comprehend the distinction between private and public financiering. The test of success in the former is the degree of profit it brings the private investor; in the latter the test is the degree of social service rendered. This argument of a deficit might be as well made-and doubtless would be if the financial motive existed for making it-against the public roads, schools, and colleges, not to say the churches and other eleemosynary institutions which are all expenditure and show no audited fiscal profit. But the challenger has disayowed such standards of the private financier and proposes to justify its tenure of these public monopolies on social service principles. Even so, it can not call that a deficit which simply represents unaudited services to the Nation, performed at its command upon grounds of settled educational public policy. Moreover, these deficits are in another sense chargeable to the influences of the private financier who has succeeded for 40 years in de-barring the postal system from the very profitable function of the parcel post. Had this business been in its hands the department would have shown no deficit, but surpluses in much the greater number of years. The initiatory experience of the very limited service we now enjoy shows that even with the most substantial reductions in the rates the service is highly profitable to the department.

The postal personnel: In pointing out the "disadvantages" of public or postal administration I confess I may not do it to the satisfaction of the challenger, however sincerely I may endeavor to divine its meaning. I am simply crediting it with making those objections commonly made when I refer to the "deficit" and now to the grumbling one occasionally hears of inefficiency in Government employees. But is the postal employee inefficient? Let us see what it is he does. Obviously, in the main, it is to handle the mail piece. How well does he perform this work? Here is the record for 27 years:

Year.	Number of employees.	Estimated num- ber of pieces mailed, including foreign matter.	Number of mail pieces per em- ployee per annum.	Cost per average mail piece, in cents.	Cost per average mail piece, in cents, excluding assignable cost of Rural Delivery Service.
1886 1887 1888 1889 1800 1889 1800 1890 1800 1800	122, 698 127, 288 134, 112 129, 295 153, 857 162, 855 171, 780 178, 018 183, 916 189, 671 194, 533 199, 846 208, 873 215, 904 224, 029 235, 327 246, 524 226, 673 286, 685 272, 694 278, 610 283, 481 288, 636 291, 320 291, 113 290, 701	3,474,000,000 3,495,100,000 3,575,100,000 4,005,408,206 4,309,900,352 4,776,575,076 5,021,841,056 4,919,090,000 5,134,281,200 5,134,281,200 5,134,281,200 5,781,002,143 6,214,447,000 6,576,310,000 7,129,990,202 7,424,390,329 8,085,446,858 8,857,467,048 9,502,459,535 10,187,505,889 11,361,606,610 12,255,666,367 13,173,340,329 14,004,577,271 14,850,102,559 16,900,552,138 17,588,658,941	28, 313 27, 458 26, 606 29, 856 26, 033 26, 833 27, 806 28, 209 28, 746 27, 069 29, 752 29, 752 29, 752 29, 752 30, 459 31, 526 31, 549 32, 797 34, 625 35, 366 37, 449 40, 770 44, 083 46, 463 46, 463 46, 620 50, 975 58, 054 60, 504	1.44 1.49 1.55 1.58 1.61 1.63 1.57 1.57 1.57 1.57 1.57 1.54 1.57 1.50 1.47 1.44 1.48 1.47 1.49 1.53 1.56 1.49 1.48 1.48 1.48 1.48 1.48 1.48 1.48 1.48	1.57 1.50 1.47 1.43 1.46 1.42 1.40 1.36 1.28 1.26 1.25 1.25 1.25 1.25

Mr. Chairman, during the years of that record not only have the units of service more than doubled, but city and rural delivery have been added, virtually doubling the quality of the service. And not only has the quality nearly doubled, the cost of service, as we see, has been reduced for each piece. Sir, I invite any privately financiered public service agency to compare its record as against this. Can any telegraph or telephone company—yes; can any public-service corporation enter the lists on this showing of advancing efficiency and progress?

At this point it may be interesting to compare our postal accomplishments with that of other nations. At the same time tables showing our telegraphic-service performances are introduced for comparison with accomplishments in these services by the postal systems of other countries.

Number of postal-service units per postal employee.

Country,	Units.	Rank.
Belgium United States Netherlands Italy Luxemburg Denmark. Switzerland Germany Sweden France Norway Austria. New Zealand Great Britain Hungary Japan	85, 819 60, 651 53, 621 42, 947 40, 321 38, 930 37, 562 37, 236 35, 837 32, 414 30, 523 28, 696 26, 056 23, 025 21, 820	1 2 3 4 5 6 7 7 8 9 10 11 11 12 13 14 16 16 16 16 16 16 16 16 16 16 16 16 16

Mr. Chairman, from this table it appears that Belgium is first and the United States second in postal efficiency among all the nations of the world. And if Belgium were not composed virtually of one large city with suburban surroundings I think we should really rank first.

Traffic density and efficiency.

Country.	Telegrams ploy		Telegrams per opera- tive office.		
	Per annum.	Per day.	Per annum.	Per day.	
New Zealand United States Norway Belgium Sweden Notherlands. Switzerland	3,700 3,487 3,115 3,063 2,370 1,607 1,596	10.1 9.5 8.7 8.6 6.6 4.4 4.4	4,380 14,332 2,097 5,451 1,495 4,774 2,454	12 39, 3 6 15 4 13 7	

With three times the traffic density per office the telegraph companies of the United States still do not take first place in product per employee. The reason for this will appear a little later. Here attention is called to the gross amount of idle plant implied in the small number of telegrams per average day—not more than 10 messages per day. This compares with 193, the average mail pieces per day for the average postal employee, with its collection, 620 miles of railway transportation, distributions, and deliveries over the city and rural routes.

I have thus far treated the question of efficiency as related to the amount of work or product which privately financiered and public financiered monopolies secured from their employees. But I put it to the serious judgment of the House whether the question of efficiency ought to be decided on such narrow grounds. Ought not such a question include a comparison of the rates charged to the public and consequent degree of social service?

Mr. Chairman, my preceding remarks have been mostly descriptive of the results under the principle of public and private financiering. Only by general analysis have they suggested, on a priori grounds, the processes of fact which cause the disappointing results where private financiering has been allowed to take the place of public financiering in the conduct of the telegraph monopolies. At this point, sir, it becomes necessary to make a painstaking investigation of the minute facts and circumstances comprising the management and workings of these agencies. If the inefficiency of our telegraph networks, as conducted in the United States, is plain, while our postal agency and competitive industries show, at least, more than the average efficiency, it may be that the particular causes of such inefficiency can be identified and brought to light. Let us take up these agencies of communication and compare their methods of operation with those of the post.

EFFICIENCY OF TELEGRAPHIC ADMINISTRATION.

Recurring now to the elements of organization essential to the highest utilization of a monopoly for social purposes we can dispose of the first, "unity and exclusiveness," by the mere statement that there are some 25 telegraph companies doing commercial business, and that two of them duplicate their agencies in more than half of the country. The next element, efficiency in details of management," will require more elaborate discussion.

Mr. Chairman, the public is familiar with the high state of simplicity attained in postal administration, especially in dealing with the mail piece and safeguarding the revenues. I have had experienced telegraphers outline the processes and acts of attention devoted to the telegram under private administration of these agencies. They are, in part, as follows:

HANDLING OF COMMERCIAL MESSAGES. THE TELEGRAPH COMPANY.

THE TELEGRAPH COMPANY.

1. Figures charges on telegrams.
2. Reads each message for purpose of properly deciphering it.
3. Marks on each message "time filed."
4a. Enters each telegram on sheet "receiving clerk's record."
5. Turns in cash to local cashier.
6. Sends telegram.
7b. Puts time sent, numbers, sending and receiving operators' signals on telegram.
8c. Checks off numbers on number sheet, and initials sheet.

RECEIVING OPERATOR.

9. Receives and transcribes telegram on proper blank. 10d. Checks off number on number sheet and initials opposite the number.

DELIVERY CLERK.

11e. Makes wet copy of telegram.
12f. Puts delivery number on telegram.
13g. Makes out delivery sheet for messenger.
14h. Enters telegram on "delivery clerk's record."
15. Incloses telegram in envelope and addresses envelope.
16l. Examines delivery sheet to see telegram is properly receipted

for. 17j. Collects cash from messenger to cover "collect received" telegrams.
18k. Turns in cash to local cashier.

MESSENGER BOY.

Delivers telegram to proper addressee.
 Secures receipt for telegram on delivery sheet.
 Collects cash on "collect" telegrams.
 Returns delivery sheet and cash to delivery clerk.

RECEIVING OPERATOR (RELAY POINT).

23. Receives and transcribes telegram on proper blank.
24n. Checks off number on number sheet and initials sheet.
SENDING OPERATOR (RELAY POINT).

25. Sends telegram.

260. Times telegram, etc. 27p. Checks off number sheet.

Here, then, are 27 acts or processes, for 16 of which (the lettered ones) an argument of elimination might well be made with the introduction of the stamp and other simplified postal

But whatever may be thought of the susceptibility to elimination of half of the above items, it is believed that the fol-

lowing, some 52 in number, all accounting processes, would give way under public management to the prepaid or postage-due stamp. We find it safe to intrust nearly three hundred millions of postal revenue to such stamps now.

OPERATIONS IN THE ACCOUNTING DEPARTMET.

CASHIER (LOCAL).

- Checks up and balances "receiving clerk's record" of messages.
 Checks up and balances "delivery clerk's record" of messages.
 Checks up and balances money-order clerk's sent-and-received
- record.
 4. Checks up "charge accounts" weekly or monthly bills of customers for messages.
 5. Turns over above four accounts to bookkeeper.
 6. Checks up receiving clerk's record, branch offices.
 7. Checks up delivery clerk's record, branch offices.

BOOKKEEPER (LOCAL).

- BOOKKEEPER (LOCAL).

 8. Records cash received, daily receiving clerk's record.

 9. Records cash received, daily delivery clerk's record.

 10. Records cash received, "sent" money orders record.

 11. Records cash received, "received" money orders record.

 12. Records cash received, receiving clerk's record, branch offices.

 13. Records cash received, delivery clerk's record, branch offices.

 14. Records all charge accounts.

 15. Records apyment of charge accounts.

 16. Makes out weekly balance sheet.

CHARGE ACCOUNT CLERK.

- 17. Makes out charge accounts (weekly and monthly).
 18. Balances with bookkeeper.
 19. Sends out bills of charge accounts.

AUDITOR'S OFFICE (LOCAL).

- AUDITOR'S OFFICE (LOCAL).

 20. Balances with cashier "receiving clerk's" record.

 21. Balances with cashier "delivery clerk's "record.

 22. Balances with cashier receiving clerk's record, branch offices.

 23. Balances with cashier delivery clerk's record, branch offices.

 24. Checks up number sheets of main and branch offices.

 25. Keeps book record of branch office receipts.

 26. Inspects "sent messages" to see that they all bear number, time, and operator's signature.

 27. Makes dally record of messages on forms supplied for "Sent paid," "Sent collect," "Received paid," "Received collect," for public, press, and Government accounts.

 28. Statement of Government messages sent paid, for Government, for general auditor.

 29. Statement of Government messages sent collect, for Government, for general auditor.

- general auditor.

 29. Statement of Government messages sent collect, for Government, for general auditor.

 30. Statement of Government messages received paid, for Government, for general auditor.

 31. Statement of Government messages received collect, for Government, for general auditor,

 32. Statement of messages upon which there are other line tolls, for general auditor.

 33. Makes daily check sheets for each city (amount of tolls).

 34. Makes statement of "deadhead" messages.

 35. Makes monthly statement of uncollected messages.

 36. Sorts all messages as "sent paid."

 38. Sorts all messages as "sent paid."

 39. Sorts all messages as "sent paid."

 40. Sorts all messages as "received collect."

 41. Figures amount of tolls on each message.

 42. Files all messages by dates.

 43. Answers all check-error sheets.

 44. Makes daily statement of "sent" press report (number of words and city).

 45. Counts number of words in "sent" press matter.

 46. Makes daily statement of "received collect" press matter.

 47. Counts number of words in "received collect" press matter.

 48. Makes daily statement of "received collect" press matter.

 49. Makes daily statement of "received collect" press matter.

 40. Makes daily statement of "received collect" press matter.

 41. Figures number of words in "received collect" press matter.

 42. Counts number of words in "received collect" press matter.

If it is objected that all these are very little things, let it be remembered that so, too, is the telegram; and that if it is

to be loaded down with an accounting burden only to be compared with the accounting applied to a carload lot of freight in railway transportation, as the express companies have done with their packages, the 25-cent minimum of the railway and of the express company and the like minimum of the telegraph company become logical enough, even if economically indefensible for a mere electrical letter.

It is exactly accurate to say that merely affixing the stamp to the letter replaces these 47 accounting processes with the individual telegram under postal practice. That is, the postal system realizes the first great canon of a publicly financiered monopoly. Its "details of management have been well worked

It is not meant to criticize the fiscal management of the telegraph companies here described. There are many reasons why the conservative private financier may find it essential to employ all the processes set forth, although under postal financiering the postage paid or postage-due stamp would safely suffice. The same phenomenon of relative rather than actual waste or inefficiency appears in the handling of the parcel by the express company when compared with the Postal Depart-

LIST OF EXPRESS PROCESSES.

THE EXPRESS COMPANY.

- THE EXPERS COMPANY.

 1. Ascertains the rate to be paid.
 2. Makes out waybill.
 3. Copies waybill into record of shipments "forwarded."
 4. Copies same into record of shipments "received."
 5. Makes statement of "shipments sent" to auditor.
 6. Makes same of shipments "received."
 7. Auditor checks waybilis against record of "sending" agent.
 8. Auditor checks same against record of "receiving" agent.
 9. In case of "through" waybills previous items repeated.
 10. Auditor makes division of percentages going to express company and the railway or railways.
 11. In case of "through" waybills auditor makes like division of percentages between express companies and railways.

 Affining the postages stamp replaces all these presesses in

Affixing the postage stamp replaces all these processes in

If the postal system were to copy express practice; that is, if it had to keep in view such a set of privative relations to the shipment, the first pound parcel rate would have at least to be doubled to pay the expense. It is likely true that the telegraph companies would find it as impossible to eliminate these accounting processes as do the express companies. At the same time, the postal method finds the stamp a sufficient accountant and conservator of its revenues.

RECEIPTS AND EXPENDITURES.

If the privative relations imposed on the administrative details of telegraph operation constitute such a tax on its personnel as the preceding analysis suggests, one should expect that other elements of expenditure would be substantially involved in the criticism. There is here inserted a balance sheet of the companies for 1902, the latest year available for which anything like an itemized expense account is given by the census. The items are also stated in percentages, and it is obvious that some of them would be rendered unnecessary under postal management.

Commercial telegraph systems, 1902. Compiled from special report of United States Census, telephones and telegraphs, 1902 - Continued.

	. Receipts.		Per ce	nt of—				
		Receipts.	Receipts.	Receipts. E	Expenses.	Operating expenses (\$26,592,411).	Earnings and income from all sources (\$40,930,038).	Number of employees of each class.
20. Net earnings from operation.	\$8,703,158			To pair Se				
21. Income from other sources, total	5, 629, 469							
22. Dividends on stock of other companies 23. Lease of lines, wires, and conduits 24. Rent from real estate 25. Interest. 26. Miscellaneous	1, 159, 658 4, 185, 799 205, 070 6, 719 72, 223							
27. Gross income, less operating expenses	14, 337, 627							

Of the above items of expenditure it is apparent that Nos. 3, 14, 15, 16, and 19, amounting to 26.8 per cent of operating expenses, might be eliminated, which would thus leave but 73.2 per cent of the operating cost. If to that be added the interest on Government capital at 3 per cent for the value of the agencies, we should have the necessary cost of the telegram for that year.

We shall see later that the cost per message should decrease with the increase of the traffic, as shown with the mail piece, and another element of economy thus be added, but I shall defer the statement of a schedule of tentative rates for more thorough treatment. The intent has been to show the failure to realize operative economy by merely confederating otherwise autonomous groups, the mere juxta amalgamations of which, in the cases of the Bell telegraph and telephone systems, as well as the Mackay companies, and their rate-making agreements, producing none of the advantages or operative economy of a pure monopoly, but instead only an effective power to fix the rates most desirable

To the foregoing wastes should be added nearly the entire expenditure of the rival company where its lines and offices duplicate another like service. To speak to the very point itself, the expenditures and capital costs of either the Bell or the Mackay telegraph companies, where their lines serve the same territory, could be almost wholly eliminated, since either system is probably adequate to handle all the traffic at the duplicated points.

INADEQUACY OF EXTENSION.

It has been suggested that substantially the entire capital and current expenditures of the rival telegraph company is wasted with reference to competitive territory. The antonym of this condition is the absence of any telegraphic service at points which are unattractive to private finance. There are 64,022 post offices and branches in the United States and but 6,828 (1907) offices maintained by the telegraph companies themselves, although they treat some 22,282 railway-signal stations as telegraph offices. Converting the railway telegraph into phone signaling is reducing this rather doubtful claim for proper geographical distribution of the telegraph service, where, with the railway business having necessary precedence and amounting to double that of the commercial companies, the citizen's message, even where service was given, came as a third and last attention. These telegraph offices are maintained by the railways at their own expense and for their own purposes, and would be quite as available for the postal administration as they are now to the telegraph companies. They can hardly be claimed as belonging to the service rendered by the telegraph companies proper. And while we are on the subject of giving the public the "advantages of public ownership, without the manifest disadvantages," a comparison of the service rendered under postal administration elsewhere and private financiering here may be of interest.

¹Commercial offices, maintained by the companies.

Two telegraph offices to three post offices, at least, elsewhere, but one to over seven here.

Stated in another way, the commercial telegraph companies maintain less than one (0.8) office for 10,000 of population in the United States, while their rate averages 36 cents per message as against 16 cents in New Zealand, which maintains over (18.51) telegraph offices to each 10,000 of its population. Why, sir, the nearest county seat to this Capital, with 1,500 population, is without a telegraph office. Such a statement can not be made of the postal system. When this is considered in connection with the fact that New Zealand gets a working efficiency of 3,713 telegrams per employee per annum out of its personnel-telegraph-and the American companies but 3,487, it is not difficult to see how far the private financier falls short of realizing that higher efficiency which economists declare feasible in properly financiered monopolies.

A TRAFFIC-KILLING TELEGRAPH RATE.

Mr. Chairman, the most serious exaggeration of the high cost of service per message in Western Union finance remains to be stated. It is the factor inseparable from the financiering of a private price-making monopoly. I refer to the necessarily low or inferior plant utilization practicable, when measured in terms of units of service attained, where the rates are made with a view solely to the object of maximum profit. That they are so made by our telegraph systems we have already seen. Now, the effect of raising the price of any commodity or service is to correspondingly diminish the effective demand for it, and this principle is well exemplified for the telegraph service in an experience which I shall take the time to relate. The following statement is taken from page 26 of "Investigation of Western Union and Postal-Telegraph Cable Cos." by the Bureau of Labor:

of Labor:

In this connection it is interesting to cite the case of the Chicago & Milwaukee Telegraph Co., which was organized in 1878. It began by charging a 10-cent rate for 10 words and 1 cent for each additional word between Chicago and Milwaukee. It does principally a board-oftrade business, having its office in the board of trade building in Chicago. In 1878 the Western Union cut the rate to 5 cents for 10 words, or one-half cent a word for all words between these points. The Chicago & Milwaukee Co. met the cut so far as quotations were concerned, but kept up its 10-cent rate on orders, and this rate continued for several years to board of trade members. Finally, in 1904, the Western Union raised the rate to 25 cents for all except members of the board of trade, to whom a 15-cent rate still obtains, and the smaller company raised its rate to 15 cents for 10 words and 1 cent for each additional word to all except board of trade members, to whom it gave a 10-cent rate. Later it made a 15-cent rate to all. It does not deliver messages except by telephone, and will not accept a message for delivery to other than board of trade members, unless the delivery can be made by telephone.

The company reports handling an average of 354 messages a day, at an average charge of 17½ cents per message, on a rate of 15 cents for 10 words and 1 cent for each additional word. This Chicago and Mil-

waukee rate is perhaps the only survival of the low rates which were wiped out by the understanding between the Western Union and the Postal Telegraph Companies, referred to by Mr. A. B. Chandler, expresident of the Postal Telegraph-Cable Co., in his testimony before the Industrial Commission, March 5, 1901 (printed in Vol. IX, p. 195), as follows:

Industrial Commission, March 5, 1901 (printed in Vol. IX, p. 195), as follows:

"Q. Have you any understanding or agreement with your competitors in regard to a division of business or in regard to the method of conducting business?—A. We have no agreement or understanding with the Western Union Co. with reference to any division of business. They have no interest in our company, its property, or its business, and we have no interest in theirs; but we have an understanding with them respecting rates and respecting certain methods of competition, the giving of rebates, and things of that kind, that are equivalent to paying for the obtaining of business. We aim to put an end to that form of wasteful competition.

"Q. What has been the practice concerning rebates and other forms of cutting prior to this agreement?—A. Such methods had prevailed to a very large extent previous to 1888 to a very injurious extent to all concerned. At the time such understanding was had a large number of rates were reduced, long-distance rates particularly, and the very low rates—10, 15, and 20-cent rates—that had been established by the various smaller competing companies were done away with, it having been well ascertained that the more business done on that basis the worse for the doer of it."

The sequel of this episode is that the Bell system at length

The sequel of this episode is that the Bell system at length secured control of the Chicago & Milwaukee Telegraph Co. and substituted the well-known Western Union rate. I have a statement of the business done under the 15-cent rate and under the 25-cent rate:

103, 248 57, 689 22,018

That is, a two-thirds increase in the rate has resulted in a reduction of the traffic of about one-half, and this is, of course, according to the principles laid down. It appears the company secured about 18 cents per message in 1908 and about 27½ in 1912; that the gross receipts were \$18,563,92 for 1909 and \$19,355.71 for 1912, and since the expenditures about equaled receipts in 1912, it is apparent that the gross operation, when divided into the number of messages, makes the operating cost per message nearly double that of 1909.

The accounting report of this company giving the items of disbursements is referred to as a clear illustration of the high expensiveness of private as compared with postal administration. Certainly, 40 per cent of its expenses would be susceptible of elimination under postal auspices. The motive of the increase in the rate for those making it was, however, that they secured about as much revenue for half the messages as they did for the normal number of messages; and with the reduction of the service to the public by one-half they were able to dismiss two operators and two messengers, saving their salaries as profit. But the effect, none the less, was to cut the plant utilization by one-half and reduce the service to the public by an equal amount. By the same set of causes the operation cost per telegram was nearly doubled.

WASTES OF DUPLICATION.

Finally we have the competition of the Bell telegraph and the Mackay or Postal Co. The former has 220,938 miles of pole line and the latter 66,154 miles. The Postal Telegraph Co. has its complementary offices maintained by itself or numerous constituent companies. Nearly all of these are stationed at points where the Western Union maintains like offices. It is almost recurrent to say that if one of them were the lines are stationed. almost accurate to say that if one of them were to instantly withdraw from all these points the remaining company could handle the entire business without substantial increase of men or material. At such points there is a profit for both companies, although at 50,000 points where they have no offices, but which their wires mostly pass, the Postal Department maintains its offices without profit, using the profits from the larger ones to recoup the loss. Here is a fundamental defect which private financiering can not overcome. It will exploit to the point of wasted plant and personnel at the points of profit, but naturally refuses to apply its excess revenues from such points to maintain its services at nonremunerative points.

Need it be suggested that the Postal Department at all these 50,000 points has its agencies established and that where the wires are in the neighborhood to be connected with its existing offices no additional expense would be incurred to furnish these services to that large portion of the public now denied them? Thus the plethora of service in the cities would be removed to the towns and country to correct the entire absence moved to the towns and country to correct the entire assence of service there. The Morse operator could be employed where the traffic justified. At the fourth-class or even third-class office, where it did not, the automatic receiver or mechanical sender or the phone might be employed to forward the message to or from a regular office. All this with only such additional expense as the traffic at such points would make necessary in order of the postmester. But I need not detail extra compensation to the postmaster. But I need not detail the complete adaptability of the postal system to readily ab-sorb this secondary form of communication, in nearly all in-

stances, without any of the costs which now attend telegraphy except for maintenance and the wages of its operators, linemen, messengers, and necessary technical engineers.

Mr. Chairman, it is evident that our private exploitation of the telegraph agencies of communication fail to gratify the laws of either administrative or social efficiency. Their rates are the highest, their services the lowest, and their product per unit of economic energy employed among the lowest in the world. And all these failures are according to the laws laid down by the political economists of our time.

THE TELEPHONE. ANALYTICAL AND COMPARATIVE.

Mr. Chairman, so far I have placed under survey the telegraph Mr. Chairman, so far I have placed differ survey the telegraph agencies in relation to the postal systems of the principal countries of the world. My next duty is to apply the same standards of economic science to the telephone. In doing this I shall think it unnecessary to repeat what has already been stated of the telegraph where the matter is obviously equally applicable, nor shall I repeat the opinions of the economists whose criteria I mean to apply to telephone administration.

EFFICIENCY OF TELEPHONE MONOPOLY.

The canons of efficiency are the same for the telephone and telegraph:

(a) The social test: What is the degree of service rendered to the public?

(b) The economic: What does it cost the public? (c) The publicist: What are the social influences?

How do these compare under private and postal financiering? The telephone service subdivides itself into, first, the local and, second, the toll and long distance, and the statistics for each of these is twofold in character; that is to say, there are the varying rates fixed in the contracts corresponding, differing in the different cities and towns of the country, by which the patron secures a limited or an unlimited local service, or a measured, or a one or more party line service, or by which for toll or long-distance conversations the rate is graduated into day and night distinctions. Then there is the rate which is constituted from the sum of all these; that is to say, the total number of conversations, local, toll, and long distance, for a year is taken, and for each class, respectively, is divided into the receipts from that class, thus giving the average local, toll, and longdistance rates collected. This rate is called the statistical rate or average charge; the former, the tariffs paid by the patron, is called the tariff rate. I shall first present the local rates for the different countries statistically and compare them with the letter rates prevailing in each country:

Letter and local telephone rates.

Country.	Rank.	Local rate.	Letter rate.	Letter rate exceeds phone rate.
Norway (private) Sweden Japan Norway Russia Hungary Denmark (private) Austria Italy Germany Netherlands Belgium Switzerland United States (Bell Co.) Luxemburg	2 3 4 5 6 7 8 9 10 11 12 13	\$0.004 .005 .005 .006 .007 .009 .010 .011 .013 .015 .015 .017 .021 .024	\$0. 026 026 015 026 036 020 028 022 028 020 020 020 020 020	Per cent. 550 420 200 333 414 122 160 80 115 33 33 17 25 200 220

¹ Belgium, 1911.

2 Phone rate exceeds letter rate.

Thus we rank but fourteenth on the phone charge and are 1 of 3 out of 16 countries in which the local rate exceeds the letter rate. It will not do to say that our letter rate is too low or does not pay. It yields, in fact, a profit of just one-third. The local and other telephone rates given for the United States are those of the Bell system for 1912, embracing about two-thirds of the entire traffic. Our mutuals and the independents give a much lower rate, according to the statistics of 1907, which embrace all companies. The Bell system in that year secured about twice the rate for its service which was collected by the independents, presumably a local service as good as the Bell's. Let us review this 1907 American experience:

Average rate and operating expense per message.							
	Rate.	Equals rate per year.	Operating expense.				
Mutuals Independents Bell system	\$0.0047 .0114 .0211	\$5.35 18.50 42.35	\$0.0039 .0062 .0148				

The above table includes local, toll, and long distance for the independents and the Bell, whose statistics, taken from the census and the Bell report for 1907, were as follows:

	Receipts.	Expenses.	Number of messages.
Bell	\$128,556,506	\$87,908,000	5,977,000,000
	55,227,531	29,782,964	4,829,547,057

The Bell data are taken from its own report, while the independents are taken from the census by deducting the Bell figures. The item of Bell receipts represents an estimate of \$7,803,306 for its long-distance receipts, being double the amount of the item "Net \$3,901,653 from telephone traffic." The item for maintenance and depreciation, \$34,665,700, in the Bell account largely represents an element of undistributed profits which have been turned into new construction or purchase of other companies, the whole of this element for a series of years representing, according to the report of 1912, the sum of \$165,000,000. This item probably largely accounts for the alleged much higher operating expense per phone of the Bell system.

Mr. Chairman, I have now to present, comparatively, the toll rate as statistically ascertained for the different countries. Except in the United States and where otherwise stated, the service is postally conducted.

Average charge, interurban (toll) and long-distance.

Country.	Rate.
uxemburg	\$0.03 .038
Jermany Switzerland Weden	.07
rance.	.09
Norway. Ireat Britain Vetherlands	.12
taly	.19
Jenmark Belgium Jungary	.23
Austria	. 25

It will be observed that under the Bell system the United States, among 15 countries, takes the eleventh place. But this table may be unjust to the other countries, and especially to Denmark, Belgium, Hungary, and Austria. Their interurban statistical rate includes the receipts from their whole long-distance service, while it can not be certainly determined whether the interurban for the Bell includes their "long-distance" receipts, properly speaking. To make the comparison certain, in this respect, it will be necessary to compare the tariffs of the different countries for their long-distance service.

Long-distance tariffs.

Country.	100 miles.	300 miles.	500 miles.	700 miles.
(a) Sweden		(a) \$0.13 (k) .24 (b) .34	(a) \$0.20 (k) .36 (m) .38	(a) \$0.34 (m) .38 (k) .48
(d) Italy(e) Belgium(f) Denmark	.19 .19 .20	(c) .35 (m) .38 (n) .38	(n) .38 (c) .53 (h) .60	(c) .58 (g) 1.25 (l) 1.26
(g) Japan (h) New Zealand (i) Great Britain	.24	(d) .38 (f) .40 (g) .50 (o) .62		
(i) Australia (m) Austria (n) Hungary	.32 .38 .38	(h) .72 (l) .80 (i) .84		
(p) Russia(p) United States (Bell Co.)	. 38	(p) 1.80	(p) 3.00	(p) 4.20

Note.—The letters preceding the name of each country are used to identify the countries to which the rates given for 300, 500, and 700 miles belong.

Thus the Bell system gives the United States the fifteenth and last place in the scale of efficiency with respect to long-distance charges. This is a most serious circumstance for us economically and socially, in view of the American scale of distances, as may be seen in our average freight haul, which is ten times that of Great Britain, and from four to five times as long as in the other countries. This circumstance but lightly reflects our need for utilizable rates over the telephone for the scale of distances which separate the centers of communication in the United States. The Bell Telephone has an even rate of 6 mills a mile for a three-minute conversation; and a thousand miles

therefore commands a Bell charge of \$6 per talk. This happens to be about the same rate (7.53 mills) the railways secure for hauling a ton of freight a mile. But the railways do not make their charge arithmetically progressive. If they were to do so their rate on the longer distances would be so high as to sweep such traffic from the rails. What they do in fact, although not in theory, is to double the charge as the distance quadruples, thus the charge for 25 miles might be 10 cents per 100 pounds, first class; the rate for 100 miles would be 20 cents; for 400 miles, 40 cents; for 900 miles, 60 cents; the rate increasing not arithmetically but according to the square root of the number of miles. Thus if the charge for a phone call were placed at 10 cents for 25 miles, on the square-root formula it would increase to 20 cents for 100 miles, 40 cents for 400 miles, 50 cents for 625 miles. In fact, such a rate would slightly exceed the long-distance rates on the continent.

Continental rates for long-distance compared with square-root formula.

Country.	25 miles.	100 miles.	300 miles.	400 miles.	500 miles.	700 miles.
Sweden	\$0.04	\$0.08	\$0.13	\$0.20	\$0.20	\$0.34
Norway	.07	.09	.34	.40		
France	. 05	.10	. 35	. 43	. 53	. 53
Italy	.10	.19	.38	.38	.38	
Belgium	.10	. 19		Lancard N. P.	Service Co.	
Denmark	.07	. 20	. 54			
Germany	.06	. 24	. 24	.36	.36	. 49
Austria	.12	.31	.38	.38		
Hungary Average continental	.10	.19	.38	.38	.38	
rate	-07	.16	.30	.36	.37	.43
Formula rate	.10	. 20	. 35	.40	. 45	. 53
Bell rate	. 25	.60	1.80	2.40	3.00	4.20

It will be urged, of course, that prices are higher here; but they are not higher here, they are higher in Europe on the copper and poles, which mainly enter into the capital cost of a long-distance line; higher by the price of the transportation of such material from this country to the Continent. It may cost more to conduct such a line here in the expense of personnel, but the difference could hardly be more than 10 per cent of the continental rate. It is true, however, that a special charge is made abroad for an urgency, or preferential, use of the line, but its payment secures one the preference, while with the Bell system the day charge is all the same and one has to wait his turn despite the rate. The truth is that no attempt is made to justify the Bell rates on the grounds of social efficiency. This is frankly declared by the present managers of the Western Union and Bell telephone system. I quote from the report of the Bell system for 1911:

Instantaneous and immediate transmission of communications is as yet a convenience or luxury, although under modern methods of business and commerce it is an economical alternative to the cheaper mail service in business operations. The use of the telegraph may be a popular convenience, but it is not a necessity and is still confined to the comparatively few, and for that reason should be at the cost of the few that find benefit and profit in that use.

This is bold language. We are virtually told that of the three great agencies of communication only one, the letter post, may be used by the people, and that the other two, the phone and the telegraph, are conveniences or luxuries, not popular necessities, and for that reason should be at the cost of the few, i. e., of the rich, to which class largely the present rates confine the service. But this is not a justification. It is a confession. These tariffs are the scandal of public-service rates the world over and are endured because the service is known only to those in easy circumstances, who overlook the rates in the glamour of the marvelous character of the process of communication.

THE TABIFFS.

The statistical charges give but a very deficient conception of the situation as to actual telephone tariffs. While there are many points at which a phone may be rented on the basis of yearly tariffs of \$24 for business and \$18 for residence service, at such points the number of subscribers are relatively low; and as a matter of fact, with the Bell system at least, the rule of 5 cents a call comes more nearly expressing the rate available to the public. This is seen in the following examples allocated according to the density of the different centers of population.

Table giving annual tariffs, flat-rate service, for leading cities of different countries.

Christiania	\$21.44
Stockholm	24, 44
The Hague	26, 00
Copenhagen	32, 00
Tokyo	34.00
Auckland, New Zealand	34. 09
New Haven	84. 00
New Haven	01.00

Table giving annual tariffs, flat-rate service, for leading cities of different countries—Continued.

Cincinnati	\$100,00
Oakland, Cai	84.00
Philadelphia	190,00
Chicago 2	
Denver	138.00
Amsterdam	
Rotterdam	
Berlin	
Budapest	57.90
Paris	
London	82. 79
Boston	125. 00
Seattle	90.00
Washington	168.00
Baltimore 3	
San Francisco	180.00
New York 3	228.00

American average exceeds foreign average 300 per cent.

Comparisons based on the flat or unlimited service rate do not adequately present the field of traffic. While, except in small towns and for the residence service, the flate-rate business works out the lowest average charge per call, it does not reflect the degree to which a popular use of the service may be had. To measure these possibilities we must go to the limited or measured service rates, under which the user is asked to pay in accordance to the number of calls. This comparison can not be made as simple as for the flat-rate tariffs without circumscribing, which I shall do by taking selected numbers of rates as, for example, the cost per call of the first 2,000, 5,000, and 10,000 calls for one-party business lines.

Rates per call for measured service in principal cities of the world.

9	Iowa City, Iowa	10,091	63	

Note (a): Limited to 5,700 calls; Manhattan district only. Note (b): Limited to 5,400 calls.

Twenty-four cities, averaging 342,486 in population, pay an average rate of \$53 under competition, while the remaining 36 cities, averaging 188,629 in population, without competition, pay \$81. Even where competition is absent there does not appear to be any rational order of rates. Stockton, Cal., with 23,253 population, pays the same rate (\$60) as Des Moines, Iowa, with \$6,368, and pays twice as much as Johnstown, Pa., with 55,482 population, and only \$24 less than Chicago, Ill., under competition.

I should utter a caution against the spirit of prejudice likely to be elicited by the great disparity shown in the rates under postal and private financiering. The gentlemen who are exploiting this service for profit as their private property have, doubtless, decided correctly that the American rates yield the very maximum of profit. This is what people do in the conduct of a hotel, I suggest. True, this is what we all should do if two coulds it is the pormal rule of private financiering. But if we could; it is the normal rule of private financiering. But competition plays its part where monopoly private financiering is inadmissible and protects us from ourselves. So we do not blame the individual. He is obeying the laws of his nature. But the Government, without whose incidental approval or protection such a monopoly could not exist—is it to be held blameless for abandoning its function and submitting its citizens to exactions which are the scandal of public-service rates the world over, and with which only our express rates can justly be compared?

The effect of these abnormal distance rates upon the utilization of the service may readily be seen. The number of interurban conversations per phone in the different countries is as follows.

Long-distance conversations per phone.

Country.	Number of conversa- tions.	Rank.
Denmark Netherlands Denmark (private) Germany Sweden Russia Norway Switzerland France Norway (private) Haly (private) Japan Haly United States (1912, Bell) Belgium Austria. Hungary	761 634 348 301 150 142 135 130 125 109 73 69 62 48 44 43 37	1 1 1 1 1 1

Mr. Chairman, it is apparent, of course, that telephone rates fail to satisfy the law of social efficiency and the pronouncement just quoted from the Bell Co., far from making apology, disavows any concern or obligation in that respect.

ADMINISTRATIVE EFFICIENCY.

Let us look now into the question of the operative efficiency of the privately financiered telephone as compared with its public and postal management in other countries.

Telephone operative efficiency.

Country.	Phone calls per cm- ployee per annum.	Rank.	Pestal units per em- ployee per annum,	Rank.
Norway	146,854	1	32, 414	11
Russia	114,659	2		
Belgium	98,715	3	85,819	1

Hungary		20	23,025	15
Japan		21	21,820	16

In the column for phone efficiency the long-distance or interurban call is included and rated as equal to four local calls in its demands upon the personnel. The column for postal efficiency is inserted to show the performance of the postal personnel. For this purpose the postal-service unit is treated as the average mail piece and the telegram as equal in service to 10 mail pieces, while the local call is rated as equal to one-half mail piece, or unit, and the interurban as equal to two mail pieces. All kinds of employees of the telephone and post are included in the statement. While these service valuations are only assumptions, it is believed that they are approximately accurate, and certainly in no case unfair to the phone service, as may be seen in the cases of Norway, Russia, and Belgium, where the phone performances per employee reach as high as 146,854, 114,669, and 98,715, respectively. It appears that the American postal system ranks second among 16 countries on the mail piece, while the Bell Co. on the phone ranks but ninth, among 13 countries, in institutional efficiency or product per employee.

Now, what is the cause of this disparity? An inferior American personnel? No; the record of the American postal personnel answers that charge. What, then, is it? My explanation is that it is the deterrent influence of high rates on the amount of the traffic and consequent plant utilization. Obviously the amount of traffic will depend on the rate. If it should cost me but a cent a call, I will use the phone freely; if it cost me a nickel, I should probably restrict my calls. So, too, not only may the message rate be so high as to discourage the use of the phone, but the rate for phone subscription may do so. In short, to a vast majority of the people the degree of utilization depends on the cost, and these as subscribers will spend less at the higher rate than they will at the lower. The low performance therefore represents the unutilized time

of the employees and wires caused by rates which to that extent are prohibitive of potential utilization; the plant is subjected to low service performance, while the same cause operates to deny society its use. This statement is susceptible of illustration in the experience of American telephone administration. As we have seen, the Bell average charge in 1907 was 2.11 cents per call, while that of the Independents was 1.14 cents, or about half. The employees of the former were 90,324 and the latter 52,112, which divided into the total calls gives an efficiency in number of calls per employee of 65,287 for the Bell and 92,868 for the Independents per annum. Traffic advantages were with the Bell, in that it had 578 phones per exchange, while the Independents rated only 295.

We reach the same conclusion for the telephone that we had reached for the telegraph. Private financiering falls to secure either the maximum of social service or the maximum of plant utilization. Its rule condemns the agency to a half marketing of its production, to less than half of its potential yield. Society under its rule must sacrifice half or more of the utility of this great agency of public communication. Suppose the farmer should organize into a monopoly, restraining the marketing of half his wheat production, half the normal yield, on the theory that the half crop would produce the same revenue as the whole. Will the defender of half service and double pay reply that the cases are different; that the "instantaneous and immediate transmission of communications is as yet a convenience or luxury, confined to the comparatively few, and for that reason should be at the cost of the few that find benefit or profit in that use"? It remains to be seen whether this ambitious rival of the postal function, like the express companies, can defy the public for 40 years.

ADEQUACY OF ORGANIZATION.

Mr. Chairman, in treating of the telegraph I presented the elements or factors laid down by the political economists as necessary in the working organization of a monopoly, in order that its service be rendered at the lowest cost, and that society should realize the possible benefits of a monopoly in the class of enter-prises for which that form of capital and labor is economically and socially adapted. But it may not be amiss to restate them here for application to our telephone agencies. The elements are stated to be:

- (a) Unity and exclusiveness of organization.
- (b) Details of management well worked out.(c) Facility for extension by mere duplication of existing structure.
- (d) A social demand for the service which is widespread and constant.
 - (e) Adequate ability in authority.

RESULTS.

- (f) Service at less cost than if broken into groups, because-(g) Assured demands for service admits of closest calculations.
- (h) Extent of demand admits of most minute division of labor.
- (i) Absence of rivalry reduces to a minimum the amount of capital and other expenditures necessary for the performance of the service.
 - (j) Speculative management is eliminated.
- (k) And thus with a public-service motive,(l) The maximum of cheapness and efficiency is rendered possible.

Mr. Chairman, it is, of course, not a matter of criticism that the telephone monopoly is lacking in a main essential—the public-service motive. In a privately financiered organization such a motive is against nature and should not be asked. With the other elements, while it may be painstaking, it may be instructive to deal.

UNITY OF ORGANIZATION.

Exclusiveness of organization is, of course, denied to the Bell Co. where a rival service has found location. But to what extent does it possess unity of organization even within itself? There is likely to be a great deal of misapprehension on this point, and unity of administration may be erroneously inferred to exist merely from the fact of the concentrative power to control the making of rates. Thus the Mackay and the Bell companies have agreed on rates, just as the fire insurance companies have done. But in neither of these instances is it claimed that unity of management or organization has been attained. The perfection of unity and of exclusiveness-except as to the express service—is, of course, found in the postal organization. In which class will the Bell system be assigned? I think it clear that it can be assigned in neither; that it is not an organization in the organic sense, but an amalgamation for which the most appropriate word of description is that used

by its officers, namely, the "associated companies." "amalgamation" or a system does not imply the reduction of methods to the ultimum of simplicity, or the number of processes to the feasible minimum. If the structure of each company amalgamated, with its distinct officialdom and accounting institutions, is preserved, as would appear to be necessary with a distinct legal proprietorship for each, then, while the methods of a holding company with a majority of stock may give the power over rates and appointment of officials for the constituent company, this mode may be far from reducing to a minimum either the personnel or the interproprietary trans-

It is this method of controlling rather than of assimilating the different exchanges which characterizes the Bell system; in fact, the expression employed is "the Associated Companies." Thus, speaking of them, Mr. Vail says: "The organization as constituted will be flexible enough to enable any rearrangement to be made of the whole or any part, in any way which may be found necessary or advantageous from reasons of policy or from business or legal reasons without affecting business." The aim has evidently been to so articulate the different exchanges that they can be used for a common purpose and yet so preserve the autonomous elements in each to meet any business or legal situation that may arise—the enforcement of the antitrust laws, for example. Such conditions preclude simplicity and singleness of process, the concomitants of economy and efficiency attained by the institution possessing unity and exclusiveness of organization. That the Bell system is not organized to realize the maximum economies of a single organization is seen in the comparison of its operating costs per message as compared with the independents on a preceding page. GENERAL CONCLUSIONS.

Sir, it appears that despite our high price and wage levels in the United States we take first place as to postal rates. Among 16 countries we take but fifteenth place as to telegraph rates; among 15 countries, but tenth place as to interurban telephone rates; among 12 countries, only the eleventh place on local telephone charges; and among 11 countries we take the eleventh, or last, place on long-distance telephone charges.

Mr. Chairman, let me explain the significance of these con-Recurring to the analysis of industries placing merchandizing in Class I, with its law of constant returns; farming as Class II, because of its law of diminishing returns; and such industries as the post, the express service, and the telegraph and telephone in Class III, under the law of increasing returns: The first two classes belong to the realm of competition, and therefore to private financiering, while the third classpublic-service monopolies—belong to the domain of public financiering. Now, what do we find? That in the United States Classes I and II-the store and farm, privately financed, according to their natures, and acting under circumstances of struggle and competition-are unquestionably among the most economically conducted of their kind among nations. That our postal service, publicly financed, in spite of our high price levels, is giving rates the lowest prevalent in the world, and possesses the very highest working efficiency; while the two examples of the third class—the telegraph and telephone monopolies, like the express companies, subjected unnaturally to the rule of private financiering-rank among the very lowest in working efficiency and among the highest in the rates exacted from the public.

I think it apparent from all these comparative experiences that the doctrine of laissez-faire is clearly inapplicable to the telegraph and the telephone; i. e., that these public agencies of communication do not belong legitimately to the field of the rule of private financiering. I quote Prof. Adams again:

rule of private financiering. I quote Prof. Adams again:

In taking the position here assumed it need not be implied that one is arguing either for or against State socialism, but merely that the doctrine of laissez faire does not permit society to realize in any adequate degree the benefits of organization in the form of monopoly. This is true, for several reasons, but especially because there are many industries which, from their nature, are monopolies, and can not, therefore, be safely consigned to the guidance of the rule of private financiering. It is certainly absurd to say that a business superior to the regulating influence of competition, conducted according to the principle that the highest possible price should be demanded for services rendered, can be managed in a spirit of fairness to the public. Such a business ought to be made to conform to the rule of public financiering, but the common prejudice aroused by the teachings and superficial application of laissez faire renders this difficult of accomplishment. "In some countries," says Mr. Mill, "the desire of the people is not for being tyrannized over, but in others it is for an equal chance to everybody to tyrannize." So long as public opinion refuses to enter upon a candid analysis of the nature of industries for the purpose of discovering which of them may be safely consigned to the guidance of competition, large numbers of private monopolies will be maintained. If men persist in thinking themselves free because the law grants them an equal chance with their fellow men to become monopolists, the great majority will pass their lives in that state which even conservative writers call commercial dependence. Bastiat is right when he speaks

of the interest of the consumer as identical with the "social interest," in so far as this question of monopolies is concerned, for it is only when we regard the problem from the point of view attained by considering the collective interest of society that we can secure a just appreciation of the relation of government to business activity.

To what conclusion does all this lead? Plainly, I suggest, to the conclusion that we are violating the laws of sound public economics. Plainly, I suggest again, that we have violated the laws of economic science in giving to the functionaries of private finance those things which were not theirs. There is a law of private finance; there is a law of public finance. Each has its subjects upon which, properly confined, each will normally operate for the maximum of human service. We have ignored, or rather misapplied, one of these laws by giving over to the private financier a postal duty. Let him rule in his own field restrained by the laws of competitive industry, he will prove a social servitor and a blessing. But give him the field of public finance where his instincts of profit making can only be misapplied, and those unwelcome results are shown to follow which would be expected to follow if public finance were applied to store and farm, namely, high prices and the lowest social and operative efficiency.

COMPETITION.

Mr. Chairman, with regard to this method as a corrective agency, I can not do better than quote from the work of Prof. Holcombe, one of the Harvard economic studies, entitled "Public Ownership of Telephones on the Continent of Europe." After stating the theory of competition in relation to prices generally, he speaks of the telephone service:

The difficulty with the theory of competitive rates in the telephone business is that the liberty of choice between rival undertakings is illusory. No two competing systems can offer the same range of communication. The subscribers to one system will have no means of conversing with those to the other. Consequently the prospective subscriber is not free to compare the price levels and conditions of service of the rival undertakings. He is compelled to join that system to which are already connected those persons with whom he most desires to converse.

seriper is not free to compare the price levels and conditions of service of the rival undertakings. He is compelled to join that system to which means the price levels and conditions of service of the rival way connected those persons with whom he most desires to the same system, he can not choose between rival services without being thereby deprived of the possibility of effecting a certain proportion of the communications which he would like to carry on by means of the telephone. The utility of the telephone lies in its marvelous power of transmitting the spoken word and reproducing it at a distance. The greater the number of persons who are enabled to converse with one another, regardless of intervening space, by means of a telephone system, the greater is the which like the postal service, reaches everybody. Whatever excludes a portion of the community from participating in the benefits of a telephone system impairs by so much its usefulness. Now, a competitive undertaking does just that. The subscribers to each undertaking are debarred from carrying on telephonic conversations with the subscribers to the other undertaking. If there are several competing systems, the impairment of the usefuness of the service is correspondingly greater. If there were as many sellers of telephone service as buyers, and all were determined to remain in the business, the telephone would have no usefulness at all even competition offers no adequate assurance of reasonable rates for telephone service, the question at once arises, How shall they be determined? The only alternative to competition is monopoly of some sort. The forces of demand and supply will operate under a régime of monopoly, as under one of free competition, but he results will not be the same. In the latter case the interests of the monopolist will ordinarily lead him to fix his rates at a level which is not most of the demand of his services were services and readjusts them, if need be, until the actual sale of his services verifies his calculations. His purp

take whatever steps they may deem expedient in order to secure to the community the enjoyment of reasonable telephone rates.

His final conclusions, after a complete survey of the Continent,

In the telephone business competition is a failure. Considered as an automatic arrangement for maintaining an accurate adjustment of the supply of telephone facilities to the demand, it easily gets out of order. So long as it remains in order its effect is to diminish the utility of the service to render which telephone facilities are created. For a while it is capable of bringing about low rates and stimulating a rapid development. Sooner or later, however, the self-interest of the competitors or the disillusionment of the public authorities will cause the termination of competition and the substitution of a régime of monopoly. This has been the result everywhere in Europe where competition has once existed, except in Stockholm, and in Stockholm the bankruptcy of the private company or the purchase of its business by the Government is only a matter of time. Competition as a permanent status in the telephone business is neither desirable nor possible.

REGULATION.

Mr. Chairman, there are many things to be predicated of regulation, of course, and I shall make no attempt to cover them all. Among them, however, are some effects that are certain. A régime of regulation will-

(a) Eliminate competition.

(b) Strongly tend to crystallize the rates and, with them, local discriminations.

(c) Remove personal discriminations.

(d) Limit extension to places of sufficiently high profit to attract private finance.

(e) Thus defeat the attainment of the maximum extension of

social service.

The three first propositions are exemplified in our railway history of the last 10 years and in that of England for 20 years. The progressive decline in average rates, which began with the introduction of the railway, continued in both countries to the time when the State exerted its power and converted the unstable rates into legal rules. In neither England nor here has the average rate fallen substantially since. I say such rates, including any local discriminations, crystallize under regula-tion fixing them as rules of the State. The shipping interests, unable to set one railway underbidding the other, urge reductions upon the regulating power, only to be met by the proprietary defenses of the railway owners. And they, when try-ing to secure rate increases, are met by the defenses of the shipping interests. The antagonistic forces are so nearly equal that, impeded by the complexity of the subject matter and the inertia of court procedure, they meet only in an impasse, with a triumph usually in favor of the status quo.

But there is a more profound reason for the impasse thus reached and the practical inability to reduce rates under regula-

tion. It is the instinct of respect for private property so highly developed in modern civilization. The stockholders earnestly defend their right to the profits their capital and enterprise have created; the effect of reducing the rates renders so uncertain what the rate of profit may be; moreover, its reduction affects not merely the dividend they are to receive but the commercial value of their capital itself, a reduction of from 12 to 6 per cent, cutting such value in two for purposes of sale; all these deterrents, with the ability of the conductor of the enterprise to suppress or disguise those inner facts of his business, of which he alone has intimate and real knowledge, usually leave but one safe recourse for the regulating tribunal, and that is to heed the inevitable doubt in the proprietor's favor. Count von Bismarck has summarized the weakness of the regulating theory as fol-

The attempts to bring about reform by laws have shown the futility of hoping for a satisfactory improvement through legal measures, without trenching materially on established rights and interests.

State ownership is necessary to attain unity and economy under conditions in harmony with the public welfare and to secure direct attention to public interests which do not permanently find sufficient furtherance and protection in the hands of private corporations whose object is gain. The inadequacy of private management and State supervision becomes daily more obvious.

Mr. Chairman, efficacy has never been claimed for regulation as a method for obtaining the maximum social service. Take the case of the Bell Co. controlling the Chicago & Milwaukee Telegraph Co., which raised its rates per telegram from 15 to 25 cents, abridging its former social service nearly 50 per cent. Contrast this with the British post office in 1885 reducing its rate from 24 cents to 12 cents and increasing the number of messages about 60 per cent. In the former case there was an increase, perhaps a justifiable increase, of profits to the private owners; in the latter there was a slight loss in the revenues, but a tremendous gain in public service rendered. It comes back, then, to the fundamental principle involved in the rule of private financiering. Regulation is helpless to invest the private investor with a public-service motive; and urally enough for the investor, the maximum return on his investment, is the rational rule of conduct.

Conservative students of the telephone subject do not propose or consider regulation as a means to attaining the maximum of utilization in this service. I shall quote again from the work of Prof. Holcombe on this subject. He says:

of utilization in this service. I shall quote again from the work of Prof. Holcombe on this subject. He says:

The great advantage of the ownership of business undertakings by the community lies in the power that goes with possession. While the ownership of business of general public importance remains in private hands there is no protection for the ordinary economic interests of consumers except by free competition or by public regulation. In the telephone business the former is neither desirable nor possible. The latter may be obtained in only two ways: (1) By special contract between the private owners and the public authorities; (2) by direct legislative action, subject to appeal to the courts for the protection of individual rights. Under either method of public regulation the antagonism of interest between the private monopolist and the consumer may be subdued but is never removed. It was in order to possess complete control over the management of the telephone business that the Governments of Europe adopted the policy of public ownership. By retaining complete control in their own hands those Governments have had the opportunity to adopt methods for the establishment of rates and the maintenance of service that would have been impossible under any form of private ownership. In a business such as the telephone, the best security for the establishment of reasonable rates is to give those who are to pay the rates a voice in their making, and the best security for the accurate adjustment of the supply of telephone facilities to the demand is to give to those who are to use the facilities a share of the responsibility for their creation.

But once it is recognized that in a particular industry the hypothetical alternative of free competition is an illusion it becomes evident that the community's saving by the assumption of the risks of the enterprise is not a mere recompense for the sacrifice of a more rapid rate of industrial progress will be appropriated by the monopolist solely by virtue of the fact that h

Naturally enough, sir, the owners, for the most part, when confronted by a proposal to postalize, object and point to the alternative of regulation. But this attitude on their part, it is not considered unfair to suggest, is dictated rather by private than by social considerations. Postalization puts an end to their profits. Regulation may or may not curtail them in a degree, while the stability of their monopoly is actually augmented by regulation, bringing with it an increment to the value of their securities. In this connection it ought to be remembered that, whatever our hesitation may be on administrative grounds to applying the State principle to all forms of natural monopoly in obedience to the principle that "private monopolies are intolerable," such hesitation need not be felt as to postal subjects given the postal department. It may be confidently asserted that no bank or railroad organization, private or public, has better assurances of administrative efficiency to offer.

OBJECTS OF RELIEF.

Mr. Chairman, having completed the analyses of the economics and the traffic effects of our systems of communication by wire let us put the direct question, What, if any, are the deficiencies to be corrected? Answering this question just as directly, I wish to say that, while our postal rates are as low as those of other countries, we find that in the United States—

(a) The telegraph charge averages more than double,
(b) The local-call phone charge about double,
(c) The toll and long-distance telephone charge about four times, the rates generally prevailing in the principal countries of the world.

Proceeding on the assumption that our postal system can do as well for the wire forms of communication as it does for the letter-that is, can handle the wire messages as cheaply, compared with these countries, as it does the letter—it is suggested that these forms of communication should be postalized; that is, the postal agency should be permitted to conduct these com-munications in order to normalize the rates and extend the service to the great body of the people.

Proceeding, again, on the further assumption that the abnor-

without that motive, not the maximum social service, but nat- mal rates operate to abridge the total service rendered in the

same percentage that the rates are excessive-a moderate statement, I think-then the Nation has short-work claims on such services as follows:

(a) The telegraph: Number of messages, 175,000,000.(b) Local phone service: Number of messages, 7,500,000,000.

(c) Toll and long distance: Number of messages, 300,000,000. That a twice normal rate will inhibit at least half the traffic, or, stated in the reverse way, that cutting the rates in half will double the traffic in a service for which, like these, there is a universal and constant demand, is an assumption sustained by postal experience with the telegram, with the letter, and now with the postal-express parcel, not to speak of definite experiences with the passenger traffic.

The doubling, or more probably the expected quadrupling, of the number of such communications is not predicated merely on the demands of those now using these means, for the effect of prohibitive rates is not merely to reduce the number of calls by present subscribers but to seriously reduce the number of subscribers themselves. It is true that the rate renders the telegram merely an incident to some calamity, like death, and so forth, for the working classes. But the use of the telephone, so forth, for the working classes. But the use of the telephone, which is an hourly convenience if not a necessity, in homes that can afford it, is at present confined to a small percentage of the homes of the country. The proportion of telephones is 1 to each 12 persons. If the number of office or business phones be deducted from this proportion, it is indeed doubtful whether more than 1 family in 6 enjoy this convenience.

Now, the Postal object is not merely to confer equal privileges in form, but to effectuate equality in practice. It, therefore, so oversiges its service and formulates its rates as to

fore, so organizes its service and formulates its rates as to remove any economic barriers to their use. The poor man, the very poor man, can actually utilize any form of the Postal service. Its rates are adapted to his means. Mr. Vail, president of the Western Union Telegraph Co., declares:

There is a road to every man's door; there should be a telephone to every man's house.

The parallel is indisputable, but its complementary fact should also be noted. It was society, and not any privately financed monopoly, that built these roads. He also adds, apologetically for the Bell, that the system must be-

Under common control * * * it must be sufficiently strong constitute practically one system, intercommunicating, interdepend-

Now, is this possible in the United States? Sir, I feel justified in saying that it is possible here, if nowhere else; and the Swiss tariff system, I submit, affords demonstration of this statement. But of this the point fundamental—indeed, the whole objective of the discussion, the supportive facts-must be developed later.

METHOD OF RELIEF.

THE TELEGRAPH AND TELEPHONE SERVICES INTERDEPENDENT.

Mr. Chairman, these two methods of communication are so interrelated and interwoven and so identical in characteristics that the only difference which now suggests itself is that the communication in one case is addressed to the eye and in the other to the ear. The mechanism, the wire, and the active principle-electricity-are the same for both; moreover, it is a fact at present that the same telephone wire may be and actually is simultaneously engaged in conveying the both forms of com-munication, especially for longer distances, where the telegram formerly was the more efficacious. Coupled with this fact that every telephone wire is in fact or potentially a telegraph wire is the circumstance of conclusive economic importance. Since the telephone wires permit the discharge of the double function without interference one with the other, the duplication of the physical agencies will involve a doubling of the expenses of each service—except for the points of large telegraphic traffic, where the skilled telegrapher will be needed as a supplement to the exchange personnel. I shall leave to Mr. Theodore N. Vail, president alike of the Western Union and the Bell telephone system, the task of completing this statement. I quote from the report of the Western Union for 1912:

from the report of the Western Union for 1912:

There are estimated to be less than about 5,750,000 rural habitations in this country. The Bell System has over 3,200,000 rural telephone stations; that is, more than half the rural habitations are connected by exchange wires with central offices of rural centers and these central offices, by means of branch telephone Ilnes, with and form a part of the Bell Telephone System. These branch lines extend to substantially every rural center. They are not used to nearly their capacity. The lines and the operating staff have to be maintained for one purpose. Under a joint working between the telepraph and telephone, these facilities, both plant and operating, could be utilized without appreciable extra cost for telephoning the occasional telegraph message. In this way a telegraph service could be given to practically every center of population in the country and by means of the rural telephones made to reach nearly every habitation.

If the public desire, as they do, not only improved facilities but additional methods of intercommunication, and eventually cheaper

rates, these benefits can only be obtained through a combined use of plant, and to bring about such a combination, not only the purpose but the reasons must be understood, and if it results in a broad combined system extending over the whole country, such a system is inherent to the object to be accomplished and it can not be accomplished in any other way.

It is an axiom that the cost of operating and the cost of construction and maintenance of plant facilities must be borne by the service, If, then, plant facilities are only partially utilized the cost of service is greater and so must be the charges. If additional use of facilities is made, then the cost of service is less and the charges can be reduced.

reduced.

If the public insist upon a duplication of plant for each kind of service, then the cost of these plants must be borne by the service and the public must pay the cost. If you hire two carriages to carry two loads that one would carry as well, the two carriages must be paid for. No individual or corporation can be expected to, nor can they be required to, provide a permanent service to the public at less than cost and a fair profit. Waste of facilities and waste of duplication come out of the public, either through the additional cost of service which must be maintained or through the loss of the investment made on the facilities which were unnecessary.

In a like report for the Bell Telephone system in 1911, Mr. Vail illustrates the complementary character of the two services with a chart.

And then he makes the following observations as to the operative and economic advantages of their unification of ownership and management:

Operative and economic advantages of their unification of ownership and management:

The joint use of such lines and operatives would be a source of economy. At busy offices and on busy circuits, the circuits could be "composited" for the simultaneous use for telegraph and telephone purposes. Each service would require its distinct operating force and its distinct offices, as the services rendered by the telegraph and the telephone are functionally and fundamentally different, although both use wire circuits. The telephone makes up a circuit and places it at the use of the customers, who do the communicating, 1. e., it leases its circuits to others for personal communication. The telegraph, by its own operators, performs all the services of collecting, transmitting, and delivering messages, 1. e., it transmits over its circuits, for others, personal communications.

The greatest economy and advantage would come from the "compositing" or simultaneous use of one system of circuits for the two services, eliminating entirely one of the wire systems. The advance in the state of the art of "compositing" lines for joint use of the telephone and telegraph has been very marked in the very recent past.

The accompanying diagram illustrates a small section each of the telephone and telegraph has been very marked in the very recent past.

The diagram shows that the existing wire mileage of the present telephone bull circuits and telegraph plants, brought up to standard construction with some provision for deficiencies or extensions, if "composited" or used jointly, would for all practical purposes be the equivalent of two plants, each of the same mileage, one for telephone and one for telegraph; or, to put it another way, the wire mileage necessary to give the same service need be about half the combined wire mileage of the two systems separately operated, as now.

The annual gross revenue from either a telephone or a telegraph system should be approximately 33 per cent of the total cost of or the investment in plant. If i

Mr. Chairman, I think it sufficiently obvious that the telegraph and telephone are not two services, but really one service; as, indeed, they represent besides but one function, the function of intercommunication. Accordingly, it may be that they will require the application of but one policy and method of treatment.

We have seen that our problem is threefold, viz, the extension of postal relief to the three forms of electrical communication-the local call, the long-distance conversation, and the telegram-which I name in the priority of their importance. It appears that the postalization of but one agency, the tele-phonic network, may be effective for all these forms of relief. But let us look more carefully into this important matter by reviewing the subject in its constructive relations.

RECONSTRUCTION.

Mr. Chairman; having concluded that on both economic and social grounds these agencies of communication require public or, more exactly speaking, postal financiering, it is now in order to consider the subject in its constructive aspects.

The postal method: The examples of nearly all the principal countries point in but one direction as to the agency which should be employed. It is the postal. Its truly wonderful genius for doing little services cheaply and well is now winning for it the express function in the United States, and in the following countries has added the telephone and the telegraph to the mail piece:

LIST OF COUNTRIES OWNING BOTH TELEGRAPH AND TELEPHONE. POSTAL TELEGRAPH AND TELEPHONE COUNTRIES.

Australia, Austria, Belgium, Bosnia-Herzegovina, Bulgaria, New Caledonia, Dahomey, Denmark (at least part—state, private, and municipal), Egypt (part), Formosa, France, Tunis, Germany, Switzerland, Great Britain, Sweden (greater part), Greece, South Africa (Union of), French Guinea, Servia, Hungary, Roumania, India (British—state and private), India (Dutch—state and private), French Indo China, Panama (Government), Italy (state and private), Norway (greater part), Japan (including Korea), New Zealand, Luxemburg, the Netherlands (state municipal, and private), Russia (state and private), Siam (state and private).

COUNTRIES OWNING TELEGRAPHS ONLY.

Abyssinia (Ethiopia), Alaska, Argentina, Bolivia (not all), Brazil, Chile (nearly all), Colombia, Costa Rica, Cuba, Mexico, Montenegro, Paraguay, Persia, Peru, Portugal, Spain, Turkey, Uruguay.

Mr. Chairman, all the civilized, yes, almost all the uncivilized countries have postalized the electrical message, and it will be observed that Spain and Brazil only among the greater countries join the United States in licensing out the telephone agencies of communication to private parties. England naturally has been the last to yield, but since January 1, 1912, even she has assumed the entire postal function of conveying intelligence, by taking over the Bell service. Some of the Provinces in Canada took the step a few years ago, so that our situation is now so exceptional as to be actually noteworthy. The causes for our conditions are not different from those which for 40 years denied us the parcel post, namely, the "Tory" and the "system" largely consequent upon the private financiering of these natural monopolies.

THE POSTAL TELEGRAPH AND TELEPHONE STRUCTURES.

Construction de novo of the wire agencies, as a program, is denied us, of course, on the grounds of national economy as well as on sound political consideration. It therefore becomes necessary to compare existing structures and determine their adaptability for economical postal management and the purposes of the desired relief.

There is considerable likeness between the postal and wire mediums, even in their physical methods. If the wire be taken as the path of the electrical communication, the parallel is perfect. Both systems are susceptible of classification into units of: (a) Number of offices; (b) number of employees engaged; and (c) miles of routes of communication. Let us see how the two compare in these respects; I say "the two," for they are not three in number. The telegraph and telephone are but one agency since the same wire—that is, the telephone wire-now carries the written and the spoken communication

NUMBER OF OFFICES.

The extent or enread of these structures has been	thue enm-

marized in order to give the student a total glance for preliminary comparison. Each must be subjected later to minute analy-I wish now merely to observe that the postal organization and structure far exceeds the other agencies. The postal personnel, 278,010 (1907), exceeds the wire, 172,203, by 62 per cent; the post routes, 1,457,961, exceed the duplicated telephone and

telegraph pole line, 692,082, by 105 per cent; and the number of post offices (bureaux de reception), 64,022, exceed the commercial wire offices and exchanges, about 60,000, by about 7 per cent. In revenue or gross charges only does the wire communication exceed the popular agency; for, putting the postal receipts this year at \$280,000,000, this figure is overtopped by the Bell system, with its \$250,000,000 of telephonic and telegraphic receipts, when the estimated \$80,000,000 of the independents and \$20,000,000 more of the Mackay company's telegraphic receipts are added. By how much this \$350,000,000 should be reduced under normal postal financiering the student will have to judge. No one will contend, notwithstanding, that the wire performances equal those of the post in economic service.

I shall consider later the speculative value of the wire systems, but at this time it will be necessary to determine approximately the reproductive cost of the 2,000,000 miles of telegraph and 18,000,000 miles of telephonic wires of the country. Attention is invited to the fact that the pole-line mileage, miles, of Western Union, the 67,000 miles of Postal Telegraph, and the 221,000 miles of interurban and long-distance telephone wires triplicate each other to the extent of their pole mileage. When some 50,000 miles of toll or interurban wire of the independents are added to the Bell we have a long-distance phone mileage of 221,000 miles, identical in extent with the Western Union. Therefore telegraphic communications are feasible over three routes:

First. The Western Union pole lines, 221,000 miles. Second. The Postal Telegraph Co. pole lines, 66,000 miles. Third. The Bell and independent toll and long-distance wires, 221,000 miles.

Mr. Chairman, considered merely from the standpoint of their value in economic use to the postal system, however, the Postal or Mackay telegraph lines would have to be rejected because of their insufficient extension. The Post Office would have to more than treble the Mackay mileage to do a general service. The Western Union is not subject to the same objection; it has the extension as a telegraph agency merely. But investigation discloses that only two-fifths of its wire—600,000 miles—is copper, so that three-fifths—900,000 miles—of its system would not be susceptible of satisfactory telephonic use. The third system, the Bell and independent toll or long-distance lines in combination suffices in extent and metabolical construction. tion, suffices in extent and mechanical construction for both objects, being entirely copper and having the requisite range and extent. All of which means that if we wished to give relief merely to telegraph users we might do so by the use of the Western Union. If we wished to extend relief as well to toll and long-distance users, the interurban and long-distance phone and long-distance users, the interurban and long-distance phone system would alone suffice. But if in harmony with other countries we wished to extend relief to users, actual and potential, of all the forms of communication by wire, we could do so completely by the single expedient of utilizing the Bell and independent telephone systems, since the telephonic network is potentially a telegraph network as well.

Recurring to the estimates of communication services now lost

to the public by relatively prohibitive wire rates, let us see in what measure these losses could be saved by the different methods of wire acquisition possible. Let the telegraphic service loss equal 14 per cent of the total loss, the toll and long-Let the telegraphic distance 21 per cent, and the local phone service 65 per cent, in all 100 per cent, then the following gains in service results

may be predicated of postal acquisition:

(a) By taking over the Western Union, 14 per cent on the tele-(a) By taking over the western cancer. A per care agraphic graphic of the property of the prop

The costs of propositions (a) and (b) collectively would be about \$200,000,000 on the basis of their capitalization; of proposition (c), about \$200,000,000; and of proposition (d), about \$900,000,000, on the like basis. But let us consider these phases of the subject matter with a little more detail.

CAPITALIZATION AND CONSTRUCTIVE VALUES.

The telegraphs: The censuses of the telephonic and telegraphic agencies are conducted quinquennially, and up to date we have such censuses for the years 1880, 1902, and 1907. On the subject of capitalization we have, besides the annual reports since 1880 of the Bell and Western Union. The "Postal" Telegraph Co. is a member of a voluntary association of telegraph and cable companies known as the "Mackay" Cos., formed under a deed of trust and managed by eight trustees. Besides the Postal Co. there are 20 or more land-wire com-

¹ Estimated 43,819 in 1907 census. ² Western Union, 600,000. Balance estimated. ³ Jan. 1, 1912.

panies merged in the association which, according to Poor's, 1913, has outstanding \$50,000,000 preferred and \$41,380,400 of common stock. There is, besides, a bond issue of \$20,000,000 and, perhaps, other issues. The association has published no reports showing receipts or expenditures, and all the information available for it is capital obligations and net receipts, none of which are segregated into land or sea operations. Besides the Bell, or Western Union Telegraph, and the Postal Co. systems, there are 23 other commercial or nonrailway telegraph companies operating on their own account, for none of which reports are available. Except for the Bell properties-that is, the American Telephone & Telegraph Co. and the Western Union—the latter itself not distinguishing its land-wire and ocean-cable capital, receipts or expenditures-we have only the census reports, which do not individualize the data for the separate companies, nor indeed segregate capitalization, receipts, or expenditures for the land and ocean service.

The situation is better for the telephone network. The companies report their fiscal experience, and the Bell publishes annually a statistical and financial report which, while displaying serious descriptive omissions, is yet excellent as a methodical disclosure of private business affairs. Besides, with the aid of its reports, the census data can be segregated into the necessary elements for the Bell, the Independents, the Rural Cooperative, and the Commercial companies, so that a working analysis of the telephone agency is practicable, while the same can not be said of the telegraphs, no segregation at all being possible as to land and ocean traffic or finance. It will now be in order to present such telegraphic data as are at hand:

Resuming with the data of the telegraph companies, the dividends paid on common and preferred stock were \$7,477,083 and \$6,256,693, while the other fixed charges amounted to \$5,300,529 and \$4,355,623 for the years 1902 and 1907, leaving surpluses of \$3,725,311 and \$2,227,172, respectively. These and other financial data appear as follows in the census report:

The telegraph. INCOME ACCOUNT, 1907 AND 1902.

	1907	1902	Per cent of increase.
Gross receipts from operation	\$45, 255, 187	\$35, 300, 569	28.2

³ Decrease.

and ocean agencies leaves the student completely at sea as to the facts bearing on the receipts and expenses, not to say capitalization, of the land lines. The number of messages was 103,794,076, of which 5,869,317 were cablegrams and 5,923,483 were dispatched by the railway personnel, leaving 92,001,276 as the telegrams handled by the commercial companies. We know, too, the miles of wire appropriate to land and occan service. But these are all the distinctive facts we and ocean service. But these are all the distinctive facts we

Constructive values: Since it is impossible to segregate the data to determine what proportions are assignable to the lat. 1 and ocean wires, or how much of the capitalization of \$220,000,000 is chargeable to ocean cables, we can only make our approach to a valuation of the land lines by means of estimates of the present cost of construction.

The telephone network: Let us now make a like survey of the telephonic agencies. The data relating to the subject are for 1907 and are taken from the census of that year:

Analysis of capitalization; outstanding capital stock and funded debt, dividends, and interest, excluding duplications due to intercompany holdings and payments.

In 1907 the exclusively telephone properties of the United States were capitalized at \$773,268,344, of which the Bell system had \$466,559,651 and the independents \$306,708,693, all of which paid \$35,668,827 in dividends and interest. Capitalizing these dividends on a 6 per cent basis, or 163 years' purchase, we arrive at a value for that year of nearly \$600,000,000, probably a slight overstatement of the total market value at

The Bell report for January 1, 1912, shows a total capitalization of \$620,760,654, or an increase of about one-third. augmentation of the Bell largely represents the acquisition of previously existing plants. Its 1912 (Jan. 1) capitalization, however, represented 12,932,615 miles of wire, 2,060,514 of which was interurban and long distance, as against 18,179,000 miles for the United States on that date, according to the best information (Scientific American Reference Book, 1912, p. 311). The Bell properties may thus be taken as representing 71 per cent of the total, which would give \$874,310,800 as the total value of telephone property at the beginning of 1912. This figure is probably an overshot for the independents, as the Bell wires embrace a disproportional percentage of the long-distance network, and thus represent larger cost elements per mile-unit.

Altogether we have a telephone network constituted as follows:

Altogether we have a telephone network constituted	as tollows.
Toll and long-distance network. Bell interurban and long distance, pole miles Independents, estimated, pole miles	
Total for the United States	221, 161
Bell toll, etc., wire extension, miles Independents, toil, etc., wire extension, estimated miles	2, 189, 163 600, 000
Total for the United States	2, 789, 163

Total exchange wire of the United States	17, 028, 035

It appears that the toll and long-distance telephone lines aggregate in pole-line distribution about 220,000 miles and have a wire development of nearly 3,000,000 miles. Besides this they articulate with over 17,000,000 miles of exchange wires, distributing the messages into the homes and offices of the country through about 9,000,000 phones. This long-distance network in terms of distance compares with the telegraphic network as follows:

Telephonic toll and telegraphic networks. Telephonic, pole lines Telephonic, wire distribution	Miles. 221, 161 2, 789, 163
Telegraphic: Western Union, pole line Postal, pole line	220, 928 66, 154
Total	287, 082
Western Union, wire distributionPostal, wire distribution	1, 517, 317 408, 735
Total	1, 926, 052

The above commercial telegraphic network in 1907 reached 6.828 offices and the railway network 22,282. Generally speaking, it is only at the former-the commercial-that messages are promptly delivered, and by far the greater number of railway offices are in towers and otherwise inaccessible, not to say so engrossed with the prior claims of railway messages that the nonrailway public is hardly to be said to secure a real telegraphic service. As opposed to this, the telephone network, through the Bell alone, reaches 70,000 places, and probably nearly 100,000 places as a whole. As against the 6,828 distributing offices of the telegraphic network, the telephonic network possessed in 1907 some 43,819 public and private exchanges-offices from which to dispatch or receive the telegram-and now some 9,000,000 phones through which instantaneous and economical collection and delivery of the message may be had. Another feature possessed by the telephonic network, not possessed entirely by the telegraphic, is that the former lines are copper, while but 40 per cent of the Western Union and an unknown proportion of the others are of such material. In consequence of this condition, the telegraph lines would require almost complete reconstruction in order to be susceptible of telephonic usage. President Vail, of the Western Union, refers to this fact in his report for 1912. He says:

No telegraph company could go into the telephone business without substantially reconstructing its telegraph plant to adapt it for toll or long-distance use, and, in addition, building exchange plants, involving an investment many times that of its telegraph plant.

The two wires which are necessary for one telephone circuit can by multiplying be made into four, six, or eight telegraph circuits and can be used for both telegraph and telephone transmission at the same time.

And, again:

A single telegraphic circuit or wire can not be used for telephonic

Another circumstance is that the telephonic lines are metallic circuits; that is, have the return wire necessary for the spoken message, while the telegraph lines do not, but rely on the "earth return," which is adequate for the telegram but unsuited for speech, except in uninhabited districts like Alaska, where the interferences of adjacent electrical industries are absent.

The practical effect of these differences is that the telegraphic network is fitted only to carry the telegram, with poorer collection and delivery facilities, while the telephonic network is adapted to carrying the telegram and also the conversation, and has the best collection and delivery facilities.

Stated in a more formal manner: The telegraphic network will-

- (a) Dispatch the telegram and
- (b) Deliver it at, say, 7,000 places.
- The telephonic network will-
- (a) Dispatch the telegram and
- (b) Deliver it, through 50,000 exchanges, at 100,000 places.(c) Provide instantaneous and economical delivery through 9,000,000 phones.

(d) Provide toll conversations.

If, in connection with these patent advantages of the telephonic network, economy in operation is also to be considered, it ought to be observed that in maintaining and personneling the telephonic network for telephonic uses the operating and capital expenses will have been met and discharged for the telegraphic service as well. Except for the employment of telegraph operators at points of high density, and the tele-graphic instruments necessary in the telegraphic traffic, no additional expense would be incurred for the telegraph service. Indeed, this element is involved in a triplicate way on the telegraphic lines. To the extent that the Postal Co. duplicates the

lines of the Western Union we should in effect be paying two bills of maintenance expense; first, on the Western Union, dis-charging only the telegraphic function, and then again on the Postal, a mere duplicate of the former. If to this be added the circumstance that the toll telephonic network left in private hands could give a telegraphic service, practically with-out cost to itself, which, whatever its rates, supplemented by its instantaneous telephonic delivery and collection, would take the most lucrative business from the Postal Telegraph agency, it becomes evident that the proposition to acquire the telegraphic in preference to the telephonic network can reflect only a superficial view, rational 30 years ago, but wholly untenable since the interurban and long-distance telephone wire has been developed. To take over the telegraph wires at this time would for these reasons be only to invite unnecessary failure and, perhaps, postal bankruptcy.

History of subject: In a preceding portion of this study a list has been given of the countries which have postalized the telephone along with the telegraph. In nearly every instance the postalization of the telephone service took place as a measure of protection against the encroachments of the telephone on the revenue of the postal telegraphs. It was foreseen that the telephone, in private hands, would make such inroads upon the telegraphic service as to seriously abridge, if not bankrupt, the

postal operation. Prof. Halcombe, of Harvard, in his work on Public Ownership of the Telephone, has developed the history of the subject in this respect quite clearly. I can not here go over his grounds for each country, but I shall take the time to briefly review the history of the subject in England, whose example in all the fields of sociology has been so potent in our past history:

HISTORY OF ENGLISH TELEPHONE.

1870-1871. Transfer of telegraphs to State.
1879. Edison Telephone Co. of London and the Bell negotiate with the post office for the sale of their patents without success.
1880. The two companies amalgamate. Courts decide that the post office has a monopoly of all wire communication, under telegraph act office ha

offiee has a monopoly of all wire communication, under telegraph actof 1869.

1881. Postmaster general grants licenses to companies for local exchanges, subject to a royalty of 10 per cent of gross revenues, to replenish prospective losses of telegraph revenues. The Bell Co. holding patent rights refuses to sell the post office its phones. Post office refuses permission to construct interurban lines, or local lines beyond 5 miles. Patents do not expire until 1890 and 1891. The post office established several telephone exchanges in provincial towns to enable it to dictate satisfactory public service terms with the private licensees. 1882. Postmaster general refused to issue further licenses unless the licensees agreed to sell lines on request to the post office.

1883. Post office engages in active competition with the telephone companies. Post office constructs interurban lines and rents wires to the Bell at an annual rate of £10 per mile of wire plus one-half of receipts beyond that sum.

1884. Post office issues new licenses applicable to whole country; licensees not to receive or deliver written messages, but allowed to crect trunk or long-distance lines. Post office reserved right to compete by itself or through competitive licenses. New licenses to terminate in 1911, with the option in post office to purchase plants in 1890, 1897, or 1904. Bell required to charge the telegraph rate, 24 cents for interurban messages, giving one-half to the post office, to protect telegraph revenues.

interurban messages, giving one-half to the post office, to protect telegraph revenues.

1885–1888. The United Telephone Co. applied for the right to lay wires underground in streets. Refused. In spite of these protective measures the telegraphic service fell, and in 1885 the minimum rate was reduced from one to one-half shilling per message to save the business. The annual increase of telegrams had been 15 per cent; it jumped to 65 per cent the first year after the reduction.

1889. The privilege of erecting trunk lines connecting the various exchanges of the telephone companies is given. In this year there culminated the amalgamation of the companies into the National Telephone Co.

1889. The privilege of erecting trunk lines connecting the various exchanges of the telephone companies is given. In this year there culminated the amalgamation of the companies into the National Telephone Co.

1891. Duke of Marlborough, in the name of the New Telephone Co., inaugurated a campaign for cheaper telephone services, but this company was captured by and was then merged in the National Telephone Co.

1892. Public discontent with telephone service and increase of private telephone competition with the Postal Telegraph becomes acute. Post office arranges to take over all trunk wires, which was accomplished in 1896. The local exchanges were required to make the trunk or long-distance connections without charge.

1897. Glasgow asks for license for municipal plant to compete with private company. Refused on grounds that two systems would prove wasteful and embarrass the post office in 1911, when postal acquisition might be undertaken.

1898. Select committee reports that telephone service "was not likely to become of general benefit so long as the present practical monopoly in the hands of a private company shall continue." Advised competition in local areas, to extend service, and avoid inflated price to Government in 1911. Resolution of Associations of Municipal Corporations that "the subject of telephone supply should be treated as an imperial and not as a local on., and that the postmaster general should have the sole control of the telephone system" and, on failure of the postmaster general to act, municipalities authorized to operate local systems, License of National Telephone Co. made coextensive with other local licenses on the condition that the company should permit free intervan communication with new licenses in same locality. That is, all-round competitive system in London.

1901. Postmaster general coerced London company into granting free intercommunication for postal and company subscribers, and both established identical rates.

1905. Government contracted to take over the exchanges of the National Telephone Co. at the end of 1911.

1910. The effect of the encroachments of the telephone on the telegraph in number of messages and revenue had been such that the former became practically stationary, while the balance of the revenues showed a continuously increasing deficit:

Year,	Number of messages.	Deficit.
1900.	89, 576, 961	£337, 641
1907.	89, 493, 000	652, 055
1911.	91, 614, 000	848, 611

Meanwhile both the local and the trunk-line telephone service of the post office continued to show satisfactory financial results.

1912. On January 1 all exchanges of the private companies were taken over by the Government and postalized.

The English experience appears to be conclusive upon this point, namely, that an independent telegraph business, because of the growing inroads of the telephone traffic, is, for the future. of doubtful financial feasibility. Even in the United States there are three long-distance communications by phone to one by telegraph, while in Germany the ratio is five to one. Prudence therefore clearly dictates that our postal system should deliberately avoid the telegraph wires and select instead the telephone lines. Such a choice would enable the Postmaster General to render both services at minimum rates, since he would have but one bill of expenditure to pay for their joint operation.

COSTS OF POSTAL ACQUISITION.

As already pointed out, we have three agencies of wire communication—(a) the telegraph network; (b) the telephonic interurban and long-distance network; (c) the local telephone exchanges. In discussing the cost of acquisition these agencies shall be separately treated.

The telegraphic network: As we have already seen, the census gives the capitalization of the telegraph companies for 1907 as \$220,293,575, which then covered 1,517,317 miles of land wire and 46,301 miles of ocean cable. No segregation of this capitalization can be made from the data for land and water properties. The capitalization for 1912 for all companies can not be secured; but for the Western Union it is now \$135,000,000 and for the Mackay companies \$111,000,000, or \$246,000,000 for both. These combinations represent 1,517,317 and 408,735 miles of wire, respectively, or a total of 1,926,052. A considerable portion of this capitalization represents real estate investments, and a larger portion the cables owned, neither of which, it is thought, would be serviceable or desirable for the postal service. The Western Union stocks are recently quoted at 63 and the Mackay companies at 78, the former representing \$00,000,000 of common and the latter \$50,000,000, the balance of the Western Union capitalization being made up of \$36,000,000 bonds and of the Mackay companies \$41,000,000 of preferred and \$20,000,000 of bonds. It is impossible with the facts at hand to make any estimate of the market value of the telegraph companies in respect to their land properties. I have had an estimate made of the present cost of construction of the Western Union land system (see Appendix), which shows a cost of \$65,329,275.76 new, but not including the value of office equipment. This is all that may be said of such telegraph land-wire valuation with the information before me.

The interurban and long-distance telephone network: There similarly no separate capitalization for the interurban and long-distance wires, the cost of their construction being for the most part included in the capitalization for the exchanges and their local or party lines. In dealing with these wires the capitalization is therefore not involved, and our estimate of their value will be purely one of cost. Mr. Vail, in his report of the Bell Co. for 1912, states that the cost of wire per mile varied from \$62 in 1905, with 1,265,236 miles, and \$68 in 1911, with 2,060,514 miles, to \$71 per mile of 2,189,163 miles in 1912. This gives a cost of \$155,430,573 for the Bell Applying the same rate of cost to the 600,000 distance lines. miles of similar independent lines gives \$198,030,573 as the total cost of the 2,789,163 miles, the entire interurban telephone network of the country. This network is not taken to include any portion of the terminal properties, such as the exchanges in which the wires converge. The British post office separated these lines—there called trunks—in the matter of ownership from the exchanges of the private companies, requiring such exchanges and their personnel to make the toll or trunk calls without special compensation.

In 1907 the census gave the total number of toll and long distance calls as 251,728,238, of which 191,614,284 were Bell and 60,113,954 were independent. The corresponding receipts

are not given, but the Bell Co. gives its receipts as \$45,699,458 in 1912 for 237,579,006 of such calls. On the basis of the 71 per cent proportion of the Bell wires, the number of calls for the independents in 1912 would be 97,039,294, and, assuming the independent rates to average 10 cents-one-half of that of the Bell with its high long-distance rates and its ratio of about 2 to 1 compared with the independents in the charge for local service—the total revenues of the interurban network would estimate at \$55,403,387 with 334,618,300 messages.

The local exchanges: Excluding those of the rural and mutual associations, the number of the public exchanges of the commercial companies in 1907 was 15,527. It would not seem necessary to deal with the cooperative plants, as, whatever may be the efficiency of their service, their rates, which average about one-half cent per call, seem to remove them from the demand for immediate postal relief. The census of 1907 gives the number of phones as 5,552,929 for the commercial and 691,605 for the mutuals and rural organizations. The number of miles of wire for the commercial companies was 12,513,075, excluding the mutuals and rural lines, while the messages were, Bell, 6,401,044,799; independents, 4,829,537,057, including the toll

We have seen that the total capitalization for the commercial companies was \$773,268,344, and that the 1912 capitalization of the Bell was \$620,760,654, which, taken at the proportion of its wire mileage for 1912, would give a present capitalization of \$874,310,800 for our entire telephonic network. While this conclusion can not be verified in the absence of official data for the independents, it is believed that it actually overstates the proportionate capitalization of the independents. This inference is based on the reasoning given under the section on capitalization. Other traffic statistics for the commercial companies are now given.

Commercial telephone systems, classified as in urban and in rural districts.

The preceding data will sufficiently indicate the relative public importance of the telegraphic, the long-distance, and the local telephone service. But if a postal simile may be employed, I should say that the telegram and long-distance messages compare with the local calls or conversations about as the parcelpost service compares with the letters and mail pieces-that is, scarcely compare at all—the local phone and the letter services being immeasurably the more important,

Some special attention may be justified at this point to the

subject of these local rates.

The average rate or receipt per local call for the principal countries of the world is shown to be 1.1 cents, which compares with a rate exactly the same for the independents in 1907, which includes their toll messages, and with 2.1 cents per local message, exclusively, for the Bell Co. in 1912. As late as 1900 the Bell report gives the cost to the subscriber as varying from 1 to 9 cents per connection. As the Bell system includes from three-fourths to four-fifths of the telephonic institution, it is apparent that its operations present conditions which are national in character. This deduction will graphically appear when we compare it with even the national telephone institutions of the greatest countries, which it overshadows in capital invested as well as in wire development and in gross expenditure and income. It is only our postal system which exceeds it in scope and extent or the other characteristics of a national institution. It would seem to be unnecessary to indicate the similarity between the postal function of communication and that of the wires, while attention has already been given to the fact that but about one home in five can now be reached by the electrical communication. That this is due to the limitations natural to the rule of private financiering may be shown in a comparison of the universality of the postal agency under contemporaneous conditions. It is certain that under private financiering the wires are not destined to follow the mail carrier into the ordinary home. And yet, for even more pressing reasons of use and necessity, this is what they should do. It is as much the necessity and the right of society to have the effective means of sending its communications to the homes of the masses by wire as by human carriers, not to speak of the similar necessity and the right of the masses to enjoy such facilities for their own uses. Private financiering has exhausted its right to a longer lease of the agency to realize this end, even if it were to convince us of the sincerity of such a program. That such a program is impossible in its hands but requires institutional motives and resources which it can not be expected to command, and which are yet available for society acting for itself, shall be the subject of our next chapter.

POSTAL SOCIO-ECONOMICS.

Mr. Chairman, Mr. Vail, president alike of the Western Union and the Bell system, declares in one of his reports:

There is a road to every man's door; there should be a telephone to every man's house.

The parallel is indisputable, but its complementary fact should also be noted. It was society and not any privately financed monopoly that built these roads. He also adds apologetically for the Bell that the system must be-

under common control * * *. It must be sufficiently strong to constitute practically one system, intercommunicating, interdependent, universal.

For such an object I make bold to say that nothing less than the social power and motive can be made adequate.

Now, the postal object is not merely to confer equal privileges in form, but to effectuate equality in practice. It therefore so organizes its service and formulates its rates as to remove any economic barriers to their use. The poor man, the very poor man, can actually utilize any form of the existing postal service. Its rates are adapted to his means.

The rate methods by which this is accomplished with the mail piece are well known, and it now becomes necessary to apply them to the different kinds of communication by wire and determine their availability for procuring like results in that field.

The rates: It must be obvious that the universality of the postal service has been accomplished through the lowness or social serviceableness of its rates. In treating the forms of wire communication, the local call, the toll, and the telegraphic message will be separately taken up.

Subscribers' rates: Academically speaking, a railway rate

structure has two functions to perform:

(a) The function of the body of rates charged is to produce sufficient revenue to keep the property whole and pay operative and capital charges.

(b) The function of the particular rate is to move as much of the potential traffic as possible in the article to which it relates without actual loss in the operating expense.

If function (a) should fail, transportation must ultimately cease, while if function (b) fails, transportation does not take place at all. What all this means in practice is that the railways have not found it practicable to move the traffic of the country with rates based upon the quantity of service rendered; that is, rates compounded of the average cost of service plus a proportionate apportionment of the fixed and capital charges. At first they tried this plan, but very shortly learned that an immense proportion of the potential, low-priced traffic, able to pay its share of the operating costs and a small proportion of the fixed charges, was not able to pay its full share of the fixed or capital charges. The consequence was that such traffic did not move at all, and the railway lost the slight gain over operating expenses which it might have secured, while society lost the service of having many of its commodities moved from their places of production to their natural market. railways accordingly threw overboard the cost and capital-charge theory of rate making, and adopted instead the system of class and commodity rates which universally obtains to-day. In other words, they have frankly espoused the principle that transportation rates, especially that proportion of them from which they derive their revenues for fixed and capital charges, must be levied, like taxes, according to the subject's capacity to pay; and so, if you will look into a freight car, you will observe shipments of equal weights and sizes moving on the same train from the same point of consignment to the same destination, each paying a different rate for what appears to be an identical service. Rates per 100 pounds actually vary from 95 cents for first class to 31 cents for the sixth class, when consigned from St. Louis to points in Massachusetts, which is not an exceptional ratio. At first we may resent the idea that a private organization should formally assume and exercise the power to tax us, and this feeling doubtless has had much to do with the Government acquisition of the railways in other countries; but as necessity knows no law and a substantial part of transportation would have failed under cost-of-service rates, the American public has long acquiesced in this private taxing

It is worthy of note that only the railway has adopted this State or social principle in rate making. None of our public utilities, such as water, gas, electric, street railway, or telephone companies have followed its example; and, indeed, it is doubtful if such a program would be permitted them even if traffic conditions made it desirable. Although it will appear sufficiently clear that the universalization in use of the local telephone service will require just the treatment the railway has applied, still we can understand why no telephone company has discriminated in its charges in favor of the poorer, potential subscribers as the railways have done in favor of the poorer paying articles of commerce. It is the object of this chapter to show that such a policy is actually necessary and that it is also fundamentally ethical and economically sound.

Ethics of rate making: It is only necessary, I submit, to clearly apprehend the relations of the subscriber to his phone and to other subscribers to make proof of the above assertion.

Let us see what are the uses of a phone: First. To save A a walk to B's office.

Second. To save A a walk to B's office.

Second. To save B a walk to A's office.

Thus my phone is intended, or its functions, as much for Jones as for me. From this it follows that having supplied myself with a phone society is obligated to supply the conditions. whereby Jones can similarly provide himself. That is, my material interests in the case of the phone, as in the case of the road, entitles me to have a phone connection with Jones's house. The analogy with the public-road system is obvious, and my right to a means of ingress to his premises, now secured by general taxation, would seem to be the same in one case as in the other.

Let us suppose, now, that the system cost of maintaining each telephone is \$15 per annum, of which \$6 is the expense of making connections and \$9 the charge for depreciation and interest. Let us suppose that A earns \$2 per day, or \$0.20 an hour, which would enable him, impelled by its convenience, to subscribe for a phone, if he could rent it at not more than \$6 per annum. On the other hand, let it be supposed that B earns \$8 per day, or \$0.80 an hour, four times the wages of A, and impelled like A, would subscribe at a rate of \$24 per annum. In that case the joint subscriptions of A and B would equal \$30, or \$15 per phone, the gross sum required. In order that A may reach B and that B may reach A, why should not the tariffs be formed on the theory that would make them both subscribers? Would not this be making a like use with the railways of a principle just as applicable to a similar state of facts in local communication by wire?

It may be answered that such a proposal amounts to a gross discrimination between A and B, and that while the railway tariffs do discriminate between the different classes they do not discriminate between persons, but merely between inanimate commodities. But is there, in fact, any discrimination in either case? Is it not the fact that the railway, theoretically at least, is simply charging each class for service according to the value of such service to the commodity as the only practical mode of fully performing the function of transportation? Let us now recur to the assumed conditions of the illustration for A and B and their telephones. B receives four times the wages of A, therefore his time has four times the monetary value of A's time. In saving the time of the walk for A the agency renders him, accordingly, only one-fourth of the benefit it renders to B. Obviously the tariffs assumed in the hypothesis express the relative utility of the service rendered to each.

Now, if A may be taken to represent the phoneless homes and offices of the country to which the present nondistinguishing tariffs deny this great service, B may be taken to represent the body of relatively well-to-do subscribers, about one-sixth of the population, who are equally denied access to such phoneless population representing the immense body of the people. five-sixths who are phoneless suffer a great inconvenience from inability to communicate with each other or the more fortunate one-sixth, but it is not improbable that the B class suffer even more from their greater need of communicating with the more numerous body of society.

It is a condition, therefore, rather than a theory that confronts us. If the present class of subscribers had the number of accessible persons multiplied by 6, could they complain if the tariffs should be based on assignments of the cost of service proportioned only to the value of service rendered to the sub-scriber, especially if such tariff making were found to be the only means, the actual sine qua non, of securing for them the

required connections or accessibility to society?

Some such method ultimately must be applied to secure the maximum of social service in the local exchange. Society has resorted to much more aggressive measures in the case of the public road and the common schools. To maintain these agencies it levies its tax without regard to the utility directly resulting to the individual taxpayer. He may be a sailor or a bachelor, yet civilized mankind adopts but one policy-it is general taxation to secure the maximum result, otherwise unattainable.

Evolution of tariffs: In the beginning the phone was treated as the unit of service, and the monthly or annual rates were identical, whether for residence or business uses. No difference of charge was made even for business houses where the calls might be 30,000 a year as against one-tenth that number in some quiet office or even less in the residence. The next step was to charge a higher tariff for business than for residence uses, and this classification still largely obtains in the smaller towns where the limited number of subscribers prevents serious overuse and financial loss. In the larger cities the differentia-tion of the tariffs has proceeded forward to what is called the measured-service rate.

There is added as an appendix a table giving the local rates for a number of countries as perhaps the best means of studying the varieties of local-rate growth throughout the world.

While I believe both the economics and the ethics of the subject would justify the use of discriminating rates based on the value of the service to the user, if such rates proved necessary to exploit the potential traffic, yet it is not thought necessary that they should assume such a form at any time, even if judged necessary. The grades of service from one-party exclusive lines to two, three, or four party lines with graduated rates could be made effectually to cover up the merely apparent discriminations. The base rates could be made sufficiently low for the multiple party lines and sufficiently high for the exclusive to achieve both revenue and traffic producing qualities, with the rate per call alike for all. If eventually, as it is believed the event will show, the cent rate proved adequate alone, the base rate could be commuted into so many calls-for example, base rate, \$10, giving 1,000 free calls. Devices for collecting the call rates and for registering their number are cheap and have reached the practical stage. Ultimately the base rate itself might be susceptible of elimination, except temporarily as security against loss in improvident new installations of the phone, where it might be retained as a guaranty of the necessary utilization. The rate evolution here described might bring us ultimately to the "pay as you use" phone, with a low and uniform rate per call for the entire country.

Local rates: It would be highly desirable, if financially feasible, to secure for the phone user a local rate of a cent per call, the average statistical receipt per call for postal-telephone countries,

and approximately the average receipt with the independents. Such a rate would, if uniformly available, place the phone service within the reach of every American home. No one should complain of such a rate, as with our wage levels the 1 cent is an actually negligible price. Thus, if such a rate can be finally rendered compensatory, the local phone charge will be completely halved and universal satisfaction with the tariff secured. The letter rate, and if not in a few instances the postal-card rate assuredly, represents that desideratum at present,

The closest tariff approaches to the cent-a-call rate are the German and Swiss tariffs for measured service with a cent-acall charge. But the Germans have a basal fee besides, and the Swiss also a basal arbitrary charge amounting, after the second year, to \$7.72 per annum. Serious apprehension of inability to attain the cent rate as an average statistical result need not be felt in view of the experience of the American independents and foreign postal systems. But grave doubt may be felt as to applying such a rate to the metropolitan populations. It will be argued that while more than compensatory in the towns and villages, on the average, as it has been shown to be, yet in a city like New York such a rate would be ridiculous, especially when compared with existing New York charges. This is an extreme case, it is true, but let us see how the facts stand with respect to New York and the rest of the country.

The Bell reports give the average cost per subscriber for its entire system, excluding the cost of toll lines, as \$105 each. The total cost of construction for 400,000 subscribers' phones and 25,000 (?) booths of the New York Telephone Co. is given in the report of the Public Utilities Commission, as follows:

Telephone plant______Less depreciation reserve______ \$50, 128, 000 5, 123, 786

> Total_ 45, 004, 214

Thus the cost per phone is \$106, or but 1 per cent greater than the average. The assumption that a metropolitan plant exceeds the town and rural so greatly in cost does not seem to be borne When millions of miles of wire can be massed in a single conduit, even though at an underground expense, the cost per

mile and the maintenance service are greatly reduced.

But no discussion of local rates is actually valid that does not explain the use being made in many American cities and other countries-Munich, and so forth-of the automatic system with which the subscriber quickly and simply makes his own connection, eliminating the exchange operator, and by switching and trunking devices reducing the miles of manual wire per phone (2.50) in the most substantial way. There is now but 1 phone to 12 persons, and these phones are in the stores and offices, probably not more than one home in five being so provided, especially in the larger cities. Each city block of fifty or a hundred homes has a few subscribers, whose lines, in connection with the automatic system and its switching and trunking devices, could be used as trunks to the central for the multitude of block-party lines that would follow the introduction of the postal cent-a-call rate. The total investment per subscriber might thus be brought down to \$70 or lower, while the expenses of operation in the cities would be reduced by the amount of the expense of exchange operators. One should feel rather hesitant to make the above statement if the actual facts of practice and accomplishment were not before him. In the case of these local rates so various and incongruous even within the Bell network. it is submitted that while a goal should obtain toward which the postal department would direct its aim, yet the approaches to an ultimate uniform rate for local services should for a time be experimental and only tentative in spirit. The widest latitude should be given the department to conduct its experimentation, and specific freedom to try out its plans in selected places.

If it be found that metropolitan centers represent a greater capital cost per phone, I think it will also be found that such phones represent an even greater percentage of use or patronage. On a measured surface basis, even with like rates, it is only rational to expect a larger number of calls and, therefore, a larger revenue per phone from city subscribers. The average larger revenue per phone from city subscribers. utilization of the subscriber's phone is said to be less than 2 per cent of its time capacity. We all feel at liberty to write as many letters as we wish, but the visitor to New York who is asked first to pay the telephone company as much as the street car fare would be and then the hotel as much more, if his

means are limited, is likely to count the cost.

TENTATIVE BATES.

For all practical purposes the cost of conducting the agency will be nearly the same whether the lines be used at their maximum or their minimum capacity. The problem of the rate maker is therefore twofold:

(a) The body of rates must on the average pay the total cost of service.

. (b) The particular rate or adaptations of the rate should produce the maximum utilization of the agency and thus the greatest service to the public.

Therefore, according to the hypothesis, if the gross annual cost of operation were known and the amount of traffic which it given rate graduation would result in might be predicated, it would be feasible, theoretically, to adjust the rates to gratify both maxims. So much for the theory, which, of course, is not precisely realizable, although the universality of postal operations renders theoretical reasoning highly useful and almost accurate, as applied to average periods. What in practice is feasible is a system of approximations as to cost and traffic; and it is by these methods that private financiers pass upon such projects in the establishment of public utilities of the various kinds. Applying this method to our subject, let us observe the probabilities.

COST OF MAINTENANCE AND OPERATION. INTERURBAN NETWORK.

The operation of 220,928 miles of pole line of Western Union in 1912 represented expenditures as follows:

Total 36,063,835

This represents the operating and maintenance expenses of a pole-line network identical in mileage with the toll and long-distance network, including depreciation on 1,500,000 miles of wire, as against about 3,000,000 miles of such telephone wire. It also represents the wastes of telegraphic accounting previously set forth, as well as other elements of expense indicated as susceptible of elimination under postal operation, e. g., office rents, legal expenses, corporate salaries, and so forth. If we ignore these savings and add to the total sum interest at the rate of 3 per cent on 200,000,000 of Government bonds and 4 per cent to cover the depreciation not fully included in the expenditures statement of the Western Union, and also add 5 cents per telegram and 2½ cents per call for the extra business to follow the proposed reduction in rates, then the following table approximately represents an annual fiscal statement for the telegraphic and long-distance telephone services under the new system:

The receipts of the toll and long distance lines are now between sixty and seventy millions. The application of continental rates to this traffic has produced a result of over five long-distance calls per capita per aunum in Germany as against about three here, although our phones double theirs in per

capita distribution. With reference to the number of telegrams, the New Zealand experience, now nine per capita, is presented. From all these data it is assumed that under postal rates the long-distance phone traffic would equal the German and half equal, at least, the New Zealand development for the telegram. Such results in tabulated form would be as follows:

Obviously the figures as to the prospective traffic can only be speculative; but they are no more so than the conditions and computations of private enterprises in the same field. their support it may be said that the gross figure of \$135,000,000 approximately represents the gross receipts now derived from the toll and telegraph business; and it is not apparent why the postal system should not secure an equal gross revenue with the inducement of offering double and treble service. That the substitution of low-service rates for high ones will find a complementary potential traffic inhibited by the higher rates has been made sufficiently evident. Yet it seems justifiable to add that the experience of the parcel post in giving mobility to an immobile but potential express traffic sustains the thesis. two hundred million shipments will be moved as parcels by the post this year, certainly not less than one hundred and fifty millions; and yet only about fifty millions of these have been taken from the express companies. The low postal rates have had the effect of creating new traffic to the extent of trebling or quadrupling the former traffic.

TELEGRAPH RATES

Mr. Chairman, the present telegraph tariffs, beginning with a minimum of 25 cents for 10 words, are graduated for increasing distances in multiples of 5 cents up to 50, whence the rate is 60, 75 cents, and \$1. The additional word rates correspondingly rise from 2 cents to 3, 4, 5, and 7 cents, respectively. These rates yield now an average on the message of from 38 to 40 cents. Special rates are given the press on individual messages as set forth in an appendix; while the great body of the news is handled by the press associations over leased wires, for which the telegraph company is commonly paid \$20 per mile per annum, the association supplying its own operators. The data are insufficient to permit an opinion as to the merit of this lease rate, but since it is a wholesale rate it is not so likely to be excessive as the individual message rates.

We have seen that, differing from our postage rates, which are quite as low, the telegraph rate here averages about twice on the shorter, and on the longer distances from three to four times as high as in other countries.

Rate and receipt per telegram.

[Telegrams per capita.]

				Recei	pt.	Telegrams p	Telegrams per capita.

- Do. Russia	Each word additional	.02 .0757 0257	15	.390	16	24	16	

Thus, in Germany the rate is 12 cents and 1 cent, with possible distances of 700 miles. In the United States the rate for a like distance would average 50 cents. There are a few foreign rates lower than the German, but it represents a mean for postal-telegraph countries, including New Zealand, with its American wage levels. It is not believed that a flat rate for all distances in a country so large as the United States could be made compensatory without making it too high for the shorter-as it is in Russia-and too low for the extreme distances of which our country abounds. Tentatively, it is proposed to adopt the 12-cent minimum, plus a cent per additional word, which is typical for postal systems, the 12 cents to embrace but 12 words, counting address and signature. This rate, it is proposed, shall be effective for 200 miles. For greater distances a rate scale based on the declension of freight rates for increasing distances is suggested. Broadly regarded, the railway class rates double as the distance quadruples; or, stated in mathematical terms, the rate increases in proportion to the increase of the square root of the mileage of the journey. a recognition of the fact that the terminal service does not increase with the lengthening haul, a fact which would seem to be of even greater importance for increasing telegraph and telephone message journeys. Applying this law to the telegraph message, we should have a result as follows:

Twelve cents, up to 200 miles. Twenty-four cents, up to 800 miles.

Forty-eight cents, up to 3,200 miles, But the above table, which is merely expository, contains only three jumps from coast to coast, while the telegraph companies have found it prudent to have not less than eight, from their 25-cent to their \$1 charge, for the most part representing increases of 5 cents per advance. The scale following is therefore presented as supplying the necessary gradations.

* Cents.	Miles.	Addi- tional word.
12	200 500 800 1,400 2,009 2,600 3,200	Cents. 1 1 1 1 1 2 2 2 2 2 2

It is thought that the day and night letter services adapted to the above rates should be retained, in order that the wires be utilized during otherwise idle hours of the day and night, and to these should be added a new species of telegram, auxiliary to the long-distance conversation. I call it the phone-appointment telegram, say, at a flat cent-a-word rate, to be used by parties in fixing a definite moment for long-distance talks. Much time and annoyance, it would seem, might be saved thus to the parties themselves as well as otherwise wasted plant and personnel in the preliminaries of the attempt to connect long-distance parties.

The above tariffs would average a little less than one-half of the present telegraphic rates, and it is thought would produce an average receipt of 25 cents, somewhat exceeding the average 21-cent receipt for Denmark on a flat 13-cent minimum and 1½-cent additional word rate. Such rates, when taken in connection with the extension of the service to all the post offices, homes, and offices reached by the telephone wires, could hardly fail, ultimately, to render effective the maximum of business and social demand for this form of correspondence. Surely such a development is due us. The people of the United States exceed all others in the number of letters per capita on identical postal rates. It is humiliating to think that we must occupy but the eighth place among the nations in the degree of use made of the wonderful telegraph agency. Great Britain, Switzerland, France, Norway, Denmark, Belgium, and the Netherlands, all with lower wage levels than ours, precede us in this respect, while New Zealand, with wage conditions like our own, manages to extend its average citizen eight times the telegraph service we get here. And this has been done for a generation. Surely the country has paid enough for its tory statesmen and monopolistic finan-

The toll telephone rate: It has been said that the telegraphs have word-miles for sale, and that the limit of their capacity might only be reached when the best word-sending devices were fully occupied in transmitting words over every mile of their wire. It is equally true that the telephone agency has mileminutes to sell, and that its theoretical limit is only reached when every wire is conveying a conversation every moment during the year. Such is the theory. In fact, during sleeping hours, say from 12 to 6 a.m., there can be but a very reduced demand.

The conversation unit is three minutes in all countries, and according to the reports of the Bell Co. the time consumed in making the connection and the conversation runs from five to seven Taking the average as six minutes, if a circuit were, theoretically, in constant use throughout the year, 87,500 conversations might take place. The German toll and long-distance network consists of 19,623 circuits, while the Bell Co.'s network, reaching about the same number of people, appears to be 33,164. The number of conversations per circuit in Germany was 16,417 in 1910, while on the American system the average was but 7,164. It is pertinent to remark, however, that the average charge in Germany was less than 4 (0.038) cents, while in the United States it was over 19 (0.192) cents. The German rates were effective to induce traffic equal to one conversation to each 31 minutes, or 19 per cent of the theoretically available phone time; while the American rates produced one conversation to each 73 minutes, or a utilization of about 8 per cent of such time. The low utilization in the United States is indubitably the result of her higher rates-over five times those of Germany. This low utilization is made a matter of observation, if not of complaint, in the reports of the American system.

Unlike the telegraphic agency, where the press and the night letter largely preserve the nighttime from waste, while the day letter may use the idle moments of the day, little has been done in the United States to distribute the distance telephone traffic equally throughout even the day hours. In Germany considerable effort has been made to effect such a distribution. There are rates for urgency or immediate demand service, rates for regular subscribers at given hours, regular day and regular

night rates, and monthly contract rates.

Under the operation of postal motives it would be interesting to sketch the possibilities of the use which might be made of the waste hours from 12 p. m. to 6 a. m. A purely fanciful case is presented for illustration. The mother lives in New York and her daughter in Chicago. The scale rate is now \$6 for a three-minute talk, and this talk, purely domestic, never takes place between poor people. But the wires are idle, and in Germany the rate would be but 48 cents. Why not permit the use of the lines during midnight hours at that rate for such purpose? The postal rate maker would say, like the railway rate maker, "Well, if it be not diverting higher-priced traffic from the day business, anything I get beyond the cost of exchange operator will be velvet to me, and I will open the wires to this social traffic at the German rates." "Nonsense," objects the private financier, "such a rate is absurd."

Well, let us see as to that. In another part it is shown that

the total cost of maintaining and operating the interurban telephonic network for telegraphic and telephonic uses would be about \$80,000,000. If half of this represented the telephonic share, the cost per mile of wire, exchange service included, would be at the rate of \$13,333 per 1,000 miles. The New York to Chicago wire measures about 1,000 miles, and with return wire 2,000 miles; thus the half annual cost of maintenance and operation would be \$26,666, or about 30 cents per six-minute period, counting every moment of the year. These figures are not to be taken as accurate, or even approximate, and yet it is asserted that the true figure, when secured, will not differ

enough to impair the case.

The truth is that the German rate, while not seductive to him, might well be introduced during these midnight hours, if the private financier did not fear the effect in two directions. would call attention to the abnormal day rate, some ten times as high, and might divert a serious proportion of the highpriced day traffic to the cheaper service. Perhaps it might have been wiser for the gentlemen controlling these really postal agencies to have taken the public into their confidence and formulated rates designed to secure the maximum utilization of their plants, even if their rates at first appeared utterly incongruous. But they are not sure that it would be wise. Nor, indeed, can it be very certain that their fears are groundless, considering the state of ignorance and indifference which has permitted the agencies to fall into private hands at all. Their patriotic night rates might indeed be made the false basis of a demand for irrational day rates. And yet this has not been the experience of the railways, with their wisely

discriminatory class and commodity rates.

The basis for a long-distance rate, it is believed, would include
(1) the total number of messages likely to be transmitted on a given rate—the experience of other countries would afford approximate means of computing them; (2) the total cost of service divided into units of mile-minutes; (3) the graduation of rates for the different hours of the day and night to correspond with the relative desirability as determined by traffic demands; (4) the distribution of wasted or unused plant values into special hour rates in a way the least deterrout to the

demand for the service. Doubtless it would require considerable experimentation by the postal department to acquire data for the use of these bases, but the postal system would have a motive to experiment, and it could rely on the support of the public in its efforts. It is highly probable that the result would be a very great salvage of telephonic plant life now lost, to be devoted to public services, which the present rates preclude.

Expository toll rates: With the object rather of stating the conditions of the problems connected with the long-distance rates, I am presenting a tentative tariff for the different distances up to 1,000 miles. Two administrative purposes are sought to be realized, the utilization of the blank period between 12 m. and 6 a. m., and the comparatively blank period from 6 to 9 a. m., as also from 8 p. m. to 12 m., in the telephonic plant day of 24 hours. Conversely, it is sought to cut down the traffic peaks one-half between the hours of 9 a. m. and 12 m. and 6 p. m. and 8 p. m. I insert at this point a chart taken from the Bell report, which illustrates these points of peak and periods of blank utilization for the toll and long-distance traffic, differing but slightly from the local traffic.

It is obvious that if the blanks could be partly filled by new traffic such business would represent nearly all gain to the postal department. It is equally obvious, of course, that if future increases of traffic during peak periods could be diverted to the comparatively blank periods by sufficiently attractive rates, a business from three to four times that now done could be accomplished on the present capacity of the wires. Theoretically the rates should rise with the degree of the demand and fall with it in order to scatter or distribute the traffic as nearly equally over the 24 hours as possible, and thus secure the maximum effective capacity of the plant. With a view to illustrate rather than to propose methods for

this purpose the following tariff is presented:

Long-distance traffic distributing tariff (3-minute units).

12 m. to 6 a. m.	6 a. m. to 9 a. m.	9 a. m. to 12 m.	12 m. to 6 p. m.	6 p. m. to 8 p. m.	8 p. m. to 12 m.

Add cost of appointment telegram 1 cent a word. Sunday, half week-day rates form 6 a. m. to 12 m. Overtime, one-sixth of given rate per additional minute.

The busy-hour rates could be very much further reduced in the event that the schedule proved effective in more equally distributing the traffic. It is for this purpose that the urgency rates are made so high; for the five busy hours they are as high as at present. Doubtless there is a body of demand that cares not for the highness of the rate—most of the present patronage, perhaps—if it can secure quick and instantaneous service. This character of service is called "urgent" in Germany, and pays three times the regular rate for its preference over the regular traffic.

The rates outlined are of seven varieties: The midnight rate for social objects slightly exceeding the German day rate; the 6-to-9 morning rate and the 8-to-12 night rate, designed to attract traffic from peak periods; the 9 a. m. to 12 m. and the 6 to 8 p. m., or peak periods, with the rates purposely left high to divert excess demands at those hours to other periods; the urgent or quick-service rates; the Sunday rates for social uses; and the one-half or one-sixth per minute additional rate, for overtime, which corresponds to the first three-minute rate

since the additional allowance of three minutes for making the connection is included in the first charge.

It will require some years of experimentation to determine just what graduation of rates to busy and nonbusy periods of the day and night will secure the highest attainable utilization of the plant; and the consummation of the lowest rates must await, and is dependent on, such a degree of utilization. Meanwhile the present rates, under the above schedule, run from but one-fifth to two-thirds of the existing rates, with it is believed a substantial enlargement of plant capacity during peak demands. Even if our long-distance traffic carries a rate four times normal, and the public service is at perhaps but one-fourth of its potential, yet normal, though compensatory, rates would not be practicable if the effect was only to exaggerate the peaks and thus perhaps require immediate additions to the plant, although its average utilization, as shown, might be but a paltry 8 per cent of its total capacity. Time and experiment only will qualify the rate maker to formulate the most desirable rate structure.

COMPARISON OF PROBABLE RECEIPTS AND EXPENDITURES.

Mr. Chairman, it may be of interest to ascertain how the account would have stood, say for 1912, had the telephones been under postal management, with the telegraph function added. Taking the receipts and expenditures of the Bell system for that year and adding those of the independents—estimated, Bell equals 71 per cent, independents equals 29 per cent—and adding also the receipts and expenditures which the superimposing of the telegraph traffic of the telephone network would have involved, we should have the following statement:

Receipts, 1912: Telegrams (300,000,000) Bell system receipts Independent companies' receipts	*75, 000,000 199, 172, 154 81, 351, 989
Total receipts	355, 524, 143
Expenditures, 1912: Telegrams, 7 cents each Bell system, 1912: Operation Current maintenance	85 248 877
Independents: Operation Current maintenance Interest at 3 per cent on purchase Depreciation, 5 per cent on purchase	26, 651, 000 12, 586, 000 27, 000, 000
Total expenditures	
Résumé: Total receipts Expenditures, interest, and depreciation	355, 524, 143 229, 246, 313
Net balance	126, 277, 830

The above table substantially reflects what the postal budget for 1912 would have been had it conducted the telephone and telegraph services over the telephone network upon the existing telephone rates, supplemented by the telegraph rates proposed. It is plain enough that the department will be on safe financial ground, with a surplus of a third of its receipts to apply to the extension of the service to the farmside and the homes of the masses.

Against this alluring balance of more than one hundred millions it will be urged that the statement takes no account of the higher wages which the postal system would have paid. Granted; its scale would have been higher. But as a future factor it is submitted, as the judgment of the telephone engineers, that the reduction of the personnel concomitant with the certain introduction of the automatic phone much more than meets the difference between private and postal wages.

SUMMARY OF BENEFITS.

Let us see what our reasoning supports as the advantages to be ultimately derived from a postalization of the telephonic network.

- (a) A cent-a-word telegram.
- (b) Long-distance rates from one-half to one-fourth those prevailing.
 - (c) A cent a call, local conversation.(d) Universal use of the telephone.

Only item (d) presents an achievement not already attained in other countries; i. e., the phone in every man's house. But with item (c) within reach our American wage levels offer the highest assurance that a service so cheap and necessary will become as universal as the letter service.

Of the great advantage which should flow to society in the way of relieving the local governing institutions from the strain to which they have been subjected by the corrupting influences of franchise hunters, it seems unnecessary to do more than refer to the experience of San Francisco recited more fully in the chapter on social effects. The New York (Bell) Telephone Co.

recently put forward a claim of \$30,000,000 as representing the value of the franchise it obtained from the city government to lay its wires in the streets. If private capital is to be relied on, then such franchises must continue, and if conceded any value it is apparent that bribery and corruption, whether frequently exposed and punished or not, are likely to continue; and with such stupendous amounts involved ordinary virtue in the promoter and official can only be expected to give way. On both economic and social grounds the verdict of the nations has been "Postalize"; and possessing an institution as trustworthy and efficient as our postal agency there is nothing to discourage the expectation of even higher accomplishments here.

OBJECTIONS.

I distinguish the difficulties which attach to any constructive program from objections which take the character of fundamental defects in the proposal itself. Such difficulties, for example, as the inconvenience of financing the project, the adjustments and readjustments necessary to secure the desirable properties in the rates, the extensions of the network to meet additional demands, the addition to the postal service of the numerous personnel essential to the conduct of correspondence by wire, and, finally, the effect of competition by the postal telegraph on the telegraph lines in private hands, all of which may be difficulties and yet not objections. It is meant to meet these in an absolutely frank way, and so I shall take them up in their order:

Financing the acquisition: It is assumed that the acquisition of the total telephone network, embracing local exchanges, toll, and long-distance lines, would cost about nine hundred millions of dollars. The purchase would, of course, be financed by the issue of Government bonds. The question presented is, therefore, whether the marketing of this amount of bonds would be so difficult as to render the proposition undesirable.

Great financing enterprises during recent years have been as follows:

The Panama Canal.
The United States Steel Co.
Acquisition of the railways by Japan.
Acquisition of the railways by Switzerland.
Acquisition of one-third of the railways by France.
Acquisition of the national telephone network of Great Britain.

The plan would not involve the compensation of the owners in one gross payment or at one time. While it would, of course, be necessary to acquire title and possession of the networks by a single process of statutory appropriation, and on the same day, it by no means follows that payment for the properties would or could be invoked in the same total or single way. There are, altogether, some 3,000 companies or distinct legal proprietorships of the network, and even the Bell associated companies number more than 200. There would, therefore, be as many distinct payments as there are different proprietor-Moreover, these payments would naturally extend over a period of time sufficiently long to enable the Interstate Commerce Commission to make its appraisals and the courts to adjust such legal questions as to valuation as may arise. It is thus apparent that the payments would be distributed throughout a period of several years and be decentralized into as many acts of payment as there are distinct legal owners. tension by such postal acquisition of the securities of the superseded companies would be likely to create an equal demand for substitute securities and render it but natural that most of such bond issues would be accepted by the former owners in lieu of their displacing private holdings. Thus ample time and opportunity to market the bonds necessary would seem to be assured, and it is not likely that the program would present any difficulties not successfully encountered in financing the Panama Canal.

Extensions of network: This represents a difficulty under any kind of proprietorship, but more especially does it represent a fundamental deficiency under private financiering. We have seen that the normal action of the private motive will be to extend the network only to those points promising sufficiently attractive profits. This motive has under our conditions substantially worked out its potency, except for the normal increase from year to year. Nearly every office and store and the residences of the well to do in the cities have been reached, and with these achievements the private financier has attained his practical limitations. The homes of the masses he has no motive to reach by the only means competent to reach them, namely, lower rates devoid of the desirable margin of profit.

As a high-priced haberdasher he naturally prefers the patronage of the gentry, and, as boldly proclaimed by the Bell system, meets demands of the masses with the assertion that "Instantaneous transmission of communications is as yet a convenience or luxury, it is not a necessity and is still confined

to the comparatively few, and for that reason should be at the cost of the few that find benefit and profit in that use."

The experience of the Bell system is that 48 per cent of their phones are "business." Whether this includes hotel-room phones does not appear. If half only of the phones are in the residences, we should have about 4,000,000 out of 20,000,000 homes supplied with phones, or one in five, embracing the 20 per cent of the population that is rich enough to patronize this alleged "luxury." It is not fair to expect that extensions to the other 80 per cent will be made by merely profit-seeking capital.

In the legislation proposed all existing agencies for extension and new development, together with important additional ones, are put in service. That is to say, individuals, associations, and corporations, together with the Postal Department, the municipalities, counties, and States, may engage in the work of extension of the system under license from the Postmaster General. They may operate them themselves, or have them postally operated, but the right to postalize the ownership is reserved upon paying a price for the extensions which shall not be so low as to discourage nonpostal construction. The above methods have been successfully employed by the Austrian Government to assure freedom and adequacy of railway development under a régime of State ownership and management, and there is every probability that these methods would prove effective to secure the maximum of telephonic extension in the United States.

Rate adjustments: It is of the highest importance that there should exist complete flexibility in the rate structure. Private financiering until the recent era of regulation possessed this advantage for use as its motive might impel. There is a disposi-tion to associate postal rates with the inertia of Congress and the inflexibility of our statutes. This objection is a fundamental one, but it is provisional none the less. If Congress undertook to make the rates, as it does the rates of postage, and gave no administrative power to the Postal Department to revise such rates, as it did in the case of the parcel post, then I should consider this objection to be a serious one indeed. But Congress has already shown that it can distinguish between what is a legislative and what is an administrative function. It has not undertaken to make freight rates or express rates, and recently delegated to the Postmaster General the power to revise the parcel-post rates and weight limit. The rate-making function is treated as administrative elsewhere and, moreover, the legislation proposed does not undertake to formulate the rates at all, but vests that duty with the postal administration under the restriction that the rates shall be revised from time to time in order to make them compensatory and to promote the public service.

The personnel: In the 1907 census the total number of employees is given as 144,169. The data for the later years are not now available, but the number for the Bell system in 1912 is stated to be 140,789, indicating something like 200,000 for the country. This compares with approximately 300,000 employees in the Postal Service. who, to an extent, would replace the telephone personnel. More than half of the telephone employees (56 per cent), i. e., 80,214, were exchange operators, as reported in the census of 1907, and of these 76,638 were girls and women. Improvements in telephone practice, the automatic switchboard now being installed abroad and in prospect, involve the elimination of nearly all exchange operators, so that the future telephone personnel need not exceed relatively one-half the present number. Two difficulties will be urged as involved in acquiring this personnel. First, probable postal hesitancy to eliminate the employee as mechanical improvement renders him unnecessary. This difficulty will happily take care of itself. The exchange operators are girls, and experience, as reported in a study of the Bureau of Labor, shows that the average time of their employment is less than three years, when their service is terminated by marriage. This is also the experience in Great Britain I am informed by the British postmaster general. Accordingly, by simply refusing to fill the vacancies the necessary reduction of the exchange-operator force will accomplish itself within a period sufficiently brief for improvement purposes.

The other difficulty that may be urged is that increases of wages and reduction of hours of service will be asked by the personnel and conceded by the Government. This is probably true. But is it an objection? Would it not, on the whole, be socially desirable that some of the savings of unification and postalization should go to the necessary employees to lift them to the wage and service level of the postal personnel? The rank and file of the latter are admittedly better paid and their working conditions more favorable than employees in nearly similar private employments. But instead of being an objection, this fact may fairly be appealed to as supportive

of postalization. The employees should be placed in the protected classified list, and their wages and conditions of employment, like the rates, left plastic, until, through experience, the Postal Department has developed a complete system of regulations for the service. If it be feared that the efficiency of the employees in work done might not be as great for the future, reference is confidently made to the efficiency tables in former pages, where the Bell performance per employee is compared with the publicly conducted telephones of other countries, and then again to a comparison of our own postal performance with those countries. The student can not be left in doubt as to the verdict, which is highly creditable to the American postal

Telegraph competition: The acquisition of the telephonic network alone, as proposed, would leave the telegraph lines undisturbed in the hands of their present owners. But the postal system would engage in telegraph business over the telephone wires, at least to the extent of transmitting individual messages. This would mean, of course, competition with the telegraph companies. President Vail, of the Western Union, is of the opinion that it need not fear such a situation, and asserts:

There is not a single instance of telegraph and telephone companies operated by private corporations in competition with Government operation where the private service is not better than the Government, and profitable, against unprofitable Government operation, if unframmeled by Government interference. (Bell report, 1911, p. 40.)

Since Mr. Vail speaks as president alike of the Western Union Telegraph Co. and the American Telephone & Telegraph Co., its major stockholder, this difficulty would seem to be answered for the Western Union, which, having granted none, asks no quarter from the public. The opinion of the Mackay companies as to Government competition is not available, but, even if unfavorable, it is submitted that it is estopped to complain. It went into the field itself with a deliberate purpose of competition, and its activities so far have been merely to duplicate the preoccupying lines of its rival. But this company is even under more distinct duty not to complain of postal rivalry. When, in the eighties, the Government was about to give the public a postal telegraph at reduced rates, it came forward and asked the Government to desist, giving it the formal assurance that it would, as fast as its lines were extended, give the public as low or lower rates.

The result was that the Government forbore at that time to postalize. Instead of keeping its promise this system joined hands with the Western Union to eliminate the popular 10 and 15 cent rates in existence, raising them to 25 cents, and has since maintained an effective agreement with it to keep the telegraph tariffs of the United States the highest in the world. A flagrant violator of its pledge to the public to furnish it the reasonable rates the Government was about taking measures to provide, it surely can not now contend that the

people should give heed to any opposition it may make. Such opposition might take the form of claiming that the telegraphic lines should be immune from competition. in effect, that the telegraph companies refusing to give the public the benefit of competition in rates the postal agency should not be permitted to do so. Many persons will fail to see any distinction between the competition of the Post Office and express companies and the like procedure with the telegraph companies. It may be urged by the latter companies that they should be purchased and not be subjected to competition from the Government. There are two circumstances preventing such a course, for one of which—the second—the companies ing such a course, for one of which—the second—the companies are responsible. First, in possession of the telephone network the telegraph lines would be only an unnecessary and very expensive adjunct to the Post Office; second, the telegraph lines notoriously are so water-logged by false capitalization that the maxim "caveat emptor" obviously applies itself, and no Government could risk their forcible appropriation. If abandoning Mr. Vail's position that postal competition need not be feared, it be argued that such competition will reduce the value of the properties and that the people should shoulder the loss by buying the properties without needing them, then a question of ethics is presented to be answered by another question of ethics, thus: Should the people, who have suffered from exorbitant telegraph rates for generations, now also be made to unpocket besides the amount of capitalization of the declining telegraph institutions merely that their owners, who took the profits with the chances of the enterprise, may escape the results of the progress of mechanical civilization? On what ethical theory can a few thousand stockholders ask that the obsolescent losses of private property shall be shifted from

them to the innocent taxpayer of the country?

It does not follow, however, that the gloomy picture of injury to the telegraph companies shall come true. There are several reasons for a more hopeful view. The competition would not extend to the whole field of telegraphic activity. With ref-

erence to much of it their rates are not so unsatisfactory. For example: First, The Associated Press business.

Second. The stock-quotation business.

Third. The patronage of those who do not object to higher

Fourth. Lease of the wires to various business demands.

Fifth. The growing demands of the rallways for such wires which are mostly located favorably for railway use.

All of these varieties of business would likely remain to the companies unimpaired, as also their cable traffic. initiative and the elimination of the nonpaying offices, as also the use of devices to economize on their extravagant telegram accounting, it is not apparent why fair returns on the fair value of their property should not follow. At all events, no claim should be made by them for a charitable purchase of their lines until they have exhausted their ability to "make good" the new conditions. If they succeeded, there would be no problem of charity to deal with. If they failed, we should know in what degree and the exact character of the problem.

The wireless: The startling character of the discoveries and innovations involved in the wireless method of communication may suggest to some the possibility that it may be applied to the domestic, or, rather, land and municipal, correspondence, and thus perhaps diverting the correspondence from the wires, place them on the scrap heap. This phase of the matter has been carefully inquired into, with the result that the Government experts declare such a prospect to be baseless. They explain that the method of the wireless is by the principle of disturbance of the medium—that is, by waves which disturb the ether between the point of sending and the point of receiving the message; indeed, the waves actually extend backward as well as in the direction of the address. This is illustrated by the wavelets caused by the throwing of a stone into a pool,

which move equably in all directions.

If many persons were throwing stones in such pool at the same time, the wavelets would commingle and lose their identity or definition. Just so when the wireless messages are being sent from different stations, attuned alike, a confusion of vibrations results and the messages can not be deciphered be-cause of the "interference" thus caused. It is true that attuning to different wave lengths is possible and, when correctly done, the interference is avoided. But the limits within which this distinguishing of wave lengths can even mathematically be carried is said not to exceed 33 in number; and so the nature of things would prevent more than 33 stations working constantly between two points. Thus, the Government scientists affirm that no development of any now known principle of communication can take the place of the telephone wires where selectiveness and secretiveness are necessary in the message. A wireless message flares itself to the whole world and correspondingly attuned instruments must listen. Thus, in a city where a half million phones are employed, or even in the smallest exchanges, it is apparent that the nonconducted or unisolated wireless message is out of the question for meeting the requirements of the telephone. For trans or intra oceanic uses where the number of communications is at its lowest, or even in uninhabitable districts like Alaska, with great distances to traverse, the wireless offers an ideal and economical agent, and for such fields its future would seem to be unrivaled. It is a supplement to and not a substitute for existing telephone agencies.

It is important, however, that provisions should be made to meet the contingencies of future discovery and invention in order to devote them to their greatest usefulness for society, and it is for this reason mainly that a monopoly of all electrical forms of communication is reserved in the bill to the Postal Department.

LEGISLATIVE METHODS.

Mr. Chairman, my object has been to present the economic, social, and institutional features of the subject, and so but the briefest discussion of legal questions will be undertaken.

Method of acquisition: The bill proposed itself condemns and appropriates the telephone network, except farmers' lines, to the use of the Government as of a given date. The transfer of title therefore takes place by force of the statute at the same moment for all the many distinct legal ownerships. method leaves open only the question of valuation, which, under the Constitution, must consist of "just compensation." Possession may be taken anterior to the act of valuation or payment, provided an appropriation is made to cover the amounts of the awards when found. (10 Am. & Eng. Ency., p. 1068.) The Interstate Commerce Commission is constituted a board of appraisal to value the properties without a jury (Nichols on Eminent Domain, secs. 302-306) and directed to

report its awards to the parties, and if either objects the valuation is sent for review to the appropriate circuit court-of appeals. The Secretary of the Treasury is directed to make payment of the final awards and is directed to issue such 3 per cent bonds as may be necessary for that purpose. On a given date, say the 1st of January, 1915, the Postmaster General takes possession, retaining the former employees so far as necessary, who are placed in the classified service, which will define the tenure of their employments.

The constitutional power to condemn the properties appears to be clear, independent of the fact that they are means of communication and correspondence and therefore postal instrumentalities. The Supreme Court has frequently decided that the wires possess interstate-commerce characteristics, and has as often affirmatively declared that Congress in its right to regulate commerce may condemn the instrumentalities through which such commerce is carried on; for example, the railroads. (Wilson v. Shaw, 204 U. S., p. 24.) But the constitutional resources are multiple. The military power is now used to construct and operate numerous telephone and telegraph agencies by the War Department, both for Government and private correspondence. The post-offices and post-roads clause, of course, is apposite. It will hardly be denied that the nearly universal postalization of the communicating wires establishes them as postal instrumentalities as much as it does the mail car or pneumatic mail tube, and as to postal instrumentalities the power of condemnation is well established. (Kohl v. U. S., 91 U. S., 367.)

The bill should contain a provision for the allowance of interest on the awards and perhaps its quarterly payment pendente lite, or from the time of Government possession up to the date of payment, Judgments in the Federal courts between private parties now bear interest at the rate provided in the State where the controversy arises; but the statutes do not apply to the Government, which pays none. A rate of 4 per cent is suggested as fair to the parties under the circumstance of a Government guaranty. A greater rate of interest might tempt pro-longed litigation in many cases to defer the events of final payment

It will be observed that the cooperative or "farmers' lines" are excepted from the act of appropriation. There are two reasons for this: First, such lines appear to be giving rates as low as should be desired, about one-half cent per call, and where not already articulated with the commercial lines may be so connected by postal permission. The second reason is that there are some 18,000 to 20,000 of such lines, each under distinct ownership; and if merger into the postal system be later desired, it might be much more efficaciously accomplished by agreements with the Postmaster General than through the methods of statutory condemnation of so great a multitude of

The licensing method: To protect its functions and its investments in the field of correspondence it is considered necessary that a monopoly be reserved to the Postal Department for the future, which is according to the practice in nearly all of the leading countries. In our civilization science is likely to develop improved methods from time to time, and it would seem to be the part of prudence to place the postal establishment in a situation where it could take the primary advantage of such progress as may occur. However, there may be, and frequently is, a period when such innovations are purely tentative and experimental and when it may be desirable to grant the private exploiter a temporary privilege, such as patentees are given, in which to put such new ideas into practice. Society might thus employ the fruits of all the pioneering which the postal system may conduct on its own initiative as well as that of private financiering without the alternative in the latter case of yielding itself over for generations to badly functioning private monopolies. Moreover, there are the present telegraph agencies, which, being left undisturbed, should be placed under license, and thus given definite relations to the postal monopoly.

In order to accomplish these objects the proposed bill first declares a monopoly of the whole field of electrical correspondence and then provides a system of licenses for existing telegraph lines, farmers' lines, and such telephone lines as may be used exclusively by the railways. These licenses may also be extended by the Postmaster General to private parties for developmental construction upon terms to be fixed in the license, so that future conditions and contingencies may be seasonably and rationally provided for without impairment of the principle of postal supremacy.

PARLIAMENTARY PROCEDURE.

Mr. Chairman, since 1871 no less than 17 favorable reports of committees of the House and Senate providing bills for some

form of postal telegraphy have been made to these bodies. They are:

March 3, 1845. House Report 187, Twenty-eighth Congress, second session. Committee on Ways and Means.

July 5, 1870. House Report 114, Forty-first Congress, second session. (Washburn.) Select Committee on Postal Telegraphy.

House Report 115, Forty-first Congress, second session. (Palmer.) 1872. House Report 6, Forty-second Congress, third session. 1875. House Report 125, Forty-third Congress, second session. (Gen. Butler.) Judiciary Committee.

1881. House Report 137, Forty-sixth Congress, third session. Committee on the Post Office and Post Roads.

1883. House Report 2004, Forty-seventh Congress, second session. (Bingham.)

mittee on the Post Office and Post Roads.

1883. House Report 2004, Forty-seventh Congress, second session.

(Bingham.)

1884. House Report 1436, Forty-eighth Congress, first session. Committee on the Post Office and Post Roads.

1888. House Report 955, Fiftieth Congress, first session. (Rayner.)

Committee on Commerce.

1870. Senate Report 18, Forty-first Congress, second session. (Ramsey.) Committee on Post Offices and Post Roads.

1872. Senate Report 20, Forty-second Congress, second session. (Ramsey.) Committee on Post Offices and Post Roads.

1872. Senate Report 223, Forty-second Congress, second session. (Zachary Chandler.) Committee on Commerce.

1872. Senate Report 242, Forty-second Congress, third session. Committee on Post Offices and Post Roads.

1874. Senate Report 242. Forty-third Congress, first session. Committee on Post Offices and Post Roads.

1875. Senate Report 624, Forty-third Congress, first session.

1884. Senate Report 577, Forty-eighth Congress, first session.

1896. Senate Document 291, volume 11, Fifty-fourth Congress, first session. (M. Butler.) Committee on Post Offices and Post Roads.

In not a single instance has one of these bills succeeded in getting before either House for a vote. They were crowded out by appropriation bills and other bills having the right to prior attention in the respective sessions. That is, to use courthouse parlance, the court adjourned at each session before the postal telegraph bill "came up" for trial; when under parliamentary practice a new bill would have to be reported at the next session, and so forth, only, however, to fail again for the want of the momentously valuable parliamentary time. In a generation, I am informed, not a single piece of postal legislation has passed Congress except as a part of the Post Office appropriation bill. Sufficient research would probably disclose that this statement is equally true of legislation relating to the other departments: and Members of Congress will understand why this has been true in the past and must become increasingly so in the future.

All of which means that there can be no hope for such legislation unless it is made a part of the Post Office appropriation bill. That bill can not be pigeonholed. An independent bill could be and most probably would be in the House or Senate. Accordingly, there would be two methods to defeat the measure without its getting a single opposing vote. One would be to have the Post Office Committee report a separate bill, the other would be to have the Committee on Rules of the House to refuse to grant a rule for the consideration of the measure as a part of the Post Office appropriation bill. So far as I know this committee has never vetoed the action of the Post Office Committee in such a way; and so if the Post Office Committee includes the measure in its appropriation bill, as it did the parcel post, the measure could not fail to come before the House for its action. If this be not done the history of the other 17 postal telegraph bills would become the history of this. It would simply be the eighteenth chapter in a story of never-ending parliamentary jugglery and calendar failures.

SOCIAL PRINCIPLES.

Mr. Chairman, having discussed the numerous other features, I shall devote my closing remarks to the social and institutional aspects of the subject, namely, the effects of the misapplication of private financiering in the field of public economics. The experience of the United States has been almost unique among nations in this respect, for it is only here that the accepted distinction between private and public financiering has been frankly thrown to the winds. Most people have been compelled to draw a very unfavorable comparison between American and foreign municipalities. With a view to explaining this fact I quote again from the work of Prof. Adams. Speaking of our State and local governments, he says:

The policy of restricting public powers within the narrowest possible limits tends to render government weak and inefficient, and a weak government placed in the midst of a society controlled by the commercial spirit will quickly become a corrupt government; this in turn reacts upon commercial society by encouraging private corporations to adopt bold measures for gaining control of government machinery. Thus the doctrine of lalsez faire overreaches itself, for the application of the rule which it lays down will surely destroy that harmony between public and private duties essential to the best results in either domain of action.

The great argument against public monopolies is that government is inefficient and corrupt, and this brings us to a consideration of the third class of evils which result from the theory of noninterference as maintained in modern society.

BOCIAL HARMONY MAY BE RESTORED BY EXTENDING THE DUTIES OF THE STATE.

As a class of evils attending the attempted realization of the doctrine of laissez faire may be mentioned the injury worked to established government. The policy of restricting public powers within the narrowest possible limit tends to weaken government and render it inefficient; this leads to corruption on the part of public officials, which, in its turn, invites to yet greater corruption in private practices. Excluding for the present Federal administration, no one will deny the inefficiency of the government of our States, while that of our municipalities is generally regarded as a dead failure. This fact is urged by the advocates of laissez faire as the strongest argument in favor of their doctrine. See, they say, what a weak and halting thing this Government is; it can not do well what now is in its hands; how absurd to extend the range of its activity. There seems to be sound sense in this statement; and yet, notwithstanding its apparent reasonableness, it is believed to rest upon superficial reasoning, for it commits the grave error of mistaking a result for a cause. I would not go so far as to say that the statement would be whelly true if turned end for end, but there is truth in the charge that the inefficiency of local government is, in a large measure, traceable to the endeavor to realize the nolle tangere policy among a people whose energies are directed by the commercial spirit.

The policy of progressive denial of function and the conse-

The policy of progressive denial of function and the consequent lessened ability of the functionary for efficient service is thus illustrated:

The policy of progressive denial of function and the consequent lessened ability of the functionary for efficient service is thus illustrated:

The advocates of noninterference have treated the Government as the old physicians were accustomed to treat their patients. Was a man hot, he was bled; was he cold, he was bled; was he faint, he was bled; until fortunately for him he passed beyond the reach of leech and lance. This has been, figuratively speaking, the form of treatment adopted by the people of the United States for their local governments, and it has worked its natural result of feebleness and disintegration.

It is quite possible that some of my readers will protest against such a presentation of the case, resting their criticism upon the well-known tendency toward an increase in legislation in these latter days. This is what Mr. Spencer complains of, and it is also the occasion of that remark, so often heard, that sessions of legislatures are far too frequents. But there are two thoughts which suggest themselves in reply to such criticism:

First, The multiplication of laws, so far from being out of harmony with the theory of individualism as understood by democratic peoples, is a natural consequence of its seneral acceptance. A philosophy of social relations, like that of laissez faire, which tends to efface the sharp distinction between public and private interests, must linevitably result in an extension of pernicious legislation; for, under the direction of such a philosophy, men feel themselves warranted in using public machinery for private ends. This conclusion is fully sustained by considering the nature of the hills which gain the approval of our modern lawmaking bodies.

Second. It is believed that the above criticism mistakes the true center of public power. The importance of government or the extent of the functions assigned to it

The causes of State and municipal corruption are said to in-

human relations, confines within itself all individual growth and action. The activity which it displays is either public or private; that is to say, the activity of the state, embracing all governmental functions, or that of individuals or corporations, which is undertaken for private ends. But the important point that should be noticed in this connection is that these departments of social activity are constantly acting and reacting each upon the other. The line which separates them is clearly defined so far as the principles are concerned to which each must conform, for the one is subject to the rule of public and the other to the rule of private financiering; but the growth of society demands continuous medification in the assignment of specific functions. Recognizing, then, the mutual relations that exist between public and private duties, it is easy to understand why failure to achieve the best results in one department of activity must injuriously affect the other; and the pertinent question for one who would direct by his thought the development of society is, Under what conditions may the best results be expected from both departments of activity?

This question has already been answered. The best results may be expected when the duties assigned to public officials and the functions performed by private individuals are so correlated that the inducements offered are of about the same strength in both domains of activity. It is, of course, necessary, in applying this rule, to take into consideration other than merely pecuniary motives by which men are led to act. Considerations of social distinction, the desire to exercise such powers as one may possess, the pleasure of filling well a responsible position—indeed, all the varied demands of human nature must be admitted into the account.

The neglect to observe these fundamental conditions, the depreciation of the public functionary, and the demoralization of the invader of public functions are treated thus:

the invader of public functionary, and the demoralization of the invader of public functions are treated thus:

In our own country, on the other hand, one observes that society has developed in the opposite direction. The great prizes here offered are in the line of individual initiative. Our civil, State, and municipal service is so poor that an official has no social position, while a business man who accumulates money is generally regarded with deference. The salary paid by the State is nothing when compared with what men of ordinary talent may secure, either as profit, if engaged in business on their own account, or as salary if working for a private employer. It is therefore no occasion for surprise to learn that in this country we have very perfect sewing machines but poorly administered cities.

One can not fully appreciate this view of the case without calling to mind the possibilities of acquiring wealth in a rapidly developing industrial society. The atmosphere of such a society is intensely commercial, and not only do men of ability and energy refuse to consider a public position as desirable to themselves, but they regard with supercilious condescension one who is willing to assume public office in a municipality. And it may be added in this connection, as bearing on the question of municipal corruption, that the moral judgments of a public officer are very much like those of his neighbors who elect him, and the sentiments which control in the transactions of their daily business will probably give color to his administration. But the ordinary business life of the nineteenth century is such as to render men familiar with methods of speculation and to conform their ethical principles to the law of supply and demand. The spirit of speculation partakes in character of the spirit of gambling. It judges all businesses undertaken on the basis of their pecuniary success, and has little care for the equivalent given for what is gained. A fine sense of what is just can not exist where it prevails, nor can a

guage:

"The man of the present day is actuated now by one influence, now by the other, and has two distinct codes of outward conduct. Moral philosophy, indeed, teaches that his fundamental character is one and unchanging; but as there is one code of practical conduct for war and another for peace, so there is one for mercantile life and a different one for the family, the social circle, and the church. The man of business is constantly passing from the jurisdiction of one code to that of another.

"It is a common remark that business practices are not what they should be, and that a sensitive conscience should be left at home when its possessor goes to the office or the shop. We helplessly deprecate this fact; we lament the forms of business depravity that come to our notice, but attack them with little confidence. We are appalled by the great fact of moral dualism in which we live and are inclined to resign ourselves to the necessity of a twofold life."

And what of the effect of these perversions upon the ambitions of public men?

The causes of State and municipal corruption are said to inhere in such a situation:

In all matters where any possible question arises between Government and corporations the advocates of governmental control are obliged to towns are managed by private companies. It is the exception for gas to be supplied through public works, while there is no city, except now Cleveland and San Francisco, so far as I am aware, that maintains whole line of policy is the morcelization of government among separate and independent boards rather than the concentration of power in the hands of responsible officials in such a manner as to make it worth their while to attend to business. Under the sway of this policy municipal government has become corrupt, while in many cases corrupted and such a manner as to make it worther their while to attend to business. Under the sway of this policy municipal government has become corrupt, while in many cases corrupted and the corruption of the control of the menacing power of corporations and the rise of municipal government provided in the regulating influence of competition on the one hand and the too great suspicion with which governmental action is viewed on the other. It is impossible, as society is at present or summitted to the control of the development of the control of the menacing power of corporations and the rise of municipal corruption. They are both an inevitable result of the too great confidence that has been placed in the regulating influence of competition on the one hand and the too great suspicion with which governmental action is viewed on the other. It is impossible, as society is at present of the menacing power of corporations and the rise of municipal corruption. They are both an inevitable result of the too great confidence that has been placed in the regulating induser of competition of the menacing power of corporations and the too great suspicion with which governmental action is viewed the control of the development of the development of the development of the p

faculties; he also learns through the sinister suggestions of those whose personal interests he does not forward that his tenure of office is insecure; and, last of all, he finds that his salary does not suffice to keep his family respectably in the social circles in which they wish to move and that the gratitude of republics does not extend to provision for their servants against sickness and old age. Repeating again the assumption that our candidate is honest—at least within the meaning of the law—and that he is conscious of ordinary business capacity, we are warranted in concluding that the career of an official will not harmonize with his tastes. He will, upon the first opportunity, retire to private life, which presents larger scope for efficient activity and where the prizes to be gained are much greater.

Such are the conditions of a public career in most of the municipalities of the United States, and observed results are altogether what might have been expected. The incumbents of local office are usually men of indifferent ability. If not actually depraved, they are at least colorless in character. Among "city fathers" of this sort there appears from time to time the shrewd yet unscrupulous man who for personal aggrandizement assumes complete control over public affairs. This is the explanation of "rings" and "jobs." Public corruption therefore is no accident. It is the necessary result of the idea that the best thing to do with a public official is to lay him on the shelf out of harm's way.

Is it not, then, correct to say that the theory of noninterference,

thing to do with a public official is to lay fills on the sach of charm's way.

Is it not, then, correct to say that the theory of noninterference, which regards individual enterprise as the only proper depository of industrial power, and which relies wholly on competitive action as the guaranty of fair treatment in business affairs, is an obstacle to the restoration of harmony in social relations? Under the influence of the sentiment engendered by this theory we see corporations to have attained power at the expense of the importance of the States; we see the symmetry of government to have been destroyed; we see the line between public and private interests to have been practically effaced; and, as a natural consequence, the machinery of government easily perverted from its high purpose to serve the private ends of corporations and individuals. tions and individuals.

A concrete case of what Prof. Adams has in mind may be given. It relates to the telephone in San Francisco. The Pacific States Co., a Bell company, and a rival, the Home Telephone Co., were engaged in a struggle for possession of the field, with stupendous bribes as their weapons. The Schmitz-Reuf combination was in political control. The following narrative is from McClure's Magazine for February, 1911, in the form of a dialogue between "Boss" Reuf and Detective Burns:

"What next?" said I [Detective Burns], when the gas case was

"What next?" said I [Detective Burns], when the gas case was finished.

"The Home Telephone Co.—\$120,000. Sixty thousand went to the board of supervisors, through Gallagher; the other sixty thousand was divided between Schmitz and me."

("Thirty thousand apiece for them," said Burns, interrupting his story, "while each of the 18 supervisors, poor devlis, who were necessary to grant the franchise and who served as a cloak, were glad to get away with their little three thousand apiece.")

There were absolutely no bounds to Reuf's greed. He is the only boss I've ever heard of who never showed an atom of loyalty or gratitude to those who served him. He admitted that, although for years he had received from the Pacific States Telephone Co., \$1,000 a month, when Detweller, of Toledo, president of the Home Telephone Co., outbid the Pacific States, he went over straightway. And in connection with the transaction Reuf told this story;

"The Pacific States, he went over straightway. And in connection with the transaction Reuf told this story;

"The Pacific States Corporation," said he, "attempted to do some individual bribing of the supervisors on their own account. They thought they could beat me," and Ruef swelled out his chest. "Their local agent, Theodore V. Halsey, had made an arrangement with Boxton, of the board, who had promised to procure the pledges of 10 of the supervisors to favor the old corporation—a majority of the 18, you see—when I was informed by some of the board of what was going on. They came to ask me what to do. 'Sure; take the money from the Pacific States people,' I advised. 'All you can get. And then give them the double-cross.' So Halsey started his little game," said Ruef. "Oh, he thought he was laying me out. He engaged a room in the Mills Building; Krause, his secretary, who has since committed suicide in Europe, ushered the supervisors into the inner office, where Halsey handed each a package containing from twenty-five hundred to five thousand dollars. Halsey told them that the balance, ma

The San Francisco conditions have not been repeated in every city, at least not to the same degree, although they are implicit wherever the temptation and prize are equal and the municipal government has been weakened by the policy

of denying it its powers.

The Federal administration has been excluded-very justly, I think-from the above desertation on the causes and character of municipal weakness and inefficiency. Its functions have not been so badly neglected, and agencies like the Interstate Commerce Commission, the Agricultural Department, the Army and Navy, and the postal system have made it adminis-tratively reliable and respected. This fact is recognized by tratively reliable and respected. Prof. Adams. He says:

So far as the Federal Government is concerned, the extension of its powers thus far does not seem to be open to severe criticism, and

we are only solicitous as to what this tendency will bring about in the future. The present condition of affairs is easily stated. Men are now coming to realize the disastrous consequences likely to emerge from the continued sway of irresponsible corporate power. They see that an extension of governmental agency can alone retain for them the fruits of an advanced industrial civilization; and, inasmuch as the States are incompetent to deal with such difficult questions, they turn of necessity to the Federal Government.

Municipal phone administration: There has been some suggestion that the interurban and long-distance lines be run by the post, but the local exchanges be left to municipal administration. The above reflections on the present municipal situation with respect to administrative deficiencies seem to preclude that course. But even should the administrative capacity of our municipalities be restored, as foreign and many home examples indicate they shall be, yet there are grave institutional and objective reasons why the wire service should be completely postalized instead of, as suggested, being partly municipalized. It is the same thing as proposing that the mail trains and the rural delivery should be in the hands of the Government, but that the local post office should be run by the mayor. The examples of all the world are against such a method.

Some of the reasons for this postal solidarity in phone administration in countries like England, Switzerland, and Germany, possessing full-fledged local governing institutions like our own, but exempt from the inefficiency charges we must bear here, are not unlikely the following:

First. Wastes of personnel service in maintaining and management of distinct institutions. Thus during breakdowns of the wires in storms local and long-distance men can be concentrated for immediate relief, if there be but one management.

Second. The postal institution articulates with and embraces all varieties of the population, whether massed in cities, towns, villages, or individual homes. The municipal institution, on the other hand, is limited to a corporate area, while many towns and villages have no administrative machinery and no means of supplying it, whatever the cost.

Third. The postal system by virtue of its universality is able to standardize its rates and service by employing the principle of averages, and thus is able to universalize the service, extending it to points which, while generally necessary, might be locally unprofitable.

It is not perceived what municipal administration of the exchanges could offer in the way of advantages over the postal method, and no such arguments have been presented. Its advocates are probably wholly influenced by the doctrinal view which deprecates all appreciation of Federal activity where local action is possible. But the makers of the Constitution, even in their day, strongly impressed as they were with a preference for local authority, plainly distinguished the function of communication as dominatingly Federal in its character and so treated it in their grant of powers. There does not seem to be any claim that the Federal discharge of the full postal function of communication would throw the Federal and the State and local governments out of equilibrium. The amount of Federal expenditures is probably much exceeded by the combined municipal, county, and State expenditures. In 1912, the latest data, the Federal expenditures were less than 40 per cent of the whole public expenditures, a disparity which is likely to have continuous growth as the local governments take up the much-needed road improvements of the future—a field they might occupy to much greater advantage and a field likely to fully tax their financial resources.

Mr. Chairman, I am only too conscious of the extreme advantage I have taken of the courtesy of the House, and now wish to conclude with a hurried summary of the leading features of the discussion. To be brief, the investigation discloses that our telegraphic rates are the highest among 20 countries, running from 25 cents to \$1, while in other countries they average about 12 cents, or a cent a word. The result of these abnormal rates is that we rank but ninth as telegraph users, with one and one-tenth telegrams per person to our credit per annum, while in New Zealand, with the 12-cent rate and our price and wage levels, the use of the telegraph reaches as high as eight telegrams per person.

Against these conditions it appears that our postal rates average lower than other countries, and that the number of letters here—101 per person—is the highest in the world.

The telegraph companies seem to be lacking in institutional economy or efficiency. The operation of sending a telegram is loaded down with 74 incidental services and processes, not less than 50 of which would be replaced by affixing the postage stamp. Notwithstanding they have the greatest business per office, yet their daily product is less than 10 telegrams per employee, even less than that of New Zealand, which has less than one-third the business per telegraph office. The American inefficiency is further exaggerated by the duplication of telegraph offices in all the important towns and cities, and the denial of the service at many thousand necessary points.

denial of the service at many thousand necessary points.

A striking feature is the discovery that the telegraph service is a relatively declining institution, and that it would be unwise now to postalize it alone and as a single service. For 10 years in England the number of telegrams has been actually stationary. To take over the telegraph lines alone and operate them merely as telegraph lines might result in postal bankruptcy. Separated from the telephone, they are not now surely self-sustaining as mere telegraphs. Because you would rather talk than write to a person, you use the telephone rather than the telegram, if the rates permit. In Germany, where both telegraph and telephone rates are normal, there are five times as many toll or long-distance conversations as there are telegrams, and even in the United States from two and one-half to three times as many. There would be no advantage in taking over the telegraph lines; the investigation makes this clear.

But our toll and long-distance rates compare with those of other countries even less favorably than do our telegraph rates. The average interurban receipt in Germany is but 4 cents; here it averages 20 cents. The long-distance rates here are made on a scale of 6 mills a mile per three-minute conversation, as against an average charge of about 7 mills a mile received by the railways for transporting a ton of freight. The average charge on the Continent for a 300-mile talk is 30 cents; here it is \$1.80, or six times as great. It is not unfair, or inaccurate, to say that the American interurban telephone rates are the scandal of public-service rates the world over. The American telephone monopoly takes the thirteenth place only among 17 countries with regard to the lowness of these rates.

With respect to local telephone exchange rates, we have three main divisions—the farmers' lines, which cost the average subscriber about a half cent a call; the independents, which cost a little over 1 cent a call, but usually with the half service permitted by telephone competition; and the local rates of the Bell monopoly, which average a little more than 2 (2.10) cents per call, or just twice the average charge in other countries. While our postal rates give us the first rank in lowness of charges, this company ranks but fourteenth among 16 countries with its local charges, and we are one of three countries where the charge per local call exceeds the letter-postage rate; the other 13 countries giving a much lower charge per phone call than their letter rates.

The subscribers' rates in American cities, compared with continental cities, are about three times as high. For example, New York, where 5,400 calls, about 15 per day, under a measured service tariff cost more than the four unlimited yearly rates of London, Paris, Berlin, and Stockholm together. For like services, Baltimore people pay more than the rates for London and Paris combined, and Washington pays as much as the five cities of Amsterdam, Rotterdam, Auckland, Tokyo, and Copenhagen combined. In postal-telephone countries the local toll fariffs tend to run about one-half the charge for a letter, while here it runs with the street car fare, and sometimes exceeds it, when it is three times the letter rate.

While competition does not supply a remedy because it divides the service and necessitates the payment for two phones, yet it throws an interesting side light on the tendency of a private monopoly to jack up the rates. Thus of 60 of the great American cities, 24 averaging 342,486 in population, pay an average annual phone rate of \$53 under competition; while the other 36 cities, averaging but 188,629 in population, without competition, pay an average rate of \$81. Since competition can only augment the total cost of operation it is apparent how private monopoly and high rates go hand in hand.

Telephone development has reached its substantial limits in

Telephone development has reached its substantial limits in the United States under private capital with the extension of the service to the very profitable office and well-to-do home traffic. To extend it to the homes of the masses, as the public roads and postal service now are extended, the postal agency is necessary. If the telephone lines are postalized, both the telephone and telegraph business can be done over them, as in other countries, where a telegram and a conversation go over the same wire at the same time. It will be unnecessary to take over the telegraph lines here (capitalized at \$240,000,000), as both kinds of communication can be handled on the telephone wires, which exceed the telegraph wires in mileage and geographical distribution.

The telegraph lines would have to be substantially reconstructed to add a telephone business to them, while the addition of the telegraph instruments to the telephone wires may be accomplished at a negligible total cost. This circumstance

shows the weakness of private monopoly. Instead of duplicating the telegraph network with a separate toll and long-distance system as the American Telephone & Telegraph Co. has done, the postal telegraph countries have made the one network serve for both functions, by articulating the telegraphic with the telephone exchanges.

The cost of acquiring the telephone networks is indicated as something less than \$900,000,000, for which it is proposed to issue 3 per cent bonds, payable in 50 years. It is calculated that the postal system by superimposing the telegraph service on the telephone lines at half present telegraph rates may net some fifty millions annually from that traffic alone, which with the present profits of the telephones, and after the deduction of interest on the bonds and depreciation, would supply the department with a large surplus for extensions, and so forth.

The telephone rates should be worked out experimentally by the Post Office Department in a few years, with the assured prospect of ultimately securing telephone and telegraph rates, like our letter rates, as low as those abroad. That is, rates about half those now obtaining for the telegraph and local telephone services, and about one-fourth those charged for the long-distance telephone conversation. Our other postal rates, including the highly profitable parcel-post rates, have been made as low as in other countries, and the indications are that like results can be obtained for the wire service when postalized.

The suggestion that the interurban and long-distance lines alone be postalized and the telephone exchanges be left to the municipalities is found to be unsound. The postal system can finance and operate the exchanges the more economically and efficiently, and the divorcement of the exchanges from the interurban and long-distance lines would necessitate the maintenance of two personnels at substantially increased cost. It would be like divorcing the local post offices from the Post Office Department and turning them over to the mayors to run. The towns and cities have enough to do if they give proper attention to those utilities which are distinctly local. Moreover, the farms and countryside villages which are without local administrative governments would not be reached by a municipal service.

The financing of the acquisition and the valuations of the properties would cover several years; and while the properties should be taken at one time with their personnel and systematized, the payments for them would have to await the final valuations by the Interstate Commerce Commission, the Treasurer paying the owners 4 per cent interest quarterly during the interim. The financing would thus be decentralized into as many payments as there are distinct legal ownerships. It is not thought this financing would involve difficulties seriously greater than those of the Panama Canal. Switzerland has recently successfully financed the purchase of her railways, amounting to about \$50 per capita, while the telephone acquisition here would be less than \$10.

With respect to management, it is found that our postal system is highly efficient. It ranks next to the highest-Belgiumamong 16 countries, and perhaps is actually in advance of her. Our product per average postal employee in 1912 was over 60,000 mail pieces per man, as compared with Germany at 37,000 and France at 34,000, countries which rank eighth and tenth, respectively, in postal efficiency. In the matter of telegrams handled per employee our companies are outranked by New Zealand, notwithstanding the concentration of the telegraph business in a relatively few offices here. The Bell telephone monopoly ranks but ninth in operative efficiency among 16 countries. In 1912 it handled 58,000 telephone calls per employee, as against 149,000 per employee in Norway. This is mainly because its abnormal rates condemn the operative plant to comparative idleness-its interurban lines show but 8 cent of utilization as against 19 per cent in Germany—while the number of operators engaged in maintenance and other services remain the same, whether the phones are actively or but sparingly used. The postal system with normal rates might easily double the Bell efficiency in number of calls per employee, and the independents do better it by nearly 50 per cent on account of their lower rates and consequent higher utilization of plant and personnel. With the number of calls thus doubled, the expense per call would be practically reduced one-half, and it may thus be seen what the postal motive could accomplish in rate reduction without substantial increase of expense. This illustrates the natural infirmities of private monopoly, which is without a motive to double the service even where expenses and profits will remain the same.

Such, sir, are the results of a business and economical survey of the field of communication by electricity. In the domain of public morals the lesson is not different. The perversion of the laws of public and private financiering, by which public governments have been disinherited of their normal functions, has led to such corruption and demoralization—of the function-aries giving and the alien claimants receiving the despoiled inheritance—that cities like New York with its street railways, Philadelphia with its gas works, and San Francisco with its telephones, have shamed the scions of Roman corruption in their most dishonorable days. The policy of weakening these

governments by alienating their functions to ambitious private finance has made them despised and attractive only to such weak political creatures as see opportunity for individual enrichment. Compare them, sir, with the proud cities of other lands, undespolled of their rightful attributes of public services and whose public position gives become prestign and respect ice and where public position gives honor, prestige, and respect.

Northwest. Shepherd Street, Avenue of the Presidents to Piney Branch Road, grade and improve, \$5,500;

Northwest. Davenport Street, Wisconsin Avenue to Howard Street, grade and improve, \$5,000;

In all, \$85,500.

Mr. Chairman, I offer the following committee

Mr. SISSON. Mr. Chairman, I offer the following committee

amendment again.

The CHAIRMAN. The gentleman from Mississippi offers an amendment, which the Clerk will report.
The Clerk read as follows:

On page 22, after line 24, insert:
"Hereafter the street designated as 'The Avenue of the Presidents' shall be known and designated as 'Sixteenth Street,' in accordance with the original plans of the city of Washington."

Day.

The CHAIRMAN. The question is on agreeing to the amend-

The amendment was agreed to.

Mr. SMITH of Maryland. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The gentleman from Maryland offers au amendment, which the Clerk will report.

The Clerk read as follows:

Amend, on page 22, after line 6, by adding the following: "Northeast, Hunt Place, Deane Avenue, and Grant Street, fr nesota Avenue to Division Avenue, grade and improve, \$14,400.

The CHAIRMAN. The question is on agreeing to the amendment.

Mr. MANN. Mr. Chairman, I reserve a point of order on that. Mr. PAGE of North Carolina. If the gentleman is going to make a point of order-

Mr. MANN. I reserve a point of order. I could not understand what the amendment was. May we have it reported again?

The CHAIRMAN. Without objection, the Clerk will again report the amendment.

The amendment was again reported.

Mr. MANN. I shall not make a point of order against it. Mr. PAGE of North Carolina. Mr. Chairman, I am constrained to make the point of order that the amendment comes too late. The paragraph has been completed, and the total has been read.

The CHAIRMAN. The Chair would call the gentleman's attention to the rule which requires the reading of the paragraph to be concluded.

Mr. PAGE of North Carolina. The item at the end of the

That is the point I made,

Mr. MANN. Mr. Chairman, I do not think the point of order is good, for two reasons. The first reason is it is not within the power of the committee to strike out some other item. And the second is, the law is that where the totals are not the same as some of the items, the items control, and not the total. And I presume that would apply in this case.

Mr. PAGE of North Carolina. I desire, also, to call the attention of the Chair to the fact that other business has intervened since the reading of the last item relating to streets. A committee amendment was offered by the gentleman from Mississippi [Mr. Sisson] changing the name of a street in the city of Washington.

Mr. MANN. It came at the end of the street business

Mr. PAGE of North Carolina. It was reported after the paragraph was read.

Mr. MANN. The amendment was reported to come in on

page 22, after line-

Mr. PAGE of North Carolina. The gentleman is mistaken. Mr. MANN. How does the amendment read?

Mr. PAGE of North Carolina. The one that was adopted?

The CHAIRMAN. The Clerk will read. The Clerk read as follows:

On page 22, after line 24, insert: "Hereafter the street designated"—

And so forth.

Mr. MANN. Then read the amendment that is pending.

The Clerk read as follows:

On page 22, after line 6, add the following:

Mr. MANN. Of course, we had passed that place.

Mr. SISSON. The gentleman from Illinois, of course, understands after we had read the total of \$85,500, I then offered an amendment in reference to the change of the name of a street. Mr. MANN. Of course, we had passed that part of the bill.

The amendment is now too late.

Mr. SISSON. The amendment has passed that line and

comes too late.

Mr. PAGE of North Carolina. The thing that I was calling to the attention of the Chair was that the committee amendment was offered at the end of line 23, on page 22.

Mr. MANN. Well, we passed over line 6 some time ago. We

can not go back to it except by unanimous consent.

The CHAIRMAN. The Chair finds on examination that each of these two lines here, containing separate items, constitutes a paragraph within the meaning of the rule, and the point of

order would be well taken. The Clerk will read.

Mr. FOWLER. A parliamentary inquiry, Mr. Chairman.

The CHAIRMAN. The gentleman will state it.

Mr. FOWLER. Where a paragraph consisting of many items and punctuated as this paragraph is, I ask the Chair, as a we reach the conclusion? That would be on page 33, after the words "abutment, \$30,500."

The CHAIRMAN. The Chair will state to the gentleman that that is an entirely independent proposition, and it carries its

own appropriation.

Mr. FOWLER. That would be after the words "in all, \$35,500." That is the conclusion of the whole paragraph, Mr. Chairman, as I understand it.

Mr. PAGE of North Carolina. So it is; but if the gentleman

will permit-

Mr. MANN. Mr. Chairman, it has always been held that each one of these paragraphs is a paragraph regardless of the

Mr. FOWLER. Mr. Chairman, just the reverse was held during the entire Sixty-second Congress, and I challenge the gentleman to find one instance in which the ruling of the Chair was

to the contrary.

Mr. MANN. Well, Mr. Chairman, I could find many instances where the practice was to the contrary. I have never heard of anyone raising the question, I think, except possibly in connection with the agricultural appropriation bill, where a great many items concerning forest reserves appeared. They are all treated as separate paragraphs, and they are separate paragraphs. That is a matter of grammatical construction, and I appeal to my colleague that he must know, as a matter of construction, that each of these is a separate paragraph.

Mr. FOWLER. Yes; but, Mr. Chairman, where an appropriation seeks to provide for several items in which they are placed as only fragments of a paragraph it has been the unbroken custom, or was during the Sixty-second Congress, to hold that it took all of those fragments to constitute the paragraph, and repeated rulings were had during the Sixty-second Congress to

that effect.

The CHAIRMAN. The Chair is informed that on a section of the bill containing a number of independent items, each giving a separate and distinct subject matter, amendments are in order at the conclusion of the reading of each separate item, such as we find on page 23, and in accordance with that information the Chair sustains the point of order at present.

Mr. MANN. The Chair is right.

Mr. FOWLER. The Chair is wrong.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

The cierk read as follows:

The authority given the Commissioners of the District of Columbia in the act making appropriations for the expenses of the District of Columbia approved March 2, 1907, to make such changes in the lines of the curb of Pennsylvania Avenue and its intersecting streets in connection with their resurfacing as they may consider necessary and advisable is made applicable to such other streets and avenues as may be improved under appropriations contained in this act: Provided, That no such change shall be made unless there shall result therefrom a decrease in the cost of the improvement.

Mr. JOHNSON of Kentucky. Mr. Chairman, I reserve a

point of order on that.

The CHAIRMAN. The gentleman from Kentucky reserves. a point of order.

Mr. JOHNSON of Kentucky. I would like to inquire of the gentleman from North Carolina as to whether or not this provision would authorize the purchase of new curbing or stones, as it did when the work was done on Pennsylvania Avenue?

I am advised-I do not know whether correctly so or notthat under a provision like this real good curbing was taken up and thrown away and curbing from somewhere else brought in. The gentleman from Georgia [Mr. Howard] lodged some complaint with the Committee on the District of Columbia re-lating to it, alleging that there was discrimination against one concern offering the stone. As the matter has come up, I would like to know what expense can be incurred under this item.

Mr. PAGE of North Carolina. My understanding of the expense that may be incurred under this item, I will say to the gentleman, is that authority was placed with the commissioners to narrow a street at certain points, as originally given on Pennsylvania Avenue, the purpose and necessity of it being at certain points in the city to protect the line of shade trees by the curb where the present line could not do so. But I can not conceive any authority for the purchase of curbing.

Mr. JOHNSON of Kentucky. I do not recall the exact wording of the District appropriation bill last year, as to that part of it, but the curbing was taken up there last year and put back in the same place, but with new granite. The only damage done to the trees was done by the steam engine which hoisted out the blocks that were there, and putting back others, by burning the trees. I think the blocks were put back in the

same place.

Mr. PAGE of North Carolina. I can not throw any light on that; but I will say to the gentleman that this provision is in the same language as the last appropriation bill, and the commissioners stated, in connection with it, that they desired it chiefly to protect the shade trees in the work of making the street grades conform one with another.

Mr. JOHNSON of Kentucky. The gentleman from North Carolina, then, interprets it that it provides only for straight-

ening?

Mr. PAGE of North Carolina. Yes. I call the gentleman's attention to the proviso in this paragraph. A limitation is placed there in this language:

That no such change shall be made unless there shall result there-from a decrease in the cost of the improvement.

Mr. JOHNSON of Kentucky. Very well, Mr. Chairman, I withdraw the point of order.

The CHAIRMAN. The gentleman from Kentucky withdraws

the point of order.

Mr. MONDELL. Mr. Chairman, I offer an amendment.
The CHAIRMAN. The gentleman from Wyoming offers an amendment which the Clerk will report.

Mr. MONDELL. It comes in at the end of line 5 on page 24. The Clerk read as follows:

Mr. MONDELL. It comes in at the end of line 5 on page 24. The Clerk read as follows:

Amend by adding at the end of line 5, page 24, the following:

"For constructing a suitable viaduct and bridge to carry Benning Road over the tracks of the Philadelphia, Baltimore & Washington Railroad Co., and of the Baltimore & Ohio Railroad Co., In accordance with plans approved by the Commissioners of the District of Columbia, to be available until expended, \$110,000.

"And the commissioners are hereby authorized to make the necessary expenditures for the construction of said viaduct and bridge and approaches under the like conditions prescribed for the expenditure of the appropriation for a subway and bridge at Cedar Street, contained in the act of May 18, 1910, making appropriations for the expenses of the District of Columbia for the fiscal year 1911: Provided, That the cost of constructing said viaduct and bridge within the limits of the rights of way of said Philadelphia, Baltimore & Washington Railroad Co. and the Baltimore & Ohio Railroad Co. shall be borne and paid, half by said railroad companies in proportion to the widths of their respective rights of way and half by the United States and the District of Columbia, as provided in section 10 of an act entitled 'An act to provide for a union railroad station in the District of Columbia, and for other purposes,' approved February 28, 1903, and said sums shall be paid by said companies to the Treasurer of the United States, one half to the credit of the District of Columbia and the other half to the credit of the United States, and the same shall be valid and subsisting liens against the franchises and property of said Philadelphia, Baltimore & Washington Railroad Co., and the Baltimore & Ohio Railroad Co., respectively, and shall be a legal indebtedness of said companies in favor of the District of Columbia, and the said lien or liens may be enforced in the States as aforesaid, and the said lien or liens may be enforced in the

name of the District of Columbia by bill in equity brought by the commissioners of said District in the supreme court of said District, or by any other lawful proceedings against the said Philadelphia, Baltimore & Washington Railroad Co. or said Baltimore & Ohio Railroad Co., or both, and any relocation in the line or change in the grade of the tracks of the Washington Railway & Electric Co. necessary to permit the completion in accordance with approved plans of the viaduct and bridge and approaches herein provided for shall be made by and at the cost of said railway company, and in the event of said railway company falling or refusing to do such work the same shall be done by the Commissioners of the District of Columbia, the cost to be paid from the appropriation for said bridge and viaduct and collected from said street railway company in the manner provided for in section 3 of 'An act providing a permanent form of government for the District of Columbia,' approved June 11, 1878, and paid into the Treasury, one-half to the credit of the United States and one-half to the credit of the District of Columbia."

Mr. PAGE of North Carolina Mr. Chairman I make a point

Mr. PAGE of North Carolina. Mr. Chairman, I make a point of order against the amendment.

Mr. MONDELL. Will the gentleman withhold his point of

Mr. PAGE of North Carolina. I want to be courteous to the How much time does the gentleman desire?

Mr. MONDELL. About two minutes.

Mr. PAGE of North Carolina. I will withhold the point of order for two minutes.

Mr. MONDELL. Mr. Chairman, I think the item is subject to a point of order, although there is some question in regard to that. However, I desire to call to the attention of the com-mittee this needed improvement. It is one of the improvements estimated for by the Commissioners of the District of Columbia.

It is very important that these five tracks of the Pennsylvania Railroad and the Baltimore & Ohio Railroad be covered by a viaduct, as the crossing is quite dangerous in its present shape. It should be remarked that this Benning Road is the principal highway to the District of Columbia from a very large section of Maryland. The State of Maryland has built a fine concrete highway extending, I think, some 60 or 70 miles into Maryland, which connects with Benning Road. In fact, there are two fine highways in Maryland that are reached from Benning Road. These fine Maryland highways are entitled to consideration by the authorities of the District of Columbia.

It is not only in the interest of the people of the District that this improvement should be made, and we not only owe it to them to make them, but we owe it to the progressive spirit that has been shown by the State of Maryland in the building of splendid highways to connect with this city. We should not require the people who travel over those highways to cross over five tracks of these two railroads in entering the District of Columbia.

Mr. PAGE of North Carolina. Mr. Chairman, in reply to what the gentleman from Wyoming [Mr. MONDELL] has said, I shall not undertake to argue the point of order. The gentleman did not argue it, but conceded it, as I understand.

This item has been included in the estimates forwarded to Congress during the last three Congresses, if not more. It proposes to construct a viaduct over these railroad tracks, and in each instance it has been proposed that the railway company shall pay only half of the cost of the bridge over their right of way. In the first instance, this has no place upon this bill. is a matter of legislation that ought to go to the legislative committee of the District, and upon that I have based my point of order.

But if the legislation was to come upon this floor, as one Member of Congress I should insist that the railroad companies should bear the whole cost of the work, where the construction of the viaduct means vastly more than the mere construction across the right of way.

In insist on my point of order.

Mr. MONDELL. Will the gentleman yield for just one state-

Mr. PAGE of North Carolina. Certainly.

Mr. MONDELL. Does not the statement just made by the gentleman emphasize the importance of having the committee which has jurisdiction over these matters take them up and bring in legislation that will be fair, equitable, and just, so that the House can pass upon it?

Mr. PAGE of North Carolina. I will say to the gentleman, that I am not a member of the Committee on the District of Columbia, and it is for them to decide what they will consider and what they will report.

Mr. MONDELL. The statement made by the gentleman from North Carolina emphasizes the importance of this improvement which the District needs and is asking for, but which the Committee on the District of Columbia, which has jurisdiction of it, refuses to give any attention to. The crossing is dangerous and should be made safe. I hope the District Committee will give the subject favorable consideration.

The CHAIRMAN. The Chair sustains the point of order. The Clerk will read.

The Clerk read as follows:

Highway Bridge across Potomac River: Draw operators—2 at \$1,020 cach, 2 at \$720 each; 4 watchmen, at \$600 each; labor, \$1,500; lighting, power, and miscellaneous supplies, and expenses of every kind necessarily incident to the operation and maintenance of the bridge and approaches, \$8,620; in all, \$16,000.

Mr. FOWLER. Mr. Chairman, I reserve a point of order against the paragraph.

The CHAIRMAN. The gentleman from Illinois reserves a point of order.

Mr. MONDELL. Mr. Chairman, I offer the following amend-

The CHAIRMAN. The gentleman from Wyoming offers an amendment which the Clerk will report.

The Clerk read as follows:

On page 25, after line 2, insert: "For surfacing with asphalt the roadway of approaches on both sides of the Highway Bridge, \$30,000."

Mr. PAGE of North Carolina. I reserve a point of order against the amendment.

Mr. FOWLER. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman from Illinois will state his point of order.

Mr. FOWLER. When a point of order is made against a paragraph, can any further proceedings be had with reference to the paragraph in the way of amendment until the point of order is settled?

The CHAIRMAN. There can not. Does the gentleman from

Illinois make his point of order?

Mr. FOWLER. The question I desire to ask of the gentleman in charge of the bill is this: On page 24, line 23, the bill provides for two drawbridge operators at \$1,020 and one at \$720. I want to ask the gentleman why there should be an increase of one at a salary of \$720?

Mr. PAGE of North Carolina. I think I can make an explanation that will be satisfactory to the gentleman from Illinois; at any rate, it was satisfactory to the subcommittee. The testimony before the committee showed that these men were required to work, on account of the lack of a sufficient number, 12 hours a day, Sundays included. If we gave them another man, it would not only shorten the hours but it would give them a little leisure on Sunday.

Mr. FOWLER. Would it give each a Sunday alternating? Mr. PAGE of North Carolina. That is the understanding

of the committee.

Mr. FOWLER. Was that the prime object in making this addition to the appropriation? Mr. PAGE of North Carolina. I do not know that it was the

prime object, but it was one of the two. Mr. FOWLER. The other was the shortening of hours?

Mr. PAGE of North Carolina. And the other was giving these men some relief on Sunday.

Mr. FOWLER. That is a very worthy object, and I with-

draw the point of order, Mr. Chairman.

Mr. PAGE of North Carolina. Mr. Chairman, I withdraw the point of order against the amendment, because I am willing to concede that it is not subject to a point of order.

Mr. MONDELL. Mr. Chairman, I do not desire to detain the House; the only desire I have is to bring this matter before the committee. This proposes to repave the approaches on each side of the Highway Bridge, which the commissioners say are very badly worn and need improvement. I hope the committee will approve the amendment.

The CHAIRMAN (Mr. BEALL of Texas). The question is on the amendment offered by the gentleman from Wyoming.

The question was taken; and on a division (demanded by Mr. Page of North Carolina) there were-yeas 10, nays 15.

So the amendment was lost, The Clerk read as follows:

For completion of the construction of a bridge across Rock Creek on the lines of Pennsylvania Avenue, in accordance with plans approved by the Commissioners of the District of Columbia, \$135,000.

Mr. FOWLER. Mr. Chairman, I caught from the reading of the Clerk that the appropriation was \$125,000. I may have been mistaken, but I desire to know whether it is \$135,000 or

The CLERK. One hundred and thirty-five thousand dollars.

The Clerk read as follows:

Rock Creek main interceptor: For continuing construction of the Rock Creek main interceptor from P Street to Military Road, \$40,000.

Mr. REED. Mr. Chairman, I move to strike out the last word. Mr. Chairman, I received a communication recently from a man in my district who subscribes himself as one of my constituents, and he wishes to send a protest, which I desire to

have printed in the RECORD. I asked unanimous consent this morning for the purpose of extending my remarks in the Record and publishing this letter, but objection was made. I should be very glad to print it in the Record now, without reading, if I can have consent, and if not I will read it in my own time.

Mr. MANN. Mr. Chairman, I make the point of order that the gentleman is not talking to the question before the House. If the gentleman wishes to print a short letter in the RECORD, I have no objection. The gentleman can not get around his unanimous-consent proposition by taking the floor in the fiveminute debate.

Mr. REED. The gentleman from Illinois objected to my unanimous-consent request this morning, and I hope he will withdraw it.

Mr. MANN. I objected because I had no idea what the gentleman wanted to put in the RECORD, whether it was a book or a set of books or a short article.

Mr. REED. The gentleman knew that it was not a set of ooks. I made my position plain by stating to him on the books. floor of the House

Mr. MANN. I beg the gentleman's pardon, but he did not make himself clear, because the gentleman was interrupted by somebody.

Mr. REED. This is a simple letter that I wish to put in the RECORD.

Mr. MANN. I have no objection at all.

Mr. REED. I thought perhaps the gentleman did not understand it.

Mr. MANN. I have no objection to the gentleman's inserting the letter in the RECORD.

The CHAIRMAN. The gentleman from New Hampshire asks unanimous consent to print in the RECORD a letter from one of his constituents. Is there objection?

There was no objection. The letter is as follows:

There was no objection.
The letter is as follows:

As one of your constituents, I wish to send you a protest. It is to this effect:
Some of the speeches made against the Democratic administration last week at the annual meeting of the Civil Service League, at Boston, were unfair and undiscriminating. Even the better of them failed to see the full significance of the iast election. Every speaker saw nothing more than a change of Republican officeholder; and from this point of view, every dismissal of Republican and the installation of Democrat was the sign of a bad and deteriorating Government.

Now, from a central point of view, was there no deeper significance than that? Just a Republican going out and a Democrat coming in? Nothing more?

In my own fight, I fought for not only a change of men, but for a change of principle; not only for a change of name, but a fresh polley and procedure.

In any own fight, I fought for not only a change of men, but for a change of principle; not only for a change of name, but a fresh polley and procedure.

In the constant of the contract of the contract of New Hampshire and elsewhere—meant anything, it expressed a protest against the wide gap Republican politics and procedure had made between all economic machinery and humanity. It meant a deep protest against the absolute rule of gold. It meant at least a fighting chance for the golden rule in economics, politics, and social ethics.

The election was a definite recognition that modern economic problems were the old problems of chattel slavery appearing in a new face. That the new freedom "implied as great an emancipation as any ever made, and that each one had the same right to himself and herself that any man or woman has."

If this fundamental shifting in national politics is true, what becomes of principles under absolute and rigid civil service? Has civil service the right to demand only correct penmanship, statistical accuracy, prompt office hours, etc."

The Hon, ELHBU Roor has a right to his view has well as machinery.

If he said thus as reported, could she have been saved by the most perfect civil service, all other things being as they were?

Was not Greece's decline caused by what once caused modern Denmark's decline? England's civil service is pretty good; but why is it not checking her decline? Will Germany's ultimate decline be checked by a simple rigid civil service?

In Rome the growth of militarism brought about a decay of what is fundamental to every nation—agriculture. Small holdings were swallowed up by large estates. These were worked with slave labor. The peasant farmers went to the cities. There was better pay, shorter hours, greater social appeal to him and his family. Commercial and industrial work was held in contempt by the Roman.

Will civil service remedy these modern conditions in our country, in Denmark, Germany, Belgium, etc.? Will an undisturbed diplomatic corps bring the remedy?

Denmark's wonderful upswing out of the depressing military and economic conditions came out of a line of men and principles that were radically opposed by the civil-service interests of Copenhagen. It came about by finding efficient men with an efficient principle and an efficient procedure.

And this is the combination we so sorely need to day—not, on the

And this is the combination we so sorely need to day—not on the low and paltry basis of spoils to the victor, but that the political and economic faith of just men may be made perfect.

Sincerely,

LEWIS H. BUCKSHORN.

CHICHESTER, N. H.

The Clerk read as follows:

Bathing beach: Superintendent, \$600; watchman, \$480; temporary services, supplies, and maintenance, \$2,250; for repairs to buildings, pools, and upkeep of grounds, \$1,500, to be immediately available; in all, \$4,830.

Mr. JOHNSON of Kentucky. Mr. Chairman, I make a point of order against the paragraph. I send to the desk volume 26 of the United States Statutes at Large and ask the Chair to refer to page 490, and there he will find that there is an authorization for the District of Columbia to maintain a bathing beach-

Mr. PAGE of North Carolina. Mr. Chairman, I concede the point of order.

The CHAIRMAN. The point of order is sustained.
Mr. MONDELL. Mr. Chairman, I offer the following amendment.

On page 27, after line 15, insert the following:

"For bathing beach on the shore of the tidal basin in Potomac Park, including buildings, wharves, boardwalks, cribs, floats, and appurtenances, \$66,000.

"For bathing beach on the shore of the Eastern Branch or Anacostia River, including buildings, wharves, boardwalks, cribs, floats, and appurtenances, \$21,000."

Mr. PAGE of North Carolina. Mr. Chairman, against that I

reserve a point of order.

Mr. MONDELL. Mr. Chairman, this amendment is subject to a point of order if the item in the bill that went out is subject to a point of order. I want to ask the gentleman from North Carolina a question in regard to that item that just went out on a point of order.

Is it not true that no expenditure can be made by the Commissioners of the District of Columbia except by authorization of Congress

Mr. PAGE of North Carolina. I think that is true.

Mr. MONDELL. And is it not also true that there is a general law which provides that so far as bathing beaches are

concerned the sum total shall be paid by the District?

Mr. PAGE of North Carolina. The gentleman is arguing to

Mr. PAGE of North Carolina. The gentleman is arguing to the gentleman from North Carolina a question relating directly to the point of order which he should argue to the Chair.

Mr. MONDELL. But the Chair decided the point of order so quickly that I did not have an opportunity to do so.

Mr. PAGE of North Carolina. The Chair decided it because I conceded the point of order. The whole matter was thrashed out over a year ago. All of the precedents were brought out and a decision was rendered. This item went out on a point of order, and I see no use of spending an hour of time in arguing the question again.

Mr. MONDELL. I do not care to take the time of the com-

Mr. MONDELL. I do not care to take the time of the committee to argue the matter, if that is the situation, but it seems to me very extraordinary, in view of the fact that this expenditure can only be made by an act of Congress, that the committee has no authority to authorize this expenditure. Otherwise how can the District maintain these bathing beaches?

Mr. SISSON. Mr. Chairman, I will state to the gentleman that the law provides that all expense of bathing beaches shall

be borne by the District of Columbia. This item is not under the half and half plan. When the item was up in Congress last year quite a good deal of time was consumed in discussion, and the Chair decided it was subject to a point of order, and

it went out of the bill.

Mr. MONDELL. In other words, that there can be no appropriation made for bathing beaches.

Mr. SISSON. Not under the present rules of the House by

an appropriation committee.

Mr. MANN, Mr. Chairman, will the gentleman from Wyoming yield?

Mr. MONDELL. Certainly.

Mr. MANN. Does the gentleman suppose that the Democratic Party would provide for bathing beaches if it could be avoided? Mr. PAGE of North Carolina. Oh, we do not need them as

much as other people do.

Mr. SISSON. I will say to the gentleman that the committee has provided them in the bill, but they have been stricken out

on a point of order. They think they do not need them, and hence Mr. MANN.

they never make use of it.

Mr. MONDELL. Mr. Chairman, I have never thought the great unwashed, however much they may be entitled to that designation, would object to other people taking a bath if they had the disposition to do so. This proposition is to allow the youths of the District to take a bath occasionally and to learn to swim. The items that I have offered are clearly subject to a point of order, because they are new items. They provide for new construction, and I offer this item simply to emphasize this fact, that here is another project—I think the ninth or tenth that I have offered, and I have 8 or 10 more-all of very great importance to the people of the District of Columbia, that ought to be passed upon, that ought to be provided for. In the meantime the committee that has charge of these matters, to wit, the District Committee, seems to spend all of its time in endeavoring to put further burdens upon the District, and when not doing that complaining of criticisms aimed at them by the newspapers and the citizens of the District on account of their neglect to do constructive things and an everlasting insistence on doing destructive things. We can not provide for these bathing beaches, the Chair holds, and the District Committee refuses to do so. I want to remind my friend from North Carolina that he stated here the other day that the subcommittee had approved of this item.

Mr. PAGE of North Carolina. As individuals, yes; but not a committee. I said the members of the subcommittee indias a committee. vidually approved this item. We did not as a subcommittee. No judgment was expressed, because we did not consider it as a committee. My statement was that the individual members of that committee favored the establishment of these bathing

beaches. I would like to be properly quoted.

Mr. MONDELL. The individual members approved it, and then Mr. Buttinsky, with a physician, with a large microscope, and a much larger imagination, came in with the discovery of bugs in the Potomac water, and that gave the individual members of the subcommittee an excuse for not doing that which their judgment approved.

PAGE of North Carolina. Will the gentleman pardon me? He tried to put that same word in my mouth the other

-a reason, not an excuse.

Mr. MONDELL. Really, does the gentleman mean to say that that was a reason?

Mr. PAGE of North Carolina. I do not hesitate to say that so far as this gentleman is concerned that was the reason.

Mr. MONDELL. Then there is another matter for the District Committee to consider. Will they consider it?

The CHAIRMAN. The time of the gentleman from Wyoming

has expired. Does the gentleman from North Carolina make the point of order? Mr. PAGE of North Carolina. Mr. Chairman, I make the

point of order.

The CHAIRMAN. The point of order is sustained. The Clerk read as follows:

For the purchase and installation of a new 25-ton railroad scale, to be immediately available, \$1,200.

Mr. MONDELL. Mr. Chairman, a moment ago, on the motion of the chairman of the District Committee, the only item contained in this bill giving the young people of the District of Columbia an opportunity to bathe under proper supervision and regulation was stricken from the bill, and yet there are gentlemen who wonder why it is that the newspapers in the District of Columbia and some of the citizens of the District criticize Members of Congress because of their attitude toward the District of Columbia. I doubt if there is a city in the Union of any considerable size that has not more bathing pools and public bathing beaches than the District of Columbia, the capital of the Nation, this great and beautiful city; and yet a Member of the House, charged by appointment with the duty of giving consideration to the needs of the District, feels it is his duty to strike from this bill an appropriation of \$4,800, the only appropriation made in the bill for the maintenance of these entirely inadequate facilities they now have. The committee having charge of these matters refuses, declines, or neglects to make any additional provision whatsover whereby the youths of visions preceded by the word "hereafter," and when so inserted,

the District can learn to swim and can occasionally get a bath in the open under proper supervision; and the chairman of that committee is instrumental in striking from the bill the small sum now in it for maintenance of the bathing beach. And yet gentlemen wonder that the people of the District do not approve the kind of treatment they give them. For one, I am surprised at the moderation displayed by the people and papers of the District.

The Clerk read as follows:

For salaries: Clerk (stenographer and typewriter), \$900; supervisor, \$2,500; to be employed not exceeding 10 months—13 directors of playgrounds or recreation centers at \$65 per month each, assistant director at \$60 per month; to be employed not exceeding 7 months—2 assistant directors at \$60 per month each, assistant director at \$60 per month; to be employed not exceeding 3 months—assistant director at \$60 per month, 13 assistants at \$45 per month each; watchmen to be employed not exceeding 12 months—12 (including 1 for recreation grounds in Rock Creek Park) at \$45 per month each; general utility man at \$60 per month for 4 months; in all, \$22,595.

In all, for playgrounds, \$31,595, which sum shall be paid wholly out of the revenues of the District of Columbia.

Mr. PAGE of North Carolina. Mr. Chairman, I desire to offer an amendment to correct the totals.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

On page 28, line 15, strike out "\$22,595" and insert in lieu thereof "\$22,295"; and, on page 28, in line 16, strike out "\$31,595" and insert in lieu thereof "\$31,295."

The question was taken, and the amendment was agreed to. Mr. SIMS. Mr. Chairman, will the gentleman yield for just a question?

Mr. PAGE of North Carolina. I yield.

Mr. SIMS. Does this playgrounds appropriation come wholly out of the revenues of the District?

Mr. PAGE of North Carolina. Yes; it is so stated in the text

of the report.

Mr. SIMS. Does not the gentleman think he may be violating the act of 1878 by making any charge wholly on the people of the District of Columbia?

Mr. PAGE of North Carolina. The gentleman whom the gentleman from Tennessee is now addressing did not perpetrate this great outrage, but it was written in the law in the establishment of these playgrounds by the House of Representatives and we felt we should follow those directions

Mr. SIMS. I knew the gentleman had a very high regard for not only the constitution of the District of Columbia, but for all constitutions, and I did not know whether he had done this

insidiously or not.

Mr. PAGE of North Carolina. I assure the gentleman I did

Mr. SIMS. There was nothing insidious about it?

Mr. PAGE of North Carolina. No. Mr. MANN. Mr. Chairman, I move to strike out the last ord. I notice in the current law in reference to the absence of members of the staff of the playgrounds it authorizes some one to fill their places. Why is that left out of this bill? Mr. PAGE of North Carolina. I did not quite catch what the

gentleman said.

Mr. MANN. The current law provides that in case of any unauthorized absence or disability of any member of the play grounds staff the salary during such absence or disability shall be available to pay substitute employees during such absence.

Mr. PAGE of North Carolina. I will say to the gentleman it

is permanent law.

Mr. MANN. I will say to the gentleman it is not permanent

Mr. PAGE of North Carolina. Well, it was so considered by your committee.

our committee.

Mr. MANN. I am very sorry they so considered it.

Mr. PAGE of North Carolina. The courts have very often held, if I am not mistaken, that the use of the word "hereafter" made it permanent. That language is in the last bill.

Mr. MANN. The word "hereafter" is not used here. The

form used is the form that has always been used merely for

current law

Mr. PAGE of North Carolina. That is not a limitation, I will say to the gentleman, on the amount of money that is carried in this bill or in the last bill, and therefore our construction was that it was permanent law, and it is perfectly useless

to carry it, as it effected no real purpose.

Mr. MANN. Well, the ruling of the comptroller for many years—I do not know what the new comptroller may rule—but the ruling of the comptroller for many years was that a provision of this sort inserted in an appropriation bill only applied to the fiscal year for which the appropriation was made. Now, in recent years we have been in the habit of inserting such propreceded by the word "hereafter," the ruling of the comptroller has been that that made it permanent law. Now, I grant you that it is a very fine-hair distinction, and yet it is a distinction made that comptrollers for years have followed, because Congress itself has made that distinction right along.

Mr. PAGE of North Carolina. Mr. Chairman, I confess to the gentleman that the point is so finely drawn that I fail to grasp it, and I have not that familiarity with the decision of

the comptroller-

Mr. MANN. The gentleman will readily see that it is often desirable for Congress to put a provision in the law, maybe as a matter of experiment, which is only applicable for the fiscal year for which the appropriation is made, and nobody will object to it, whereas, if you put it in as a permanent law, a point of order would be made, and for years the House has followed that rule.

Mr. PAGE of North Carolina. I will ask the gentleman if that has not been true in those instances where a limitation was intended?

Mr. MANN. Oh, no; it is not confined to that at all.

Mr. FOSTER. May I ask my colleague a question? Mr. PAGE of North Carolina. It is a matter about which I

have personally no pride of opinion.

Mr. MANN. I understand.

Mr. PAGE of North Carolina. And it was a matter that was unanimously agreed to in committee; we may have been mis-taken about it.

Mr. MANN. I say very frankly, if it should be the ruling that a provision like this would be permanent law, I would make a point of order, when nobody knows what it would be. have made that a practice for years, the House being perfectly willing to let a provision go in when it was only for the fiscal year which it would not write as permanent law after a trial.

Mr. PAGE of North Carolina. If the gentleman will allow me, I find here that in case of the unauthorized absence or disability of any member of the playground staff the salary during such absence or disability shall be available to pay substitute employees during the fiscal year. That is the language that appeared in the last appropriation bill.

Mr. MANN. Yes; I just read the language. Mr. PAGE of North Carolina. The view of your committee was that it became permanent law, that it was not necessary to write it into the paragraph every time this appropriation was made, and that it would not affect in the slightest degree the

appropriations herein made by its omission.

Mr. MANN. Of course, if it is permanent law, it does not need to be ever written in again, but under the rulings of the comptroller it is not permanent law. It is a provision put in for the fiscal year in connection with the appropriation and was not intended as permanent law. The gentleman who had charge of the bill last year did not believe it was permanent law. If the gentleman wants to make it permanent law, if I was in his place, I would offer it again, with "hereafter" written in, in order to make it permanent law.

Mr. PAGE of North Carolina. I can not say that I do desire to make it permanent law. It is one of those matters that the committee could pass upon from time to time, if it cared to. But the decision of the comptroller, with which the gentleman is familiar, was not brought to the attention of this committee. The gentleman cites that decision, but I have not seen it, although, of course, I am ready to accept the statement made by the gentleman, as I have great confidence in his judgment.

Mr. MANN. I will not take the trouble to cite it, but the next time one of these items is offered in an appropriation bill I shall make the point of order, and let that side of the House produce the decision, on the ground that it is not permanent law. I have read the decision, and a number of them on that

subject

Mr. STAFFORD. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The gentleman from Wisconsin [Mr. Staf-FORD] offers an amendment, which the Clerk will report.

The Clerk read as follows:

Insert as a new paragraph, after line 17, page 28, the following: "For music at Sunday sacred concerts at the public parks and squares, \$10,000."

Mr. PAGE of North Carolina. Mr. Chairman, I make a point of order on that.

Mr. STAFFORD. I hope the gentleman will reserve it.

Mr. PAGE of North Carolina. How long does the gentleman want?

Mr. STAFFORD. Several minutes.

Mr. PAGE of North Carolina. I will reserve the point of order for five minutes.

Mr. STAFFORD. Mr. Chairman, several years ago, when the District bill was under consideration, I proposed a similar amendment to that which is presented here to-day. I had hoped in the intervening time that some action would have been taken by the committee at the suggestion of the District Commissioners, but up to the present time, after scanning the hearings as closely as one can, I can find no recommendation for providing music in the public parks for the denizens of this District who are obliged to spend the sultry summer months in the city of Washington. We have had recommendations from the new commissioners in favor of fish wharves, municipal bathing establishments, and municipal boarding houses, and all that character of municipal reform, but no word of recommendation providing music for the people of the District, which so many other cities of the size of Washington provide for their people.

Mr. MONDELL. Mr. Chairman, will the gentleman yield?

Mr. STAFFORD. I will yield for a question.
Mr. MONDELL. What encouragement is there for the commissioners to ask for more when they can not get any of the

things they do ask for?

Mr. STAFFORD. I should at least think that these commissioners, if they are acquainted with the practices of other cities of the size of Washington, would have incorporated in their program of reform some little item like this of \$10,000 to prowide music for the people of Washington on Sunday.

Mr. MONDELL. They should have done so.

Mr. STAFFORD. In all seriousness I appeal to the commit-

tee to allow the paltry sum of \$10,000 to be provided.

We are regaled here on occasions once a week by the Marine Band with a discourse of about an hour er an hour and a half, only to find most of these same musicians hurrying away from the Capitol grounds in order to provide rag-time music out here in a suburban resort maintained for the benefit of a street railway company. But no provision whatsoever is made to develop the æsthetic sense of the people of the District, so far as music is concerned, on Sunday.

Those Members who come from the large cities will appreciate the benefit of such a provision as this. I see before me several Representatives from the city of Philadelphia, where in their Fairmount Park are provided concerts on Sunday, so as to give the working classes of Philadelphia the benefit of sacred and popu-Why should not the people of Washington have the same privileges? In my own city within the last few years we have adopted the Sunday music program, and thousands of people flock to our public parks to enjoy themselves on Sunday afternoon. It takes them out of their homes and gives them a little diversion. But where are these prisoners working for the Government in the departments, who serve six days in the week, year in and year out, able to find any recreation except, perhaps, to take a car ride out to Great Falls or to the Zoo, with no opportunities to hear music except by paying a large fee at our theaters? Why should not provision be made so that our publicpaid bands, such as the Marine Band and the battalion bands, could furnish a little entertainment in a popular way for the benefit of the clerks and other residents of the District?

I hope the chairman of the committee will not insist upon his point of order. If he does, then I hope that this suggestion that I have made will be sufficient to call the matter to the attention of the commissioners and also to the attention of the people of the District, so that next year when this bill comes up for consideration it will contain a provision for Sunday concerts, such as those given to the people of other cities, for the uplift, benefit, and recreation of the people.

Mr. SISSON. Mr. Chairman, I make a point of order against The CHAIRMAN. The Chair sustains the point of order, and

the Clerk will read.

Mr. MONDELL. Mr. Chairman, I offer an amendment. The CHAIRMAN. The gentleman from Wyoming offers an amendment, which the Clerk will report.

The Clerk read as follows:

On page 28, line 2, insert: "For the equipment of new playground in Tennallytown, on property owned by the District, \$1,000."

Mr. FITZGERALD. Mr. Chairman, I make the point of order that that part of the bill has been passed.

The CHAIRMAN. The Clerk will conclude the reading of the

The Clerk read as follows:

For purchase of new site occupied by Mount Pleasant playground, \$60,000.

Mr. FITZGERALD. Mr. Chairman, I make a point of order against that.

Mr. MONDELL. Will the gentleman reserve his point of order for just a minute?

Mr. FITZGERALD. Oh, yes.

Mr. MONDELLL. Mr. Chairman, playgrounds are purchased and maintained in the District of Columbia entirely at the expense of the people of the District. Let us bear that in mind. Uncle Sam does not pay a cent. The much-talked-of half-and-half plan does not apply. The people of the District desire to buy a playground in the northwest, on Park Road, that is now being used as a playground by the sufferance of the owner. The children of that entire district are likely to be compelled to leave that playground any day because the owner wants to use the property

If this bill becomes a law as it now stands, the people of the District of Columbia will have \$1,500,000 left over and above

paying one-half of all of the items carried in the bill.

Under the provisions of section 8 of this bill that money is to go into the Treasury, is to be confiscated, and the people of the District are not to be allowed to spend \$61,000 of their own money for the purchase of playgrounds for their own children. It is not the fault of the Committee on Appropriations. The Committee on Appropriations has no authority to purchase new playgrounds. This is subject to a point of order. But there is a committee that has jurisdiction, the chairman of which committee made a motion just a few minutes ago to strike out the only appropriation contained in this bill for the maintenance of bathing beaches-a little, measly \$4,500. That committee has jurisdiction to carry out the will of the people of the District, to provide playgrounds for their children, and it has not done This morning we heard some of the gentlemen complain and wax indignant because it is said that some people of the District have suggested-it is not clear whether they suggested it or not-that they might call to the attention of their constituents at home the attitude of these gentlemen toward the District. The people of the District of Columbia, whose town council we are, have the right to appeal to our constituents and say: "We do not think the men you have elected and sent here are treating the District of Columbia fairly. We do not think they are fair Representatives when they refuse to allow the erection or maintenance of bathing beaches, when they refuse to allow the people of the District of Columbia to spend their own money to buy grounds on which children can play. We do not think your Representative should refuse to allow the building of needed public-comfort stations."

For my part, I think gentlemen are overtender when they resent that kind of criticism. It is legitimate criticism, and in my district it would be effective criticism. It would be effective, in my opinion, in any part of the country. I do not believe any district in the country would justify its Representative in opposing appropriations for bathing beaches, opposing the establishment of more bathing beaches, opposing appropriations for needed public-comfort stations, opposing appropriations for playgrounds and the maintenance of playgrounds, to be paid for out of the funds belonging to the people of this District.

Mr. SISSON. I make a point of order.
The CHAIRMAN. The Chair sustains the point of order and The CHAIRMAN. the Clerk will read.

The Clerk read as follows:

ELECTRICAL DEPARTMENT.

ELECTRICAL DEPARTMENT.

Electrical engineer, \$2,500; assistant electrical engineer, \$2,000; 4 electrical inspectors, at \$1,200 each; inspector, \$1,000; electricaln. \$1,200; 2 draftsmen, at \$1,000 each; 3 telegraph operators, at \$1,000 each; 4 inspectors, at \$900 each; expert repairman, \$960; 3 repairmen, at \$900 each; telephone operators—3 at \$720 each, 4 at \$540 each, 1 \$450; electrical inspectors—1 \$2,000, 1 \$1,800, 1 \$1,350; cable splicer, \$1,200; assistant cable splicer, \$620; clerks—1 \$1,400, 1 \$1,200, 2 at \$1,125 each, 1 \$1,050, 1 \$750; assistant repairmen—1 \$620, 2 at \$540 each; laborers—1 \$630, 2 at \$540 each, 1 \$460, 2 at \$400 each; storekeeper, \$875; in all, \$47,695.

Mr. FOWLER. Mr. Chairman, I reserve a point of order against the paragraph.

The gentleman from Illinois reserves a The CHAIRMAN.

point of order against the paragraph.

Mr. FOWLER. In line 5, on page 29, there is an increase of

one electrical inspector-an increase from three to four.

Mr. SISSON. That was because of the increased number of moving-picture shows that have to be inspected and looked after, and for that reason the committee thought the increase in the employees was necessary.

Mr. FOWLER. Will that result in a diminution in these vulgar and ungainly scenes that are carried on here in the city

in what are called the nickelodeons or movies?

Mr. SISSON. These inspectors look after the electrical appliances of the moving-picture shows. If those electrical appliances were not inspected, it might endanger the lives of the people who attend them. This has nothing to do with the censoring of moving pictures. They are here, and it is necessary that those electrical appliances be inspected.

Mr. FOWLER. Is the new man to look after the movies? Mr. SISSON. To inspect the electrical appliances generally throughout the city; but owing to the great number of movingpicture shows an increase in the way of inspectors is neces As I recall the testimony, it was that the number of places

needing inspection has about doubled within the last two years, so we gave them this one additional employee.

FOWLER. In line 8, on the same page, you have an additional inspector at \$900.

Mr. SISSON. That is a mere change of designation. Mr. FOWLER. Your bill carries four, whereas the

Your bill carries four, whereas the current law carries only three.

Mr. SISSON. I have not referred to the hearings since the gentleman raised the question, but my recollection is that there is only one additional employee in this department.

Mr. FOWLER. According to your bill there are two increases,

one at \$1,200 and the other at \$900.

Mr. SISSON. I think the gentleman is mistaken. It is a mere change of designation.

Mr. PAGE of North Carolina. The present law carries four repair men and this bill carries three. It is simply a change in the designation or title.

Mr. FOWLER. I know you carry only three, whereas last year there were four.

Mr. PAGE of North Carolina. There is only one increase,

and that is the inspector.

Mr. MONDELL. Mr. Chairman, I ask unanimous consent to return to line 20 on page 28. I had an amendment prepared, but my attention was distracted for the moment and I did not have the opportunity to offer it.

The CHAIRMAN. The gentleman asks unanimous consent to return to page 28, line 20. Is there objection?

Mr. FOSTER. I should like to know what the amendment is? Let the amendment be read first.

Mr. MONDELL. It is an amendment for two public convenience stations

Mr. FOSTER. I should like to have the amendment read. The CHAIRMAN. If there be no objection, the Clerk will report the amendment for information.

The Clerk read as follows:

On page 28, after line 20, insert:
"For public convenience station at Fifteenth and H Streets, including site, \$11,000.
"For public convenience station on Wisconsin Avenue and M Street, including site, \$20,000."

Mr. SISSON. Mr. Chairman, I object to the unanimous con-

Mr. JOHNSON of Kentucky. Mr. Chairman, I make a point of order

The CHAIRMAN. Objection is heard. The Clerk will read. Mr. STAFFORD. I move to strike out the last word.

Mr. PAGE of North Carolina. The last word of the amendment of the gentleman from Wyoming?

Mr. STAFFORD. No; the last word of the paragraph just

The CHAIRMAN. The gentleman from Wisconsin moves to

strike out the last word. Mr. STAFFORD. I do not move to strike out something that

is nonexistent.

I would like to inquire of the chairman of the committee concerning the convenience stations. I have noticed, on my walks from the hotel to the Capitol, that in Franklin Square and Judiciary Park there are in course of erection some shacks that look as if they were intended for comfort stations. the chairman inform the committee whether these beautiful parks are to be defiled and disfigured by these erections?

Mr. PAGE of North Carolina. I can inform the gentleman that neither the former District bill nor does this bill carry any appropriation for the construction of public-convenience The District appropriation bill does not treat with stations. those at all; it is another bill coming from the Appropriations Committee which makes these provisions,

Mr. STAFFORD. The sundry civil bill?

Mr. PAGE of North Carolina. There are three or four public-service stations in the course of erection, and we provide for

the maintenance of a part of those.

Mr. MONDELL. Mr. Chairman, the amendment that I offered for the purchase of ground and the erection of two public-convenience stations is in line with the estimates made by the Commissioners of the District of Columbia. The commissioners very earnestly urged upon the committee the importance of these two stations. They called attention to the fact that they were proposed to be erected in sections of the city where a large number of people frequently congregated and there were no

public-convenience stations in the neighborhood. The chairman of the Committee on the District of Columbia made the point of order against the amendment, but the Chair did not rule because the committee refused to allow me to go back to the point where the amendment was germane to the bill. I now desire to ask the chairman of the Committee on the District of Columbia whether his committee, which has jurisdiction, intends to take up for consideration the important question as to whether the people of the District of Columbia shall have these public-convenience stations which he declines to allow to be provided for on this bill.

Mr. JOHNSON of Kentucky. Mr. Chairman, in answer to the gentleman, I will say that I do not know whether such a bill is before the committee or not; but if it is before the committee, or if it comes before the committee, I shall do as I always have done—bring it to the attention of the committee.

Mr. MONDELL. It is a good, long time since any bill was brought to the attention of Congress providing for any new construction in the District of Columbia, or providing for new facilities for the people. We had hoped, in the absence of action by the committee having jurisdiction in matters of legislation, that these items might be provided for on an appropria-tion bill. It seems, however, that the people who are threat-ened with confiscation of a million and a half dollars of their own money raised by taxation are to be refused the ordinary conveniences that any civilized community is entitled to and ought to have, and which decency requires they should have.

The Clerk read as follows:

The Clerk read as ioliows:

Lighting: For purchase, installation, and maintenance of public lamps, lamp-posts, street designations, lanterns, and fixtures of all kinds on streets, avenues, roads, alleys, and public spaces, and for all necessary expenses in connection therewith, including rental of stables and storerooms, this sum to be expended in accordance with the provisions of sections 7 and 8 of the act making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ended June 30, 1912, approved March 2, 1911, and with the provisions of the act for the same purpose for the fiscal year ending June 30, 1913, approved June 26, 1912, and other laws applicable thereto, livery and extra labor, \$395,000.

Mr. CURRY. Mr. Chairman, I rise to put a question to the gentleman from North Carolina, in charge of the bill, for information. I would like to ask the chairman of the commit-tee how he arrives at the item of \$395,000 for lighting, and what are the rates charged in the District by the electrical, power, and gas companies for electric lights and gas lights?

Mr. PAGE of North Carolina. The rates for lights are estab-

lished by law. It is a fixed charge and therefore it is a matter of computation based upon the number of lights that the commissioners are going to use and the rates fixed by law.

Mr. CURRY. I supposed that these rates were fixed by the commissioners. Does the gentleman know what those rates are? Mr. PAGE of North Carolina. The rates are not uniform, because there are various kinds of lights used; there is a schedule of those lights, and as soon as it can be found I will give it

to the gentleman.

Mr. CURRY. Mr. Chairman, that answers my question. Mr. PAGE of North Carolina. I will put the schedule in the

By the act of June 26, 1913, it is provided: "Sec. 7. During the fiscal year 1913 no more than the following rates shall be paid for lighting avenues, streets, roads, alleys, and public spaces. "For mantle gas lamps of 60 candlepower, \$18.40 per lamp per

spaces.

"For mantle gas lamps of 60 candlepower, \$18.40 per lamp per annum.

"For mantle gas lamps of not less than 120 candlepower, \$27 per lamp per annum.

"For street designation lamps, using flat-flame burners, consuming not more than 2½ cubic feet of gas per hour, or 8-candlepower incandescent electric lamps, with posts and lanterns furnished by the District of Columbia, \$10 per lamp per annum.

"For 40-candlepower, 50-watt, incandescent electric lamps on overhead wires, \$15 per lamp per annum.

"For 40-candlepower, 50-watt, incandescent electric lamps on underground wires, \$19.50 per lamp per annum.

"For 60-candlepower, 75-watt, incandescent electric lamps on overhead wires, \$17.50 per lamp per annum.

"For 60-candlepower, 75-watt, incandescent electric lamps on underground wires, \$23 per lamp per annum.

"For 80-candlepower, 100-watt, incandescent electric lamps on underground wires, \$26 per lamp per annum.

"For 150-candlepower, 125-watt, incandescent electric lamps on underground wires, \$26.50 per lamp per annum.

"For 150-candlepower, 125-watt, incandescent electric lamps on underground wires, \$36.50 per lamp per annum.

"For 200-candlepower, 250-watt, incandescent electric lamps on underground wires, \$46.50 per lamp per annum.

"For 4-glower Nernst lamps on underground wires, \$52.50 per lamp per annum.

"For 4-glower Nernst lamps on underground wires, \$52.50 per lamp per annum.

"For 6.6-ampere, 528-watt, direct-current, series-inclosed arc lamps, \$80 per lamp per annum.

"For 5-ampere, 550-watt, direct-current, multiple-inclosed arc lamps, \$80 per lamp per annum.

"For 6.6-ampere, 520-watt magnetite, or other arc lamps of equal illuminating value acceptable to the Commissioners of the District of Columbia, on overhead wires, \$59 per lamp per annum.

"For 4-ampere, 320-watt magnetite, or other arc lamps of equal illuminating value acceptable to the Commissioners of the District of Columbia, on underground wires, \$72.50 per lamp per annum.

"For 6.6-ampere, 500-watt magnetite, or other arc lamps of equal illuminating value acceptable to the Commissioners of the District of Columbia, on overhead wires, \$84 per lamp per annum.

"For 6.6-ampere, 500-watt magnetite, or other arc lamps of equal illuminating value acceptable to the Commissioners of the District of Columbia, on underground wires, \$97.50 per lamp per annum.

"For flame arc lamps, 500-watt, General Electric type, or other arc lamps of equal illuminating value acceptable to the Commissioners of the District of Columbia, \$150 per lamp per annum."

The Clerk read as follows:

For erection of a house for the assistant to the overseer at Great Falls, Md., including purchase of necessary materials not now on hand, the work to be done by the present force of men engaged on the Washington Aqueduct when their services can be spared from other work, \$1,000.

Mr. MANN. Mr. Chairman, to that paragraph I reserve a point of order. Is it intended that this house that is to be erected for the assistant overseer shall be erected by carpenters or masons now in the employ of the Government, or by Tom, Dick, and Harry?

Mr. PAGE of North Carolina. The statement was made be-fore the committee that the house would be built by a force

now employed in that service.

Mr. MANN. What are they doing?

Mr. PAGE of North Carolina. I do not know that I can tell the gentleman just what they are doing. It is a force that they will use in a new employment for the erection of the house.

The statement was made by the officer in charge that they had now not only a large part of the material, but that they could erect it by men already employed, provided this small appropriation was given for the purpose of assembling the material and buying a slight amount of other material for the construction of the house,
Mr. MANN. I suppose this is to be a frame house?
Mr. PAGE of North Carolina. Yes.

Mr. MANN. Do they have carpenters employed with nothing else to do, or is this house to be built without the aid of carpenters?

Mr. PAGE of North Carolina. They have carpenters, I think. Mr. PAGE of North Carolina. They have carpenters, I think. There is a force at work, under a provision of law, building an extension of the Conduit Road to Great Falls. They have not only laborers, who are constructing the road, but they have carpenters, who are building bridges and doing various and sundry other things

Mr. MANN. Mr. Chairman, I should suppose that the laborers would not be the proper people to build a house, and I am not sure that the bridge constructors would be. I do not see why the Government, if it is going to build a house, should not permit the employment of the regular carpenters.

Mr. PAGE of North Carolina. The language provided here

was the suggestion of the man who wanted to build the house, that he wanted no additional employment, and the committee felt inclined to comply with his request. That is all I have to say about that. If the gentleman cares to put it out, very well. It is about the cheapest residence, I think, I have known to

be estimated for.

Mr. MANN. I would rather pay more and have it constructed by proper union carpenter labor than to have it built

by men engaged in paving a street.

Mr. PAGE of North Carolina. I will say, so far as I am concerned, that there is a responsible officer of the Army of the United States in charge of this work, and I think this committee will agree that they are not men who, as a rule, do things badly. They do things well usually, and I had all conthings badly. They do things well usually, and I had all confidence, and I have yet, that, under the direction of this particular gentleman having charge, this house will be properly constructed.

Mr. MANN. And yet the gentleman knows that it is the duty of the Army officers, at least in their opinion, to get the work done just as cheaply as possible, regardless of who does it.

Mr. PAGE of North Carolina. So long as it is done well. Mr. MANN. And in most cases we have insisted that the wages paid to men doing this kind of work should be commensurate with the ordinary wages paid in that particular locality for that kind of work, which, in the main, is the union scale of wages. The proposition here is to build a house which may be knocked together by some men engaged in repairing a street. If that is to be the rule of the Government all around, I will have to put up with it, but I do not believe in it. I make the point of order against the language in lines 16 and 17, page 32: The work to be done by the present force of men engaged on the Washington Aqueduct, when their services can be spared from other

The CHAIRMAN. The gentleman from Illinois makes the point of order, and the point of order is sustained.

Mr. MONDELL. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Page 32, after line 18, insert as a new paragraph the following:

"Great Falls water and power project: For continuing the work of increasing the water supply of the District and the development in concection therewith of water power from the Great Falls of the Potomac, \$1,000,000."

Mr. SISSON. Mr. Chairman, on that I make the point of order.

Mr. MONDELL. Mr. Chairman, will the gentleman reserve

the point of order?

Mr. SISSON. How long does the gentleman desire?

Mr. MONDELL. Five minutes.
Mr. SISSON. I will reserve the point of order for five min-

Mr. MONDELL. Mr. Chairman, this is the only amendment that I have offered or that I shall offer that was not estimated by the Commissioners of the District. The Engineer Commissioner of the District, in speaking of this Great Falls waterpower project, said:

I was very sorry not to be able to include in the estimates that were submitted any estimate for the furtherance of the Great Falls power project, but after we got through with our estimates and added them up we found it would be impossible to include the item of \$1,000,000 asked for as the District's share of the money required for the furtherance of that project.

At the time that statement was made the estimates before the committee amounted to the full amount of the anticipated revenues of the District, but the items as reported will leave a million and a half dollars of the revenues of the District over and above the amount required to meet one-half of the expenditures contemplated; so that it is entirely possible to appropriate this million dollars which the commissioners would have estimated and still have quite a sum remaining from the revenues of the District. Last year the District bill contained an item providing for a report on this water-power project at the Great Falls of the Potomac. That report has been made and was before the committee and was given some consideration. It contemplates a project that will cost in the neighborhood of \$15,000,000, and it is suggested or was proposed in the preparation of the plans and estimates that the District should pay \$2,000,000 or \$2,500,-000 as its share of the expenditure for an increased water supply

Mr. Chairman, it is a curious commentary, on the lack of proper conservation in the East as compared with the West, that here, almost in sight of the Dome of the Capitol, is one of the greatest water powers in the country going to waste, going to waste in the center of a country with a great population, with two cities easily within reach of electric wires, with a combined population of nearly a million people.

We are burning in this Capital City hundreds of thousands of tons of anthracite coal every year, taking that much from the store of the anthracite of the Nation that could be saved if we would harness the Potomac at the Great Falls.

Mr. CURRY. Will the gentleman yield for a question?

Mr. MONDELL. I will be glad to do so.

Mr. CURRY. Does not the gentleman think that if that were done the cost of light and power of Washington and the sur-

rounding country would be cut nearly in two

Mr. MONDELL. I think that has been the experience of other communities, particularly communities in the State of the gentleman who has just spoken, California, where they have progressed in developments of this sort in a way ought to shame the people of all this eastern country and Members of Congress, who are in the position, and have been for years, to provide for the development of this great power here at Great Falls and have neglected to do so. Why, gentlemen are much worried about our water power in the West; they are tremendously fearful that out there where we have declared that the water belongs to all the people and can not become private property The CHAIRMAN. Th

The time of the gentleman has expired. Mr. MONDELL. May I have just one minute more, Mr.

Chairman? The CHAIRMAN. The gentleman from Wyoming asks unanimous consent to proceed for one minute. Is there objection? [After a pause.] The Chair hears none.

Mr. L'ONDELL. Many gentlemen are very fearful lest out West there shall be a monopoly in water, which in fact can not occur by reason of public ownership of water, a situation under which a monopoly is practically impossible. At the same time which a monopoly is practically impossible. At the same they entirely neglect to urge the development of one of the greatest water powers in the country right Lere within sight of the Capitol, in the midst of a densely populated and highly developed country. In the meantime we are depleting by hundreds of thousands of tons annually the limited store of anthracite coal in the country and leaving that great power to

go to waste. I hope that the committee having charge of these matters, inasmuch as the Committee on Appropriations can not do it, will find time in the midst of its efforts to prevent the people of the District of Columbia from criticizing their attitude, in their efforts to smother criticism and prevent it being made, I hope that in the midst of these activities they will also find time for some constructive legislation relative to

will also find time for some constructive legislation relative to the utilization of the Great Falls of the Potomac. Mr. SISSON. Mr. Chairman, I make the point of order. The CHAIRMAN. The gentleman from Mississippi makes the point of order and the Chair sustains the point of order.

The Clerk read as follows:

The Clerk read as follows:

Longevity pay: Longevity pay for director of intermediate instruction, supervising principals, supervisor of manual training, principals of normal, high, and manual training high schools, principals of grade manual training schools, heads of departments, director and assistant director of primary instruction, directors and assistant directors of drawing, physical culture, music, domestic science, domestic art, and kindergartens, teachers, clerks, librarians and clerks, and librarians to be paid in strict conformity with the provisions of the act entitled "An act to fix and regulate the salaries of teachers, school officers, and other employees of the board of education of the District of Columbia," approved June 20, 1906, as amended by the acts approved May 26, 1908, May 18, 1910, and June 26, 1912, \$400,000.

Mr. SISSON. Mr. Chairman, I offer the following committee amendment

The CHAIRMAN. The Clerk will report the amendment. The Clerk read as follows:

On page 35, after line 12, insert: "No teacher or other person employed in the public schools of the District of Columbia receiving a base pay of \$1,190 or more per annum under the act approved May 26, 1908, shall receive or be entitled to any longevity pay under said act."

Mr. SISSON. The purpose of that amendment is this Mr. MONDELL. Mr. Chairman, if it is not too late, I desire to reserve the point of order.

Mr. SISSON. Mr. Chairman, I make the point of order the gentleman is too late with his point of order.

Mr. MONDELL. I desire to reserve the point of order, Mr. Chairman

Mr. SISSON. I have no objection to the gentleman reserving the point of order, because I think it is clearly in order under the Holman rule. Now, Mr. Chairman, there is no question about this being in order and your committee thought that they were entirely reasonable in limiting the longevity pay to those teachers who were receiving less than \$1,190. It was in the minds of the committee that we would fix it at \$1,200, and it just happened in calculating the longevity pay on the basis of the law when they get above \$1,190 they may be transferred to the next higher class; therefore, under the present longevity law a teacher receiving \$1,190 would be transferred to the next higher class. It is unnecessary for me to state more than this, that your committee found that as best could be estimated last year \$75,000 had been appropriated for longevity pay to cover that year, but a deficiency of thirty-odd thousand dollars was necessary, because, as it was stated by the chairman of this committee, it was utterly impossible for anyone to figure it until the year is over what the longevity pay will be. Some of these teachers under this present longevity pay receive as high as \$1,600, \$1,700, and on up to \$1,800. Some teachers receiving \$2,400 continue to receive longevity pay until they reach the sum of \$3,000.

Now, the pay of teachers in the District of Columbia is vastly in excess of that, on the average, of any other city in the United States and, so far as we know, in the world. committee thought that when a teacher in any of the classes of teachers below \$1,190 should receive the longevity pay up to that time, the District of Columbia and the United States Government were more than kind to the teachers in fixing salaries. In other words, in round numbers, for the work rendered it is something over, taking the school months, \$125 and more.

Mr. MONDELL. Will the gentleman yield for a question?

Mr. SISSON. I will.
Mr. MONDELL. What is the law in regard to longevity? Mr. SISSON. There is quite a good deal of it. The provision of law in reference to the matter is that teachers of class or law in reference to the matter is that teachers of class 1 and class 2 shall receive an annual increase of salary of \$25 for four years. That is, each year for four years there shall be added to their salary \$25 until the maximum is reached. The teachers of class 3 shall receive an annual increase of salary of \$25 for 10 years, or until the maximum is reached. Beginning with a period of 10 years, they would receive \$25 increase, the next \$50, the next \$75, and the next \$100, and so forth, to the end of the next year. And at the end of the so forth, to the end of the next year. And at the end of the time the school board would have a right to reclassify the teachers. In class B, \$30 for 10 years until the maximum was The same rule would apply there as indicated in the class I have just mentioned. In class 5 an increase of salary

of \$40 for 10 years until the maximum is reached. The teachers of any class shall receive an annual increase for eight years. Teachers in group A of class 6, after the probationary year, shall receive an annual increase of salary of \$100 for eight years, in group B of \$100 for three years.

Now, the school board, and everybody connected with the matter will tell you, it is an impossibility to tell exactly what the longevity pay will be during the current fiscal year, for this reason: A teacher may be transferred from one of the high salaries to a lower place, and a new teacher may be employed at a very low salary. So during the year various changes may be made affecting the longevity pay. But your committee thought when teachers received \$1,190 they were receiving practically twice what teachers received throughout the States. For the average of a teacher is from \$50 to \$60 a month, and in some of the States a teacher in the grades gets about \$70 a

Mr. BRYAN. Has the gentleman investigated the conditions out in the State of Washington, when he says the average pay

Mr. SISSON. I will say to the gentleman that our inquiries were not extended to the country districts of that entire State, but as to the cities. I do not remember that any investigation was made in reference to a teacher in your State.

Mr. BRYAN. I am quite confident the gentleman is in error when he states the maximum of that kind is in force in the city of Seattle.

Mr. SISSON. What is the average?

Mr. BRYAN. I do not know. I have not figured it out.

I do not understand, unless the gentleman has Mr. SISSON. made an investigation, how he can controvert what I have said. But the gentleman will find that the teachers in the grades throughout the States do not receive \$1,190. They do not receive it in the cities. Some of the principals and some of the teachers who have higher positions, such as advisory positions, receive, of course, larger salaries than that.

The CHAIRMAN. The time of the gentleman has expired. Mr. MANN. Mr. Chairman, I ask unanimous consent that the gentleman have five minutes more.

Mr. SISSON. I do not know that I will consume five minutes

The CHAIRMAN. The gentleman from Illinois asks unanimous consent that the gentleman from Mississippi have five minutes more. Is there objection?

There was no objection.

Mr. SISSON. Now I will yield to the gentleman from Illinois.

Mr. MANN. I was going to ask the gentleman if he could tell what the usual salary is here for teachers in the primary grades and each intermediate grade to the higher grades

Mr. SISSON. The great many classes of longevity pay get

Mr. SISSON. The great many classes of longevity pay get mixed up, but the basic salary—

Mr. MANN. I do not care anything about that.

Mr. SISSON. Now, the basic salary—

Mr. MANN. I do not care anything about that. That would not convey any information to my mind that a mathematical calculation could be based upon. Is the gentleman able to state what the average salary of these teachers is now, including the longevity pay?

Mr. SISSON. Well, this is in class 1, I will say to the gentleman. I can not answer any more accurately than this.

Mr. MANN. "Class 1" does not mean anything to me there.

Mr. MANN. "Class 1" does not mean anything to me there. Mr. SISSON. The first year it is \$500, the next \$525, the next year \$550, and the next year \$575. The next year, I believe, it is \$600, and then they get an increase for 10 years of \$25 a year.

Mr. MANN. If I should ask the gentleman what is the usual salary of a clerk in Washington, I am sure he would not say they enter the service at \$600.

Mr. SISSON. There are difficulties in the matter.

Mr. MANN. I acknowledge there are difficulties. I did not know whether the gentleman could answer or not.

Mr. SISSON. It would be necessary to take an average, of course; it would be necessary to get the teachers in certain classes and average their pay; it would be necessary to add those classes up and divide the total by the number of classes. did not do that on account of the large number of teachers here.

Mr. ROBERTS of Massachusetts. Mr. Chairman, will the gentleman yield to me for a question?

The CHAIRMAN. Does the gentleman yield?

Mr. SISSON. Certainly.

Mr. ROBERTS of Massachusetts. Can the gentleman tell the committee how many teachers would have their salaries reduced if his amendment were adopted?

Mr. SISSON. I do not know how many teachers' salaries would be reduced, but no teacher in the classes except those

that are above \$1,190. Those that are above \$1,190 would cease, of course, to receive longevity pay. All those at \$1,190 or under it would receive the longevity pay under the law.

Mr. ROBERTS of Massachusetts. What I want the gentleman to answer is this: Is it not a fact, if the gentleman's amendment were adopted, that those in the \$1,190 grade would go back to the basic pay?

Mr. SISSON. No; they would go back to \$1,190. It would

not affect their status at all.

Mr. ROBERTS of Massachusetts. They would then lose compensation over what they are now getting?

Mr. SISSON. Suppose they were of a class that goes on increasing. Suppose they received \$1,500. If that amendment is adopted, they not having reached the class of \$1,500, they would, of course, drop back to \$1,190.

Mr. ROBERTS of Massachusetts. Mr. Chairman, as I understood the gentleman to say in reading the longevity increases of the different classes, class 6 gets an increase of \$40 a year for 10 years?

Mr. SISSON.

Mr. ROBERTS of Massachusetts. So that at the end of 10 years, assuming the basic pay to be \$1,000, as set forth in the bill now under consideration, these teachers would get \$1,400 after 10 years of service.

I want to ask the gentleman this: If his amendment is adopted, will it not automatically drop those teachers who are getting, say, \$1,360 a year by reason of longevity pay back to

Mr. SISSON. No, sir.

Mr. ROBERTS of Massachusetts. How could it be otherwise?

Mr. SISSON. This amendment would not make any change in any salary below \$1,190.

Mr. ROBERTS of Massachusetts. Does the gentleman mean it would not change any basic salary or any actual salary re-ceived by reason of longevity pay? There is the crux of the whole thing

Mr. SISSON. The pay would run up until they got \$1,190, and if they had gone beyond \$1,190 it would not cease, because under this amendment they would receive longevity pay up to

.190. There is no question about that. Mr. ROBERTS of Massachusetts. I am taking the case of a \$1,000 teacher who starts at the basic pay of \$1,000. In a little over two years' time that teacher under present conditions would be getting \$1,120. But it would take practically six years for that teacher to exceed the \$1,190 minimum that the gentleman proposes to establish.

Mr. SISSON. No; because in that class of \$1,000 as basic pay-in class 6 they start at a thousand dollars-they would receive \$40 extra a year for 10 years, so that in 5 years their salary would be \$1,100.

Mr. ROBERTS of Massachusetts. It ought to be \$1,200 in

five years

Mr. SISSON. Yes.

Mr. ROBERTS of Massachusetts. What I want to emphasize is this: That teacher has received this longevity pay for five years and is now getting \$1,200? Mr. SISSON. Yes.

Mr. ROBERTS of Massachusetts. Is not the whole purpose and purport of the gentleman's amendment to drop that teacher back to \$1,190?

Mr. SISSON.

Mr. ROBERTS of Massachusetts. Now, if you are going to cut off this longevity pay entirely, do you not really drop that teacher back to \$1,000?

The CHAIRMAN. The time of the gentleman from Missis-

sippi has expired.

Mr. SISSON. Oh, not at all. That does not affect the salary of a single teacher.

Mr. Chairman, I will ask for two minutes more in order to put in the six classes.

The CHAIRMAN. The gentleman from Mississippi asks unanimous consent to proceed for two minutes more. Is there objection?

There was no objection.

Mr. WILLIS. Will the gentleman allow me to ask him a question?

Mr. SISSON. Certainly.
Mr. WILLIS. Did I understand that by the gentleman's amendment he proposes to limit longevity pay to those who receive less than \$1,190 per year?

Mr. SISSON. That is the purpose of the committee.

Mr. WILLIS. Can the gentleman define this in terms of

grade-that is, in what grades the teachers receive less than \$1,190 per year? I do not know anything about the classes.

Mr. SISSON. Yes; it is fixed by law, and I will say to the gentleman that it is not fixed by grades that the teacher occupies in the schools. It is fixed by the length of service.

Mr. WILLIS. By length of service alone?

Mr. SISSON. For instance, supposing a teacher under this longevity pay received \$2,000. Suppose that teacher went out of the service; suppose that teacher died. They would put in a teacher receiving \$500 or \$600 in the other teacher's place.

Mr. WILLIS. The grade has nothing to do with it? Mr. SISSON. No; except the grade under the longevity-pay law. Under class 1 the basis of calculation is \$500. In class 2 it is \$600. In class 3 it is \$650, and in class 4 it is \$800. In class 5 it is \$950, and in class 6 it is \$1,000. In the first 10 years the teacher receives \$1,800.

Mr. Chairman, I will ask that there be printed in the RECORD this entire schedule which I have marked, taken from the hear-

ings, on page 228:

Class 1.	Class 2.	Class 3.	Class 4.	Class 5.	Class 6.
\$500	\$600	\$650	\$800	\$950	\$1,000)
525	625	675	830	990	1,000
550	650	700	860	1.030	1,100

					2,200

Now, your committee finds that the great number of teachers in the District would fall in classes 1, 2, 3, 4, and 5, and, except those who have been in class 5 seven years, none of them would be affected by it. Therefore it does not affect those teachers who are receiving smaller salaries. It only affects those who are receiving these high salaries. Feeling this way about it, that if we did not put some limitation somewhere, there is no telling just exactly what the teachers' pay roll in the District of Columbia will be, and we have placed this limita-

The CHAIRMAN. The time of the gentleman has again ex-

Mr. SISSON. The thing is going on now with geometrical progression. They are transferred from the lower classes to the higher classes, and the amount of longevity pay is rapidly increasing and is becoming a great burden; and I doubt whether Congress at the time it adopted the longevity-pay law realized exactly how it would add to the expenses of the schools during each fiscal year, and that is the reason your committee have offered this amendment.

Mr. MURRAY of Massachusetts. Mr. Chairman, I am not familiar with the peculiarities that may have crept into this longevity-pay system that has been established in the District of Columbia; but I am impelled to speak upon this subject because of some reflection that I have recently given on the subject of the relation of the public school and its teachers in our country to the business of the Government of this country.

I am very clear in my own mind, at least, that no action should be taken by this body nor by any governmental body the effect of which is to discourage the activity and zeal of public-school teachers in their daily work. [Applause.] We live in the days when the entire tendency of the times is to put the burden of the responsibility of government squarely on the people who are governed. We live in a time when direct nominations of President and Vice President are advocated. We live in a time when direct nominations and election of Senators of the United States have come to be the rule. We live in a time when the initiative and referendum are preached on every stump in every State in the Union, and I have wondered how these things will work out in the practical solution of the problem unless we have annually recruited to our electorate wise young men and wise young women who have been trained in the public schools of the country under leadership that is good and valuable and practical. [Applause.]

The proposition of the gentleman from Mississippi [Mr. Sis-

son] on behalf of his committee is to cut down the salaries of some of the teachers in the District of Columbia. He shakes his head, but the concrete illustrations that were put to him in the course of the interruptions led him to say in one breath that only a few teachers would be cut down, but in the next breath he said that the teachers who are now in grades below

\$1,190 will have no hope of arriving by longevity of service at these higher salaries of \$1,800 a year.

Mr. SISSON. Will the gentleman permit an interruption? Mr. MURRAY of Massachusetts. Certainly.

Mr. SISSON. If the gentleman will permit me to correct him, it simply means that no teacher who is paid more than \$1,190 a year will receive longevity pay. If they are transferred to these positions which pay \$1,500 or \$1,800 a year, they will not get any longevity pay. It does not mean that anyone's salary is reduced, but it simply means that the salary will not automatically increase beyond \$1,190 by operation of the longevity law

Mr. MURRAY of Massachusetts. Is it not the purpose of the gentleman's amendment to save an amount estimated at \$75,000

year out of the salaries of school-teachers?
Mr. SISSON. No; it will not do that.
Mr. MURRAY of Massachusetts. What will it do?
Mr. SISSON. It is difficult to figure just what amount it will save, just as it is difficult to figure what the deficiency will be when we make the appropriation.

Mr. MURRAY of Massachusetts. How much do you estimate

it will save?

Mr. SISSON. That is a very difficult matter to estimate.
Mr. MURRAY of Massachusetts. Of course it is difficult, and therefore I can not guess it. What is the gentleman's guess?

Mr. SISSON. It is difficult to state, for the simple reason

that I can not tell you how many teachers will arrive by longevity at the point where this amendment will operate upon their salaries

Mr. MURRAY of Massachusetts. Will it save anything?

Mr. SISSON. Unquestionably it will.
Mr. MURRAY of Massachusetts. About how much?

Mr. SISSON. I can not tell you how much. Mr. MURRAY of Massachusetts. Then, Mr. Chairman, declining to yield further, I will say that I do not want—
Mr. SISSON. I do not want the gentleman to get a false im-

pression that it reduces salaries.

Mr. MURRAY of Massachusetts. How are you going to save in any other way?

Mr. SISSON. It prevents teachers being advanced automatically beyond \$1,190, irrespective of their merits, irrespective of whether they are rendering good service, irrespective of whether they are good teachers or not, simply for longevity service, if they are not discharged.

Mr. MURRAY of Massachusetts. Let us see what it will do. There is now a positive statute providing for longevity pay for the teachers in the District of Columbia, and declaring that they shall have automatic promotion year after year in some variable amount based on amount of salary and length of service.

That is fundamental, and it is true. Who are the District of Columbia teachers, Mr. Chairman, that they were powerful and able enough to get written into the statute law of the United States such a provision? Are they men and women bound together with the great vote of the populace behind Oh, no. Are they men and women possessed of tremendous influence with the gentleman from Mississippi and men like him that they could have a special privilege written into the laws? What is the history of this legislation? Who are the people for whose benefit it was written? They are people who have demonstrated by the character of the service that they have given, not by any tremendous influence they could bring to the support of this proposition, or any proposition. that they were entitled to have a longevity-pay system written

If it was a product of a long campaign carried on in every congressional district in the country, if it was the result of a systematic effort in the gentleman's district and the district that I represent, I might look at this proposition in a way very different from the kind of consideration that I give to it. this longevity-pay legislation must by the very nature of the persons in whose interests it has been operating be solely because a good case was made out before Congress in favor of it.

Now, the gentleman says it will save some money, but he does not know how much. If there is going to be a saving it must come out of the salaries of the men and women who are teaching. It is not enough to say that the teachers are paid more than the teachers are paid in Boston or Winona, Miss. It may be that the salaries paid in Boston are much too low.

I believe that the amendment of the gentleman from Missisippi is unwise, because it will be a positive discouragement

to those whom we should encourage.

We can not have good public schools without good public-school teachers; and we can neither attract nor retain good

public-school teachers by legislating along in lines of my colleague's amendment to reduce teachers' salaries. [Applause.]

Mr. ROBERTS of Massachusetts. Mr. Chairman, as I gather from this bill by a hasty perusal there will be something like 200 or 300 teachers affected by the proposed amendment of the gentleman from Mississippi. How much they will suffer in reduction I am not able to state, and the gentleman does not seem to be able to tell us.

But I want to say in connection with this effort to reduce the salaries of the teachers in the District that I have some knowledge and familiarity with the school system, and I have given it some thought and investigation. I find from personal inspection and knowledge that we have teachers in certain grades in this District who are splendid teachers for that grade. They should be continued in that grade as long as they have the ability to serve as teachers. In other words, some men and women are temperamentally better fitted to teach kindergarten classes than advanced grades in school. They get along better with the little children and are able to bring out what is in them better than in children of advanced years.

Now, under this system of longevity pay the whole effort of the teachers of this District is directed to getting an advance in the class, getting into the higher grades. Why? they get more compensation. It is not a question of whether the teacher is fitted for the first or the sixth grade work, it is a question of getting in an advanced grade and getting higher pay, and so their efforts are all bent to being promoted, instead of having the salaries so arranged that they will be getting an increased salary by length of service in the line of work which they are best fitted to perform.

The gentleman from Mississippi advances as one of his arguments that it only affects the higher-paid teachers; that it does

not affect those that get less than \$1,190 a year. I want to ask the gentleman if he does not think that a man or a woman drawing a higher salary, many married with families to support, are feeling the high cost of living as much as the teachers in the lower grades, as much as all of us? Why should not these teachers receive a fair compensation based on the length of their service? We want to keep our teachers. When we have a good teacher, we want that teacher to remain. The gentleman may recall that because of an inadequate salary paid in the District of Columbia we have lost our superintendent of schools. Mr. Davidson, considered the best man in his line in the whole United States. Is it any benefit to the school system of the District of Columbia to lose such a valuable man as that because we can not pay an adequate salary, and is it not a fair presumption that we have-and I know we have-many teachers in the District drawing over \$1,190 who are most valuable teachers; is it not a fair presumption that if they lose the increase of salary by longevity that they will go elsewhere? I say to the gentlemen of the House that the school system of this District can not afford to lose the services of the splendid,

excellent, effective teachers such as we now have. Mr. SISSON. Will the gentleman yield?

Mr. ROBERTS of Massachusetts. I will.

Mr. SISSON. I want to say to the gentleman that the superintendent of schools and the principals are not affected at all. Their salaries are fixed by law at a specific sum. Your committee did not have that in mind at all.

Mr. ROBERTS of Massachusetts. I brought in the superintendent's salary to show that, as compared with some of the cities of this country, we are paying an inadequate salary to the superintendent; and if we are paying an inadequate salary to the superintendent, is it not fair to presume that the teachers, some of them at least, are underpaid?

Now, I have in mind a case of a teacher in the District whose health has broken from the tremendous strain under

which she has been working by reason of her duties.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

Mr. SHARP rose.

Mr. PAGE of North Carolina. Mr. Chairman, before the gentleman from Ohio [Mr. Sharp] proceeds, I ask unanimous consent that debate on the pending paragraph and the amendment be closed at half past 4.

The CHAIRMAN. The gentleman from North Carolina asks unanimous consent that debate on the pending amendment be

closed at 4.30 o'clock. Is there objection?

Mr. MANN. Mr. Chairman, reserving the right to object, the gentleman from Ohio [Mr. Sharp] desires five minutes, the gentleman from Washington [Mr. Bryan] desires five minutes, and I want five minutes. Of course we are all friends of the teachers.

Mr. PAGE of North Carolina. Mr. Chairman, I ask unanimous consent that debate may close in 30 minutes

The CHAIRMAN. The gentleman from North Carolina asks unanimous consent that debate on the pending paragraph and amendment thereto close in 30 minutes. Is there objection?

Mr. MANN. With the understanding that out of that the gentleman from Ohio [Mr. Sharp] gets five minutes, the gentleman rom Washington [Mr. BRYAN] five minutes, the gentleman from Ohio five minutes.

Mr. PAGE of North Carolina. That disposes of how many

minutes on the gentleman's side?

Mr. MANN. Twenty minutes, including myself and the gen-Mr. MANN. Twenty minutes tleman from Ohio [Mr. Sharp].

Mr. PAGE of North Carolina. And 10 minutes remaining

Mr. MANN. Yes.

Mr. PAGE of North Carolina. Is there objection?

There was no objection.

Mr. SHARP. Mr. Chairman, the gentleman from Massachusetts [Mr. Murray] a few moments ago stated that the situation was such that evidently whatever raise in salary had been granted to the school-teachers of the District in the past must have come from genuine merit, without any pull on their part. It was not my intention to say anything upon this amendment or on this bill as it applies to teachers, but to merely ask him a question. Unfortunately his time elapsed before I could do that, so that I did not get the opportunity to put this thought before the House. He touched upon a point that has been very suggestive in my study of the subject of salaries paid to schoolteachers, and it is this: We have in this country a well-organized labor force, a great labor organization, whose claims I have from time to time supported by my vote and voice, because I have recognized the inherent principle of justice and right in that organization to combine, within reasonable limits, to get better recognition and better pay. The result has been—and I think they are willing to agree to that fact—that they have been enabled thereby to considerably increase the rate of wages paid to their membership since the organization was effected. I have no complaint to make of that, because, as I have said, I think it is just, and certainly, with the increased cost of living, absolutely necessary. But when you come to consider our teachers—those poorly paid semipublic servants—and see how utterly impossible and ineffectual it is for that great body of useful citizens, men and women, to organize for such a purpose, then you commence to realize the helplessness of their position. This condition, in answer to the question of the gentleman from Massachusetts, is largely responsible for the poorly paid teachers whom we have to-day.

In scanning the provisions of this bill I find that whereas it provides for the payment of something like 1,750 teachers in the District, more than two out of three get not to exceed \$800 a year, and many of them are paid less than \$700 a year. seems to me to be a very good illustration of the unfair and ungenerous treatment of this most important class of workers, to whom we intrust for their care and training our most valued of earthly possessions—our own children. It means that whereas we paid an average-grade teacher 8 or 10 years ago what we thought to be a fair sum in consideration of his or her services, placing it at, we will say, \$800, we are to-day, if not literally and actually, at least figuratively, and to all intents and purposes, paying those teachers at the present time not 800 American dollars of their former value, but 800 Mexican dollars—60-cent dollars, if you please—in so far as their purchasing power is concerned. We too often confound the worth of a big, round silver piece with its denominational value as stamped on its face by the Government or our paper bill with a similar value. These are only mediums of exchange; they have little or no intrinsic value. If we should suddenly be cast upon some desert or uninhabited island we could not eat that silver or that paper money; they would, indeed, be of very little service to us. It is the amount of food, clothing, and rent that the dollar, whether silver or paper, stands for that possesses a real significance. If of these necessaries of life our dollar of to-day will buy but two-thirds as much as it formerly did, is not that fact worthy of thought when these salaries are to be considered? That is an additional reason why we ought at this time, instead of planning deliberately a proposition that looks to saving money by reducing the appropriations for teachers' provided for in this bill, to rather increase them. I say boldly that if I could have it in my power I would increase horizon-tally the salaries not only of every well-tried and faithful teacher in this District, but of all such teachers throughout the broad lands of the United States, by a very considerable amount. [Applause.]

The CHAIRMAN. The time of the gentleman from Ohio has

Mr. WILLIS. Mr. Chairman, I do not know that I shall occupy all the time to which I am entitled. I simply want to say it seems to me, after having heard the rather technical explanation given by the gentleman from Mississippi [Mr. Sisson], that clearing that explanation of all its verbiage it simply amounts to this: That this is a proposition covered up to a greater or less extent, made to operate in a way which we can not very well understand, but which nevertheless, in effect, is simply this, that we are proposing to undertake to save a few dollars here, as the gentleman from Mississippi says, not by reducing the salaries of the teachers—oh, no; perish the thought—not by reducing salaries, he says, but he has worked out a method whereby it will not be possible to increase salaries. Now, the effect of that is just the same as it would be if we in cold blood adopted a proposition to reduce the salaries of teachers in the District of Columbia. Now, Mr. Chairman, I do not think that the finances of the Government at this time-we can not tell how they will be later on when the new Democratic tariff law gets further into operation—but I do not think at this time that the finances of this Government are in such desperate straits that it is necessary to undertake to economize by cutting off the income of the poorest paid public servants that we have now upon the pay roll. [Applause.] Now, the gentleman from Mississippi says this does not affect the teachers who receive low salaries; that this applies only to those who are richly paid. He says it applies only to those who get the princely sum of \$1,190 a year. Why, think of what a magnificent salary that is for a man to get to live in the great city of Washington with its high prices, who proposes to own his home and raise his family—\$1,190 a year! Why, gentlemen, they are veritable Croesuses who get any such income as that.

Mr. SISSON. Will the gentleman yield?

Mr. WILLIS. I yield to the gentleman for a question. Mr. SISSON. I want to read to the gentleman—

Mr. WILLIS. I hope the gentleman will not take up my

Mr. SISSON. I only desire to call his attention to one thing. When asked about how this law operated, and its incongruities, Commissioner Siddons said that in many instances a teacher would get under longevity pay more pay than the principal of the high school.

Well, Mr. Chairman, I do not object to that. Mr. WILLIS. That does not prove at all the salary of the teacher who does the actual work ought to be cut down. If the gentleman is not satisfied with the law governing the system of longevity pay, then he ought to use his great influence to have a general overhauling of that system, and not come in here during the consideration of an appropriation bill with a proposition which in effect cuts down the salary of the teachers.

Mr. SISSON. It might be a better method to vertically raise teachers who are receiving \$500, \$600, \$700, and \$800 rather than have the longevity pay to go to those teachers who are getting \$2,200, \$2,300, \$2,400, and \$2,500.

Mr. WILLIS. Possibly; but will the gentleman bring in a

bill to accomplish that purpose?

Mr. SISSON. If I were on the legislative committee I most assuredly would, but we have to write the amendment this way to come within the Holman rule and to come on this bill.

Mr. WILLIS. The gentleman evidently used all of his power on this committee to do exactly the reverse of the thing which he says he would do if on another committee. Here is the fact, shorn of all the gentleman's eloquent explanation. The fact is that the result of this amendment will be to reduce very materially the pay going to these school-teachers.

Mr. SISSON. Only to the teacher who receives more than

Mr. WILLIS. I have the gentleman's explanation, and his

explanation of it does not explain. The CHAIRMAN. The time of the gentleman has expired.

Mr. BRYAN. Mr. Chairman, it has just been stated that the teachers are underpaid. The proposition of the gentleman from Mississippi [Mr. Sisson], representing the committee that has charge of this bill, is to save money for the Government. billion-dollar Government is to be made to spend a little less than a billion dollars by taking a few hundred dollars out of the pockets of the underpaid but overworked teachers of the city of Washington. I believe that the responsibility that the teachers of the country bear certainly is as heavy, the work they do is as important, and the returns that they are expected to render are as great as any department of public work or private enterprise in this city or any other city. I do not be-lieve this Congress ought for one moment to put this limitation on the teachers' salaries. The sum of \$100 a month is con-

sidered to be such a munificent sum that the person who receives it ought not to participate in this longevity-pay arrangement by which his salary may be raised.

The intention is to save this money by taking it out of the salaries of the teachers. Its purpose is to reduce the salaries, notwithstanding the ingenious argument of the gentleman from Mississippi [Mr. Sisson]. It can have no other purpose, because you can not save money from salaries of teachers without reducing the pay of those teachers. It makes the amount they receive each month just so much less.

The public-school system of our country is a system that not only involves the expenditure of money, the keeping up of school buildings, but it involves the education, refinement, and, to a great extent, the health of all the children of the country. come here to Washington and bring our children, and we enter them into the schools. I have three children in school here, and I find they are being well cared for, and I do not think it is right for Congress to figure on reducing the pay of the teachers. We need the very best talent for teachers.

I remember that I taught school for one year down in the State of Louisiana and received \$45 a month for it. While that may have been more than I was entitled to, Mr. Chairman, for the services rendered, I submit it was not a sufficient amount to live upon. When the suggestion is made here that men and women of this country receive an average salary of about \$50 a month, and that amount ought to be taken as a fair pay, I submit that there is too little appreciation placed upon the school system.

In Washington the schools ought to be considered the most important part of the public work. There ought to be no thought of a false economy along that line. Now, take, for instance, the salaries of our secretaries. There is not a man here who has any kind of reason within him that does not know that \$125 a month for one of our secretaries is not sufficient to enable him to properly support himself and family here in Washington, if he has a family, and that it is very hard for them to live on any such sum as that. But these teachers have to support their families; they have to figure on laying up something for a rainy day and they have to look ahead. Their efficiency as teachers as well as their plans for the future are largely dependent on the amount of salary they receive.

Mr. SHARP. Will the gentleman yield for a question?

Mr. BRYAN. Yes; I will yield.

Mr. SHARP. Is not the gentleman aware of the fact that even with \$1,500 per year paid to your secretary, it represents twice the amount paid to at least 900 teachers under this bill?

Mr. BRYAN. Yes; that represents nearly twice the amount paid to the average teacher. It may be suggested that this amendment of the gentleman from Mississippi will not affect those who receive that low pay; but it will in the end affect them, because when talented persons enter into service as teachers they have a right to look ahead to emoluments in that office in the years to come, and they have a right to think, if they enter at low pay, that in years to come they will be entitled to advances, and longevity pay is one of the means of advancing their position.

The CHAIRMAN. The time of the gentleman from Washington [Mr. Bryan] has expired.

Mr. BRYAN. Mr. Chairman, I ask unanimous consent to extend my remarks, in order to cover some of the figures I mentioned a while ago.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. MANN. Mr. Chairman, as I understand, the gentleman's amendment only cuts off longevity pay where what is called the basic salary, not including longevity, itself amounts to over \$1,190. I find that in this bill there are 1,769 teachers appropriated for, of which 49 only receive a base pay of more than \$1,190. Those are all supervisory teachers. The intermediate, the lower grades, and the grammar-school teachers are not affected by the amendment at all. There are 14 normal, high, and manual-training teachers who would be affected by the proposition. There are 12 heads of departments in the high and proposition. There are 12 heads of departments in the high and proposition. There are 6 manual-training schools who would be affected. There are 6 assistant directors of music, drawing, physical culture, and so forth, who would be affected. There is 1 assistant director of primary instruction and 6 assistant directors of music, drawing, physical culture, and so forth, who would be affected.

Now, I ask the gentleman, for information, if those are not the only ones that would be affected?

Mr. SISSON. I will state to the gentleman that if I caught his enumeration I think he has covered practically all who would be affected by this amendment.

Mr. MANN. I did not quite enumerate all of them, but there are 49 in the higher grades.

Mr. ROBERTS of Massachusetts. Will the gentleman pardon me a moment?

Mr. MANN. Yes, sir.

Mr. ROBERTS of Massachusetts. On page 34 there are mentioned 283 in group A of class 6, with a minimum salary of \$1,000 each. Under the law, if these teachers remain in the school 10 years, their salary can get up to \$1,400. So every one of these teachers may be affected by this amendment-

Mr. MANN. I did not yield for a speech.

Mr. ROBERTS of Massachusetts. I am pointing out instances to the gentleman where they would be affected.

Mr. MANN. The gentleman is making a speech. These teach-

ers are appropriated for on a basic salary of \$1,000 a year.

Mr. ROBERTS of Massachusetts. But the law gives them a

Mr. ROBERTS of Massachusetts. But the law gives that a longevity pay for 10 years.

Mr. MANN. The gentleman does not understand what the amendment is. That is the difficulty.

Mr. ROBERTS of Massachusetts. I think I understand the

amendment. Very well. Let me go on. The gentleman had Mr. MANN. his own time. The amendment affects only the pay where the base salary is over \$1,190.

Mr. ROBERTS of Massachusetts. It was not so stated in

the amendment.

Mr. MANN. The gentleman has not read the amendment. That is the difficulty with so many Members on the floor of this House who discuss things without knowing anything about them. I have read the amendment. The gentleman from Massachusetts ought to do it, and then he would know that that is the proposition. I do not favor it, although it does not affect the ordinary teachers, but affects only 49 out of 1,769. affects only the high-school teachers and the principals.

I do not see any reason why we could not pay the high-school teachers and the principals reasonable salaries. I do not believe in longevity as a proposition of itself, but I should hesi-

lieve in longevity as a proposition of itself, but I should hesitate about cutting off these salaries.

Mr. SISSON. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Illinois yield?

Mr. MANN. I have not the time. I should hesitate to cut off these salaries now, when there is no proper fixing of salaries. In addition to that, I suppose if it applied only to this appropriation they would have a claim. But here are principals who are now receiving \$2,000. In the case of the director of primary instruction, with \$1,800 base salary, with longevity pay, that would amount probably to several hundred dollars a year. I doubt the propriety of Congress attempting to cut those year. I doubt the propriety of Congress attempting to cut those salaries down without giving the board of education the power to pay commensurate salaries to those teachers.

The CHAIRMAN. The time of the gentleman from Illinois

has expired

Mr. PAGE of North Carolina. Mr. Chairman, it seems to me that a great deal of what has been said in this debate is based upon a misapprehension as to what the amendment offered by the gentleman from Mississippi [Mr. Sisson], for the committee, really is. It is certain that the gentleman from Massachusetts [Mr. Roberts] made his speech and based his whole argument upon a false assumption of what the amendment is. tleman from Illinois [Mr. MANN] has properly stated what the amendment is and who would be affected by the adoption of it.

The amendment provides that-

No teacher or other person employed in the public schools of the District of Columbia receiving a base pay of \$1,190 or more per annum under the act approved May 26, 1908, shall receive or be entitled to any longevity pay under said act.

It would affect only the salaries, so far as the longevity pay is concerned, of teachers employed at a basic pay greater than \$1,190 per annum.
Mr. MURRAY of Massachusetts. Mr. Chairman, will the gen-

tleman yield?
The CHAIRMAN. Does the gentleman yield?

Mr. PAGE of North Carolina. I yield. Mr. MURRAY of Massachusetts. Has not every teacher, even those teachers who are not in that grade, constantly before him or her the hope of getting into that grade?

Mr. PAGE of North Carolina. Certainly; and they are not affected when they get into it. There is no basic pay, except as

to about 20 or 30, that are above \$1,190 now.

Mr. MURRAY of Massachusetts. That is true; but has not

every teacher, even the newest teacher in the District, the hope of getting into that class which, though small in number, is to be actually affected by this legislation? Will not every teacher be affected by being excluded from the possibility of getting into

Mr. PAGE of North Carolina. Oh, I do not know that I can

answer the gentleman exactly, because I do not know the aspirations of the teachers in the classes.

Mr. MURRAY of Massachusetts. It is reasonable to suppose that the aspiration of all of them is to get the most pay.

Mr. PAGE of North Carolina. In reply to the gentleman from Massachusetts [Mr. MURRAY], and diverting a little from what I was going to say, I will state that the gentleman from Massachusetts awhile ago made the remark that this law was enacted and placed on the statute books without any great influence or influential body being brought to bear upon Members of Congress in its behalf; that here were a few hundred school-teachers in the District of Columbia without influence, and still this law has been placed upon the statute books. I want to ask the gentleman from Massachusetts if he seriously supposes that about 1,800 school-teachers in the city of Washington, a large proportion of them ladies, have no influence upon the membership of this body?

Mr. MURRAY of Massachusetts. They surely have no voting influence, and I restricted it to voting influence. Not one of

them has a vote.

Mr. PAGE of North Carolina. No; but sometimes there is influence that is very much greater than voting influence. [Ap-

Mr. MURRAY of Massachusetts. There was only one time in my life when I met that influence.

Mr. PAGE of North Carolina. Certainly every man has met it at least once, if he has gone very far along the journey of

Mr. Chairman, it appears in the hearings and in the estimates for this longevity pay, and all the estimates submitted for the conduct of the public schools in the city of Washington, that those estimates as made up by the school board came to the Committee on Appropriations without the crossing of a "t" or the dotting of an "i" by the Commissioners of the District of

In other words, the Commissioners of the District of Columbia did not exercise in the slightest degree their supervisory powers over these estimates. There was enough influence to reach even these gentlemen, and there is enough influence to

reach gentlemen in Congress.

I am not here to advocate any injury to the schools of the city of Washington, and I can say truthfully that the largest increase in appropriations made in the bill presented at this time is for the conduct of the public schools in the city of Washington. Your committee are not antagonistic to the school They are not antagonistic to the teachers who are employed in these schools; but they believe that the appropriation made here for longevity pay should be used for the teachers in the lower grades, who are receiving less than \$1,200 a year.
Mr. SHARP. Will the gentleman yield for information?

Mr. PAGE of North Carolina. Certainly.
Mr. SHARP. The gentleman refers to the largest increase in the bill as being for public schools. Is that increase for build-

ings or for pay?

Mr. PAGE of North Carolina. It is for both; for no increase in the pay of any one teacher, but for the increase under the longevity law and in the aggregate. For instance, the increase in this appropriation for longevity pay is very considerable, and there is an increase in the appropriation for the construction of new buildings and for the extension of school grounds; and it is the largest increase of any one item in the bill.

Mr. WILLIS. I understand that the gentleman believes in the principle of longevity pay. Now, what is the reason for drawing the line at the point indicated by this amendment? I

have heard no reason given by anyone.

Mr. PAGE of North Carolina. If the gentleman wants my personal opinion about longevity pay, I stated it here a few days ago on the floor of the House. So far as I am personally concerned I do not believe in the principle of longevity pay.

Mr. WILLIS. The committee does,

Mr. PAGE of North Carolina. The committee has followed the law in regard to longevity pay. I do not know the individual opinions of the members of the committee on the subject.

Mr. WILLIS. That is really not material to the question I want to ask the gentleman, which is. Why did the committee draw the line at this particular point? If it is a good principle, why apply it at one place and not at another?

Mr. PAGE of North Carolina. The law did that; we did not

do it.

Mr. WILLIS. No; but there is a limit of \$1,190. Mr. PAGE of North Carolina. They drew it at that amount because most of the teachers are below that sum and are not affected in the slightest degree. The committee believe that for these higher places the salaries ought to be fixed by law, at

what they are now or more, as the case may be.

Mr. Chairman, I do not care to prolong this discussion. I
presume every member of this committee has his mind thor-

oughly made up now as to how he is going to vote. Nothing that I could say would change it; and unless some other gentleman on this side of the House desires the remaining time, I ask for a vote.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Mississippi.

The affirmative vote was taken.

Mr. BRYAN. Mr. Chairman, a point of order. The point of order was reserved on this amendment. It seems to me this is exactly what is intended to be prohibited by the rule. It certainly is substantive legislation that is offered here to annul the existing law. Now, if in making this appropriation we can repeal the existing law as to longevity pay by inserting a provision that puts that law out of business, then we are certainly able to open up a wide range of legislation, and I submit that the amendment is out of order.

Mr. PAGE of North Carolina. In reply to the gentleman from Washington, I desire to say that the amendment is clearly in order under what is known as the Holman rule. It will unquestionably reduce expenses and reduce the amount of the bill. Mr. ROBERTS of Massachusetts. You can not tell how

Mr. MANN. The Chairman of the Committee of the Whole House on the state of the Union [Mr. HULL] made a ruling the other day which, it seems to me, is conclusive upon this propo-In ruling upon the amendment offered by the gentleman from Missouri [Mr. Borland] the other day, the Chair ruled that, while the committee, or a member of the committee by authorization of the committee, might offer an amendment to reduce expenditures or retrench expenses, a Member from the floor could not offer such an amendment unless it went further than that.

The Chair sustained the point of order, which I made, on the Borland amendment, on the ground that it was offered by an individual Member on the floor, as this is, without authority of the committee which has jurisdiction of the subject matter. Laying aside the question of the right of the District Committee to offer the amendment, the amendment must provide that it shall retrench expenditures by number and salary of the officers of the United States. These teachers are not officers of the United States. "By reduction of compensation of any person paid out of the Treasury of the United States." I do not think that they come within that view. Or "by reduction of the amount of money covered by the bill." Of course, it does not purport to reduce the amount of money covered by the bill.

Mr. SISSON. Mr. Chairman, if the Chair will examine the Holman rule, he will find that one provision is that it "reduces the salary of any person paid out of the Treasury of the United States." One-half of these salaries being paid out of the Treasury of the United States, therefore this is in order, not under the proviso but under the other portion of the Holman rule, under the rule itself. This is clearly within that rule. The estimates last year under the longevity pay were three hundred and some-odd thousand dollars. They were given \$375,000, and there was a deficit of \$37,000. This year's

estimate of longevity pay is that it will take \$462,035.

So your committee know that it does reduce the amount of money paid to persons drawing a salary out of the Treasury of the United States, and for that they were warranted in reporting this amendment, because these teachers receive one-half of their pay out of the Treasury of the United States, and the effect of the amendment would be that it would reduce the amount of money paid out of the Treasury to these teachers received under longevity pay where the amount they now receive is over \$1,190. The effect is a direct and immediate

reduction of the amount of money paid out of the Treasury.

Mr. STAFFORD. Mr. Chairman, in a lengthy decision delivered by the present occupant of the chair on the Borland amendment he pointed out that the amendment did not come within the three provisions of the first part of the Holman rule. I wish to take issue with the distinguished gentleman from Illinois [Mr. Mann] that the second provision of the first part which says "if it relates to the reduction of the compensation of any person paid out of the Treasury of the United States," does not bring these school-teachers within that provision. Certainly a part of the compensation of these school-teachers is paid out of the Treasury of the United States, half from the District and half from the Treasury; and, further, this amendment would come within the third class of the first provision by a reduction of the amount of money covered by the bill. The effect of this amendment will be to reduce the expenditures of the District as covered by the bill. I do not think there can be any question under the precedents of the House that this is clearly within the provision of the Holman rule.

Mr. BRYAN. Mr. Chairman, if this amendment provided some requirement as to the ages of the teachers, it might be said that it reduced expenditures, but nevertheless it would be substantive legislation and would be outside of the purview of this bill. It would be repealing a statute already fixing these matters.

The CHAIRMAN. The Chair is ready to rule. The point of order is made against the amendment on the ground that it does not meet the requirements of clause 2, Rule XXI. number of authorities are cited, both pro and con. others was a decision rendered during the early consideration of this bill relative to an amendment proposing to enact a system of taxation in this District against certain kinds of local benefits. That point of order was disposed of upon the theory that the amendment would establish by a comprehensive provision of law a system of assessments to be levied upon the owners of property abutting on streets that were improved by either of a number of different methods which the amend-

ment prescribed.

In view of the permanent character and comprehensive provisions of that amendment the Chair did hold that it in its very nature constituted a separate, substantive, permanent The pending amendment, the Chair thinks, is germane to the subject matter of the bill, or rather to the paragraph to which it is offered. He is also of the opinion that it complies with at least one of the requirements of clause 2, Rule XXI, Upon its face it proposes to eliminate from the longevity-pay law a certain class of those who otherwise would be beneficiaries of appropriations made by its authority, and thereby to reduce expenditures. The Chair thinks it does not come within the class of separate, substantive, permanent provisions of law, such as was involved in the amendment ruled on last Saturday, and fell under the proviso of clause 2, and therefore the point of order is overruled, and the question is on agreeing to the amendment

Mr. BRYAN. Mr. Chairman, I move to amend the amendment by the following, which I send to the Clerk's desk and ask to have read.

The Clerk read as follows:

Amend the pending amendment by striking out "\$1,190" and inserting "\$1,500."

The CHAIRMAN. The question is on agreeing to the amendment to the amendment.

The amendment to the amendment was rejected.

The CHAIRMAN. The question now is on agreeing to the amendment.

The question was taken; and on a division (demanded by Mr. Sisson) there were—ayes 28, noes 72.
Mr. PAGE of North Carolina. Mr. Chairman, I demand

tellers.

The CHAIRMAN. The gentleman from North Carolina demands tellers. As many as are in favor of ordering tellers will rise and stand until counted. [After counting.] Eighteen Members have risen, not a sufficient number, and tellers are refused. The Clerk will read.

The Clerk read as follows:

Central High School and annex: Janitor, \$900; laborers-1, \$420; at \$360 each; in all, \$2,400.

Mr. DYER. Mr. Chairman, I move to strike out the last word. Do I understand that the pay provided for these people of \$420 and \$360 is for all of their time to be devoted to this work, or for only a portion of it?

Mr. PAGE of North Carolina. The hearings before the committee show that these people give only a few hours a day to

Mr. DYER. Mr. Chairman, I withdraw the pro forma amend-

The Clerk rend as follows:

The Clerk read as follows:

Medical inspectors: Thirteen medical inspectors of public schools, one of whom shall be a woman, two shall be dentists, and four shall be of the colored race, at \$500 cach; in all, \$6,500: Provided, That said inspectors shall be appointed by the commissioners only after competitive examination, and shall have had at least three years' experience in the practice of medicine or dentistry in the District of Columbia, and shall perform their duties under the direction of the health officer and according to rules formulated from time to time by him, which shall be subject to the approval of the board of education and the commissioners.

Mr. MANN. Mr. Chairman, I reserve the point of order on the paragraph. I ask the gentleman what is the object of the proviso in this bill, it already being in the current law?

Mr. PAGE of North Carolina. Because it refers to these

Mr. PAGE of North Carolina. Because it refers to these particular inspectors, and it is the limitation upon them and on this particular paragraph.

Mr. MANN. I withdraw the point of order, although it is subject to a point of order. It is not a limitation.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

A detailed statement of the expenditure of the appropriation made for purposes expressed in the foregoing paragraph shall be submitted to Congress in the Book of Estimates for the fiscal year 1916, and annually thereafter

Mr. MANN. Mr. Chairman, I reserve the point of order on the paragraph. What does the gentleman expect to get by the expression "detailed statements of the expenditures

Mr. PAGE of North Carolina. Mr. Chairman, heretofore in these appropriations for contingent and miscellaneous expenses and in the estimates, in addition to the appropriation made in a lump sum for the expense of repairs for the school buildings in the District of Columbia, there has come to be a large number of special items of special repairs in almost every bill. Your committee, in framing this bill, decided that it was a very much better practice to have the appropriations for these expenses made in one item, and they therefore disallowed the special items that were asked for, but increased this item by several thousand dollars above the estimate submitted to them by the commissioners. In reply to the gentleman's question I will say that I think the language of the proviso answers itself. A detailed statement would include the expenditure of money on each separate building that was repaired, the amount of money expended, and the nature of those repairs, in the aggregate, and explain how the entire appropriation of \$115,000 was expended.

Mr. MANN. The gentleman is aware that in recent years we have put in a great many provisions of this kind calling for detailed statements of expenditures. For instance, we require a statement of traveling expenditures. One department will make a report that will give the dates of persons traveling, another department leaves out the dates, and one department will put in what they were traveling for, while another leaves

that out entirely.

It is true that all of them in some way get at the items, though they do not take the trouble to give the details. In some of these detailed statements which we require in the Indian Service, what is called a detailed statement will contain nothing but the different Indian reservations, with practically no further information and that runs all through them until we have a mass of that stuff, or those of us who examine the reports, that in the main gives no information, and you have to look through them to find out that you can not find out anything about them.

Mr. PAGE of North Carolina. Let me ask the gentleman this: In spite of the justice in some degree of the criticism that he is making, and of the manner in which these statements are made, in compliance with provisions of this sort, does he not think that a distinct benefit comes from a provision of this kind, and from the statements made, even though they may be, from his point of view, imperfect statements?

Mr. MANN. I do think this, that where a department is required to make a detailed statement, the fear that some one will criticize what has been expended has a slight tendency at

least to prevent undue and improper expenditures.

Mr. PAGE of North Carolina. I agree with the gentleman. Mr. MANN. That may be the case here. I wish, however, that some one in the administration with authority, or by legislation, would provide a more uniform system of making these detailed statements.

Mr. PAGE of North Carolina. Well, I agree with the gentleman.

Mr. MANN. So they would cover somewhat the same ground

and be comparable one with the other.

Mr. PAGE of North Carolina. I agree with the gentleman there is need for some system being evolved by which there may be uniform detailed statements.

Mr. MANN. What the gentleman wants is to get out of this practically a statement of schools—

Mr. PAGE of North Carolina. Yes, sir; of school buildings. Mr. MANN. But the gentleman does not want a detailed statement of all the items?

Mr. PAGE of North Carolina. No; not necessarily. I do not imagine we will get that, because we do not enter upon too great detail; but we will get the exact expenditure on each school building.

Mr. MANN. I withdraw the point of order. Mr. PAGE of North Carolina. Mr. Chairman, in order that it may appear in the RECORD, not so much for the Committee of the Whole as for the persons who have charge of the expenditures of this lump-sum appropriation for the repair of school buildings in the District of Columbia, I desire to make a statement which, in my judgment, shows that there is some necessity for having a report made to the Congress as to the swept before his own door?

expenditures made from this lump-sum appropriation and from all other lump-sum appropriations.

In the estimates submitted to the committee or to the Congress there was one for thirty-odd thousand dollars for a building and the approaches to a school building that had been authorized, appropriated for, and constructed under a former bill. The evidence came out in the hearings that this particular school building had been constructed under a provision of the appropriation—I believe on Georgia Avenue—on a terrace 40 feet above the street level, and that the original appropriation was intended to complete the building entirely, and the approaches as well as the building. As a matter of fact, a condition exists by which the appropriation was all expended, and the building is 40 feet above the street level, with no provision made for getting to it except to climb up this embankment.

A little inquiry developed the fact that the original plan prepared by the municipal architect provided for the construction of the building as well as the approaches and the entire com-pletion within the appropriation. The style of architecture did not meet the approval of that recently created board of censors, the Fine Arts Commission, and they changed the style of that architecture from the dorie to the colonial. The result was that this change of architecture—as appears from the testimony in the hearings before this committee given by the municipal architect and others-did not improve in the slightest degree the school building; in fact, the direct testimony is that the style of architect under the direction of the Fine Arts Commission is vastly less desirable for a school building than the one originally planned, giving less light. Now, because of the interference or judgment of this Fine Arts Commission they find themselves \$32,000 short of completing the building for the proper use of the children of the District. We increased this sum for the purpose of allowing some sort of approach to be made to that building, in the hope that in the future the expenditure of money for the construction of public-school buildings, particularly when the amount asked for in the estimates is granted, that those in authority may get their contracts and construct the buildings so that they may be completed within the amount appropriated.

The Clerk read as follows:

For purchase and repair of tools, machinery, material, and books, and apparatus to be used in connection with instruction in manual training, and incidental expenses connected therewith, \$25,000.

Mr. BRYAN. Mr. Chairman, I move to strike out the last Now, we have here an \$85,000 appropriation for fuel, gas, electric light, and power, representing 4 per cent on over \$2,000,000. Mr. Chairman, it seems to me that this committee, which no doubt has been carefully considering questions involving the District of Columbia, its development, and its industrial welfare, ought to have considered up to this time something more on this subject of improving and obtaining some development of power out of the Great Falls, of which we have talked. It seems to me that this committee ought to feel censured every time it looks at an electric light until they do something toward the development of water power here in the District of Co-

Mr. PAGE of North Carolina. Will the gentleman yield?

Mr. BRYAN. Certainly.

Mr. PAGE of North Carolina. Does the gentleman know this committee reporting this bill has no power to legislate? Which is the gentleman lecturing, the present committee or some other?
Mr. BRYAN. If this committee has no power to consider

this proposition, and I understand they have a right to consider some of these constructive enterprises, as well as some of the appropriations for schools—
Mr. PAGE of North Carolina. I do not know where the

gentleman got his understanding.

Mr. BRYAN. Then the proper committee of this House ought to feel censured every time they look at the electric light, and this committee ought to become very active when it comes to an appropriation here for \$85,000 for these things, in view of the fact that these falls out here are unimproved and the immense power that is there ready to be generated, and realizing the fact that Congress is absolutely ignoring and paying no attention to it. Here in the District of Columbia we are compelled to pay

Mr. SISSON. How many times has the gentleman been be-fore the proper committee of this House urging this important

matter:

Mr. BRYAN. I may have been delaying it somewhat, but I

am getting busy now.

Mr. SISSON. Does not the gentleman think that he ought to adopt the rule that was adopted in Jerusalem, which was said to be the cleanest city in the world because every man

Mr. BRYAN. I am sweeping in front of my door now. Here we are paying every kind of price for electric current, and the complaint is made that there are no manufactories when we could just as easily afford effective power by a little development and a little expenditure of money, and I think the committee of this House which has that matter in charge ought to feel humiliated and ought to feel censured because such a matter as this is neglected.

Mr. MANN. Mr. Chairman, I would like to oppose the mo-tion. I do not think this is the time for serious consideration of an appropriation bill, anyhow, because of the temper the House is in now.

The gentleman from Washington [Mr. BRYAN] calls attention to the possibilities of water power at Great Falls, but his complaint is not as well founded as he thinks it is. I do not know whether the gentleman has ever visited the Great Falls or not. I would advise him to go there himself and look at the place. It is not a very simple proposition, by any means. It is a grave question in my mind whether you can construct a water power there at all under any circumstances; but whether you can or not, with the development of water power or the electrical power through water power, as it has been growing in the last few years, several years ago Congress undertook to investigate the subject at Great Falls. I do not think we have been derelict on that subject.

The use of electric power and water power had come to that point in the country where it attracted the attention of the bill to the Great Falls. A commission was appointed or engineers instructed—I have forgotten which—at some considerable expense, to investigate and make a report. I dare say the gentleman from Washington has not yet read the report.

Mr. BRYAN. Yes; I have. Mr. MANN. I am glad the gentleman from Washington has read it. If he has, he knows that report does not settle the matter-that it is not yet determined whether it will be possible to erect a dam at Great Falls or whether it is a practical propo-Now, that report has not been before Congress. committee of the House which ought to deal with it up to date has had no opportunity of passing upon the question; and the Committee on Appropriations, which ordinarily steals the jurisdiction of such matters, did not attempt to do it this year, and I suppose, for two reasons: First, they did not desire to enter into a controversy; second, they had not yet made up their minds as to whether it was a feasible proposition.

Mr. BRYAN. Will the gentleman yield?

Mr. MANN. Certainly.

Mr. BRYAN. Is it not a fact that a million dollars, or some such an amount asked for, has been cut off of the necessary

appropriation in order to cut expenditures?

Mr. MANN. It is possible the million dollars ought to be appropriated. I do not know. The commissioners, I believe, made an estimate, or threatened to make one, for \$1,000,000 And yet I do not believe that any business man who would have to expend his own money would endeavor to put it into this proposition until he had better reports than Congress has up to date. It may be there will be great power there, but since I have read the report of one of the doctors in the Public Health Service, an expert in his profession, that the water just below Great Falls, which is the clearest water in this part of the country, is so foul that a dirty boy dare not bathe in it, I am not so ready to accept expert opinions offhand without further knowledge. Undoubtedly, if it is possible we will develop water power at Great Falls, and then we will have light enough to go around—in this Hall perhaps. [Applause.] The CHAIRMAN. The Clerk will read,

The Clerk read as follows:

For utensils, material, and labor, for establishment and maintenance of school gardens, \$1,200.

Mr. WILLIS. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Ohio [Mr. WILLIS]

moves to strike out the last word.

Mr. WILLIS. The gentleman from North Carolina [Mr. PAGE] will remember that when we had this item up for discussion last year and the year before we had something of a heated controversy about it. I am not disposed to renew that controversy, but I want to ask the gentleman whether there were any representations made to the committee in the hearings concerning this item? I have looked over the hearings carefully and can not find anything about it. Was any statement made

Mr. WILLIS. Yes; the item just read?

Mr. WILLIS. Yes; the item just read?

Mr. Dage of North Carolina. The just read?

Mr. WILLIS. Yes; the item just read. I can not find anything concerning it. It is at the top of page 43, for school

gardens. I could not find anything in the hearings on the subject.

Mr. PAGE of North Carolina. I think there is nothing in the hearings touching that item.

Mr. WILLIS. This is the same as it was last year?

Mr. PAGE of North Carolina. Yes; this is the same as it was last year, and the same amount that was estimated for as being necessary to carry on the work already established. No change was asked of the committee, and we appropriated the same amount on the representation that that amount was

Mr. MANN. Mr. Chairman, may I ask the gentleman from Ohio a question?

Mr. WILLIS. Yes. Mr. MANN. If I recollect aright, last year my friend from Ohio said that unless this item was increased the work on the gardens would have to stop, and even the schools would have to be closed. [Laughter.] Was that the reason for the action of the House in not making the increase?

Mr. WILLIS. The memory of the gentleman is at fault with I did not say that the work would cease or espect to that. that the schools would be closed. I did say that the work could not be increased as much as I wanted it to be increased.

Mr. MANN. Well, I remember the gentleman moved me to

tears last year by what he said about it. [Laughter.] Mr. WILLIS. I feel very highly complimented by the suggestion that I was able to do such a thing as that. I withdraw

the amendment, Mr. Chairman. The CHAIRMAN. The pro forma amendment is withdrawn.

The Clerk will read.

The Clerk read as follows:

It shall not be lawful for any person employed under or in connection with the public schools of the District of Columbia to solicit or receive, or permit to be solicited or received, on any public-school premises, any subscription or donation of money or other thing of value from pupils enrolled in such public schools for presentation of testmonials or for any other purposes.

Mr. WILLIS. Mr. Chairman, I reserve a point of order on this paragraph just read.

The CHAIRMAN. The gentleman from Ohio [Mr. Willis] reserves a point of order on the paragraph.

Mr. WILLIS. I am willing that the gentleman from North

Carolina may make a statement. Mr. PAGE of North Carolina. Does the gentleman reserve it?

Mr. WILLIS. I reserve the point of order.

Mr. PAGE of North Carolina. And the purpose of the gentleman's reservation is that the chairman may make an explanation?

Mr. WILLIS. Decidedly, unless the gentleman wants me to

make the point of order.

Mr. PAGE of North Carolina. Mr. Chairman, your committee placed this paragraph in the appropriation bill because of evidence adduced in the hearings in relation to the solicitation of funds for various and sundry purposes from the children in the public schools of the city of Washington. We found that we had reached a place where it had become almost a nuicance. Solicitations were made for all sorts of charitable purposes, and there were constant collections and subscriptions among the school children, even of the grammar grades, for this purpose or that purpose or the other purpose, until there was great complaint, not only on the part of some of the children themselves, but also on the part of the parentc. so much of a nuisance that your committee felt that the charitable institutions or the Board of Charities of the city of Washington should take care of the cases of charity, and not poor children in the public schools.

Mr. COX. I see that the provision carries no penalty. How

do you propose to enforce it?

Mr. PAGE of North Carolina. There are many provisions of law that carry no penalty.

Mr. COX. How do you hope to enforce it?

Mr. PAGE of North Carolina. We hope that the expression of disapproval here will result in the discontinuance of this practice in the schools.

Mr. WILLIS. Mr. Chairman, I have listened to the gentleman's explanation and am in sympathy with the gentleman's purpose that he expresses as having been arrived at in the committee; but it seems that this amendment includes some things that the committee would not wish to include. I referred a moment ago to the school gardens. As the gentleman knows, a great deal of that work is carried on entirely outside of the appropriation that we make here. It is carried on largely by

the children themselves.

Mr. PAGE of North Carolina. By contributions made to it?

Mr. WILLIS. Yes. The children themselves make contributions. Now, as I read this language in this paragraph, no teacher could receive contributions, as they have been receiving them heretofore, for the purpose of buying fertilizer or seeds,

and so forth, to be used in these school gardens.

Mr. PAGE of North Carolina. They could not receive them if they were solicited or contributed upon the school grounds.

Mr. WILLIS. Does the gentleman think that is a wise provision—to make it necessary for the teachers to get the pupils off into an alley somewhere to solicit these contributions?

Mr. PAGE of North Carolina. No; and if the gentleman will permit, I think they ought not to get them off into an alley or elsewhere to solicit subscriptions, either in public or private, for any purpose. If the children in the school want to make a contribution, that is another matter, and that can be arranged.

Mr. WILLIS. But the language of this paragraph will abso-

lutely prohibit that, because it reads:

To solicit or receive.

So if a pupil should come to a teacher desiring to make a contribution for the school garden work, it could not be re-

ceived, probably.

Mr. PAGE of North Carolina. Let me suggest to the gentleman from Ohio that if we do not close the gap entirely we can not write this paragraph so as to close it at all; and if you permit certain of these activities under the language you write, you will permit all of them, and the abuses in the schools in

this regard will go on unabated.

Mr. WILLIS. Does not the gentleman think it would be perfectly safe to leave the regulation of a matter of this kind in the hands of the school board? Has not the school board already adopted regulations to prevent the taking up of sub-scriptions for the giving of testimonals to teachers? I am in-

formed that is the fact.

Mr. PAGE of North Carolina. This power is now vested in the school board.

Mr. WILLIS. Does not the gentleman think it is sufficient to

let the school board act in the premises

Mr. PAGE of North Carolina. In the light of some things that have taken place and of the abuses that have gone on in the schools in this matter I think not. I believe some other restriction ought to be placed upon them.

Mr. WILLIS. I have the greatest respect for the gentleman's opinion, but I think this amendment is too broad, and unless I get some further light on the subject I am disposed to

make the point of order.

Mr. PAGE of North Carolina. If the gentleman intends to do that. I wish he would do it at this point.

Mr. WILLIS. I will reserve it.
Mr. MANN. Will the gentleman yield for a question?

Mr. PAGE of North Carolina. Certainly.

Mr. MANN. Does the gentleman think this provision without a penalty clause attached to it would be at all effective?

Mr. PAGE of North Carolina. I think it would be to a cer-

tain degree; yes.

Mr. MANN. The gentleman knows that there is a provision of law now forbidding the raising of subscriptions in the depart-

Mr. PAGE of North Carolina. Yes.

Mr. MANN. And the gentleman knows that constantly the departments are engaged in raising subscriptions to give something to some retiring officer. I think the law provides that the person doing this shall be dismissed from the service, but I am sure no one has ever heard of anyone being dismissed from the service for that reason, and I am sure I never heard of anyone being discharged. One of the notable cases was that of the auditor of this District at one time.

Mr. PAGE of North Carolina. This committee had no desire to be so drastic about this matter as to write a penalty into the law, but we merely intended to give warning to these people, believing that they would heed the action of Congress in the matter, and that this practice that has grown up to a very great

extent in the schools would be discontinued.

Mr. MANN. If you are going to write a law that is not needed for people of ordinary ethical principles, you ought to write it so that it will have to be observed by those who do not have the finer sense.

Mr. PAGE of North Carolina. As a general principle, I agree with the gentleman, but in this particular item we thought it ought not to be so drastic.

Mr. WILLIS. I make the point of order.

The CHAIRMAN. The point of order is sustained.

Mr. PAGE of North Carolina. I offer the following amendment-

Mr. MANN. Oh, let us rise.

Mr. PAGE of North Carolina. Let us have this amendment read, and then I will move to rise.

The Clerk read as follows:

On page 44, after line 17, insert:

"No part of any money appropriated by this act shall be paid to any person employed under or in connection with the public schools of the District of Columbia who shall solicit or receive, or permit to be solicited or received on any public-school premises, any subscription or donation of money or other thing of value from pupils enrolled in such public schools for presentation of testimonials, or for any other purposes other than for the promotion of school athletics and commencement exercises of high schools."

Mr. WILLIS, I reserve a point of order on the amendment.

Mr. WILLIS. I reserve a point of order on the amendment, Mr. PAGE of North Carolina. Mr. Chairman, I ask for a ruling. This is a limitation on the expenditure of the money, and, to my mind, is clearly in order. It fixes the penalty, about which the gentleman from Illinois was concerned.

Mr. MANN. I understand the amendment the gentleman now offers excludes from the prohibition from raising money for the school athletics and commencement exercises for high school.

Mr. PAGE of North Carolina. Yes; and fixes the penalty that no part of the money shall be paid to anyone who violates the law.

Mr. WILLIS. Would not the gentleman include in the exceptions the school gardens? That is what I am seeking to protect.

Mr. PAGE of North Carolina. Yes; I will except that. Mr. Chairman, I ask unanimous consent to modify the amend-

ment by including in the exceptions "school gardens."

The CHAIRMAN. The gentleman from North Carolina asks unanimous consent to modify his objection by including in the exceptions school gardens. Is there objection?

There was no objection.

Mr. BRYAN. Will the gentleman yield for a question?

Mr. WILLIS. Mr. Chairman, I withdraw the point of order. Mr. McCOY. Mr. Chairman, I ask that this paragraph in the bill may be passed over until we can consider the amendment. It seems to me rather drastic that a school-teacher should be cut out of a month's salary because she permitted the boys to violate a law.

Mr. PAGE of North Carolina. Why, Mr. Chairman, complaint comes from one gentleman that there is no penalty attached to

it, and now from another that the penalty is drastic.

Mr. MANN. It seems we do not all agree.

Mr. PAGE of North Carolina. I think before the committee rises I would like to dispose of this amendment.

Mr. McCOY. Well, Mr. Chairman, I ask that it be passed

Mr. PAGE of North Carolina. The point of order has been withdrawn.

Mr. McCOY. I make the point of order.

Mr. PAGE of North Carolina. It is too late; there has been discussion of it.

Mr. McCOY. The point of order was reserved by the gentleman from Ohio [Mr. Willis].

Mr. PAGE of North Carolina. The point of order was made. Mr. WILLIS. I did not make it; the gentleman from New

Jersey was also reserving the point of order.

Mr. McCOY. The gentleman from Ohio reserved the point of order, and during that reservation the discussion took place. Now, if the gentleman from Ohio does not want to make the point of order, I do make it.

The CHAIRMAN. The Chair is under the impression that this is a limitation within the meaning of the rule, a limitation

on the appropriation.

Mr. McCOY. It is in the nature of creating a criminal offense and fixing a penalty. If that can be a limitation on the expenditure, it seems to me to be going a good ways.

The CHAIRMAN. The point of order is overruled.

Mr. BRYAN. Mr. Chairman-

The CHAIRMAN. Debate is exhausted on the amendment. Mr. LINTHICUM. Mr. Chairman, I demand the regular

Mr. MANN. Mr. Chairman, the amendment has just been held in order, and therefore debate can not be exhausted on it. Before that debate was proceeding by unanimous consent.

The CHAIRMAN. The point of order was reserved, and yet the merits of the question were discussed by gentlemen on the floor. The Chair will recognize the gentleman from Washington [Mr. BRYAN].

Mr. PAGE of North Carolina. Mr. Chairman, I ask that debate on this amendment may close in five minutes.

Mr. McCOY. Oh, make it 10 minutes. Mr. PAGE of North Carolina. I move, Mr. Chairman, that the committee do now rise.

Mr. BRYAN. But I have the floor, Mr. Chairman. The CHAIRMAN. The Chair has recognized the gentleman from Washington [Mr. BRYAN].

Mr. BRYAN. I am going to make this statement if it can be made.

Mr. MANN. The gentleman can get a chance when we go back into committee.

Mr. BRYAN. Mr. Chairman, the penalty provided here is extraordinary and-

Mr. HEFLIN. Mr. Chairman, a parliamentary inquiry. The CHAIRMAN. The gentleman will state it:

Mr. HEFLIN. Under the order of the House, the committee was to rise when the conference report on the currency bill

The CHAIRMAN. The gentleman from Washington has the floor, and the gentleman from Alabama can not interrupt him.
Mr. UNDERWOOD. Mr. Chairman, will the gentleman from Washington yield?
Mr. BRYAN. Yes; certainly.

Mr. UNDERWOOD. If the gentleman from Washington will allow me to make a suggestion, as soon as the gentleman from North Carolina has an opportunity he intends to move that the committee rise, so that the conference report on the currency bill can be perfected. I presume that the gentleman from Washington will prefer to make his remarks when the House goes back into the committee.

Mr. BRYAN. Very well, Mr. Chairman; I will yield the floor

with that understanding.

Mr. PAGE of North Carolina. Mr. Chairman, I move that the

committee do now rise.

The motion was agreed to; accordingly the committee determined to rise, and the Speaker having resumed the chair, Mr. HULL, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 10523, the District of Columbia appropriation bill, and had come to no resolution thereon.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Tulley, one of its clerks, announced that the Senate had passed bills of the Senate of the following titles, in which the concurrence of the House of Representatives was requested:

S. 3192. An act waiving the age limit for appointment as cadet engineer in the Revenue-Cutter Service of the United

States in the case of John S. McKinney;

S. 1346. An act to authorize the Eastern Maine Railroad to construct, maintain, and operate a bridge without a draw across the Penobscot River between the cities of Bangor and Brewer, in the State of Maine; and

S. 1784. An act restoring to the public domain certain lands heretofore reserved for reservoir purposes at the headwaters

of the Mississippi River and tributaries.

The message also announced that the Senate had passed with amendments bills of the following titles, in which the concurrence of the House of Representatives was requested:

H. R. 1967. An act regulating the manufacture of smoking opium within the United States, and for other purposes; and H. R. 1966. An act to amend an act entitled "An act to pro-

hibit the importation and use of opium for other than medicinal purposes," approved February 9, 1909.

SENATE BILLS REFERRED.

Under clause 2, Rule XXIV, Senate bills of the following titles were taken from the Speaker's table and referred to their ap-

propriate committees, as indicated below:

S. 3192. An act waiving the age limit for appointment as cadet engineer in the Revenue-Cutter Service of the United States in the case of John S. McKinney; to the Committee on Interstate and Foreign Commerce.

S. 1346. An act to authorize the Eastern Maine Railroad to construct, maintain, and operate a bridge without a draw across the Penobscot River between the cities of Bangor and Brewer, in the State of Maine; to the Committee on Interstate and Foreign Commerce.

S. 1784. An act restoring to the public domain lands hereto-fore reserved for reservoir purposes at the headwaters of the Mississippi River and tributaries; to the Committee on the Public Lands.

THE CURRENCY.

Mr. GLASS. Mr. Speaker, I present the conference report (H. Rept. 163) on the bill H. R. 7837, the currency bill, and, under the order of the House, I ask for its immediate consideration.

Mr. MURRAY of Oklahoma. Mr. Speaker, I desire to make point of order against the report.

The SPEAKER. What is the point of order?

Mr. MURRAY of Oklahoma. Upon the ground that the report is not in obedience to the instructions given by the House

The SPEAKER. The Chair can not pass upon that until he has read or heard read the conference report.

Mr. MURRAY of Oklahoma. I am making it, and desire to have the point of order pending.

Mr. UNDERWOOD. In what particular do the conferees fail to follow the instructions of the House?

Mr. MURRAY of Oklahoma. The point of order I make is that the conferees did not obey the instructions of the House in one particular, and that is in respect to loans on farm credits.

Mr. MANN. Mr. Speaker, I submit that is a matter that might affect the acceptance or rejection of the report and not a

point of order.

The SPEAKER. The Chair thinks that is correct. Of course when the conference report is read, and when it comes up for consideration, the gentleman from Oklahoma will have his rights. The Chair does not know what is in the report, and does not think that anyone else does except the conferees.

The Clerk will read the report.

The Clerk read as follows:

CONFERENCE REPORT (H. REPT. NO. 163).

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 7837) to provide for the establishment of Federal reserve banks, to furnish an elastic currency, to afford means of rediscounting commercial paper, to establish a more effective supervision of banking in the United States, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate and agree to the same with an amendment

as follows:

In lieu of the amendment proposed by the Senate insert the following:

Be it enacted, etc., That the short title of this act shall be the "Federal reserve act." Wherever the word "bank" is used in this act, the word shall be held to include State bank, banking association, and trust company, except where national banks or Federal reserve banks

are specifically referred to.

The terms "national bank" and "national banking association" used in this act shall be held to be synonymous and inter-changeable. The term "member bank" shall be held to mean any national bank, State bank, or bank or trust company which has become a member of one of the reserve banks created by this act. The term "board" shall be held to mean Federal reserve board; the term "district" shall be held to mean Federal reserve district; the term "reserve bank" shall be held to mean Federal reserve bank,

FEDERAL RESERVE DISTRICTS.

Sec. 2. As soon as practicable the Secretary of the Treasury, the Secretary of Agriculture and the Comptroller of the Currency, acting as "the reserve bank organization committee," shall designate not less than 8 nor more than 12 cities to be known as Federal reserve cities, and shall divide the conti-nental United States, excluding Alaska, into districts, each district to contain only one of such Federal reserve cities. The determination of said organization committee shall not be subject to review except by the Federal reserve board when organized: Provided, That the districts shall be apportioned with due regard to the convenience and customary course of business and shall not necessarily be coterminous with any State or States. The districts thus created may be readjusted and new districts may from time to time be created by the Federal reserve board, not to exceed 12 in all. Such districts shall be known as Federal reserve districts and may be designated by number. A majority of the organization committee shall constitute a quorum with authority to act.

Said organization committee shall be authorized to employ counsel and expert aid, to take testimony, to send for persons and papers, to administer oaths, and to make such investigation as may be deemed necessary by the said committee in determining the reserve districts and in designating the cities within such districts where such Federal reserve banks shall be severally located. The said committee shall supervise the organization in each of the cities designated of a Federal reserve bank, which shall include in its title the name of the city in which it is situated, as "Federal Reserve Bank of Chicago."

Under regulations to be prescribed by the organization committee, every national banking association in the United States is hereby required, and every eligible bank in the United States and every trust company within the District of Columbia, is hereby authorized to signify in writing, within 60 days after the passage of this act, its acceptance of the terms and provisions hereof. When the organization committee shall have designated the cities in which Federal reserve banks are to be organized, and fixed the geographical limits of the Federal re-serve districts, every national banking association within that district shall be required within 30 days after notice from the

organization committee, to subscribe to the capital stock of such Federal reserve bank in a sum equal to 6 per cent of the paid-up capital stock and surplus of such bank, one-sixth of the subscription to be payable on call of the organization committee or of the Federal reserve board, one-sixth within three months and one-sixth within six months thereafter, and the remainder of the subscription, or any part thereof, shall be subject to call when deemed necessary by the Federal reserve board, said payments to be in gold or gold certificates

The shareholders of every Federal reserve bank shall be held individually responsible, equally and ratably, and not one for another, for all contracts, debts, and engagements of such bank to the extent of the amount of their subscriptions to such stock at the par value thereof in addition to the amount subscribed, whether such subscriptions have been paid up in whole or in

part, under the provisions of this act.

Any national bank failing to signify its acceptance of the terms of this act within the 60 days aforesaid, shall cease to act as a reserve agent, upon 30 days' notice, to be given within the discretion of the said organization committee or of the Fed-

eral reserve board.

Should any national banking association in the United States now organized fail within one year after the passage of this act to become a member bank or fail to comply with any of the provisions of this act applicable thereto, all of the rights, privileges, and franchises of such association granted to it under the national-bank act, or under the provisions of this act, shall be thereby forfeited. Any noncompliance with or violation of this act shall, however, be determined and adjudged by any court of the United States of competent jurisdiction in a suit brought for that purpose in the district or territory in which such bank is located, under direction of the Federal reserve board, by the Comptroller of the Currency in his own name before the association shall be declared dissolved. In cases of such noncompliance or violation, other than the failure to become a member bank under the provisions of this act, every director who participated in or assented to the same shall be held liable in his personal or individual capacity for all damages which said bank, its shareholders, or any other person shall have sustained in consequence of such violation.

Such dissolution shall not take away or impair any remedy against such corporation, its stockholders or officers, for any liability or penalty which shall have been previously incurred.

Should the subscriptions by banks to the stock of said Federal reserve banks or any one or more of them be, in the judgment of the organization committee, insufficient to provide the amount of capital required therefor, then and in that event the said organization committee may, under conditions and regulations to be prescribed by it, offer to public subscription at par such an amount of stock in said Federal reserve banks, or any one or more of them, as said committee shall determine, subject to the same conditions as to payment and stock liability as provided for member banks.

No individual, copartnership, or corporation other than a member bank of its district shall be permitted to subscribe for or to hold at any time more than \$25,000 par value of stock in any Federal reserve bank. Such stock shall be known as public stock and may be transferred on the books of the Federal reserve bank by the chairman of the board of directors of such bank.

Should the total subscriptions by banks and the public to the stock of said Federal reserve banks or any one or more of them, be, in the judgment of the organization committee, insufficient to provide the amount of capital required therefor, then and in to provide the amount of capital required therefor, then and in that event the said organization committee shall allot to the United States such an amount of said stock as said committee shall determine. Said United States stock shall be paid for at par out of any money in the Treasury not otherwise appropriated, and shall be held by the Secretary of the Treasury and disposed of for the benefit of the United States in such manner, at such times, and at such price, not less than par, as the Secretary of the Treasury shall determine.

Stock not held by member banks shall not be entitled to vot-

ing power.

The Federal reserve board is hereby empowered to adopt and promulgate rules and regulations governing the transfers of

said stock.

No Federal reserve bank shall commence business with a subscribed capital less than \$4,000,000. The organization of reserve districts and Federal reserve cities shall not be construed as changing the present status of reserve cities and central reserve cities, except in so far as this act changes the amount of reserves that may be carried with approved reserve agents located therein. The organization committee shall have power to appoint such assistants and incur such expenses in carrying | limitations prescribed by this act.

out the provisions of this act as it shall deem necessary, and such expenses shall be payable by the Treasurer of the United States upon voucher approved by the Secretary of the Treasury, and the sum of \$100,000, or so much thereof as may be necessary, is hereby appropriated, out of any moneys in the Treasury not otherwise appropriated, for the payment of such expenses.

SEC. 3. Each Federal reserve bank shall establish branch banks within the Federal reserve district in which it is located and may do so in the district of any Federal reserve bank which may have been suspended. Such branches shall be operated by a board of directors under rules and regulations approved by the Federal reserve board. Directors of branch banks shall possess the same qualifications as directors of the Federal reserve banks. Four of said directors shall be selected by the reserve bank and three by the Federal reserve board, and they shall hold office during the pleasure, respectively, of the parent bank and the Federal reserve board. The reserve bank shall designate one of the directors as manager.

FEDERAL RESERVE BANKS.

SEC. 4. When the organization committee shall have established Federal reserve districts as provided in section 2 of this act, a certificate shall be filed with the Comptroller of the Currency showing the geographical limits of such districts and the Federal reserve city designated in each of such districts. Comptroller of the Currency shall thereupon cause to be forwarded to each national bank located in each district, and to such other banks declared to be eligible by the organization committee which may apply therefor, an application blank in form to be approved by the organization committee, which blank shall contain a resolution to be adopted by the board of directors of each bank executing such application, authorizing a subscription to the capital stock of the Federal reserve bank organizing in that district in accordance with the provisions of this act.

When the minimum amount of capital stock prescribed by this act for the organization of any Federal reserve bank shall have been subscribed and allotted, the organization committee shall designate any five banks of those whose applications have been received, to execute a certificate of organization, and thereupon the banks so designated shall, under their seals, make an organization certificate which shall specifically state the name of such Federal reserve bank, the territorial extent of the district over which the operations of such Federal reserve bank are to be carried on, the city and State in which said bank is to be located, the amount of capital stock and the number of shares into which the same is divided, the name and place of doing business of each bank executing such certificate, and of all banks which have subscribed to the capital stock of such Federal reserve bank and the number of shares subscribed by each, and the fact that the certificate is made to enable those banks executing same, and all banks which have subscribed or may thereafter subscribe to the capital stock of such Federal reserve bank, to avail themselves of the advantages of this act.

The said organization certificate shall be acknowledged before a judge of some court of record or notary public; and shall be, together with the acknowledgment thereof, authenticated by the seal of such court, or notary, transmitted to the Comptroller of the Currency, who shall file, record and carefully preserve

the same in his office.

Upon the filing of such certificate with the Comptroller of the Currency as aforesaid, the said Federal reserve bank shall become a body corporate and as such, and in the name designated in such organization certificate, shall have power-

First. To adopt and use a corporate seal.

Second. To have succession for a period of 20 years from its organization unless it is sooner dissolved by an act of Congress, or unless its franchise becomes forfeited by some violation of law.

Third. To make contracts.

Fourth. To sue and be sued, complain and defend, in any court of law or equity.

Fifth. To appoint by its board of directors, such officers and employees as are not otherwise provided for in this act, to define their duties, require bends of them and fix the penalty thereof, and to dismiss at pleasure such officers or employees.

Sixth. To prescribe by its board of directors, by-laws not inconsistent with law, regulating the manner in which its general business may be conducted, and the privileges granted to

it by law may be exercised and enjoyed.

Seventh. To exercise by its board of directors, or duly authorized officers or agents, all powers specifically granted by the provisions of this act and such incidental powers as shall be necessary to carry on the business of banking within the

Eighth. Upon deposit with the Treasurer of the United States of any bonds of the United States in the manner provided by existing law relating to national banks, to receive from the Comptroller of the Currency circulating notes in blank, registered and countersigned as provided by law, equal in amount to the par value of the bonds so deposited, such notes to be issued under the same conditions and provisions of law as relate to the issue of circulating notes of national banks secured by bonds of the United States bearing the circulating privilege, except that the issue of such notes shall not be limited to the capital stock of such Federal reserve bank.

But no Federal reserve bank shall transact any business except such as is incidental and necessarily preliminary to its organization until it has been authorized by the Comptroller of the Currency to commence business under the provisions of

this act.

Every Federal reserve bank shall be conducted under the su-

pervision and control of a board of directors.

The board of directors shall perform the duties usually appertaining to the office of directors of banking associations and

all such duties as are prescribed by law.

Said board shall administer the affairs of said bank fairly and impartially and without discrimination in favor of or against any member bank or banks and shall, subject to the provisions of law and the orders of the Federal reserve board, extend to each member bank such discounts, advancements and accommodations as may be safely and reasonably made with due regard for the claims and demands of other member

Such board of directors shall be selected as hereinafter specified and shall consist of nine members, holding office for three years, and divided into three classes, designated as classes A, B, and C.

Class A shall consist of three members, who shall be chosen by and be representative of the stock-holding banks.

Class B shall consist of three members, who at the time of

their election shall be actively engaged in their district in commerce, agriculture or some other industrial pursuit.

Class C shall consist of three members who shall be designated by the Federal reserve board. When the necessary subscriptions to the capital stock have been obtained for the organization of any Federal reserve bank, the Federal reserve board shall appoint the class C directors and shall designate one of such directors as chairman of the board to be selected. Pending the designation of such chairman, the organization committee shall exercise the powers and duties appertaining to the office of chairman in the organization of such Federal reserve bank.

No Senator or Representative in Congress shall be a member of the Federal reserve board or an officer or a director of a

Federal reserve bank.

No director of class B shall be an officer, director, or employee of any bank.

No director of class C shall be an officer, director, employee,

or stockholder of any bank.

Directors of class A and class B shall be chosen in the fol-

lowing manner:

The chairman of the board of directors of the Federal reserve bank of the district in which the bank is situated or, pending the appointment of such chairman, the organization committee shall classify the member banks of the district into three general groups or divisions. Each group shall contain as nearly as may be one-third of the aggregate number of the member banks of the district and shall consist, as nearly as may be, of banks of similar capitalization. The groups shall be designated by number by the chairman.

At a regularly called meeting of the board of directors of each member bank in the district it shall elect by ballot a district reserve elector and shall certify his name to the chair-man of the board of directors of the Federal reserve bank of the district. The chairman shall make lists of the district reserve electors thus named by banks in each of the aforesaid three groups and shall transmit one list to each elector in each

group.

Each member bank shall be permitted to nominate to the chairman one candidate for director of class A and one candidate for director of class B. The candidates so nominated shall be listed by the chairman, indicating by whom nominated, and a copy of said list shall, within 15 days after its pletion, be furnished by the chairman to each elector.

Every elector shall, within 15 days after the receipt of the said list, certify to the chairman his first, second, and other choices of a director of class A and class B, respectively, upon a preferential ballot, on a form furnished by the chairman of the board of directors of the Federal reserve bank of the dis-

trict. Each elector shall make a cross opposite the name of the first, second, and other choices for a director of class A and for a director of class B, but shall not vote more than one

choice for any one candidate.

Any candidate having a majority of all votes cast in the column of first choice shall be declared elected. If no candidate have a majority of all the votes in the first column, then there shall be added together the votes cast by the electors for such candidates in the second column and the votes cast for the several candidates in the first column. If any candidate then have a majority of the electors voting, by adding together the first and second choices, he shall be declared elected. If no candidate have a majority of electors voting when the first and second choices shall have been added, then the votes cast in the third column for other choices shall be added together in like manner, and the candidate then having the highest number of votes shall be declared elected. An immediate report of election shall be declared.

Class C directors shall be appointed by the Federal reserve board. They shall have been for at least two years residents of the district for which they are appointed, one of whom shall be designated by said board as chairman of the board of directors of the Federal reserve bank and as "Federal reserve agent." He shall be a person of tested banking experience; and in addition to his duties as chairman of the board of directors of the Federal reserve bank he shall be required to maintain under regulations to be established by the Federal reserve board a local office of said board on the premises of the Federal reserve bank. He shall make regular reports to the Federal reserve board, and shall act as its official representative for the performance of the functions conferred upon it by this act. He shall receive an annual compensation to be fixed by the Federal reserve board and paid monthly by the Federal reserve bank to which he is designated. One of the directors of class C, who shall be a person of tested banking experience, shall be appointed by the Federal reserve board as deputy chairman and deputy Federal reserve agent to exercise the powers of the chairman of the board and Federal reserve agent in case of absence or disability of his principal.

Directors of Federal reserve banks shall receive, in addition to any compensation otherwise provided, a reasonable allowance for necessary expenses in attending meetings of their respective boards, which amount shall be paid by the respective Federal reserve banks. Any compensation that may be provided by boards of directors of Federal reserve banks for directors, officers or employees shall be subject to the approval of the Federal

reserve board.

The reserve bank organization committee may, in organizing Federal reserve banks, call such meetings of bank directors in the several districts as may be necessary to carry out the purposes of this act, and may exercise the functions herein conferred upon the chairman of the board of directors of each Federal reserve bank pending the complete organization of such

At the first meeting of the full board of directors of each Federal reserve bank, it shall be the duty of the directors of classes A, B and C, respectively, to designate one of the members of each class whose term of office shall expire in one year from the 1st of January nearest to date of such meeting, one whose term of office shall expire at the end of two years from said date, and one whose term of office shall expire at the end of three years from said date. Thereafter every director of a Federal reserve bank chosen as hereinbefore provided shall hold office for a term of three years. Vacancies that may occur in the several classes of directors of Federal reserve banks may be filled in the manner provided for the original selection of such directors, such appointees to hold office for the unexpired terms of their predecessors.

STOCK ISSUES; INCREASE AND DECREASE OF CAPITAL.

SEC. 5. The capital stock of each Federal reserve bank shall be divided into shares of \$100 each. The outstanding capital stock shall be increased from time to time as member banks increase their capital stock and surplus or as additional banks become members, and may be decreased as member banks reduce their capital stock or surplus or cease to be members. Shares of the capital stock of Federal reserve banks owned by member banks shall not be transferred or hypothecated. When a member bank increases its capital stock or surplus, it shall thereupon subscribe for an additional amount of capital stock of the Federal reserve bank of its district equal to 6 per cent of the said increase, one-half of said subscription to be paid in the manner hereinbefore provided for original subscription, and one-half subject to call of the Federal reserve board. A bank applying for stock in a Federal reserve bank at any time after the organization thereof must subscribe for an amount of the capital

stock of the Federal reserve bank equal to 6 per cent of the paid-up capital stock and surplus of said applicant bank, paying therefor its par value plus one-half of 1 per cent a month from the period of the last dividend. When the capital stock of any Federal reserve bank shall have been increased either on account of the increase of capital stock of member banks or on account of the increase in the number of member banks, the board of directors shall cause to be executed a certificate to the Comptroller of the Currency showing the increase in capital stock, the amount paid in, and by whom paid. When a member bank reduces its capital stock it shall surrender a proportionate amount of its holdings in the capital of said Federal reserve bank, and when a member bank voluntarily liquidates it shall surrender all of its holdings of the capital stock of said Federal reserve bank and be released from its stock subscription not previously called. In either case the shares surrendered shall be canceled and the member bank shall receive in payment therefor, under regulations to be prescribed by the Federal reserve board, a sum equal to its cash-paid subscriptions on the shares surrendered and one-half of 1 per cent a month from the period of the last dividend, not to exceed the book value thereof, less any liability of such member bank to the Federal reserve

SEC. 6. If any member bank shall be declared insolvent and a receiver appointed therefor, the stock held by it in said Federal reserve bank shall be canceled, without impairment of its liability, and all cash-paid subscriptions on said stock, with one-half of 1 per cent per month from the period of last dividend, not to exceed the book value thereof, shall be first applied to all debts of the insolvent member bank to the Federal reserve bank, and the balance, if any, shall be paid to the receiver of the in-solvent bank. Whenever the capital stock of a Federal reserve bank is reduced, either on account of a reduction in capital stock of any member bank or of the liquidation or insolvency of such bank, the board of directors shall cause to be executed a certificate to the Comptroller of the Currency showing such reduction of capital stock and the amount repaid to such bank.

DIVISION OF EARNINGS.

Sec. 7. After all necessary expenses of a Federal reserve bank have been paid or provided for, the stockholders shall be entitled to receive an annual dividend of 6 per cent on the paid-in capital stock, which dividend shall be cumulative. After the aforesaid dividend claims have been fully met, all the net earnings shall be paid to the United States as a franchise tax, except that one-half of such net earnings shall be paid into a surplus fund until it shall amount to 40 per cent of the paid-in capital stock of such bank.

The net earnings derived by the United States from Federal reserve banks shall, in the discretion of the Secretary, be used to supplement the gold reserve held against outstanding United States notes, or shall be applied to the reduction of the outstanding bonded indebtedness of the United States under regulations to be prescribed by the Secretary of the Treasury. Should a Federal reserve bank be dissolved or go into liquidation, any surplus remaining, after the payment of all debts, dividend requirements as hereinbefore provided, and the par value of the stock, shall be paid to and become the property of the United States and shall be similarly applied.

Federal reserve banks, including the capital stock and surplus therein, and the income derived therefrom shall be exempt from Federal, State, and local taxation, except taxes upon real

Sec. 8. Section 5154, United States Revised Statutes, is hereby amended to read as follows:

Any bank incorporated by special law of any State or of the United States or organized under the general laws of any State or of the United States and having an unimpaired capital sufficient to entitle it to become a national banking association under the provisions of the existing laws may, by the vote of the shareholders owning not less than 51 per cent of the capital stock of such bank or banking association, with the approval of the Comptroller of the Currency be converted into a national banking association, with any name approved by the Comp-troller of the Currency: Provided, however, That said conversion shall not be in contravention of the State law. case the articles of association and organization certificate may be executed by a majority of the directors of the bank or banking institution, and the certificate shall declare that the owners of 51 per cent of the capital stock have authorized the directors to make such certificate and to change or convert the bank or banking institution into a national association. A majority of the directors, after executing the articles of association and the organization certificate, shall have power to execute all other papers and to do whatever may be required to make its organization perfect and complete as a national asssociation. The

shares of any such bank may continue to be for the same amount each as they were before the conversion, and the directors may continue to be directors of the association until others are elected or appointed in accordance with the provisions of the statutes of the United States. When the comptroller has given to such bank or banking association a certificate that the provisions of this act have been complied with, such bank or banking association, and all its stockholders, officers, and employees, shall have the same powers and privileges, and shall be subject to the same duties, liabilities, and regulations, in all respects, as shall have been prescribed by the Federal reserve act and by the national banking act for associations originally organized as national banking associations.

STATE BANKS AS MEMBERS.

Sec. 9. Any bank incorporated by special law of any State, or organized under the general laws of any State or of the United States, may make application to the reserve bank organization committee, pending organization, and thereafter to the Federal reserve board for the right to subscribe to the stock of the Federal reserve bank organized or to be organized within the Federal reserve district where the applicant is located. The organization committee or the Federal reserve board, under such rules and regulations as it may prescribe, subject to the provisions of this section, may permit the applying bank to become a stockholder in the Federal reserve bank of the district in which the applying bank is located. Whenever the organization committee or the Federal reserve board shall permit the applying bank to become a stockholder in the Federal reserve bank of the district, stock shall be issued and paid for under the rules and regulations in this act provided for national banks which become stockholders in Federal reserve banks.

The organization committee or the Federal reserve board shall establish by-laws for the general government of its conduct in acting upon applications made by the State banks and banking associations and trust companies for stock ownership in Federal reserve banks. Such by-laws shall require applying banks not organized under Federal law to comply with the reserve and capital requirements and to submit to the examination and regulations prescribed by the organization committee or by the Federal reserve board. No applying bank shall be admitted to membership in a Federal reserve bank unless it possesses a paid-up unimpaired capital sufficient to entitle it to become a national banking association in the place where it is situated, under the provisions of the national banking act.

Any bank becoming a member of a Federal reserve bank under the provisions of this section shall, in addition to the regulations and restrictions hereinbefore provided, be required to conform to the provisions of law imposed on the national banks respecting the limitation of liability which may be incurred by any person, firm, or corporation to such banks, the prohibition against making purchase of or loans on stock of such banks, and the withdrawal or impairment of capital, or the payment of unearned dividends, and to such rules and regulations as the Federal reserve board may, in pursuance thereof, prescribe.

Such banks, and the officers, agents, and employees thereof, shall also be subject to the provisions of and to the penalties prescribed by sections 5198, 5200, 5201, and 5208, and 5209 of the Revised Statutes. The member banks shall also be required to make reports of the conditions and of the payments of dividends to the comptroller, as provided in sections 5211 and 5212 of the Revised Statutes, and shall be subject to the penalties prescribed

by section 5213 for the failure to make such report.

If at any time it shall appear to the Federal reserve board that a member bank has failed to comply with the provisions of this section or the regulations of the Federal reserve board, it shall be within the power of the said board, after hearing, to require such bank to surrender its stock in the Federal reserve bank; upon such surrender the Federal reserve bank shall pay the cash-paid subscriptions to the said stock with interest at the rate of one-half of 1 per cent per month, computed from the last dividend, if earned, not to exceed the book value thereof, less any liability to said Federal reserve bank, except the subscription liability not previously called, which shall be can-celed, and said Federal reserve bank shall, upon notice from the Federal reserve board, be required to suspend said bank from further privileges of membership, and shall within 30 days of such notice cancel and retire its stock and make payment therefore in the manner herein provided. The Federal reserve board may restore membership upon due proof of compliance with the conditions imposed by this section.

FEDERAL RESERVE BOARD.

10. A Federal reserve board is hereby created which shall consist of seven members, including the Secretary of the Treasury and the Comptroller of the Currency, who shall be members ex officio, and five members appointed by the President of the United States, by and with the advice and consent of the Senate. In selecting the five appointive members of the Federal reserve board, not more than one of whom shall be selected from any one Federal reserve district, the President shall have due regard to a fair representation of the different commercial, industrial and 'geographical divisions of the coun-The five members of the Federal reserve board appointed by the President and confirmed as aforesaid shall devote their entire time to the business of the Federal reserve board and shall each receive an annual salary of \$12,000, payable monthly together with actual necessary traveling expenses, and the Comptroller of the Currency, as ex officio member of the Federal reserve board, shall, in addition to the salary now paid him as Comptroller of the Currency, receive the sum of \$7,000 annually for his services as a member of said board.

The members of said board, the Secretary of the Treasury, the Assistant Secretaries of the Treasury, and the Comptroller of the Currency shall be ineligible during the time they are in office and for 2 years thereafter to hold any office, position, or employment in any member bank. Of the five members thus appointed by the President at least two shall be persons experienced in banking or finance. One shall be designated by the President to serve for 2, one for 4, one for 6, one for 8, and one for 10 years, and thereafter each member so appointed shall serve for a term of 10 years unless sooner removed for cause by the President. Of the five persons thus appointed, one shall be designated by the President as governor and one as vice governor of the Federal reserve board. The governor of the Federal reserve board, subject to its supervision, shall be the active executive officer. The Secretary of the Treasury may assign offices in the Department of the Treasury for the use of the Federal reserve board. Each member of the Federal reserve board shall within 15 days after notice of appointment make and subscribe to the oath of office.

The Federal reserve board shall have power to levy semiannually upon the Federal reserve banks, in proportion to their capital stock and surplus, an assessment sufficient to pay its estimated expenses and the salaries of its members and employees for the half year succeeding the levying of such assessment, together with any deficit carried forward from the pre-

ceding half year, The first meeting of the Federal reserve board shall be held in Washington, D. C., as soon as may be after the passage of this act, at a date to be fixed by the reserve bank organization The Secretary of the Treasury shall be ex officio chairman of the Federal reserve board. No member of the Federal reserve board shall be an officer or director of any bank, banking institution, trust company, or Federal reserve bank nor hold stock in any bank, banking institution, or trust company; and before entering upon his duties as a member of the Federal reserve board he shall certify under oath to the Secretary of the Treasury that he has complied with this requirement. Whenever a vacancy shall occur, other than by expiration of term, among the five members of the Federal reserve board appointed by the President, as above provided, a successor shall be appointed by the President, with the advice and consent of the Senate, to fill such vacancy, and when appointed he shall hold office for the unexpired term of the member whose place he is selected to fill.

The President shall have power to fill all vacancies that may happen on the Federal reserve board during the recess of the Senate, by granting commissions which shall expire 30 days after the next session of the Senate convenes.

Nothing in this act contained shall be construed as taking away any powers heretofore vested by law in the Secretary of the Treasury which relate to the supervision, management, and control of the Treasury Department and bureaus under such department, and wherever any power vested by this act in the Federal reserve board or the Federal reserve agent appears to conflict with the powers of the Secretary of the Treasury, such powers shall be exercised subject to the supervision and control of the Secretary.

The Federal reserve board shall annually make a full report of its operations to the Speaker of the House of Representatives, who shall cause the same to be printed for the information of the Congress.

Section 324 of the Revised Statutes of the United States shall be amended so as to read as follows: There shall be in the Department of the Treasury a bureau charged with the execution of all laws passed by Congress relating to the issue and regulation of national currency secured by United States bonds, and, under the general supevision of the Federal reserve board, of all Federal reserve notes, the chief officer of which bureau shall be called the Comptroller of the Currency and shall perform his

duties under the general directions of the Secretary of the Treasury.

Sec. 11. The Federal reserve board shall be authorized and empowered:

(a) To examine at its discretion the accounts, books and affairs of each Federal reserve bank and of each member bank and to require such statements and report: as it may deem necessary. The said board shall publish once each week a statement showing the condition of each Federal reserve bank and a consolidated statement for all Federal reserve banks. Such statements shall show in detail the assets and liabilities of the Federal reserve banks, single and combined, and shall furnish full information regarding the character of the money held as reserve and the amount, nature and maturities of the paper and other investments owned or held by Federal reserve banks.

(b) To permit, or, on the affirmative vote of at least five members of the reserve board to require Federal reserve banks to rediscount the discounted paper of other Federal reserve banks at rates of interest to be fixed by the Federal reserve board.

(c) To suspend for a period not exceeding 30 days, and from time to time to renew such suspension for periods not exceeding 15 days, any reserve requirement specified in this act: Provided, That it shall establish a graduated tax upon the amounts by which the reserve requirements of this act may be permitted to fall below the level hereinafter specified: And provided further, That when the gold reserve held against Federal reserve notes falls below 40 per cent, the Federal reserve board shall establish a graduated tax of not more than 1 per cent per annum upon such deficiency until the reserves fall to 321 per cent, and when said reserve falls below 321 per cent, a tax at the rate increasingly of not less than 11 per cent per annum upon each 2½ per cent or fraction thereof that such reserve falls below 321 per cent. The tax shall be paid by the reserve bank, but the reserve bank shall add an amount equal to said tax to the rates of interest and discount fixed by the Federal reserve board.

(d) To supervise and regulate through the bureau under the charge of the Comptroller of the Currency the issue and retirement of Federal reserve notes, and to prescribe rules and regulations under which such notes may be delivered by the comptroller to the Federal reserve agents applying therefor.

(e) To add to the number of cities classified as reserve and central reserve cities under existing law in which national banking associations are subject to the reserve requirements set forth in section 20 of this act; or to reclassify existing reserve and central reserve cities or to terminate their designation as such.

(f) To suspend or remove any officer or director of any Federal reserve bank, the cause of such removal to be forthwith communicated in writing by the Federal reserve board to the removed officer or director and to said bank.

(g) To require the writing off of doubtful or worthless assets upon the books and balance sheets of Federal reserve banks.

(h) To suspend, for the violation of any of the provisions of this act, the operations of any Federal reserve bank, to take possession thereof, administer the same during the period of suspension, and, when deemed advisable, to liquidate or reorganize such bank.

(i) To require bonds of Federal reserve agents, to make regulations for the safeguarding of all collateral, bonds, Federal reserve notes, money or property of any kind deposited in the hands of such agents, and said board shall perform the duties, functions, or services specified in this act, and make all rules and regulations necessary to enable said board effectively to perform the same.

(j) To exercise general supervision over said Federal reserve banks.

(k) To grant by special permit to national banks applying therefor, when not in contravention of State or local law, the right to act as trustee, executor, administrator, or registrar of stocks and bonds under such rules and regulations as the said board may prescribe.

(1) To employ such attorneys, experts, assistants, clerks, or other employees as may be deemed necessary to conduct the business of the board. All salaries and fees shall be fixed in advance by said board and shall be paid in the same manner as the salaries of the members of said board. All such attorneys, experts, assistants, clerks, and other employees shall be appointed without regard to the provisions of the act of January 16, 1883 (vol. 22, U. S. Stat. L., p. 403), and amendments thereto, or any rule or regulation made in pursuance thereof: Provided, That nothing herein shall prevent the President from placing said employees in the classified service.

FEDERAL ADVISORY COUNCIL.

Sec. 12. There is hereby created a Federal advisory council, which shall consist of as many members as there are Federal reserve districts. Each Federal reserve bank by its board of

directors shall annually select from its own Federal reserve district one member of said council, who shall receive such compensation and allowances as may be fixed by his board of directors subject to the approval of the Federal reserve board. The meetings of said advisory council shall be held at Washington, D. C., at least four times each year, and oftener if called by the Federal reserve board. The council may in addition to the meetings above provided for hold such other meetings in Washington, D. C., or eisewhere, as it may deem necessary, may select its own officers and adopt its own methods of procedure, and a majority of its members shall constitute a quorum for the transaction of business. Vacancies in the council shall be filled by the respective reserve banks, and members selected to fill vacancies shall serve for the unexpired term.

The Federal advisory council shall have power, by itself or through its officers, (1) to confer directly with the Federal reserve board on general business conditions; (2) to make oral or written representations concerning matters within the jurisdiction of said board; (3) to call for information and to make recommendations in regard to discount rates, rediscount business, note issues, reserve conditions in the various districts, the purchase and sale of gold or securities by reserve banks, openmarket operations by said banks, and the general affairs of the reserve banking system.

POWERS OF FEDERAL RESERVE BANKS.

Sec. 13. Any Federal reserve bank may receive from any of its member banks, and from the United States, deposits of current funds in lawful money, national-bank notes, Federal reserve notes, or checks and drafts upon solvent member banks, payable upon presentation; or, solely for exchange purposes, may receive from other Federal reserve banks deposits of current funds in lawful money, national-bank notes, or checks and drafts upon solvent member or other Federal reserve banks,

payable upon presentation.

Upon the indorsement of any of its member banks, with a waiver of demand, notice and protest by such bank, any Federal reserve bank may discount notes, drafts, and bills of exchange arising out of actual commercial transactions; that is, notes, drafts, and bills of exchange issued or drawn for agricultural, industrial, or commercial purposes, or the proceeds of which have been used, or are to be used, for such purposes, the Federal reserve board to have the right to determine or define the character of the paper thus eligible for discount, within the meaning of this act. Nothing in this act contained shall be construed to prohibit such notes, drafts, and bills of exchange, secured by staple agricultural products, or other goods, wares, or merchandise from being eligible for such discount; but such definition shall not include notes, drafts, or bills covering merely investments or issued or drawn for the purpose of carrying or trading in stocks, bonds, or other investment securities, except bonds and notes of the Government of the United States. drafts, and bills admitted to discount under the terms of this paragraph must have a maturity at the time of discount of not more than 90 days: Provided, That notes, drafts, and bills drawn or issued for agricultural purposes or based on live stock and having a maturity not exceeding six months may be discounted in an amount to be limited to a percentage of the capital of the Federal reserve bank, to be ascertained and fixed by the Federal reserve board.

Any Federal reserve bank may discount acceptances which are based on the importation or exportation of goods and which have a maturity at time of discount of not more than three months, and indorsed by at least one member bank. The amount of acceptances so discounted shall at no time exceed one-half the paid-up capital stock and surplus of the bank for

which the rediscounts are made,

The aggregate of such notes and bills bearing the signature or indorsement of any one person, company, firm, or corporation rediscounted for any one bank shall at no time exceed 10 per cent of the unimpaired capital and surplus of said bank; but this restriction shall not apply to the discount of bills of exchange drawn in good faith against actually existing values.

Any member bank may accept drafts or bills of exchange drawn upon it and growing out of transactions involving the importation or exportation of goods having not more than six months sight to run; but no bank shall accept such bills to an amount equal at any time in the aggregate to more than one-

half its paid-up capital stock and surplus.

Section 5202 of the Revised Statutes of the United States is hereby amended so as to read as follows: No national banking association shall at any time be indebted, or in any way liable, to an amount exceeding the amount of its capital stock at such time actually paid in and remaining undiminished by losses or otherwise, except on account of demands of the nature following:

First. Notes of circulation,

Second. Moneys deposited with or collected by the association.

Third. Bills of exchange or drafts drawn against money actually on deposit to the credit of the association, or due thereto.

Fourth. Liabilities to the stockholders of the association for dividends and reserve profits.

Fifth Liabilities incurred under the provisions of the Federal reserve act

The rediscount by any Federal reserve bank of any bills receivable and of domestic and foreign bills of exchange, and of acceptances authorized by this act, shall be subject to such restrictions, limitations, and regulations as may be imposed by the Federal reserve board.

OPEN-MARKET OPERATIONS.

Sec. 14. Any Federal reserve bank may, under rules and regulations prescribed by the Federal reserve board, purchase and sell in the open market, at home or abroad, either from or to domestic or foreign banks, firms, corporations, or individuals, cable transfers and bankers' acceptances and bills of exchange of the kinds and maturities by this act made eligible for rediscount, with or without the indorsement of a member bank.

Every Federal reserve bank shall have power:

(a) To deal in gold coin and bullion at home or abroad, to make loans thereon, exchange Federal reserve notes for gold, gold coin, or gold certificates, and to contract for loans of gold coin or bullion, giving therefor, when necessary, acceptable security, including the hypothecation of United States bonds or other securities which Federal reserve banks are authorized to hold:

(b) To buy and sell, at home or abroad, bonds and notes of the United States, and bills, notes, revenue bonds, and warrants with a maturity from date of purchase of not exceeding six months, issued in anticipation of the collection of taxes or in anticipation of the receipt of assured revenues by any State, county, district, political subdivision, or municipality in the continental United States, including irrigation, drainage and reclamation districts, such purchases to be made in accordance with rules and regulations prescribed by the Federal reserve board:

(c) To purchase from member banks and to sell, with or without its indorsement, bills of exchange arising out of com-

mercial transactions, as hereinbefore defined;

(d) To establish from time to time, subject to review and determination of the Federal reserve board, rates of discount to be charged by the Federal reserve bank for each class of paper, which shall be fixed with a view of accommodating commerce and business:

(e) To establish accounts with other Federal reserve banks for exchange purposes and, with the consent of the Federal reserve board, to open and maintain banking accounts in foreign countries, appoint correspondents, and establish agencies in such countries wheresoever it may deem best for the purpose of purchasing, selling, and collecting bills of exchange, and to buy and sell with or without its indorsement, through such correspondents or agencies, bills of exchange arising out of actual commercial transactions which have not more than 90 days to run and which bear the signature of two or more responsible parties.

GOVERNMENT DEPOSITS.

SEC. 15. The moneys held in the general fund of the Treasury, except the 5 per cent fund for the redemption of outstanding national-bank notes and the funds provided in this act for the redemption of Federal reserve notes may, upon the direction of the Secretary of the Treasury, be deposited in Federal reserve banks, which banks, when required by the Secretary of the Treasury, shall act as fiscal agents of the United States; and the revenues of the Government or any part thereof may be deposited in such banks and disbursements may be made by checks drawn against such deposits.

No public funds of the Philippine Islands, or of the postal savings, or any Government funds, shall be deposited in the continental United States in any bank not belonging to the system established by this act: Provided, however, That nothing in this act shall be construed to deny the right of the Secretary of the

Treasury to use member banks as depositories.

NOTE ISSUES.

SEC. 16. Federal reserve notes, to be issued at the discretion of the Federal reserve board for the purpose of making advances to Federal reserve banks through the Federal reserve agents as hereinafter set forth and for no other purpose, are hereby authorized. The said notes shall be obligations of the United States and shall be receivable by all national and member banks and Federal reserve banks and for all taxes, customs, and other public dues. They shall be redeemed in gold on

demand at the Treasury Department of the United States, in the city of Washington, D. C., or in gold or lawful money at any Federal reserve bank.

Any Federal reserve bank may make application to the local Federal reserve agent for such amount of the Federal reserve notes hereinbefore provided for as it may require. Such application shall be accompanied with a tender to the local Federal reserve agent of collateral in amount equal to the sum of the Federal reserve notes thus applied for and issued pursuant to such application. The collateral security thus offered shall be notes and bills, accepted for rediscount under the provisions of section 13 of this act, and the Federal reserve agent shall each day notify the Federal reserve board of all issues and withdrawals of Federal reserve notes to and by the Federal reserve bank to which he is accredited. The said Federal reserve board may at any time call upon a Federal reserve bank for additional security to protect the Federal reserve notes is sued to it.

Every Federal reserve bank shall maintain reserves in gold or lawful money of not less than 35 per cent against its deposits and reserves in gold of not less than 40 per cent against its Federal reserve notes in actual circulation, and not offset by gold or lawful money deposited with the Federal reserve agent. Notes so paid out shall bear upon their faces a distinctive letter and serial number, which shall be assigned by the Federal reserve board to each Federal reserve bank. Whenever Federal reserve notes issued through one Federal reserve bank shall be received by another Federal reserve bank they shall be promptly returned for credit or redemption to the Federal reserve bank though which they were originally issued. No Federal reserve bank shall pay out notes issued through another under penalty of a tax of 10 per cent upon the face value of notes so paid out. Notes presented for redemption at the Treasury of the United States shall be paid out of the redemption fund and returned to the Federal reserve banks through which they were originally issued, and thereupon such Federal reserve bank shall, upon de mand of the Secretary of the Treasury, reimburse such redemption fund in lawful money or, if such Federal reserve notes have been redeemed by the Treasurer in gold or gold certificates, then such funds shall be reimbursed to the extent deemed necessary by the Secretary of the Treasury in gold or gold certificates. and such Federal reserve bank shall, so long as any of its Federal reserve notes remain outstanding, maintain with the Treasurer in gold an amount sufficient in the judgment of the Secretary to provide for all redemptions to be made by the Treasurer. Federal reserve notes received by the Treasury, otherwise than for redemption, may be exchanged for gold out of the redemption fund hereinafter provided and returned to the reserve bank through which they were originally issued, or they may be returned to such bank for the credit of the United States. Federal reserve notes unfit for circulation shall be returned by the Federal reserve agents to the Comptroller of the Currency for cancellation and destruction.

The Federal reserve board shall require each Federal reserve bank to maintain on deposit in the Treasury of the United States a sum in gold sufficient in the judgment of the Secretary of the Treasury for the redemption of the Federal reserve notes issued to such bank, but in no event less than 5 per cent; but such deposit of gold shall be counted and included as part of the 40 per cent reserve hereinbefore required. The board shall have the right, acting through the Federal reserve agent, to grant in whole or in part or to reject entirely the application of any Federal reserve bank for Federal reserve notes; but to the extent that such application may be granted the Federal reserve board shall, through its local Federal reserve agent, supply Federal reserve notes to the bank so applying, and such bank shall be charged with the amount of such notes and shall pay such rate of interest on said amount as may be established by the Federal reserve board, and the amount of such Federal reserve notes so issued to any such bank shall, upon delivery, together with such notes of such Federal reserve bank as may be issued under section 18 of this act upon security of United States 2 per cent Government bonds, become a first and paramount lien on all the assets of such bank.

Any Federal reserve bank may at any time reduce its liability for outstanding Federal reserve notes by depositing, with the Federal reserve agent, its Federal reserve notes, gold, gold certificates, or lawful money of the United States. Federal reserve notes so deposited shall not be reissued, except upon compliance with the conditions of an original issue.

The Federal reserve agent shall hold such gold, gold certificates, or lawful money available exclusively for exchange for the outstanding Federal reserve notes when offered by the reserve bank of which he is a director. Upon the request of the Secretary of the Treasury the Federal reserve board shall re-

quire the Federal reserve agent to transmit so much of said gold to the Treasury of the United States as may be required for the exclusive purpose of the redemption of such notes.

Any Federal reserve bank may at its discretion withdraw collateral deposited with the local Federal reserve agent for the protection of its Federal reserve notes deposited with it and shall at the same time substitute therefor other like collateral of equal amount with the approval of the Federal reserve agent under regulations to be prescribed by the Federal reserve board.

In order to furnish suitable notes for circulation as Federal reserve notes, the Comptroller of the Currency shall, under the direction of the Secretary of the Treasury, cause plates and dies to be engraved in the best manner to guard against counterfeits and fraudulent alterations, and shall have printed therefrom and numbered such quantities of such notes of the denominations of \$5, \$10, \$20, \$50, \$100, as may be required to supply the Federal reserve banks. Such notes shall be in form and tenor as directed by the Secretary of the Treasury under the provisions of this act and shall bear the distinctive numbers of the several Federal reserve banks through which they are issued.

When such notes have been prepared, they shall be deposited in the Treasury, or in the subtreasury or mint of the United States nearest the place of business of each Federal reserve bank and shall be held for the use of such bank subject to the order of the Comptroller of the Currency for their delivery, as provided by this act.

The plates and dies to be procured by the Comptroller of the Currency for the printing of such circulating notes shall remain under his control and direction, and the expenses necessarily incurred in executing the laws relating to the procuring of such notes, and all other expenses incidental to their issue and retirement, shall be paid by the Federal reserve banks, and the Federal reserve board shall include in its estimate of expenses levied against the Federal reserve banks a sufficient amount to cover the expenses herein provided for.

The examination of plates, dies, bed pieces, etc., and regulations relating to such examination of plates, dies, etc., of national-bank notes provided for in section 5174 Revised Statutes, is hereby extended to include notes herein provided for.

Any appropriation heretofore made out of the general funds of the Treasury for engraving plates and dies, the purchase of distinctive paper, or to cover any other expense in connection with the printing of national-bank notes or notes provided for by the act of May 30, 1908, and any distinctive paper that may be on hand at the time of the passage of this act may be used in the discretion of the Secretary for the purposes of this act, and should the appropriations heretofore made be insufficient to meet the requirements of this act in addition to circulating notes provided for by existing law, the Secretary is hereby authorized to use so much of any funds in the Treasury not otherwise appropriated for the purpose of furnishing the notes aforesaid: Provided, however, That nothing in this section contained shall be construed as exempting national banks or Federal reserve banks from their liability to reimburse the United States for any expenses incurred in printing and issuing circulating

Every Federal reserve bank shall receive on deposit at par from member banks or from Federal reserve banks checks and drafts drawn upon any of its depositors, and when remitted by a Federal reserve bank, checks and drafts drawn by any depositor in any other Federal reserve bank or member bank upon funds to the credit of said depositor in said reserve bank or member bank. Nothing herein contained shall be construed as prohibiting a member bank from charging its actual expense incurred in collecting and remitting funds, or for exchange sold to its patrons. The Federal reserve board shall, by rule, fix the charges to be collected by the member banks from its patrons whose checks are cleared through the Federal reserve bank and the charge which may be imposed for the service of clearing or collection rendered by the Federal reserve bank.

The Federal reserve board shall make and promulgate from time to time regulations governing the transfer of funds and charges therefor among Federal reserve banks and their branches, and may at its discretion exercise the functions of a clearing house for such Federal reserve banks, or may designate a Federal reserve bank to exercise such functions, and may also require each such bank to exercise the functions of a clearing house for its member banks.

Sec. 17. So much of the provisions of section 5159 of the Revised Statutes of the United States and section 4 of the act of June 20, 1874, and section 8 of the act of July 12, 1882, and of any other provisions of existing statutes as require that before any national banking association shall be authorized to com-

mence banking business it shall transfer and deliver to the Treasurer of the United States a stated amount of United States registered bonds is hereby repealed.

REFUNDING BONDS.

SEC. 18. After two years from the passage of this act, and at any time during a period of 20 years thereafter, any member bank desiring to retire the whole or any part of its circulating notes, may file with the Treasurer of the United States an application to sell for its account, at par and accrued interest, United

States bonds securing circulation to be retired.

The Treasurer shall, at the end of each quarterly period, furnish the Federal reserve board with a list of such applications, and the Federal reserve board may, in its discretion, require the Federal reserve banks to purchase such bonds from the banks whose applications have been filed with the Treasurer at least 10 days before the end of any quarterly period at which the Federal reserve board may direct the purchase to be made: Provided, That Federal reserve banks shall not be permitted to purchase an amount to exceed \$25,000,000 of such bonds in any one year, and which amount shall include bonds acquired under section 4 of this act by the Federal reserve bank: Provided further, That the Federal reserve board shall allot to each Federal reserve bank such proportion of such bonds as the capital and surplus of such bank shall bear to the aggregate capital and surplus of all the Federal reserve banks.

Upon notice from the Treasurer of the amount of bonds so sold for its account, each member bank shall duly assign and transfer, in writing, such bonds to the Federal reserve bank purchasing the same, and such Federal reserve bank shall, thereupon, deposit lawful money with the Treasurer of the United States for the purchase price of such bonds, and the Treasurer shall pay to the member bank selling such bonds any balance due after deducting a sufficient sum to redeem its outstanding notes secured by such bonds, which notes shall be canceled and

permanently retired when redeemed.

The Federal reserve banks purchasing such bonds shall be permitted to take out an amount of circulating notes equal to

the par value of such bonds.

Upon the deposit with the Treasurer of the United States of bonds so purchased, or any bonds with the circulating privilege acquired under section 4 of this act, any Federal reserve bank making such deposit in the manner provided by existing law, shall be entitled to receive from the Comptroller of the Currency circulating notes in blank, registered and countersigned as provided by law, equal in amount to the par value of the bonds so deposited. Such notes shall be the obligations of the Federal reserve bank procuring the same, and shall be in form prescribed by the Secretary of the Treasury, and to the same tenor and effect as national-bank notes now provided by law. They shall be issued and redeemed under the same terms and conditions as national-bank notes except that they shall no be limited to the amount of the capital stock of the Federal reserve bank issuing them.

Upon application of any Federal reserve bank, approved by the Federal reserve board, the Secretary of the Treasury may issue, in exchange for United States 2 per cent gold bonds bearing the circulation privilege, but against which no circulation is outstanding, 1-year gold notes of the United States without the circulation privilege, to an amount not to exceed one-half of the 2 per cent bonds so tendered for exchange, and 30-year 3 per cent gold bonds without the circulation privilege for the remainder of the 2 per cent bonds so tendered: Provided, That at the time of such exchange the Federal reserve bank obtaining such 1-year gold notes shall enter into an obligation with the Secretary of the Treasury binding itself to purchase from the United States for gold at the maturity of such 1-year notes, an amount equal to those delivered in exchange for such bonds, if so requested by the Secretary, and at each maturity of 1-year notes so purchased by such Federal reserve bank, to purchase from the United States such an amount of 1-year notes as the Secretary may tender to such bank, not to exceed the amount issued to such bank in the first instance, in exchange for the 2 per cent United States gold bonds; said obligation to purchase at maturity such notes shall continue in force for a period not to exceed 30 years.

For the purpose of making the exchange herein provided for, the Secretary of the Treasury is authorized to issue at par Treasury notes in coupon or registered form as he may pre-scribe in denominations of \$100, or any multiple thereof, bearing interest at the rate of 3 per cent per annum, payable quarterly, such Treasury notes to be payable not more than 1 year from the date of their issue in gold coin of the present standard value, and to be exempt as to principal and interest from the payment of all taxes and duties of the United States except as provided by this act, as well as from taxes in any form

by or under State, municipal, or local authorities. And for the same purpose, the Secretary is authorized and empowered to issue United States gold bonds at par, bearing 3 per cent interest payable 30 years from date of issue, such bonds to be of the same general tenor and effect and to be issued under the same general terms and conditions as the United States 3 per cent bonds without the circulation privilege now issued and outstanding.

Upon application of any Federal reserve bank, approved by the Federal reserve board, the Secretary may issue at par such 3 per cent bonds in exchange for the 1-year gold notes herein

provided for.

BANK RESERVES.

SEC. 19. Demand deposits within the meaning of this act shall comprise all deposits payable within 30 days, and time deposits shall comprise all deposits payable after 30 days, and all savings accounts and certificates of deposit which are subject to

ont less than 30 days' notice before payment.

When the Secretary of the Treasury shall have officially announced, in such manner as he may elect, the establishment of a Federal reserve bank in any district, every subscribing member bank shall establish and maintain reserves as follows:

(a) A bank not in a reserve or central reserve city as now or hereafter defined shall hold and maintain reserves equal to 12 per cent of the aggregate amount of its demand deposits and 5 per cent of its time deposits, as follows: In its vaults for a period of 36 months after said date five-

twelfths thereof and permanently thereafter four-twelfths.

In the Federal reserve bank of its district, for a period of 12 months after said date, two-twelfths, and for each succeeding 6 months an additional one-twelfth, until five-twelfths have been so deposited, which shall be the amount permanently required.

For a period of 36 months after said date the balance of the reserves may be held in its own vaults, or in the Federal reserve bank, or in national banks in reserve or central reserve cities as now defined by law.

After said 36 months' period said reserves, other than those hereinbefore required to be held in the vaults of the member bank and in the Federal reserve bank, shall be held in the vaults of the member bank or in the Federal reserve bank, or in both, at the option of the member bank.

(b) A bank in a reserve city, as now or hereafter defined, shall hold and maintain reserves equal to 15 per cent of the aggregate amount of its demand deposits and 5 per cent of its time deposits, as follows:

In its vaults for a period of 36 months after said date sixfifteenths thereof, and permanently thereafter five-fifteenths.

In the Federal reserve bank of its district for a period of 12 months after the date aforesaid at least three-fifteenths, and for each succeeding 6 months an additional one-fifteenth, until six-fifteenths have been so deposited, which shall be the amount permanently required.

For a period of 36 months after said date the balance of the reserves may be held in its own vaults, or in the Federal reserve bank, or in national banks in reserve or central reserve

cities as now defined by law.

After said 36 months' period all of said reserves, except those hereinbefore required to be held permanently in the vaults of the member bank and in the Federal reserve bank, shall be held in its vaults or in the Federal reserve bank, or in both, at the option of the member bank.

(c) A bank in a central reserve city, as now or hereafter defined, shall hold and maintain a reserve equal to 18 per cent of the aggregate amount of its demand deposits and 5 per cent of

its time deposits, as follows:

In its vaults six-eighteenths thereof. In the Federal reserve bank seven-eighteenths.

The balance of said reserves shall be held in its own vaults or in the Federal reserve bank, at its option.

Any Federal reserve bank may receive from the member banks as reserves, not exceeding one-half of each installment, eligible paper as described in section 14 properly indorsed and acceptable to the said reserve bank.

If a State bank or trust company is required by the law of its State to keep its reserves either in its own vaults or with another State bank or trust company, such reserve deposits so kept in such State bank or trust company shall be construed, within the meaning of this section, as if they were reserve deposits in a national bank in a reserve or central reserve city for a period of three years after the Secretary of the Treasury shall have officially announced the establishment of a Federal reserve bank in the district in which such State bank or trust company is situate. Except as thus provided, no member bank shall keep on deposit with any nonmember bank a sum in excess of 10 per cent of its own paid-up capital and surplus. No member bank shall act as the medium or agent of a nonmember bank in applying for or receiving discounts from a Federal reserve bank under the provisions of this act except by permission of the Federal reserve board.

The reserve carried by a member bank with a Federal reserve bank may, under the regulations and subject to such penalties as may be prescribed by the Federal reserve board, be checked against and withdrawn by such member bank for the purpose of meeting existing liabilities: Provided, however, That no bank shall at any time make new loans or shall pay any dividends unless and until the total reserve required by law is fully restored.

In estimating the reserves required by this act, the net balance of amounts due to and from other banks shall be taken as the basis for ascertaining the deposits against which reserves shall be determined. Balances in reserve banks due to member banks shall, to the extent herein provided, be counted as reserve

National banks located in Alaska or outside the continental United States may remain nonmember banks, and shall in that event maintain reserves and comply with all the conditions now provided by law regulating them; or said banks, except in the Philippine Islands, may, with the consent of the reserve board, become member banks of any one of the reserve districts, and shall, in that event, take stock, maintain reserves, and be subject to all the other provisions of this act.

SEC. 20. So much of sections 2 and 3 of the act of June 20, 1874, entitled "An act fixing the amount of United States notes, providing for a redistribution of the national-bank currency, and for other purposes," as provides that the fund deposited by any national banking association with the Treasurer of the United States for the redemption of its notes shall be counted as a part of its lawful reserve as provided in the act aforesaid, is hereby repealed. And from and after the passage of this act such fund of 5 per cent shall in no case be counted by any national banking association as a part of its lawful reserve. BANK EXAMINATIONS.

Sec. 21. Section 5240, United States Revised Statutes, is

amended to read as follows:

The Comptroller of the Currency, with the approval of the Secretary of the Treasury, shall appoint examiners who shall examine every member bank at least twice in each calendar year and oftener if considered necessary: Provided, however, That the Federal reserve board may authorize examination by the State authorities to be accepted in the case of State banks and trust companies and may at any time direct the holding of a special examination of State banks or trust companics that are stockholders in any Federal reserve bank. The examiner making the examination of any national bank, or of any other member bank, shall have power to make a thorough examination of all the affairs of the bank and in doing so he shall have power to administer oaths and to examine any of the officers and agents thereof under oath and shall make a full and detailed report of the condition of said bank to the Comptroller

of the Currency.

The Federal reserve board, upon the recommendation of the Comptroller of the Currency, shall fix the salaries of all bank examiners and make report thereof to Congress. of the examinations herein provided for shall be assessed by the Comptroller of the Currency upon the banks examined in proportion to assets or resources held by the banks upon the

dates of examination of the various banks.

In addition to the examinations made and conducted by the Comptroller of the Currency, every Federal reserve bank may, with the approval of the Federal reserve agent or the Federal reserve board, provide for special examination of member banks within its district. The expense of such examinations shall be borne by the bank examined. Such examinations shall be so conducted as to inform the Federal reserve bank of the condition of its member banks and of the lines of credit which are being extended by them. Every Federal reserve bank shall at all times furnish to the Federal reserve board such information as may be demanded concerning the condition of any member bank within the district of the said Federal reserve bank.

No bank shall be subject to any visitatorial powers other than such as are authorized by law, or vested in the courts of justice or such as shall be or shall have been exercised or directed by Congress, or by either House thereof or by any committee of

Congress or of either House duly authorized.

The Federal reserve board shall, at least once each year, order an examination of each Federal reserve bank, and upon joint application of 10 mcmber banks the Federal reserve board shall order a special examination and report of the condition of any Federal reserve bank.

Sec. 22. No member bank or any officer, director, or employee thereof shall hereafter make any loan or grant any

gratuity to any bank examiner. Any bank officer, director, or employee violating this provision shall be deemed guilty of a misdemeanor and shall be imprisoned not exceeding one year or fined not more than \$5,000, or both; and may be fined a further sum equal to the money so loaned or gratuity given. Any examiner accepting a loan or gratuity from any bank examined by him or from an officer, director, or employee thereof shall be deemed guilty of a misdemeanor and shall be imprisoned not exceeding one year or fined not more than \$5.000, or both; and may be fined a further sum equal to the money so loaned or gratuity given; and shall forever thereafter be disqualified from holding office as a national-bank examiner. No national-bank examiner shall perform any other service for compensation while holding such office for any bank or officer, director, or employee thereof.

Other than the usual salary or director's fee paid to any officer, director, or employee of a member bank and other than a reasonable fee paid by said bank to such officer, director, or employee for services rendered to such bank, no officer, director, employee, or attorney of a member bank shall be a beneficiary of or receive, directly or indirectly, any fee, commission, gift, or other consideration for or in connection with any transaction or business of the bank. No examiner, public or private, shall disclose the names of borrowers or the collateral for loans of a member bank to other than the proper officers of such bank without first having obtained the express permission in writing from the Comptroller of the Currency, or from the board of directors of such bank, except when ordered to do so by a court of competent jurisdiction, or by direction of the Congress of the United States. or of either House thereof, or any committee of Congress or of either House duly authorized. Any person violating any provision of this section shall be punished by a fine of not exceeding \$5,000 or by imprisonment not exceeding one year, or both.

Except as provided in existing laws, this provision shall not take effect until 60 days after the passage of this act.

Sec. 23. The stockholders of every national banking association shall be held individually responsible for all contracts, debts, and engagements of such association, each to the amount of his stock therein, at the par value thereof in addition to the amount invested in such stock. The stockholders in any national banking association who shall have transferred their shares or registered the transfer thereof within 60 days next before the date of the failure of such association to meet its obligations, or with knowledge of such impending failure, shall be liable to the same extent as if they had made no such transfer, to the extent that the subsequent transferee fails to meet such liability; but this provision shall not be construed to affect in any way any recourse which such shareholders might otherwise have against those in whose names such shares are registered at the time of such failure.

LOANS ON FARM LANDS.

Sec. 24. Any national banking association not situated in a central reserve city may make loans secured by improved and unencumbered farm land, situated within its Federal reserve district, but no such loan shall be made for a longer time than five years, nor for an amount exceeding 50 per cent of the actual value of the property offered as security. Any such bank may make such loans in an aggregate sum equal to 25 per cent of its capital and surplus or to one-third of its time deposits; and such banks may continue hereafter as heretofore to receive time deposits and to pay interest on the same.

The Federal reserve board shall have power from time to time to add to the list of cities in which national banks shall not be permitted to make loans secured upon real estate in the manner described in this section.

FOREIGN BRANCHES.

Sec. 25. Any national banking association possessing a capital and surplus of \$1,000,000 or more may file application with the Federal reserve board, upon such conditions and under such regulations as may be prescribed by the said board, for the purpose of securing authority to establish branches in foreign countries or dependencies of the United States for the furtherance of the foreign commerce of the United States, and to act, if required to do so, as fiscal agents of the United States. application shall specify, in addition to the name and capital of the banking association filing it, the place or places where the banking operations proposed are to be carried on, and the amount of capital set aside for the conduct of its foreign business. The Federal reserve board shall have power to approve or to reject such application if, in its judgment, the amount of capital proposed to be set aside for the conduct of foreign business is inadequate, or if for other reasons the granting of such application is deemed inexpedient.

Every national banking association which shall receive authority to establish foreign branches shall be required at all times to furnish information concerning the condition of such branches to the Comptroller of the Currency upon demand, and the Federal reserve board may order special examinations of the said foreign branches at such time or times as it may deem best. Every such national banking association shall conduct the accounts of each foreign branch independently of the accounts of other foreign branches established by it and of its home office, and shall at the end of each fiscal period transfer to its general ledger the profit or loss accruing at each branch as a separate

Sec. 26. All provisions of law inconsistent with or super-seded by any of the provisions of this act are to that extent and to that extent only hereby repealed: *Provided*, Nothing in this act contained shall be construed to repeal the parity pro-vision or provisions contained in an act approved March 14, 1900, entitled "An act to define and fix the standard of value, to maintain the parity of all forms of money issued or coined by the United States, to refund the public debt, and for other purposes," and the Secretary of the Treasury may for the purpose of maintaining such parity and to strengthen the gold reserve, borrow gold on the security of United States bonds authorized by section 2 of the act last referred to or for oneyear gold notes bearing interest at a rate of not to exceed 3 per cent per annum, or sell the same if necessary to obtain gold. When the funds of the Treasury on hand justify, he may purchase and retire such outstanding bonds and notes

Sec. 27. The provisions of the act of May 30, 1908, authorizing national currency associations, the issue of additional nationalbank circulation, and creating a National Monetary Commission, which expires by limitation under the terms of such act on the 30th day of June, 1914, are hereby extended to June 30, 1915, and sections 5153, 5172, 5191, and 5214 of the Revised Statutes of the United States, which were amended by the act of May 30, 1908, are hereby reenacted to read as such sections read prior to May 30, 1908, subject to such amendments or modifications as are prescribed in this act: Provided, however, That section 9 of the act first referred to in this section is hereby amended so as to change the tax rates fixed in said act by making the portion applicable thereto read as follows:

National banking associations having circulating notes se-cured otherwise than by bonds of the United States, shall pay for the first three months a tax at the rate of 3 per cent per annum upon the average amount of such of their notes in circulation as are based upon the deposit of such securities, and afterwards an additional tax rate of one-half of 1 per cent per annum for each month until a tax of 6 per cent per annum is reached, and thereafter such tax of 6 per cent per annum upon the average amount of such notes.

SEC. 28. Section 5143 of the Revised Statutes is hereby amended and reenacted to read as follows: Any association formed under this title may, by the vote of shareholders owning two-thirds of its capital stock, reduce its capital to any sum not below the amount required by this title to authorize the formation of associations; but no such reduction shall be allowable which will reduce the capital of the association below the amount required for its outstanding circulation, nor shall any reduction be made until the amount of the proposed reduction has been reported to the Comptroller of the Currency and such reduction has been approved by the said Comptroller of the Currency and by the Federal reserve board, or by the organiza-tion committee pending the organization of the Federal reserve board.

Sec. 29. If any clause, sentence, paragraph, or part of this act shall for any reason be adjudged by any court of competent jurisdiction to be invalid, such judgment shall not affect, impair, or invalidate the remainder of this act, but shall be confined in its operation to the clause, sentence, paragraph, or part thereof directly involved in the controversy in which such judgment shall have been rendered.

SEC. 30. The right to amend, alter, or repeal this act is hereby expressly reserved.

> CARTER GLASS, CHARLES A. KORBLY. Managers on the part of the House.

ROBT. L. OWEN, J. A. O'GORMAN, JAS. A. REED, ATLEE POMERENE, J. F. SHAFROTH, HENRY F. HOLLIS, Managers on the part of the Senate. The statement is as follows:

STATEMENT.

The managers on the part of the House at the conference on the disagreeing vote of the two Houses on the amendment of the Senate to the bill H. R. 7837, entitled "An act to provide for the establishment of Federal reserve banks, to furnish an elastic currency, to afford means of rediscounting commercial paper, to establish a more effective supervision of banking in the United States, and for other purposes," submit the following statement:

The House receded from its disagreement to the amendment of the Senate to the House bill with certain amendments, which are more specifically shown in Senate Document No. 335, Sixty-third Congress, second session, a copy of which is attached hereto and which shows the House bill as it passed the House of Representatives, as amended by the Senate, and as agreed to in conference. The column in this document containing the bill as agreed to in conference shows by brackets and bold-face type that portion of the Senate amendment which was stricken out and the parts inserted by the House managers, respectively.

CARTER GLASS, CHARLES A. KORBLY, Managers on the part of the House.

The SPEAKER. The gentleman from Virginia is recognized for an hour.

Mr. HAYES. Mr. Speaker, I would like, if we can, to have some unanimous-consent agreement about the time for debate.

Mr. GLASS. Mr. Speaker, I was not present on the floor of the House, but I understood there was a unanimous-consent

The SPEAKER. The unanimous agreement was that debate was to be for two hours.

Mr. MANN. Not less than two hours.

The SPEAKER. At least two hours, one-half the time to be

controlled by the gentleman from Virginia——
Mr. MANN. Mr. Speaker, there was no formal agreement; it was a gentleman's agreement.

Mr. HAYES. I would suggest to the gentleman from Virginia we have 2 hours and 20 minutes' debate.

Mr. GLASS. An hour and ten minutes on each side? Mr. HAYES. I would suggest the gentleman from Virginia control 1 hour and have 1 hour to be controlled by myself and

20 minutes by the gentleman from Minnesota.

Mr. GARRETT of Tennessee. Mr. Speaker, that can not

I merely suggest it.

Mr. MANN. Make it an hour and twenty minutes on a side. Mr. GLASS. Mr. Speaker, I would like to have it understood that the Senate is in session to-night waiting for this bill, and it is very important to get it over there.

Mr. MANN. I take it it would be impossible to pass this bill in the House before 10 o'clock or after 10 o'clock

Mr. HAYES. Two hours and twenty minutes would let us come to a vote about 9 o'clock-

Mr. MANN. It would be after 10 o'clock to pass it, and I think the Senate will not wait to dispose of it to-night.

Mr. GLASS. An hour and twenty minutes to a side. Mr. MANN. That would be an hour to Mr. HAYES, 20 minutes to Mr. LINDBERGH, and an hour and twenty minutes to the gentleman from Virginia, to be divided as he may wish.

Mr. GLASS. That is satisfactory to me.

Mr. HAYES. All right.

Mr. GLASS. Then, Mr. Speaker, I ask unanimous consent that debate be limited to 2 hours and 40 minutes, 1 hour and 20 minutes to be controlled by the chairman of the Banking and Currency Committee and 1 hour by the senior Republican of the committee and 20 minutes by the gentleman from Min-

The SPEAKER. The gentleman from Virginia [Mr. Glass] asks unanimous consent that this debate shall be limited to 2 hours and 40 minutes, an hour and twenty minutes to be controlled by him, 1 hour by the gentleman from California [Mr. HAYES], and 20 minutes by the gentleman from Minnesota [Mr. Lind-BERGH]. Is there objection?

Mr. FOWLER. Mr. Speaker, reserving the right to object, I

desire to inquire what arrangement will be made for extending remarks in the RECORD?

Mr. MANN. It has been granted to everybody.

Mr. RAGSDALE, Five days in which leave is granted to extend remarks.

The SPEAKER. Is there objection? [After a pause.] Chair hears none, and the Clerk will read the statement.

Mr. MANN. Does not that include that at the end of that time the previous question is ordered?

Mr. GLASS. And at the end of which time the previous ques-

tion be considered as ordered.

The SPEAKER. Part of the gentleman's request is that at the end of this time the previous question shall be considered as ordered. Is there objection? [After a pause.] The Chair hears none.

Mr. COOPER. Mr. Speaker, I would like to ask the gentle-man a question. Does the report as read by the Clerk contain correction of errors in this conference report as printed?

Mr. GLASS. Yes; the report read by the Clerk is the report of the committee corrected.

Mr. COOPER. There are some errors, more or less. I find several.

Mr. GLASS. There are some immaterial errors in the printed report in the print that some Members seem to have obtained, I do not know where.

Mr. COOPER. Well, there are some, possibly not very mate-

rial; but there are some errors, more or less. For instance—Mr. GLASS. I do not know what print the gentleman from Wisconsin has, but the report as read at the desk is the correct conference report.

Mr. COOPER. Well, for instance, I will call the gentleman's

attention to this, page 15, class C:

Directors shall be appointed by the Federal reserve board. They shall have been for at least two years residents of the district for which they are appointed, one of whom shall be designated by said board—

And so forth. That is not at all correct that way.

Mr. GLASS. From this point of vantage I rather imagine the
print the gentleman from Wisconsin [Mr. Cooper] has is not an authentic bill as reported by the conference committee.

Mr. COOPER. And on page 12 it says:

Such board of directors shall be selected as hereinafter specified and shall consist of nine members, holding office "or" three years, and divided into three "lasses."

The last word must mean "classes." Mr. GLASS. The gentleman evidently has a misprint of the

Mr. NORTON. The gentleman from Wisconsin apparently is reading from Senate Document No. 335.

Mr. GARRETT of Tennessee. Mr. Speaker, I demand the regular order.

Mr. MORGAN of Oklahoma. Mr. Speaker, a parliamentary inquiry

The SPEAKER. The gentleman will state it.

Mr. MORGAN of Oklahoma. I would like to know if the unanimous consent, as suggested by the Speaker, includes that after the debate the previous question shall be considered as ordered? I did not understand that as a part of the proposition.

The SPEAKER. The Chair wishes that the gentleman would

speak a little louder.

Mr. MORGAN of Oklahoma. I desire to know if after the expiration of this general debate the previous question will be considered as ordered?

The SPEAKER. Yes, sir.
Mr. MORGAN of Oklahoma. I did not so understand that.

The SPEAKER. The gentleman from Virginia [Mr. Glass] left that out at first, and then the gentleman from Illinois [Mr. Mann], I think it was, jogged his memory, and he stated that as a supplementary part of his request. The Chair put the question, and stated that the gentleman from Virginia had inadvertently left it out of the original proposition.

Mr. MORGAN of Oklahoma. Mr. Speaker, at that time I did

not have any opportunity to object.

The SPEAKER. Why not? Mr. MORGAN of Oklahoma. Because I did not understand that the Speaker put it again after he made that second suggestion.

The SPEAKER. The Chair undoubtedly did.

Mr. MORGAN of Oklahoma. Mr. Speaker, I desire to ask if, after the previous question is considered as ordered, there will be any opportunity or it will be in order to make a motion to recommit?

Mr. MANN. That is in order.

The SPEAKER. Undoubtedly it would. The same rule applies to a conference report in that regard as applies to a bill. The Clerk will read the statement.

Mr. MANN. Mr. Speaker, the rules do not require the statement to be read. The report has been read and the statement can only be read in somebody's time.

Mr. GLASS. Mr. Speaker, I ask unanimous consent that the report be not read.

The SPEAKER. Is there objection?

There was no objection,

The SPEAKER. The gentleman from Virginia [Mr. GLASS] is recognized for 1 hour and 20 minutes [applause], and the House will be in order.

Mr. MANN. Mr. Speaker, I wish the gentleman from Virginia would ask that the statement be printed in the RECORD.

Mr. GLASS. Mr. Speaker, I ask that the statement be printed in the RECORD

The SPEAKER. The gentleman wishes both the statement and the report in the RECORD?

Mr. GLASS. Yes.

The SPEAKER. The gentleman from Virginia [Mr. GLASS] asks that both the report and the statement be printed in the RECORD. Is there objection. [After a pause.] The Chair hears

[Mr. GLASS addressed the House. See Appendix.]

Mr. MANN. The gentleman has that right already.
Mr. GLASS. Mr. Speaker, I reserve the balance of my time.
The SPEAKER. The gentleman from California [Mr. HAYES] is recognized for one hour.

Mr. HAYES. Mr. Speaker, in the short time which I can consume in justice to my colleagues who desire to speak, it would be impossible for me to discuss in any adequate way this great and important measure now before us.

When the bill was first before the House I discussed at some length certain features of it to which I objected, and I shall not now undertake to cover the same ground that I then cov-I first desire to call the attention of the House to the fact that the Senate has not seen fit, and the conferees since have not seen fit, to remove from this bill the provision which makes the Government of the United States primarily liable upon the notes that it is proposed to issue through the regional reserve banks.

Probably all of the people of the United States who have not studied this measure carefully, suppose these notes are to be bank notes, something similar to the national-bank currency we When they come to understand that these notes are now have. not primarily bank notes at all, but the notes of the Government of the United States, I want to say to my friends on the other side of the aisle that the people of the United States will hold them to account for creating such a currency. This feature will rise to plague them for many years to come, just as the free-silver proposition for which they stood in times gone by, has risen to plague them. Having loaned the credit of the Government of the United States to the bankers of the country for their purposes, and incidentally for the purposes of the public, how are my Democratic friends to resist the appeal of the cotton growers and the farmers to the Government to lend them its credit in order to enable them to grow, harvest, and market the products of the soil?

Mr. WINGO. Mr. Speaker, will the gentleman yield?
Mr. HAYES. Certainly.
Mr. WINGO. The gentleman, as I understand, condemns these notes, which he calls Government notes, and as I recall in his argument before, he did not want to put this strain upon

Mr. HAYES. Yes. That was one of the reasons.

Mr. WINGO. That being true, how does the gentleman reconcile the provisions which he and his party associates are responsible for being in the bill, as now reported in the conference report, which puts the burden of gold redemption on the Government and yet permits these banks to redeem in chips and whipstocks?

Mr. HAYES. I deny that I and my party associates on the committee or in this House are responsible for that provision. If it had been left to me, I would make the burden of maintaining these notes and of redeeming them solely and entirely the duty of the banks.

Mr. WINGO. As the bill left the House it required both the Government and the banks to redeem in gold or lawful money.

Mr. HAYES. Yes, Mr. WINGO. Has the gentleman ever heard of any banker or of any Member of the other branch of this Congress debating this bill, or has he read of any man wanting or demanding the redemption features the gentleman is now reporting and standing for in this conference report? If so, will the gentleman give his name?

Mr. HAYES. I will say, in reply, that when the bill was up before I thought I made myself perfectly clear, that it was my opinion that it was not sound to require the Government to redeem these notes; that the burden of redemption should be placed entirely upon the banks; and that the credit of the Government should not under any circumstances be involved.

Mr. WINGO. I beg the gentleman's pardon. I understood

that he had approved that,

Mr. HAYES. No; I never did, and I do not now. Mr. Speaker, I started out to ask my Democratic brethren how they are to resist the demand of the cotton grower and the agriculturist of the country for permission to borrow the credit of the United States in order to help them out as the Government is now about to help out the banking interests of the country? They can not resist it. If the credit of the Government is to be loaned for the benefit of one interest in the country, then why not for the benefit of other interests in the country? And of all the unsound and wild-eyed ideas or propositions for inflating the currency, the idea of loaning the credit of the Government in the form of notes for the purpose of growing, harvesting, and marketing the products of the soil is the most unsound and the most wild eyed, according to my judgment.

Mr. PLATT. Mr. Speaker, will the gentleman yield for a

question?

Mr. HAYES. Certainly.

Mr. PLATT. From what I understood the gentleman to say a moment ago in answer to a question from the gentleman from Arkansas, I inferred the gentleman meant to imply that the Republican conferees had not been admitted to the conference.

Mr. HAYES. Mr. Speaker, the facts in regard to that are these, and I think the House is entitled to them: The gentlemen representing the majority of the House on the conference committee invited the representative of the minority into the conference upon this bill from the beginning, and we were in conference until the conferees met with the Senate conferees. Since that time the minority members of the conference committee on the part of the House and on the part of the Senate have not taken part in the conference at all until the final act, when it was moved to report the bill. I desire to relieve the conferees on the part of the House representing the majority from any narrowness or partisanship in this regard. The responsibility rests solely with the Senate.

Mr. MURDOCK rose.
The SPEAKER. Does the gentleman from California yield to the gentleman from Kansas?

Mr. HAYES. I do for a question.

Mr. MURDOCK. Does the gentleman mean to say that in the conference which lasted through the night, or until 3 o'clock in the morning, he was excluded?

Mr. HAYES. I do.

Mr. MURDOCK. May I ask the gentleman how long the conference at which he was present lasted?

Mr. HAYES. Probably 15 or 20 minutes— Mr. KORBLY. That is wrong. Mr. HAYES. I am talking about the conference with the Senate.

Mr. GLASS. I will answer that.

The SPEAKER. To whom does the gentleman yield?

Mr. HAYES. I do not yield at all.

Mr. GLASS. Mr. Speaker, if I may be permitted to answer

The SPEAKER. The gentleman declines to yield.

Mr. HAYES. I will yield to the gentleman to make a state-

Mr. GLASS. I do not want to make a statement, except I want to answer the inquiry. It lasted for some time after the minority conferees left the committee room of their own volition.

Mr. MURDOCK. I wish the gentleman would confine that charge to the Republican minority. The Progressives had no representation upon that conference, and they would have stayed, I will say to the gentleman.

Mr. HAYES. I want to state, Mr. Speaker, the fact is that the representatives of the minority remained in the conference until a motion had been made and carried to report the conference report which we now have before us.

Mr. KORBLY. Oh, Mr. Speaker—
The SPEAKER. Does the gentleman from California yield? Mr. HAYES. I will not yield further, I can not yield to permit this controversy and consume my time. The fact is as have stated it.

GLASS. Mr. Speaker—
Does the

The SPEAKER. Does the gentleman yield to the gentleman from Virginia?

Mr. HAYES. I yield to my colleague, of course.

Mr. GLASS. My colleague does not want a misstatement of facts to go into the RECORD and thereby be attributed to him, I

Mr. HAYES. I certainly do not.

Mr. GLASS. I want to be fair, and say to the House that the majority conferees invited the minority conferees repeatedly and almost appealingly to offer any suggestion or any amendment that they might have in mind [laughter on the Republican side], and they declined to do it.

Mr. HAYES. It would be according to fact to say that the minority were asked to make any suggestion they chose to make, yes; but, to use a very homely expression, the members of the minority felt as though they had not only been spit upon but had had it rubbed in after the majority had made up their minds and come to their agreement upon all points and had their conference report printed in the form in which it has been now presented to us here. Why, it would have been a farce for us to go there to make any suggestion or offer any amendment. [Applause on the Republican side.] We had more important business to attend to.

Mr. BUTLER. The gentleman says it was printed?

Mr. HAYES. Certainly; it was printed before we were called in.

The SPEAKER. The Chair will suggest to Members that they should not from their seats inject remarks into a speech a gentleman is making. It is a bad habit. [Applause.]

Mr. HAYES. I regret to inject this matter into the Record. I want to say, further, in regard to this bill that this bill is defective, seriously and fundamentally defective, by reason of the way in which it treats extension of credit upon farm loans. Of course, the provision that is now incorporated in the bill is only a gold brick to the farmer. Only a small percentage of the capital stock of the smaller banks in the country can be loaned to farmers, and this is only permissive; it is not mandatory, of No banker in control of a commercial bank would be fit for his position if he loaned any amount out of his assets on farm mortgages on five years' time. No commercial bank of any kind will do this, so it will prove to be nothing but a gold brick thrown for political reasons to the agriculturists of the United States to make them think that there is something in this bill that will take care of their interests.

Now, when the House passed the bill it had a provision in it which, if it had remained, would have been of vast benefit to the agricultural interests of the country by providing that any national bank in the United States could establish a savings department under the rules and regulations by which well-conducted savings banks in the United States are run. If that measure had been incorporated in the bill, hundreds of millions of dollars would have been available to the farmers of the United States that might safely and properly be loaned to them upon long-time mortgages. [Applause on the Republican side.] But as it is, no such provision has been incorporated in the bill. Section 27 of the House bill, which provided for such a department, has been stricken from it.

I have here a telegram, which is typical of hundreds of telegrams and letters which I have received from bankers and business men all over the State of California. It is as follows:

I hope you will do all possible to give national banks the right to have savings accounts upon obtaining the permission of the Comptroller of the Currency. The farm-loan features of the new act will be absolutely useless here unless the above is incorporated, as national banks are now prohibited the use of the word "savings." Would like to see the act complete, so the national banks in smaller places can transact all kinds of proper banking business.

ALDEN ANDERSON,
President Capital National Bank, Sacramento, Cal.

Now, that is the attitude, so far as I know, of all the business men of California. I doubt not it would be the attitude of all business men of the United States, or nearly all of them, if they could be consulted.

But I must not consume too much time. I can merely sug-

gest things that I think are defective in this bill.

Another thing in this bill which I think is a great mistake is a new provision that has been incorporated in it by the conferees, and that is the provision throwing upon the regional reserve banks the sole burden of redeeming, or, rather, refunding the 2 per cent bonds. I supposed that the chief purpose of the establishment of these regional reserve banks was to make liquid, to consolidate, and keep for the use of the commercial interests of the country the reserves from all the banks in the United States, and yet here is a provision incorporated by the conferees that permits the Federal reserve board to require the Federal reserve banks, in proportion to their capital stock, to take over and purchase with their assets \$25,000,000 of 2 per cent bonds a year for 20 years. Thus \$500,000,000 of what are supposed to be quick assets in the regional reserve banks may be swallowed up by purchasing low interest bearing bonds of the United States. This will greatly weaken this system and prevent it from performing the functions which it ought to perform and which this law, as it passed the House, intended it should perform.

Will the gentleman yield? R. Will the gentleman from California yield The SPEAKER. to the gentleman from Arkansas?

Mr. WINGO. I want to ask a question for information.

Mr. HAYES. All right.

Mr. WINGO. In view of your statement as to reserve banks, I will ask if this provision does not go in the bill according to the conference report print:

The Federal reserve banks purchasing such bonds shall be permitted take out an amount of circulating notes equal to the par value of

Mr. HAYES. I will come to that in a minute. In order to relieve these Federal reserve banks of the burden, the proposition incorporated in the bill is that they can use the bonds for circulation just as the national banks now use them, which means that the circulating privilege by that much will be taken from the national banks and transferred to the Federal reserve banks.

One of the avowed purposes of this measure is to do away with national-bank circulation, because it is secured by United States bonds, and therefore inflexible and inelastic; and yet this bill as it comes before us not only continues, so far as it can, all the national-bank circulation, but it makes it possible to increase it. This bill in its present form, so far from retiring the national-bank currency, only adds to our circulation a new kind of note. But I can not spend time on that, as the time which I reserved for myself has already expired. I only desire to call the attention of the House to one or two other things.

Mr. WINGO. Will the gentleman yield further? The SPEAKER. Does the gentleman from California yield

to the gentleman from Arkansas?

Mr. HAYES. I must decline. I would be glad to do so, but I can not. Among other things I regard as fundamental is the provision, stricken out of the House bill, which provided that not more than two of the members of the reserve board should belong to any one political party, making that board a nonpartisan one. That provision was stricken out by the Senate, and the conferees have agreed that it should remain out; so that now it is left to the discretion of the President of the United States to appoint all of the members of this board of his own political faith if he so wills. I should be glad to see that provision remain in the bill, because it would make this board nonpartisan like the Interstate Commerce Commission, and as such it would command vastly more confidence and respect from the people of the United States than any partisan body could, and could therefore accomplish its purpose much more effectively and certainly.

Now, in conclusion, the fundamental defects of this bill to which I have adverted, and others to which I could refer if I had time, are all there, I have no doubt, because of the fact that this measure has been framed and considered in a partisan way. Practically all measures in this House except tariff bills are not considered in committee nor in the House on partisan lines. After exhaustive discussion by both minority and majority, the measures are settled and all questions relating thereto upon their merits. In the preparation and consideration of this bill political considerations and political arguments have had in some instances, I am satisfied, much more weight than the arguments that went to the merits of the various propositions. I regret that this great measure is to go forth from the Congress of the United States with these unsound and dangerous provisions in it, when, if there had been this nonpartisan consideration in its preparation and in its passage through the House and the Senate, most or all of them would have been eliminated from the bill. [Applause on the Republican side.]

The SPEAKER. The gentleman from California used 22

minutes and reserves the balance of his time.

Mr. HAYES. Yes. I reserve the balance of my time. now yield five minutes to my colleague, the gentleman from Maine [Mr. GUERNSEY].

The SPEAKER. The gentleman from Maine [Mr. GUERNSEY] is recognized for five minutes.

Mr. GUERNSEY. Mr. Speaker and gentlemen of the House, I shall not take all of the time that has been allotted to me. As I have already stated at length in the remarks which I addressed to the House on a former occasion some of my objections to the measure as it was then reported to the House. One of my chief objections has been eliminated from the bill. Other objections that I raised on that occasion still continue in the measure, although I think as a whole the measure has been greatly improved by the work of the Senate and the conferees.

I am opposed to the principle of Government issue of the

currency provided in this legislation. That objectionable feature is still retained in the bill. I believed it is unwise as well as unnecessary, if these bills are to be amply secured, as it is contended that they are, by gold and other assets, they should be bank notes as well as bank issued, which this measure provides for.

Another objection that I had was to the fact that the Federal board, to whom the Government is to delegate more power than

was ever before delegated to any board created by the Federal Government, will be a board that may be composed wholly of members of one political party and will have the appearance of being a political board. That objectionable feature is retained in the bill. I believe it to be an important objection, since this board, if this bill goes into effect and accomplishes what it is expected to accomplish, will exercise control over a majority of the banking of the United States; otherwise the bill will be an utter failure. If the bill does succeed, and the board does exercise control over a majority of the banking of the United States, it should certainly be above any suspicion of political bias or

Further, I believe this to be an inflation measure, the only question being the extent of the inflation. Therefore, for the reasons I have stated, I shall now vote against the adoption of the conference report and this measure, as I formerly voted against the bill in the House last September. [Applause on the Republican side.]

The SPEAKER. The gentleman has used four minutes and yields back one.

Mr. HAYES. Mr. Speaker, I now yield five minutes to the gentleman from Wisconsin [Mr. LENROOT].

The SPEAKER. The gentleman from Wisconsin [Mr. Len-ROOT] is recognized for five minutes.

Mr. LENROOT. Mr. Speaker, I believe that it is admitted by all that the bill now before us is an improvement over the House bill, and I believe it to be an improvement over the Senate bill. I shall vote for the adoption of this conference report. [Applause on the Democratic side.]

I shall do so, Mr. Speaker, because the bill as agreed upon establishes the policy of public control over the finances of this country by a Federal board similar to the control that is now exercised over the interstate commerce of the country through the Interstate Commerce Commission. [Applause on the Democratic side.]

Additional reasons, Mr. Speaker, why I shall vote for the conference report are because the bill takes the reserves of the banks of the country that are now piled up in the city of New York and used to aid stock speculation upon the New York Stock Exchange and distributes those reserves back to the different parts of the country from whence they came [applause on the Democratic side]; because those reserves under this bill can no longer be used to aid in stock and bond transactions, but must be used for commercial purposes to meet the commercial needs of the country.

In addition to that, the bill provides for an elasticity of currency that, in my opinion, will meet the needs of different parts of the country during the seasons of the year when crops

Another reason is that, notwithstanding what the gentleman from California [Mr. Hayes] has said, it does provide substantial assistance to the farmers of this country in the making of farm loans.

And, last of all, Mr. Speaker, I will vote for it because when this bill is put into operation, in my judgment, it will insure against purely financial panies in this country, such as occurred in 1907. [Applause.] It will not, in my judgment, prevent industrial panics, such as may be confronting us as a result of the tariff legislation enacted by the Democratic majority, but, so far as pure manipulation of finance is concerned, it will, in

my judgment, be an absolute preventive.

Now, Mr. Speaker, it is feared in some quarters that the financial interests which now control the banking interests of this country will continue to control these Federal reserve banks. But, Mr. Speaker, that is not possible, unless we assume that those financial interests will control the Federal reserve board, because under this bill that board has the right to remove every director and every official of every Federal reserve And unless we can trust the President of the United States to appoint and the Senate of the United States to confirm men who are above and beyond the influence and control of special interests-if we can not trust them to do that-then legislation upon this or any other subject relating to great industrial and economic problems is absolutely futile. [Applause.] The Congress of the United States may enact legislation as perfect as human wisdom can devise, and yet, after all, the efficacy of that legislation must depend upon how it is administered by the administrative side of the Government. I believe we can trust the President of the United States to appoint a Federal reserve board that shall be absolutely free from the control of special interests.

So, upon the whole, Mr. Speaker, though there are many defects in this bill, its benefits so far outweigh those defects that

I shall gladly cast my vote for it.

So far as the admittedly beneficial features of the bill are concerned, it has the support of Republicans and Progressives as well as Democrats. Had it not been for the partisan means by which this bill was put through this House and the Senate many of its defects would have been removed. So far as the good features of this bill are concerned, you on the other side are not able to assume the entire credit for the bill; but so far as its defects are concerned, which could have been remedied, and would have been remedied had it been treated in a nonpartisan way, you on the Democratic side must assume the responsibility for those defects. [Applause on the Republican

Mr. GLASS. Mr. Speaker, I yield five minutes to my col-

league from South Carolina, Mr. RAGSDALE.

Mr. RAGSDALE. Mr. Speaker, a few short months ago I was asked to take my place with those who were writing this currency bill. Many of the provisions that we find in the bill at this time were met with strong disapproval at the time they were offered by me in the committee. Then I was denounced as a rebel and insurgent. When we went into the caucus we found there limited approval of loans secured by farm products and improved lands, and now, to-day, it seems to me that we have before us a currency bill that we can all safely hand to the people of the United States and say the power of the Money Trust is broken and that the people have come into their own. [Applause on the Democratic side.] I have been one of those who fought against some features of this bill, but, as a gentleman who has preceded me has well said, the benefits to be derived from the bill far exceed the evils, and the people of the Southland, whom the gentleman from California [Mr. HAYES] has so unnecessarily criticized for the benefits we receive, look upon it as a very godsend to us that at last the cotton growers of America are recognized in this currency system. [Applause on the Democratic side.]

Why should the cotton growers be barred from the benefits? Why should the agriculturists be barred from the benefits of a financial system? Do we not produce that which feeds and clothes the world? Do not the products that we grow help to sustain the balance of trade with other countries? Why then should our products be outlawed and the right of credit be denied to us? Ah, Mr. Speaker, the Republican Party have grown so accustomed to denying any rights to the agricultural people on everything and heaping unjust burdens on us in tariff laws that they welcome this last opportunity to hurl another

stone at them. [Applause on the Democratic side.]

Mr. Speaker, the gentleman from California [Mr. HAYES] says there is no system here by which money may be loaned on lands. If he will turn to section 24 of the bill, it is provided there that any money received on time and on which interest is paid may be loaned for five years directly on land, the loans based either on capital and surplus or time deposits. What is a savings bank? Is it not a bank that receives time deposits and pays interest on them? Does not this bill specifically prowide for their entrance into the system? Does it not provide that that money may be loaned under the system? Why then is the gentleman from California [Mr. Haves] so disturbed? Why is it that he never offered anything by way of relief along this line, but merely contents himself with trying now to muddy the water?

Mr. HAYES. Mr. Speaker-

Mr. RAGSDALE. I have but five minutes. The gentleman

has plenty of time to answer.

Mr. Speaker, the time has come, and it has been written into this statute for the first time in this country, that farm lands are a basis for credit in America, and that the owners of them who produce the wealth of this country shall share in that financial system which everything in this country goes to support and sustain. The time is here when farm products are a basis of credit and subject to rediscount in the national reserve banks of America, and the men on whose shoulders rest the feeding of the masses now have some recognition at the hands of the Nation through the Democratic Party. [Applause.]

I want to congratulate the chairman of this committee [Mr. GLASS] that, with the Senate and the Democrats of this committee, we have been enabled to hand to this country a bill of which we can go home and say to our people, "At last we have given you a system by which you shall control and take charge of the financial system of this country." [Applause.] [Applause.]

The SPEAKER. The gentleman has used four minutes and

vields back one minute.

committee of conference it is the best currency measure which has been written upon the statute books since this Government began. [Applause.] It is not only a great credit and honor to the House of Representatives, in which it originated, but also to the Committee on Banking and Currency of this House, to whose arduous labors is due in chief part the satisfactory form in which it is now presented.

But it is also a most striking evidence of the high patriotic purpose and unswerving fidelity to party pledges upon the part of the leader of the party in power, the President of the United [Applause on the Democratic side.] Before he was nominated he pointed out the evils which this bill will correct. When he became the candidate of the party he promised this boon to the American people, and he has now the high and great satisfaction of knowing that his party has followed him loyally in the redemption of that pledge. And I am particularly happy to believe that it is the last and absolutely final refutation of the time-worn slander that the Democratic Party is a

party of criticism and negation without constructive ability. [Applause on the Democratic side.]

I can not hope, in the short time at my disposal, to discuss this measure in any detail, but I want to say to my friend the gentleman from Wisconsin that I take issue with him upon one vital feature of his remarks. I believe that this bill when it becomes a law will do much to prevent the return of industrial panies in this country, as well as financial panies. I am content to know that when this bill shall become a law it will mean that every business man who has an asset of value to hypothecate in order to receive credit for the advance and promotion of his business will be able to secure that credit in a competitive market. I am glad to believe that under this law competition will not be all in front of the bank counter, but that we will have competition behind the bank counter amongst the banks as well.

I base that upon one feature of this bill, which, to my mind, will prove most beneficial to the country—a reduction in the amount of reserve required to be kept by the member banks throughout the country. For the credit which the bank can extend is measured by the amount of demand liabilities, and the amount of demand liabilities in any system where a percentage of liabilities is required by law to be kept as reserve is irrevocably bound by the reserve it must keep. By the reduction of that required amount in this bill the amount of new credit which may be extended to business will be so very considerable that we will have almost a guarantee of times of prosperity, of promotion and advancement of production in all lines of business endeavor in this country. [Applause.]
Mr. HAYES. Mr. Speaker, I wish the gentleman from Min-

nesota would use some of his time.

Mr. LINDBERGH. Mr. Speaker, I yield 10 minutes to the

gentleman from Kansas [Mr. MUBDOCK].

Mr. MURDOCK. Mr. Speaker, I voted for this bill when it passed the House and I shall vote for the conference report. [Applause.] I support this measure because I believe that it jostles out of a deep rut the present antiquated currency sys-[Applause.]

But I do not blind myself to the fact that this measure will not be effectual as a remedy for a great national evil-the concentrated control of credit. I believe that the conservatism with which this measure was drawn and the haste which has latterly characterized its consideration is more significant than the measure itself, for the method of its consideration indicates plainly the fear that has seized the minds of the Democratic leaders and which from the start has weakened this leg-

In the last eight months I have seen the mental attitude of the Democratic leaders here change from a seemingly bold attitude of desiring to serve the people into a mental attitude of trying to divert national disaster.

Mr. FITZGERALD. What is the answer? Mr. MURDOCK. The answer is this. There is-

Mr. MURRAY of Massachusetts. Will the gentleman yield? The SPEAKER. Will the gentleman from Kansas yield to

the gentleman from Massachusetts?

Mr. MURDOCK. I will not. The answer is this: There is no panic in this country—not yet. [Applause on the Democratic side.] There are no hard times-not yet. When the tariff bill passed the House the gentleman from Alabama [Mr. Underwood] issued an uncompromising warning to the manufacturers of this country that if they, to discredit the new revi-Mr. GLASS. I yield five minutes to the gentleman from Pennsylvania [Mr. PALMER].

Mr. PALMER. Mr. Speaker, this banking and currency bill as it passed the House was a good bill. As it passed the Senate it was in many respects a better bill, and as it comes from the The Democratic revision of the tariff seen this night in perspective is not as drastic as it seemed to many on the day it passed. In many respects it was not a drastic revision, but it was a

foolish revision in the manner of it.

One year ago and a little over the Democratic leadership, in the day of probation before the country, revised the tariff one schedule at a time, which would have applied a revision gradually and safely. This year, in their arrogance, they slammed down on the business of this country in an omnibus bill 4,000 readjustments, and what followed? There was disorder in business; there was disquietude. What immediately followed the disorder and disquietude in business? The special interests in this land, the mention of whom you men land at mockingly to-night, seized the opportunity. They are no mean enemy. They fight all the time. And when the disorder in business followed the omnibus revision of the tariff, Wall Street was watching and Wall Street acted.

In July the interests began to restrict credits in this Nation. Do you doubt it? Then ask your Secretary of the Treasury. By September Wall Street had begun to manipulate the price of Government 2 percents. Do you doubt it? Then ask your Secretary of the Treasury.

For the last six months the special interests have been taking away from the markets their support. Do you doubt it? Ask any man who studies the stock market. All over this country the word went out to the minions of the special interests to spread the poison of pessimism; they have been trying to talk business to death, and every man within the sound of my voice knows it. Is it true? You know it is true, on this side of the House, and you have a lively suspicion of it on the other side. They have saturated the air with distrust. They have been dictating the very terms that the Democratic leadership is thinking and acting in, and there has gone up will ain the last four months everywhere one grand chorus of calamity on the part of the men that the special interests control. [Applause.] And there has been put out over the country, and I say it with regret, for it has found its echo here, a certain senseless, Godless, merciless partisan habit of thought upon the part of the Republican leadership, which has led them to show hope of party prosperity coming through national disaster. [Applause on the Democratic side.]

Mr. Speaker, I want to say to this House, and the next year's events will bear me out, that the Money Trust has not passed. The Democratic leadership in the hour when it should have fought, faltered. In a situation controlled by special privilege, confidence is always an essential to prosperity, and special privilege, unchallenged in this country and undestroyed, can destroy confidence; and special privilege has been busy in the last six months. Your Democratic Pujo committee brought in specific remedy after remedy which, if adopted, would have met fairly and squarely, face to face, the great enemy of this Nation, the Money Trust. But you rejected the specific remedies of the Pujo committee, chief among them the prohibition of interlocking directorates. You Democrats voted that provision down in caucus, you voted it down in the Committee of the Whole, you defeated it upon record vote in the House, and it was defeated

in the Senate.

I say to you as one American talking to others, you can not afford to palter with this enemy. He is yours, as well as he is mine. He will not cease fighting at some gentle love-tap, at some timid compromise, at some half-way measure, at some half-baked enactment. "Be slow of entrance to a quarrel, but being in bear it so the opposed may beware of you." In this You allowed the special bill you rejected specific remedies. interests by pretended dissatisfaction with the measure to bring about a sham battle, and the sham battle was for the purpose of diverting you people from the real remedy, and they diverted you. The Wall Street bluff has worked. You struck a weak half blow, and time will show that you have lost. could have struck a full blow and you would have won. [Applause.]

The SPEAKER. The time of the gentleman from Kansas has expired.

Mr. GLASS. Mr. Speaker, I yield to my colleague, the gen-

tleman from Kansas [Mr. Neeley].

Mr. NEELEY of Kansas. Mr. Speaker, I have had occasion to indorse some of the splendid sentiments of the gentleman who just left the floor; but he, like some of the balance of us, gets overenthusiastic at times and hypercritical at others, so that he loses the balance and the poise he might otherwise have. He says this bill was framed in haste, forgetting that for over seven months it has received the earnest and careful consideration of the Banking and Currency Committee of this House and for nearly six months the consideration of the same committee in the Senate. True it is that it has not taken the Democrats

as long to revise the currency as it did the Republicans to revise the tariff; but we have now all but completed the job and here present in seven months the sum total of our endeavors, so perfect in the whole that the gentleman from Kansas [Mr. MURDOCK], representing as he does the leadership of an opposition party, pledges his support to the work that has

been achieved. [Applause on the Democratic side.] While we are passing it might be well to call attention to the

fact that when the Aldrich-Vreeland bill, which this substitutes, was presented to the entire Banking and Currency Committee, where it was then pending, the Democratic membership of that committee were denied the privilege of having a copy of the bill, and the party to which the gentleman then belonged reported the bill without the Democratic membership of the committee ever having seen or read it. When the bill was reported to the House for passage a rule was brought in from Committee on Rules limiting debate to four hours on a bill that none but the Republican members of the Banking and Currency Committee had ever read, and it was an objection by the now chairman of the Banking and Currency Committee that brought a printed copy of that bill before the House for the first time. It came fresh from the printer, green and wet, and was rushed through under the rule, practically without considera-

tion and without amendment.

I know this bill is not perfect, and I hope that before the end of this Congress it will be amended by placing in it an adequate bank-guaranty law. It ought to have been in this bill. When we made our fight in the committee the four gentlemen who were denominated insurgents, Filipinos, obstructionists, recalcitrants, fought for a decent bank-guaranty law. We opposed then, as we did in the caucus, the consolidation of banks and the granting of the savings-bank privilege to institutions already too powerful. We contended then, as we did in the caucus, for a provision prohibiting the interlocking of directors, so broad in its scope as to force competition between groups now allied for their own selfish purposes. We contended with all the power at our command for six-months agricultural paper; we contended for the extension of the privilege of making farm loans by national banks from nine months to five years; and we fought to lay the foundation for a comprehensive farm-loan plan. Had the things we contended for then been accepted upon the part of the Banking and Currency Committee or by this House there would have been but one change made in this bill as it now comes from the conference committee, and that the guaranty of bank deposits. Then, instead of the Senate taking the credit for presenting a bill favoring the recognition of agricultural credits, this House would have received the whole and entire credit for the first recognition of the agriculturist in currency legislation since this Government was established. The gentleman is mistaken, however, when he says that the interlocking-directorate proposition is dead and that the Pujo committee recommendations are buried. A motion was made in the Democratic caucus to send my interlocking-directorate amendment to the Judiciary Committee, and it was sent there with specific instructions and directions to report a bill preventing interlocking directors, not only between banking institutions, but between all industrial corporations; and when this has been done the Pujo committee and the Stanley committee may well join in singing the doxology, for they have

not been in vain. [Applause.]
The SPEAKER. The time of the gentleman from Kansas has expired.

Mr. HAYES. Mr. Speaker, I yield five minutes to the gentle-

man from Pennsylvania [Mr. Moore]. [Applause.]

Mr. MOORE. Mr. Speaker, Andrew Jackson, a Democrat, destroyed the second Bank of the United States, which was located in my district in Philadelphia, because it was a central bank presumed to be under the control of one man. Andrew Jackson wanted to decentralize the banks and succeeded in doing so, to the great distress of the country. Andrew Jacksons who have brought in this bill would make the original Andrew Jackson turn in his grave. Why? Because in the name of "popular rule" they have built up a banking system more firmly centralized under the authority of one man than the United States Bank was under Nicholas Biddle. The President of the United States now becomes the absolute dictator of the finances of the country. He appoints a controlling board of seven men, all of whom may belong to his political party, although it is in the minority. His Secretary of the Treasury, under his direction, is to rule supreme whenever differences of opinion arise between himself and the Federal reserve board. And only one member of that board is to pass out of office while the President is in office.

Could the authority of one man be made more absolute than that? And by what "popular rule" is this brought about?

The Democratic caucus considers a bill in secret session for several months. The Representatives of a majority of the people have no voice in its preparation. It is brought into the House and passed in a day. The Senate receives the bill, and the Democratic Representatives ponder over it for months. It is forced through the Senate and returns to the House so changed in form that even the Democratic committee chairman of the House declares that if passed it will result in a veritable "saturnalia of inflation." In 40 minutes, less time than it takes to read the bill, the House is allowed to consider if. Then it goes to conference. And the people whose money is at stake are "in the saddle" and "popular rule" is supreme. Let us see.

The Senate appoints nine conferees to meet three conferees of the House and adjust the differences between the two bodies. When they get into action, the nine "popular-rule" Senate conferees are boiled down to six Democrats. The three "popularconferees of the House are reduced to two Democrats. All Republicans are excluded from the conference. rule" now rests with the six Senators and the two little giants of the House-the gentleman from Virginia [Mr. Glass] and the gentleman from Indiana [Mr. KORBLY].

Mr. GLASS. We confess. Mr. MOORE. You are entitled to do so.

The bill is now brought back to the House in a 58-page document in triple columns and a 30-page closely printed report, which the House is to accept after two hours' discussion in order that the President and the Members may go off on their holiday vacations. And what is the principal change we are to vote upon after the two hours' discussion? On page 24 of the comparative print we find that "popular rule" in the steelbound Democratic conference has restored to the President, as one of his Federal reserve board, the Comptroller of the Currency, whom he was in danger of losing under the Senate bill. Only one of the seven members of the Federal reserve board will go out of office during the President's term. Will the six others stand by the President and his Secretary of the Treasury against any order given by the President? If he plays politics to perpetuate his power, will they resist him?

Therefore the popular rule which Andrew Jackson strove for against the rule of Nicholas Biddle, of the United States Bank, is overthrown by the Democratic Party and the President becomes the absolute dictator of the public and private resources of the country which find their way into the national banks under the new system. Such tremendous power for good or ill was never granted to any President, nor has so great an inducement to perpetuate the power of any party been vouch-

safed to any man in the history of this country.

This bill, apart from its many danger points and imperfec-tions, is a travesty upon Democracy's so-called "popular rule." It is a confession of dictation and absolutism the like of which has no parallel in American annals.

Mr. HAYES. Mr. Speaker, I yield five minutes to the gentleman from New York [Mr. Platt].

Mr. PLATT. Mr. Speaker, it has been well said by the gentleman from Virginia [Mr. GLASS] and by others that this is a great measure—one of the greatest measures that has passed this House of Representatives and the Congress of the United States for a long time. I want to congratulate my Democratic friends for the large measure of success they have attained in making the measure largely a good measure, but at the same time I want to point out to them that they are enacting this great measure with some very serious defects, and with a certain amount of fear and trembling, under the party lash and under threat from the President that there would be no Christmas dinners unless it was passed at once. And yet what have you done, gentlemen? You are passing a great measure which the Democratic Party is going to take credit for and on the end of it you are extending a Republican measure which you have condemned in most unmeasured terms on the floor of this House, There is nothing you have condemned more roundly and vehemently than the Vreeland-Aldrich law. It has been cursed from one end of this Hall to the other by gentlemen on the other side of the House, and yet this bill extends it for one year because our Democratic friends are afraid this bill may not be panic proof.

Mr. GLASS. May I interrupt my colleague?

Mr. PLATT. Certainly.

Mr. GLASS. Is it not fair to state that while we are extending the Vreeland-Aldrich Act we are amending it so as to make it available to the people of the country? We reduce the tax, so the people may get the currency should they need it. [Applause on the Democratic side.]

have very much condemned, but you found it necessary to put it into this bill.

As a Republican measure it was not operative; as a Democratic measure it may be operative. [Ap-

plause on the Democratic side.]

Mr. PLATT. Well, I hope it will not be needed, but there is good deal in this bill based on the Vreeland-Aldrich bill besides, and that is one trouble with it. [Laughter.] The currency feature of this bill is a scheme whereby the United States issues notes for the banks. It provides for a currency made to loan to the banks at a low rate of interest, and that appears as a tremendous special privilege given to privately controlled banking institutions. Other organizations of the country, like the farmers and workingmen, will ask why, if the United States can issue its Treasury notes to loan to banks at one-half of 1 per cent interest, it can not issue notes to loan to them at 2 per cent. And it is a perfectly logical conclusion that is going to give you a whole lot of trouble. I agree with everything that my colleague the gentleman from California [Mr. HAYES] has said-that the notes issued under this bill ought to be bank The banks are to keep the reserves and can redeem them, but for some reason unknown, or perhaps not entirely unknown, you have characterized these notes as Government notes when really they are practically bank notes and-

Mr. GLASS. I will ask the gentleman if, under the nationalbank act, a distinctly Republican measure, you have not been loaning currency to the banks for 50 years on their collateral, while not loaning to farmers? [Applause on the Democratic

Mr. PLATT. No; we have not. We have been depositing money and taking security for it. You can call that a loan if you want to, but it is a deposit. Under this bill the Government lends its notes to the banks at a low rate of interest and the banks loan the same notes to the people at a high rate of interest, and this is a special privilege.

Mr. KORBLY. Is it not a fact that the banks put up 140 per cent of security to get these borrowed notes you speak of? Mr. PLATT. I think they are secured sufficiently. with the gentleman from Virginia and the gentleman from Indiana, in that the notes are probably secure, but you have got to explain from now on what business they have to read as Government notes when they ought to be bank notes standing on the security of good banking and a sufficient reserve. [Ap-

The SPEAKER. The time of the gentleman from New York

has expired.

The gentleman from Minnesota [Mr. LINDBERGH] is recognized.

Mr. LINDBERGH. Mr. Speaker, I am mindful of a picture in life. It is that of the school children of to-day, throughout all parts of this country, being taught the principles of conservation-told that it is not their generation alone to conserve for, but that they must build for all the future as well; told to conserve the forests, the minerals, the waters, the soils, and all the things required for the use of humanity. This is being taught in all the schools and the homes. For example:

Nevis is a small village located in one of nature's beautiful parks in northern Minnesota. In the early summer I accepted an invitation to address the people at a fair which was held at Nevis last October. You Democrats issued one of your caucus decrees to put the House out of work just previous, therefore I was able to comply with my promise. I went straight from

Washington to Nevis

Soon after my arrival at Nevis Prof. R. M. Washburn, of the State university, who was at Nevis to lecture in the interest of farming, seized me by the arm. The professor was aglow with enthusiasm and requested me to follow him. I could understand that some grand object lesson was in store. Sure enough, he led me to a hall and had me stand where I could overlook an exhibit of agricultural and horticultural products, and also various kinds of needlework, drawings, and other industrial products of the people there. "This," he said, "is one of many fairs that I have attended. Behold this exhibit."

It was, indeed, a beautiful sight to anyone who would associate all that he saw there, in all its relations to the world as well as to the people there. "See," said Mr. Washburn, "the school children's exhibit. What does that suggest to you along the conservation line?" Mr. Washburn looked like a mountain of comprehension, and it was plain that he expected me to rise to the importance of the suggestion. He was not a mere enthusiast. He knew that there was more than appeared on the surface. He knew the difference between the rearing of children in the country and rearing them in the great cities. He suggested some of these differences—all favorable to the chil-Mr. PIATT. Oh, I admit you are making it more available, suggested some of these differences—all favorable to the chilbut at the same time it is a Republican measure which you dren on the farms and in the villages. They will have the best

of it in the coming struggle for the settlement of the great

The village folks, joined by their neighbor farmers, had collected together the evidences of the intelligence and thrift of the exhibitors and the productivity and adaptability of the climate and soils for certain agricultural and horticultural products. It was, of course, not the first such exhibit that I had seen, but just then, direct from the Nation's Capital and the doings of Congress, the importance of what had been suggested to me and my own observations along the lines of human industry everywhere, linked in their relations directly and indirectly with the acts of Congress, made an extraordinary and vivid impression on my mind.

Is all this to make humanity more prosperous and happy? If it were so, it would be well, for above all things it is important to conserve to men and women the products that result from their intelligence and industry. That is the hope of the world. But that kind of conservation has been almost wholly neglected. Congress appropriates more to protect the hogs, cattle, and dumb animals than it does to preserve satisfactory conditions among the people.

The things that are taking place at Nevis in a way are taking place in the agricultural districts everywhere. It is being supplemented in the factories, in the mines, on the railways, and in the various industries where people are working to produce the necessaries of life. To conserve these people and their children in health, prosperity, and happiness is the real conservation problem—to conserve the products of their own energy for their own use, and not for the purpose of giving it to pay interest on credit supported by themselves, but paid to bankers and others. That is the real problem that is before Congress in the consideration of the currency bill, but the currency bill falls in this respect. It simply gives the bankers the privilege of extending credits to charge the people interest on, while the Government is to support it.

I doubt that any Member would intentionally wrong the people, but it is known that the Money Trust is adroit in its plans to defeat those who dare to oppose it. Members who oppose it are subject to all kinds of attempts to injure their reputation back in their districts. The trusts control some of the newspapers and have them and other agents at work. These libel, slander, and hatch up all sorts of schemes in the hopes to start the people themselves to making unfavorable comments about Members whom the trusts wish to remove from Congress. But the people have discovered this and are not often fooled by them. So now the Money Trust has supplementary schemes, and try them out with some success in molding legislation. This scheme has been to make the people believe that the trusts are opposed to the very thing that the trusts favor. It is assumed that the people will favor what the trusts openly claim to be against. Smoothly the Money Trust has played a game of fake opposition to allay the suspicions of the public while it put through Congress its plan to shape this new bill. Members have voted for it who never would have done so if they did not believe the people wanted it. One of the shrewdest things that has occurred in connection with this bill was a speech made within the walls of this Capitol by a very distinguished person in opposition to the bill. I believe that speech to have been made for the very purpose of giving it a better chance to pass.

The new law will create inflation whenever the trusts want inflation. It may not do so immediately, but the trusts want a period of inflation, because all the stocks they hold have gone down, because the people got suspicious of them in the investigations and refused to buy. They have been dropping for a long time. Now, if the trusts can get another period of inflation, they figure they can unload the stocks on the people at high prices during the excitement and then bring on a panic and buy them back at low prices. Formerly they worked the stocks up and down several times a year to fleece the people, but the people have been keeping out of stocks for a while. Excitement, it is hoped by the trusts, will bring them back.

Several in both House and Senate voted against this bill because their votes were not necessary to carry it. But if it stood in danger of losing, like the 23 Democrats who a few sessions since came to the rescue of the standpat Republicans to save as much of the gag rules as possible, here too, I repeat, if it were necessary to save from defeat this Money Trust bill, there would be a sacred and trusted "23," so to term it, on hand to help pass the bill.

This act establishes the most gigantic trust on earth, such as the Cherman Antitrust Act would dissolve if Congress did not by this act expressly create what by that act it prohibited. When the President signs this act the invisible government by the money power, proven "o exist by the Money Trust investigation, will be legalized.

The bill establishes regional banks to be owned by the other banks. The United States Treasury collects taxes from the people. These it will deposit in the regional banks, but will get interest or at least very little. These banks will be controlled by nine directors—three of them selected by the Federal Reserve Board and six by the banks. That will give the banks full control, with the privilege of the three other directors to look on and see how slick they will do it. It will work out in about this way: All the taxes collected from the people by the United States officers will be deposited in the regional banks. Those of the people who have any money will deposit it in the local banks. The people who are compelled to borrow will go to the local banks and borrow that money. It will be the same money that their neighbors and their be-loved Government, the United States, deposited in the banks. They will give their notes for these loans to the local banks. The local banks will send the notes to the regional banks which they own. 'The regional banks will take them to the people's Government, the United States, and have some more money printed. This the local banks will get. This may be loaned to manufacturers, merchants, etc., and their notes taken, and these notes again may be sent to the regional banks to go through the same process to get some more money from the United States-and so on the endless chain will continue. is the financial end of it. Then comes the domestic. Of course we all know, and I shall explain the process later, that all this interest is added to the price of the things we buy, or if we are the original producer, subtracted from the things we sell, or in case we are wageworkers it is subtracted from our wages or made up by extra hours of work. The consequence is that the farmer's wife, the wageworker's wife, and others' wives who are not supported by the usury system, are compelled to work long, long days in their domestic toil, and their daughters are sent to be the servants of the usurers, and their husbands are kept in the field, at the bench, or other place of toil, all to pay the usury that has been supported by the old system and enlarged on by this new fraud. When I hear politicians talk about a progressive administration, and then review this bill, which is to be a Christmas gift to the Money Trust, I pity the innocent children all over this land-defenseless they are, but the burden created by this act in lieu of a promise for liberation from the false old system that has made 94,000,000 people industrial slaves, is a shame that should make the administration seek its own oblivion.

The trusts may have temporary prosperity by reason of this act. They control the banking interests. This is a great grant to the banks, immensely more than they had a right to expect even from a subservient Congress. But their triumph is the loss of the people. The people may not know it immediately, but the day of reckoning is only a few years removed. The trusts will soon realize that they have gone too far even for their own good. This act places the jackscrew and the vise completely within their hands, and the squeezing process which they will apply to force the last bit of energy from the toilers to enrich the wealthy will go to the point of maddening the people.

Since there is no hope to stop this Congress from passing this bill, I shall discuss a few of the principles involved and the ways and means for the people to make a declaration of independence to relieve themselves from the money power. This they will be able to do by taking control of Congress.

The bill is of such far-reaching injustice that I feel it my duty, preliminary to considering some fundamental principles involved, to make some observations on the system that has made it possible to prevent Members of Congress from preparing a good bill and forcing a vote upon it.

The Money Trust caused the 1907 panic, and thereby forced Congress to create a National Monetary Commission, which drew a bill in the interests of the Money Trust, but Congress did not dare to pass the bill as coming from that Commission. The main features of that bill, however, were copied into this bill. In 1912 I made a speech predicting that that would be done, and, further, that the Money Trust would cause a money stringency in order to force its bill through Congress. All this has now taken place. This bill is passed by Congress as a Christmas present to the Money Trust.

The political cowardice existing in this Capitol will prevent adequate reform until the people themselves realize more fully the burden that is placed on them by the interest, dividends, rents, and profits allowed by law, and collected by banks and others who control centralized wealth.

The money power overawes the legislative and executive forces of the Nation and of the States. I have seen these forces exerted during the different stages of this bill. It has convinced me that the people can secure no help from Congress until public sentiment is directed to a specific bill in the people's interests. There has been a strong sentiment for reform, but it has not been directed to a specific remedy, and, therefore, the Money Trust has taken advantage of the sentiment, and under disguise has put forward its own bill—the bill that is about to become a law. Had the people presented a bill and demanded Congress to pass it, Congress would not dare to pass this bill as a Christmas present to the Money Trust.

Even the House bill was a vicious bill, and I so stated it be-

fore, but it could hardly be worse than the old law. It might be better, but the Senate amendments have completely legalized a gigantic trust and reenacted the old Aldrich-Vreeland emergency currency act of 1908. It shows how persistent the trusts are to control those in power. The Democrats here then, and many of them are still in Congress, all voted against that bill, and now when in power all of the Democratic Senators and all but two of the Democratic Representatives in the House

The grandiloquent attempt is being made to make the people believe that the control of the money system is being taken out of the banks and placed in the Government. There never was a more deceptive attempt than this. The people are principally interested in how to get money when they need it and what it will cost them. This bill empowers the banks to get more money on the credit of the people so as to collect more interest.

Those who tell you that the Federal reserve board has like powers with reference to finances that the Interstate Commerce Commission has with reference to railway transportation either try to deceive or are ignorant on that point. There is this vital, and it is a vital, difference: The Interstate Commerce Commission can regulate rates to be charged shippers, but the Federal reserve board have no power whatever to regulate the rates of

interest that bankers may charge borrowers of money.

This is the Aldrich bill in disguise, the difference being that by this bill the Government issues the money, whereas by the Aldrich bill the issue was to be controlled by the banks. should be deceived by that change, however, for by this bill the Government can let no one but the banks have the money. It is optional with them whether they will take it or not. If they do, they will control it without limit. Wall Street will control the money as easily through this bill as they have heretofore. It makes no difference that the money can not be secured from the Government on stocks and paper based on stock gambling, for the Wall Street banks have enough commercial and other discountable paper to borrow on, and when they get the money they can and will loan it direct to the stock gamblers, to be used to exploit the people. I do not believe that any intelligent person is simple enough to not know that what I state is the exact truth. You will be surprised to see how quickly the special interests will accept this bill. There will be no delay about that. They may not prefend it, but it will be done just the same. This is merely one of several installments of bills that are to be used as promises to the people to fool them. They will be told that the next one will cure defects. And when the next one comes, then it will be the next after that, and so it will continue till the people look into the matter themselves. It is all a pretense for the purpose of making the people believe that good things are coming, and in the meantime the millionaires will have gotten more millions at the people's expense.

In view of the conditions that I have in part described and shall further discuss, I am convinced that the greatest pros-pects for reform is for the people themselves to frame concrete measures and present them to Congress and demand their adoption. If it is left to Congress to draft bills, they will be drafted in the interest of the Money Trust as the present bill has been. The people have much more to gain from their own work than They are paying for all the things that they generally realize. are being done, and they have the opportunity, if they will avail themselves of it, to so organize that they may secure the fruits of their own industry, instead of letting the parasites enjoy it. Men and women should not drudge as they do. that is necessary for them to avoid it is to so govern that they

enjoy the results from their own energy.

BORROWERS FORCED TO APPLY TO THE MONEY TRUST.

I challenge any Member to show how any person can get money under this bill without going to a bank for it, and I also challenge any Member to show me one syllable in the bill that will regulate the bank in the least in the amount of interest that it will charge. The power of the banks has been increased to expand credits and collect interest from the people for their

stockholders on the credit of the Government. But inasmuch as there is no way to make Members who are subservient to the bosses remedy a fraud on the people, I shall first observe the system of politics that has made it possible to perpetrate the plan. I do this with the hope of interesting the people to arise in their own behalf.

Barnum, the great showman and entertainer of children, small as well as those grown up, is said to have said something like

The American people love to be humbugged.

Plainly, intelligent observers can see that Congressmen know that if Barnum said that, he erred. Senators and Representatives know that the American people hate to be humbugged. That may be inferred, because they take infinite pains to conceal the fact that Congress is the greatest of humbugs. hear much about Wall Street fleecing the lambs, but that is not a "patchin" in comparison with what the Senators and Representatives humbug the voters. The people have spotted Wall Street and do not trust it. We expect Wall Street to cheat, Wall Streeters have not taken an oath to serve the people, but Senators and Representatives have. Wall Streeters could not cheat us if Senators and Representatives did not make a humbug of Congress.

THE FARCE OF PARTY CONTROL IN CONGRESS.

The division of Congress into political parties is a crime. No intelligent person who has been here long doubts that the present main object of the bosses in the political parties is to get office and to grant special favors at the people's expense.

The party of Abraham Lincoln was created because there was a division of opinion as to whether this country should be slave or not. That could be settled only by a strong party. it was settled there was no further occasion for a division among the people. All the political problems now existing are economic and should be settled on the basis of business judg-

It is contrary to the plain interests of the people and of government itself to have the bosses fence the people into various political pastures to oppose each other. There are now no conflicting interests except those fostered by a division of the

people into political parties.

The people, individually and collectively, should use every means possible to destroy the existing boss system. Individually and collectively they may have to work within one party to destroy government by other parties as well as to prevent government by the party within which they work. If the existing machinery is bad and is the only thing left that we can use, and it is required to destroy the false structure, it should be used.

Congress was not originally a humbug, but it developed into one by reason of its division into political parties. The Republican Party was not originally a humbug, but political bosses got control after the slavery problem was settled and its administration became a humbug, and for that reason it met defeat. The Democratic Party was not originally a humbug, but in that, too, the bosses got control and its administration developed into a humbug and is one now, and for that reason should be defeated. The Progressive Party did not start as a humbug, but if it should obtain power and undertake as a party to govern the Nation its administration would develop into a humbug, the same as the other parties while in power did.

My colleague from Iowa [Mr. Wood], chairman of the national Republican congressional committee, is one of the best Members in this House and is independent and progressive. The December Reflector publishes an article by Mr. Wood, disclosing that he (using his language)

Believes that the American people, when they register their will at the polls, are actuated by a desire either to continue existing conditions or remedy unsatisfactory ones—

And that-

when their judgment is adverse to the Republican administration, it behooves our party-

Meaning the Republican-

to determine the underlying reasons for the change and apply the necessary correctives.

Mr. Wood's statement is additional evidence of what I claim as a reason why no party should control Congress. What he points out as the reason for the people registering their disapproval is continually happening because of party government in Congress and in legislatures.

The people can not by that system register their wants.

They can only vote to negative what has been, if they think that a different vote will not get still worse results, and some-times they are willing to take a long chance. They vote to eliminate the worst of the existing evils. That is what party government amounts to. That is not affirmative government by the people, but it is negative. It will take the people very much longer to get their rights that way than by a more direct control—that is, government by Congress itself. Each district should be responsible for its own Member and hold him responsible to the district instead of letting him be bound and gagged by a political party boss.

This is inherently a National Government, and that is why party government is unsuccessful in dealing with the economic problems. We have changed from one party to the other, and the uncertainty that is created makes harder times. If we had a people's Congress, there would be stability. We could then solve the economic problems in the interest of all the people. There would be continuous improvement.

In most cases political parties have had their origin for good cause. I hold no brief against any party operating in its proper place. In fact, parties may be of great service. But I hold a brief from my constituency to register the strongest protest and opposition that I can against any party usurping the powers of Congress

I have watched the operations of false government by party that make Senators and Representatives who subordinate themselves to party rule practice perjury and treason galore. In some cases their wrongful acts are hidden and screened by rules and practices adopted in order to enable them to do that. But in other cases they believe, if done in the party name, it will be forgiven—even approved by a partisan constituency—and in those cases Members proceed boldly, as if to do a thing in the name of a party is justified, however much it conflicts with the people's rights.

CAUCUS IN CONGRESS IS CONSPIRACY.

The caucus crime is one of the methods used. The people are told that the caucus is justified when it begets better legislation. The bosses are very careful not to explain that the caucus is resorted to principally to prevent legislation most favorable to the people. Of course the bosses know that some improvement will be forced, and they resort to the caucus to keep it as little as they think the people will accept without giving the bosses trouble. The caucus keeps it at the least.

The correct name for a caucus is "conspiracy." The con-

The correct name for a caucus is "conspiracy." The conspiracy here is to usurp the powers of Congress and do as little for the people as it is thought the people will accept. I have been fighting the caucus system and the secret meetings of committees ever since I came to Congress. When I began the standpat press poked fun and ridicule at me for doing that. The whole country is now fighting to kill "king caucus." Even Collier's Weekly, which ordinarily supports the Democrats, mildly criticizes them by publishing in a 1913 number the following:

The caucus system, even in the form in which the Democratic Party is now using it, is doomed and will not last beyond the present session. It is against the present spirit, and it is not consistent with present-day ethics and politics.

It is not enough to destroy the caucus conspiracy, however. Party government is practically the same thing as caucus government. I fought party government from my first entry into Congress. I believe I am the ploneer in the fight. Among others, Collier's Weekly again said in September, 1913:

With the beginning of the coming session the power of the caucus will be a thing of the past. As soon as this happens there may very well come a break-up in the parties, which is the necessary preliminary to a new line-up in the United States—a normal division between men whose minds and interests are conservative and those whose minds and interests are liberal.

Collier's Weekly, however, did not correctly estimate the Democratic bosses in Congress, for the Democratic Senators in this now regular session held caucuses to regulate the currency bill that should pass the Senate.

SECRET MEETINGS TO DECEIVE PUBLIC,

I introduced a resolution myself in the House Banking and Currency Committee to have all its meetings open to the public, so that the public would know what was being done by the committee. The liberal press supported it, the stand-pat press opposed it; but it got publicity both ways, and the majority of the committee did not dare to make a record against the public demand. So my resolution passed. But note what was done to evade it. The Democratic members, who were in the majority, called no more meetings of the Banking and Currency Committee until they had held numerous secret meetings and fixed up a bill, and then they called a meeting of the Banking and Currency Committee, which was simply to report it to the House. Minor amendments were allowed. Four that I offered were accepted, and I think an equal number offered by my colleague, Mr. Smith, of my own State, and three or four others. But all the amendments of vital importance were voted down

on the express statement made by more than one member of the committee that he could not vote for an amendment not consistent with the Democratic caucus.

That is the way these secret meetings and secret caucuses work to defraud the people by preventing the best kind of legislation.

POLITICAL PATRONAGE.

The political bosses maintain their position by patronage. The Democratic and Republican Party bosses have been equally guilty in using patronage as a means to bribe. It costs the bosses nothing, as the people pay the salary of all appointees, and the bosses use them to carry on their campaigns to fool the voters.

Any new party that is actually progressive and any old party becoming actually progressive will advocate that public appointive offices be distributed in the proportion of the respective numerical strength of the parties. Any official who is progressive and honest in his administration, if he has appointments to make, will, so far as possible, distribute them amongst the several parties in the proportion of their voting. That would insure freedom, remove prejudice, create a wise and natural checking for efficiency, and give general respect. To practice that would change this from a factional government, as it is now, to a people's government.

This is not a mere academic problem. I wish to explain what sort of a deal so-called party government has given the people.

FORMER GREAT ADVANTAGES SACRIFICED.

There was a time within the generation of those now governing that the conditions in this country promised the people exceedingly good results. Conditions originally were all right. But under party government, officered by men long in Congress, and some of them still here, we have been getting into more and more difficulty. There is a very serious dissatisfaction, justly so, among the people. They have been deprived of the results that the advantages originally promised them.

Consider conditions as they were and then the results. While the political parties started with things in excellent shape, and while some of the men then and still in office had a chance to conserve to the public the natural advantages, things went wrong. They did not so much as file a protest, because they wanted to "stand in" so they could appoint their supporters postmasters or to some other office that the people pay salaries to. Instead of the people now possessing the natural advantages the trusts have gotten and capitalized them, and the salaries of patronage officials are paid out of the people's daily earnings.

WHY LONGER TRUST THOSE WHO FAILED?

How can we expect the same system and the same men that failed to conserve the advantages that the public so recently had are going to rise to the present emergency to reinvest the people with their sacrificed advantages? The problems were simple when they took charge, but now they are complex. If the public is made to believe that the political parties and the men who have run the ship of state on to the rocks can be trusted because they profess to be progressives, after the votes are counted, but never were progressive before, then our children are to be pitied for the results that would come from the credulity of their parents.

The stockholders of the Hartford & New England Railway Co., when they found the company in trouble and its resources squandered, discharged the officers. The company is now doing better. It would profit the people to put the politicians and bosses and the political parties out of Congress. They have squandered the Nation's resources.

Men and parties who are forced to become progressives, or to say that they are, because the voters have demanded progress before the officeholders and the party bosses have seen the necessity, can not be depended upon to see any necessity for further progress until the voters force it. They may still further delay progress by caucus-secret committee meetings and rules fixed to screen the boss system. Many of those who were stand-patters when the progressive movement began and now pretend to be progressive are solely so for the purpose of stopping the progressive movement from materializing into full benefits.

Let us review some of the advantages that we had and that have been lost or impaired by party government administered by political bosses, some of whom are still in office and are trying their utmost to keep the political parties in control of Congress

The people did own the lands and the minerals. Congress gave half of the lands and practically all of the minerals to corporations, or left the way open for them to acquire the

minerals. Congress allowed speculators to secure the Government's most valuable forests.

Congress permitted the valuable patents and patentable inventions to be monopolized, so as to give a monopoly of their use.

Congress permitted transportation companies to establish systems of discrimination favoring certain individuals and localities, thus causing some individuals to acquire colossal fortunes and some communities to grow to unuatural proportions, all at the expense of an economic general system that would be favorable to the public.

Congress permitted private individuals to monopolize the telephone and the telegraph, two great service instruments that

the public should own.

Congress has permitted many other valuable instruments and conditions to become controlled by special interests. But of them all none is so important as those needed for the mediums of exchange—the telegraph and the telephone, to communicate i formation; the railways and the waterways, to facilitate the physical exchange and the travel; and the money, for the adjustment of accounts.

These that I mention and some others are con'rolled as special privileges by a few persons. They were acquired either by grant of Congress or because of the negligence of Congress. The public was rich in resources, but its wealth has been Watered stock has been issued by the special privileges. The public is charged compound interest and profits on what it originally owned, but lost through the negligence of Congress. That is one of the results of "caucus government" by bosses in the name of parties.

The greatest crime of Congress is its currency system. The

schemiest legislative crime of all the ages is perpetrated by this new banking and currency bill. The caucus and the party bosses again operated and prevented the people getting the benefit of their own Government. The subject of banking and currency can be simplified by a few preliminary observations.

A FEW HINTS ON THE COST OF LIVING.

Why did Congress create an expensive commission to consist of outsiders, which by its expense makes living cost more, when there were 200 more Members in the House than are necessary?
This commission can not inform Congress of anything about

the cost of living that the Members themselves can not ascertain from observation of facts that are occurring daily under their very eyes. Congressmen draw high salaries. not the commission created from their own number? It would save the people paying additional expenses to tell Congress what any intelligent person can ascertain by watching daily occurrences.

Why does Congress create boards, commissions, and committees from the outside to advise it on matters that Members themselves can ascertain from work that should be done by their own excessive membership? These boards, committees, and commissions are created in order to pay off political debts, thereby increasing the cost of living, and also for the purpose of giving Congress excuses to delay needed legislation. Most of the Congressmen never read the reports. In fact, many of the reports are not worth reading. Is it any wonder that the public lost its respect for Congress? No intelligent person can review its acts and respect it.

The cost of living will keep going up as long as the laws of nature are violated by uneconomic practices. We must pay the

I knew a farmer who owned his land, with modest but good buildings and improvements, out of debt, and getting along very well, but had no money. He decided to build a fine new house and barn, and buy an automobile. He mortgaged his farm to secure He employed men to do that part of the work that he and his family could not do. He boarded them. Thereafter he had an annual interest to pay. The mortgage is still on. His cost of living is increased because of high interest, but his farm yields him no more income than if the venture had not been undertaken. Many farmers, and modest citizens in towns, give mortgages with the same result.

The same principle applies to the human family as a whole as applies to the individual. The people are working at many things-building great cities, railway systems, public buildings, monuments, etc., as well as harbors, canal systems, and other things too numerous to mention them all. These are of a permanent character; some of them are expected to last thousands of years. The people are also working to manufacture all sorts of things to entertain the rich and to satisfy their whims, things that ordinary people have no means to enjoy. Notable among these are high-priced automobiles, summer homes, yachts, and other special contrivances.

In New York City are found examples of the most extravagant. Other large cities copy so far as they are able. railroad terminals in New York City alone cost \$200,000,000; office buildings there by the hundreds cost from \$3,000,0000 to \$25,000,000 each; bridges, tunnels, and underground railways alone cost over \$1,000,000,000. These are only a few of the many things there, but they show the scale of expenses. takes armies of men and women to do the work. Other armies, so to speak, are required to supply the contrivances exclusively for the rich and idle.

We have seen that a farmer increased the cost of his living by building a new house and barn, buying an automobile, and forth. That principle applies with much greater force to the building of great cities, and all the things required in them, and the systems of railways and all the other things. Immense debts are created on which the people generally are paying the interest. It is not necessary to the intelligent to enumerate in detail more than a few things. I discussed the high cost of living more in detail on the following dates: April 21, 1910; February 27, 1912; August 1, 1912; reported in the Congres-

SIONAL RECORD.

SPENDTHRIFT GOVERNMENT.

No one reasonably objects to paying taxes when he gets full value in a necessary service. The objection is to spendthrift government. The Census Bureau has issued a late statement showing the cost of governing the cities to be about \$1,000,000,000 annually. No one farm product would pay for this. It would take more than all the profit from the raising of corn, wheat, oats, and cotton to pay it.

It costs \$35,000,000 to run Boston for one year, equal to about \$50 per capita; that is over \$225 for each of its families. takes about \$4.35 per week out of the wages of the head of the family. That is for the city expenses alone. In the country districts there too we find spendthrift government. In addition there is a spendthrift State government that adds still more to the cost. Then comes the United States with an annual expense exceeding \$1,000,000,000 annually. The cost of government is constantly increasing. I mention Boston merely to give a concrete example. It is the same in other cities.

Who is paying all this cost, which surely exceeds \$500 per family, on the average, in the whole United States? The farmer, the wage earner, and people generally who earn their living—these, the voters, do they realize that they are paying for spendthrift government? Are they figuring that because their direct taxes may be only a few dollars, and some of them none, that they escape the tax? I hope none is so deluded. Furthermore, does anyone working for less than \$500 think that he can not be taxed even to exceed that sum? I hope no

one is so ignorant as to think that.

There are many ways to collect taxes indirectly, whether it be fair or dishonest. One is to make the laborer, whether it be on the farm, in the shop, on the railway, or other place, do longer day's work; one is to pay them less for the time than they earn, or, in case of a farmer, less for the product of his farm than it is worth; another is to add it to the cost of the things they must buy—that is, to the rents, the grocery, the clothing, and other bills. It all comes in some form; if not in direct taxes, it is concealed in the lower wages paid, or in extra hours of labor for which nothing is paid, or, in case it is a farmer or other plain producer selling commodities to the middle men, it is subtracted from the price.

It is not the property owner alone who pays the taxes due to extravagant government. The owner passes the tax along to be paid by the working people, wherever and whatever they may be doing. The vast expenditure being made in national armaments, on canals, in great buildings, and so forth, and in duplicating systems of railways, and all the other great expense is also passed along to be paid by the plain people. Go into any of the ultrafine hotels on any evening and see the enormous extravagance of guests. It goes on in thousands of hotels. The plain people work to pay all that. It all goes to jacking up the cost of living.

I quote the following paragraphs from a speech and resolution of mine in a previous Congress. It is to show that the toilers are not benefited by excessive construction:

House resolution 636.

House resolution 636.

Whereas it is among the declared purposes of our Government to establish justice and insure domestic tranquillity and to promote the general welfare; and

Whereas there is a persistent and irrepressible economic conflict now everywhere manifest in the economies of production and distribution between those who own the principal means, appliances, and materials of socialized production and distribution, on the one hand, and the smaller owner and those who perform the social service, manual and mental, on the other, and since said conflict, unless soon

reconciled, threatens to overthrow all social order; Therefore, among other important facts relating to the some, it is important to know—it is important facts relating to the some, it is important to know—it capitalistic wealth for speculative and remote future use is so great that in its production and maintenance it robs the industrial forces engaged and consumes the material resources required to produce the count there is now insufficient production and distribution of the chings necessary to supply the common needs, and therefore most people are in want of many of the actual necessaries. This condition other countries and by the construction of systems of canals, rall-ways, buildings, and other permanent structures, many of which are other countries and by the construction of systems of canals, rall-ways, buildings, and other permanent structures, many of which are the promotion of industries with the main purpose of supplying the necessaries for the people's use, convenience, and well-being. The people's energies and the material substances are being thus used to recrete from the material resources, and is supplemented by the great wealth that labor adds, but it is controlled by a few individuals whose direct purpose is to use it as a basis on which to collect interest whose direct purpose is to use it as a basis on which to collect interest whose direct purpose is to use it as a basis on which to collect interest whose direct purpose is to use it as a basis on which to collect interest whose direct purpose is to use it as a basis on which to collect interest whose direct purpose is to use it as a basis on which to collect interest and the state of the products when he sells, parily by increasing the price of the necessaries of the flat much growed the product profits regardless of the service to be secured.

It is a some of the natural resources and energies are employed to produce profits regardless of the necessaries of the flat much property in the store of the product when the product we have a supp

wanton extravagance

(e) That it is a fact that corporations have been organized to overcome some of the disorders that have been common in business. But these, in most cases, are trusts, and operate for extremely selfish purposes. The public derives little benefit from their existence, but on the contrary in some cases is actually injured. The trusts have been able to systematize and practice economy in the cost of production and distribution, but, since they are monopolies, the public has not had a proper advantage from their formation. On the contrary the trusts have used the monopoly to reduce prices when they buy from the original producers and increase them when they sell to the consumer. They build up colossal fortunes—commonly called vested capital—for the individuals who control them. On these fortunes the public is charged annual compound interest, rent, and dividends. Experience teaches the managers of the trusts that they may cooperate to their mutual business profit, and therefore there is a

community of interest between them. But there is no community of interest between the trusts and the public except in the sense that there is a community of interest between the farmer and his team or between the farmer and hi

there is a community of interest between the farmer and his team of there is a community of interest between the farmer and his team.

(f) That it is a fact that in this country there are natural conditions, resources, and advantages sufficient to satisfy and supply every human need under economically governed use and application of our industrial forces in their development. People have the intelligence required to bring about better conditions if they will make the effort. The problem is to direct things in a way to prevent waste of energy and resources in the production of things unnecessary and to exert more energy in the production of the necessaries, and otherwise reconcile the present industrial conflict in a manner which will bring about a reasonable adjustment.

My purpose is to show that we can not accomplish improvement in either the cost or the advantages of living as long as the present money standard and its application under the present system, or that proposed by the President's new bill, is or will be in operation. That system is responsible for our economic troubles. The trusts, the tariff, and the various other troubles of which complaint is made, are fathered by the false money system.

The special interests and the politicians are making all sorts of complicated and mysterious arguments to deceive the people. If the people knew that their Government, which through their own apathy they permit to be run by political charlatans, was operated on a plan that makes it certain that only a few out of more than 95,000,000 inhabitants can be successful in the degree that the natural conditions justify, they would rise in their power and do for themselves that which the present Congress fails to do for them.

We have been told by the "select" and by the "special interests" and by that portion of the press and news agencies "kept" by the "special interests" and by officeholders that

this is the grandest Government in the world.

A lot of poor governments—this might be a mighty poor Government and still be the best of them all. It ought to be the best, because it has had the best opportunity. It is the best, but that notwithstanding, the results show that it is a mighty poorly governed country.

THE GOVERNMENT SHOULD CONTROL THE MONEY.

The banks have been granted the special privilege of distributing the money, and they charge as much as they wish. The President's new bill gives the bankers even greater powers than they had under the old laws. Heretofore they could get bank notes only on the debt of the United States. Under the new bill they can get United States Treasury notes on my notes, on your notes, and on everybody's notes except the farmers' notes secured on the farms that feed us all.

The farmers' secured notes will not be accepted under the President's bill. It is not because the farmers were forgotten. I introduced an amendment making farmers' notes secured by real estate mortgages, having no more than 180 days' maturity, eligible to secure United States Treasury notes on, but the committee said that the Democratic caucus had refused that,

so the Democrats voted it down.

What is the fundamental basis of the new bill? It is the same as the old law and practice. It is that gold shall continue a as the old law and practice. It is that gold shall continue a special property on which the people shall, whether they wish it or not, gamble. It is that property shall be preserved as having greater potential force than the human family. I submit herewith a table of interest that is supported by the system—the old system—and given greater power by the President's new system, because that permits inflation of credit for the banks to collect interest on. The following table, compiled by a former Librarian of Congress, shows the growth of \$1, by compounding interest annually in advance in the manner. compounding interest annually in advance in the manner of the banks. One dollar loaned for 100 years would grow as follows:

That shows the potential power of the dollar as the country is now organized. No human being can compete with it. Nothing can compete with the dollar except \$2, and nothing with \$2 except \$3, and so on up, the greater the sum the greater the cinch. The bankers control it. We have no vacation of 100 years to get a hundred years' effect. That system has been in operation under a somewhat smaller expansion of credit than that promised by the new bill for over 100 years. It has been in operation on a large scale for the last 25 years in this country, and by reason of it we find the people of the United States classified with regard to their income and financial status, as follows:

Number of the class.	Persons engaged.	Average income.	Aggregate income.	Number in each class, including their families.
0	37, 815, 000 126, 000 178, 000 53, 009 24, 500 10, 500 21, 000 8, 500 2, 500 550 350 100	\$601 4,500 7,500 12,500 17,500 22,500 37,500 75,000 175,000 375,000 1,500,000	\$22, 725, 590, 000 567, 090, 000 1, 385, 000, 000 632, 500, 000 236, 250, 000 787, 500, 000 637, 500, 000 437, 590, 000 206, 250, 000 262, 500, 000 150, 000, 000	94,537,500 315,000 445,000 132,500 61,250 26,250 52,500 21,250 6,250 1,375 875 250
	38, 240, 000		28, 426, 440, 000	95,600,000

Nos. 8, 9, 10, 11, and 12 in my table comprise 10,000 persons whose incomes in their respective classes average from \$75,000 per annum to \$1,500,000, with a total income of \$1,693,750,000 per annum. This income is not for personal services rendered but is the increment from "vested property." Assuming that the sum is 6 per cent on a capitalization, it is supported by approximately \$17,000,000,000 capital. Interest compounded annually at 6 per cent on the bankers' plan doubles the principal in less than 11 years. In 33 years the capital of the 10,000 persons, without any further activity on their part than to reinvest the interest, would give them \$136,000,000,000, or a little more than the present valuation of all the property in the United States.

WHO CAN ESCAPE?

The people in class 1, in the table I present, have already been reduced to about the lowest extremity. There are over 94,000,000 of these people. Now and then one from this class makes a lucky strike, or by sheer force of some extraordinary kind is able to get out of it and into one of the other classes. Under the system he must oppress the class from which he emerges, or else reduce one or more in the other classes to this class. A few such there are and will continue to be, but the total of the underpaid and overworked will increase instead of diminish as long as the system works the interest, dividend, rent, and profit game exhibited by the interest table quoted.

As between the several classes whose incomes average from \$4,500 per annum to \$1,500,000 their number will be reduced. Many of the less wealthy will, by the very nature of the system, be reduced to a class with lower incomes. Of course, some high salaries are paid to managers that come from the lower paid classes, but those are the exceptions and do not prevent the process of the system reducing the plain people to the position of industrial slaves that they are now.

WE ARE NOT WITHOUT HOPE, HOWEVER.

The people have yet left to themselves political liberty, and when they have come to a realization of the hopeless struggle that they make while the present system prevails, they will throw off the yoke and adopt their own system for their own use instead of as at present being governed by the bankers' system for the bankers' use.

I pass now to a consideration of the false and shameful act of this Congress in giving to the bankers the monopoly of the distribution of money. They have been given the exclusive control without limit as to the charges that may be made to borrowers.

WHAT THE FARMER GETS.

The President's message contains words of encouragement for financial aid to farmers, but it only reads well, for the bill supported by the President "is the proof of the pudding," in that the farmers get the smallest crumb. Let us investigate.

I represent a district 60 per cent farmers, with 12 of the best counties in Minnesota. On September 4, 1912, that district had 33 national banks, with \$1,614,050 capital and surplus and \$9,319,405 deposits. Farmers own stock in these banks. The exact amount belonging to farmers deposited in these banks is not known.

More than half of the wealth in the district belongs to the farmers. They undoubtedly at least own half of the \$9,319,405 deposits, or \$4,659,000. The President's bill permits these national banks to loan on the security of the land that grew the products that were sold for the \$4,659,000 only a "sum equal to 25 per cent of their capital and surplus." That is, \$437,525 is all that the farmers can borrow of their own money on the best security in the world.

The other \$4,211,475 in the 33 banks belonging to farmers may be loaned to "Tom, Dick, and Harry," whoever and wherever they may be, just so that it is not on farm loans. The farmers in that district have more than ten times greater deposits in the national banks than the President's bill permits the banks to loan on the farmers' best security. That is rank injustice and discrimination against the farmers, and it is aggravated by the fact that the banks may, and to a great extent do, loan these deposits to speculators who exploit the farmers and others with their own money. That is so in all agricultural districts.

The bankers are not to blame. They are forced to adjust to the way business evolutes under the law. I am not complaining of the bankers. Were I a banker I would be compelled to do business in the same way that they are doing. The people shall have to blame themselves for not electing a better Congress.

What benefit, if any, do the farmers get from their share of the deposits? In the district I represent farmers have about \$4,250,000 more deposits in the banks than the President's bill will allow the banks to loan to the farmers on their improved land. After allowing for the reserve more than \$3,500,000 of this may be loaned to corporations and others than farmers in business or speculation.

The farmers who have deposited in the banks would be benefited if the banks were permitted to loan the deposits to neighbor farmers instead of to speculators. Estimating that the farmers get an average of 2 per cent interest on their deposits, it nets them \$85,000 on the \$4,250,000. Some get 4 per cent, but many get none. No interest is paid on open accounts. Estimating that the banks get 7 per cent on the \$3,500,000 that they loan, it would give them \$245,000, a net profit over the cost equal to \$160,000.

The whole \$245,000 is charged back to the people on the price of the goods and services that the money goes into. The farmers themselves practically pay all of it, because I have taken into account only one-half of the deposits, while the farmers must buy for 60 per cent of the population.

A subcommittee is framing a bill for a system of farm credits and loans. Ordinarily it is not fair to assume in advance that

A subcommittee is framing a bill for a system of farm credits and loans. Ordinarily it is not fair to assume in advance that an insufficient bill will be the result, but in view of all previous legislation, and especially the new bill, I give it as my opinion that it will be framed up as "sop to the farmers." It will not be what the farming interests merit.

FARMERS HAVE NO SPECIAL PRIVILEGE, BUT BANKS HAVE.

It is true, as the President stated in his message, that "the farmers, of course, ask and should be given no special privilege." The farmers never have had a special privilege and probably never will ask for one. But the President's bill does contain a special privilege to the bankers. No such great special privilege was ever before extended.

The President's bill directs all the money into the control of the banks—the money loaners. It will be used by them to exploit the borrowers and users of money. If not enough can be collected into these centers, then the Government will print more to place there. The banks and special centers will get the exclusive control of all the stocks of money. They will form the greatest trust in the world. The bill does not limit the charge that the banks can make borrowers.

I hope that the public may soon take as much interest in banking and currency legislation as the bankers do, for the public is just as much interested and the importance to the public is as much greater as the number of people constituting the public exceeds that of the bankers. Congress can only be forced by public opinion. Until it is, it will legislate in favor of the banks and against the people.

INVESTIGATE CONGRESS.

When the public once becomes aware of the fact that Congress is to blame for the economic ills that make of the people industrial slaves, there will be an investigation of Congress by the voters. That will get to the bottom long before the investigation of the trusts by Congress will. Trusts have been prosecuted, but the cost of living is not going down. Certainly not. The trusts add the costs to the price of goods they sell or the service they render. The people pay for the goods they buy and the services they receive. The costs of the prosecution as well as that of the defense is added. But still under our present system it is necessary to prosecute in some cases.

THE MONEY LOANERS' MONOPOLY.

The banks are now the only practical depositories for money. The Government by a most ingenious system is to direct all funds into bank control. It will also issue money to the banks and no one else. The banks are to be the exclusive distributors, with no limit on the charges that may be made to borrowers.

The commodity gold is made a legal tender and the standard of value—the final redemption. As long as those conditions continue, there is no remedy for the present economic evils.

The Government should issue and distribute sound money its own, not gold. Gold is not a true measure of value nor sound as a legal tender, because prices do not fairly adjust under the gold standard. I realize that there is such fear among Members lest they be marked for defeat by the money power that they run for cover the moment the gold standard is attacked.

We now have the gold standard. It is unsound. The results show it. I shall give concrete examples: The New York Times Annalist, September 8, 1913, states:

The cotton crop of 1912-13 is 14,167,115 bales, a decrease under that of 1911-12 of 1,971,311 bales.

The total value of the large crop, measured by the gold standard, was much less than the value of the small crop, measured by the same gold standard. Here is what the Annalist said about that:

The value of the crop (1912-13), including seed, is placed at \$998,-425,059, against \$937,280,764 (for 1911-12 crop), and attention is called to the fact that for a crop embracing 1,971,311 bales less cotton and 893,000 tons less seed, the South received \$61,000,000 more money.

That is the way the gold standard works. It is the gamblers' standard. But let us take another concrete example. I quote this time from the Minneapolis (Minn.) Press, which keeps well informed on the wheat market as any in the world. Here is what was published last November.

Daily News, Washington Bureau,
Washington, November 14.

Although the wheat farmers of the United States raised 23,000,000
bushels of wheat more this year than they did a year ago, their crop
is worth \$32,000,000 less, according to the Crop Reporting Board of
the Bureau of Statistics of the United States Department of Agriculture.

The figures preserved above the

The figures prepared show this in spite of the fact that the wheat this year weighs out three-tenths of a pound to the bushel heavier than a year ago and more than a half a pound better than the 10-year average.

I could multiply examples of this kind by the hundred to show that the gold standard is the gamblers' and speculators' standard and not a true standard. The farmers have in the last 20 years been cheated out of billions of dollars by this false standard. On this subject I quote the following from my minority report made to the House:

GOLD STANDARD RESPONSIBLE FOR MANY OF THE SOCIAL EVILS.

minority report made to the House:

GOLD STANDARD RESPONSIBLE FOR MANY OF THE SOCIAL EVILS.

On March 14, 1900, after an adroit campaign carried on by the special interests covering a considerable period, Congress passed an act which called for the permanent establishment of the so-called "gold basis" for all of our money. Since then there have been new inventions made for mining gold which make the available amount more plentiful, with the result that the "gold basis" is puzzling the Money Trust. But there is a still further complication, and that is that the people are becoming familiar with the fallacy of the "gold standard," and they are becoming dissatisfied in proportion to their understanding of its bad effects.

The dollar is worth less now than it was in 1900; that is, it will buy less. That fact, particularly, does not satisfy the creditor class. They have had enormous interest returns, but they have lost a part of that advantage because of the depreciation of the purchasing power of the dollar. To a greater or less extent all of the people are dissatisfied with it; many for selfsh reasons; and they only desire a remedy to be adopted which will help them alone, but there are fewer of these than there are of those who seek a reform which will better the conditions of all.

We have seen many comments in the press lately in regard to a plan devised by Prof. Irving Fisher, of Yale University. Mr. Fisher is no doubt an honest and earnest worker who is trying to reform the gold standard. He has arrived at the inevitable conclusion that every capable student must finally adopt, and that is that the present gold standard is not the standard by which we can secure honest money. Prof. Fisher has given a most thorough analysis of the production and supply of gold and shown quite extensively the effect of its present use as a money standard upon the prices of commodities. I have given below a synopsis of his plan as stated in the Boston News Bureau of December 28, 1912. It is as follows:

"The following is Prof.

bullion is worth.

"The very principle of intercontrovertibility with gold bullion which we now employ could be used to maintain the proposed standardized dollar. The Government would buy and sell gold bullion just as it does at present, but not at an artificially and immutably fixed price.

"At present the gold miner sells his gold to the mint, receiving \$1 in (say) gold certificates for each 25.8 grains of gold, while on the other hand the jeweler or exporter buys gold of the Government, paying \$1 of certificates for every 25.8 grains of gold. By thus standing ready to either buy or sell gold on these terms (\$1 for 25.8 grains), the Government maintains exact parity of value between the dollar and the 25.8 grains of gold. Thus the 25.8 grains of gold bullion is the virtual dollar.

"The same mechanism could evidently be employed to keep the dollar equivalent to more or less than 25.8 grains of gold, as decided upon from time to time.

"The change in the virtual dollar (bullion weight of gold intercontrovertible with the dollar) would be made periodically, or once a month, not by guesswork or at anybody's discretion, but according to an exact criterion. This exact criterion is found in the now familiar 'index number,' which tells us whether the general level of price is, at any time, higher or lower than it was. Thus, if in any month the index number was 1 per cent above par, the virtual dollar would be increased 1 per cent. Thus the dollar would be 'compensated' for the loss in the purchasing power of each grain of gold by increasing the number of grains which virtually make the dollar."

Prof. Fisher has performed a great service to his country and to the world by discrediting the gold standard so convincingly. When a man of his prominence and ability has the courage to state his beliefs, the more timid of those holding like views of which there are many, ought to take an active part in supporting the indictment of the gold standard.

While the professor has clearly indicted the gold standard and con-

more timid of those holding like views of which there are many, ought to take an active part in supporting the indictment of the gold standard.

While the professor has clearly indicted the gold standard and conclusively shown that it is a false one, I do not agree with the remedy that he proposes. Instead of proposing to abandon gold as a standard and relegating it to its natural place among the articles of commerce he advocates its reform and would still retain it as a standard by making the weight of the dollar variable and determining its value from time to time according to a commodities index. The professor is surely correct in his assumption that commodities have actual value worth considering in connection with the establishment of a true exchange system based upon the actual value of services and commodities. It is to be regretted that Prof. Fisher has complicated the conclusion he arrives at by continuing to consider the gold standard entitled to any greater recognition than is accredited to commodities in general. After proving its falsity he should have suggested the abandonment of the gold standard.

If we were compelled to change the weight of the dollar monthly, quarterly, or even annually, as we would have to do with a commodity dollar; if we tried to keep it of the same purchasing power all of the time, it would give us more trouble than we now have in changing the tariff schedules; but while Prof. Fisher has performed a world service in being instrumental in giving general publicity to the falsity of the gold standard, that publicity is pushed by the influence of selfish interests, because they are pleased with the remedy he proposes. If he had not proposed to standardize the gold dollar, his proof that it is not an honest mensure of value would have received no publicity greater than he himself and his friends and a few others could give to it. It would have been ridiculed if he had not proposed a remedy that sulted the interests, for the money sharks demand some measure that is favorable to

"TO ASK INTERNATIONAL GOLD-DOLLAR AGREEMENT.

"One of the features of the proposed currency legislation which will be considered by Congress is the initiation of a movement for an international agreement for the purpose of preventing the depreciation of the gold dollar.

"Such action has been suggested by eminent economists. It is widely held that the enormous increase in gold supply and the consequent depreciation of the gold dollar is the real cause of the high cost of living and high prices.

Not all of the articles appearing in the press directly discuss the gold standard, but many of them are adroitly written in order to impress the reader and prepare him to receive the information that the gold dollar is not now a good standard, but further designed to make the reader come to a wrong conclusion on the question of a remedy. When the first half of an argument is true, unless the reader is very careful it goes far toward making him believe that the second half is also true, and that is frequently the case, even when the conclusions are wholly erroneous, as long as the material is adroitly handled. That is where the danger comes in the discussion of the gold standard from the side of the special interests alone. Innumerable articles are now published, in fact the plan is systematically advertised for that very purpose. But there are other articles which are written and published in good faith, and in these there is no intention to deceive. An article was published in Collier's Weekly, also on the date of April 12, 1913, which I quote:

"THE DISCOURAGEMENT OF THRIFT.

"THE DISCOURAGEMENT OF THRIFT.

"The people of the United States have now saved up well over a hundred billions, as measured by current money standards. The aggregate is amazing, and, while the amount per capita is not large, nothing like it was ever known before in any country. This saving takes on many forms—the largest, of course, being in the rearing of children, which shows itself in the steady increase in the value of land. The next is ownership of enormous amounts of securities of railway and industrial companies and the like. Then probably comes life insurance. The savings in banks are relatively small. The increment in land values goes to much less than one-half of the population, even in theory, and a comparatively small number of people get the benefit which is made up of the efforts of all. The larger amount of the securities outstanding represents a more or less fixed value. While these securities and insurance obligations were being created the relative worth of the dollar has been rapidly declining. The forehanded folk who saved and loaned this money get for it an average return of less than 5 per cent, and if they received back the principal now it would buy of land or food one-third less than 12 or 15 years ago. This is a savage penalizing of

thrift. We believe that events will soon focus public attention upon this serious problem. The procedure of the insurance companies, which in part is enforced by law, is of special interest. The companies collect above \$600,000,000 annually from policyholders, and from this loan largely on long-time notes. They act simply as money brokers, but with this effect, that with the rapid depreciation of the currency in the last 15 years, they are now returning to their policyholders, on death claims or matured policles, relatively far less than the average amount of money which the policyholders have paid in. Roughly speaking, the policyholder has been paying in \$1 bils; he will bet back 66-cent pieces. Theoretically, the compounding of the interest on premiums ought to pay the companies' expenses and yield the policyholders a profit on the average payment. In point of fact, with the extravagance of the companies and the decline in the purchasing power of the dollar, there is a serious loss. This is not as it should be. A remedy might lie in a radical change of investment. A larger part of the insurance money is loaned directly or indirectly on land. Actual ownership of the land ought to be as safe as loans, and, if gold inflation is to continue, more profitable. It is something to think about."

Surely Collier's states the truth when it says that it is something to think about. We have indeed been buncoed long enough—so long that we ought to think about it seriously. It is up to Congress right now.

The Money Trust is satisfied with the new banking and currency bill, because it requires more gold, so now for a time they will not find it necessary to advertise the standardizing of the gold dollar.

The Money Trust is satisfied with the new banking and currency bill, because it requires more gold, so now for a time they will not find it necessary to advertise the standardizing of the gold dollar.

It because that the remedy is necessarily twofold: First, and concurrent the establishment of an enew system, the old system should be an emeded that some of its most serious administrative defects will be diminished. It should then serve as a vehicle for carrying out the equitable relations and obligations already existing as a result of the legitimate business based upon it.

Founded upon the natural demands of commerce and trade and divorced from personal favor or property preference. This new system should be the basis for the establishment of a permanently solid and equitable means of exchange. The Government, on being pald the cost of stamping, may properly stampth weight and quality on any commodity of commerce and left the sain exchange on a basis of its own intrinsic value. Anyone who demands in tentionally unfair to the rest of us, or ignorant. In most cases it is because the persons accept seeming facts without actually understanding the conditions which surround them. If the owner of gold, sliver, or other commodity desires to pay the Government the expense of the legal tender is simply to decrease the value of our labor and of our property—if we have any, unless we also possess gold enough to offset, which most of us do not labor that it has an intrinsic value which most of us do not be exchanged in the same way that it now it it can be used as a means of exchange without making it legal tender the outlet it is a convenient commodity to slive which most of us do not commerce and then it could be exchanged in the same way that it now it it is a convenient commodity to slive which most of us of the property—if we have any unless we also possess gold enough to offset, which most of used to be used as a means of exchange without making it legal tender. The Government same, it is a convenient to make the

The whole problem simply reduces itself to a question of how long will the people submit to remaining industrial slaves to the system. The gold owners ridicule flat greenbackers, yet they themselves are flatists. If they are not, why do they object to gold circulating on its own commercial merits? Why do they object to gold circulating on its own commercial merits? Why do they object to gold circulating on its own commercial merits? Why do they object to gold circulating on its own commercial merits? Why do they object to gold circulating on its own commercial merits? Why do they wish to coln it with any other designation than its weight and finenss and why force the people of take it as legal tender? They are inconsistent in claiming the color of t

"THE VICIOUS CIRCLE.

"THE VICIOUS CIRCLE.

"We harvested bumper crops last year, you remember. May wheat at Chicago is worth 10 cents a bushel less than a year ago; corn and oats about 15 cents less. Yet commodity prices, as a whole, have declined scarcely at all. The index number, which compounds the price of many leading articles, is almost as high as ever, which means the cost of living is still about at the top notch.

"The bumper crops stimulated trade in many lines, and that usually brings higher prices; while wheat went down, iron and steel products went up. What you saved on flour you lost on the pan to bake it in. And Wall Street echoes with complaints that investors, spurred on by higher cost of living, are demanding more interest, thereby raising the cost of manufacturing and transportation. This higher cost must be offset by higher prices, to overcome which investors must demand still more interest.

"Meanwhile labor, so to speak, chases its own tall, demanding higher wages, which result in higher prices that consume the increased wages, which naturally induces a demand for still higher wages that result in still higher prices."

Every farmer knows that a difference of 10 cents a bushel between the price a commodity brings in one year and the price it brings a different year is not uncommon, but the railways charge full price for shipping every bushel, and the larger the crop the more they get, while the farmer must handle the additional wheat and get less for it. A farming having the equivalent of 300 bushels of wheat to sell in a year when crops are generally abundant expects to receive a little less per bushel than he would receive per bushel for 270 bushels in a year when crops were not abundant, but he does not expect to give away the 30 bushels difference because he has more wheat than the year before. If that were to be the result, it would pay him, from his own individual financial standpoint, to burn up a part of his crop when it was abundant. In fact, the cotton farmers of the South started to do that a few ye

There should be no legal tender other than that issued by the Government of the control of the c

the Government would create no more "commodity" money either for itself or for the people, because it would not only be unjust to do so, but unnecessary and ridiculous. When anyone wishes commodities let them buy them as such.

Everybody knows that we must have money, and now the question arises as to what kind it shall be. "Honest money," of course, in stead of what we have now and are told is "sound money," whereas in truth it is the opposite of "honest money," and should have been named accordingly. We want a kind of money the buying and selling properties of which remain respectively constant. In other words, we want a kind of money that will buy the exact equivalent of what it cost us to get it. We want the kind of money that serves the same office among the people in their commercial and social relations with each other as the drafts and checks serve in the business transactions entered into by the bankers. We do not intend that the bankers shall have a better system for themselves than we have for ourselves. We expect to pay those whose duty it will be to help make the exchanges. The bankers will be able to give as effective and valuable service in this other up-to-date system as they have given us heretofore; but the past service has been altogether too expensive, and therefore not sufficiently effective. We have no prejudice to vent upon the bankers. As the system stands they serve the people generally the best they can. There are always, of course, a few isolated exceptions. But the time for us to do for ourselves what the bankers are doing for themselves is here and now, and we should hasten to adopt a system of exchange under which it will cost the people more to make their commercial exchanges between each other than it costs the banks to make exchanges between the bankers and their cash customers. It is just as simple for us as it is for them, and we have the indisputable right. We owe it to ourselves, to our children, and to all posterity to have an efficient, self-sustaining, and effective syste

The SPEAKER. The gentleman from California [Mr. Hayes] is recognized.

Mr. HAYES. Mr. 8 California [Mr. KAHN]. Mr. Speaker, I yield to my colleague from

The SPEAKER. The gentleman from California [Mr. Kahn] is recognized.

Mr. KAHN. Mr. Speaker, I can no more hope to convince the Democratic side of the error of their ways in 1 minute, or even in 10 minutes, than they could hope to convince the minority conferee on the part of the House from this Republican side of the House [Mr. HAYES] to agree to their bill in the few minutes they allotted to him.

But I want to call attention to the statement made by the distinguished chairman of the Committee on Banking and Currency in regard to the dangers that lurk in this bill so far as inflation is concerned. In his speech here this evening he said:

I want to say that the House has been rather bitterly assailed in another place, and the charge has been vehemently and recklessly made that it involves a vast amount of inflation. And yet it is a demonstrable fact that the House bill involved a far less amount of inflation than the Senate bill involved and an appreciable less amount than the bill reported from the conference committee involves.

In other words, it is admitted that there is more inflation in the pending measure than in the original House bill, and that bill was said to contain a very Saturnalia of inflation.

Mr. Chairman, we all know that inflation means ruin to the

business interests, the farming interests, the mining interests, and all of the great industrial interests of the United States. [Applause on the Republican side.]

Oh, we have been regaled this evening with many siren songs. We have been told how this measure will revive the business of the country, how it will stimulate enterprise, how it will prove a genuine blessing to the teeming millions that inhabit our glorious Republic. These songs have a familiar sound. I remember that similar songs were sung during the closing hours of the discussion on the Underwood tariff law.

Despite the fact that the increase in the cost of living was a world-wide movement, causing universal complaint on the part of the masses in every civilized country in the world, many Democratic spellbinders led the people of this country to believe that a reduction of the tariff on foodstuffs would cause a corresponding reduction in the high cost of living. Perhaps the wish was father to the assertion. But we all know that there has been no reduction in the price of foodstuffs, and that, if anything, there has been an increase since the new law went into effect. It is a matter of deep regret that notwithstanding the glowing word pictures of happiness, prosperity, and contentment that were painted by the leaders of the Democratic majority in this House in the early days of last October, those pictures have not been developed into actualities. There is no use trying to deceive the country. There are more idle men throughout the Union to-day than at any time within the last 15 years. In the far West free soup houses have had to be erected for the feeding of the unemployed. History seems to be repeating itself. The distressing scenes of 1893, 1894, 1895, and 1296 are being reenacted, notwithstanding the reassuring utterances of the Democratic theorists on tariff legislation. The masses are learning, if they have not learned already, that skilled mechanics in the United States, earning \$4 and \$5 per day, can not compete with the foreign skilled mechanic who earns a maximum of a dollar and a half a day for similar work. They have learned that your prosperity songs on the Underwood tariff were pure "bunk"; they will show their just resentment at the polls next November.

And it is my firm belief that this new "Federal reserve act' will prove equally abortive so far as creating prosperity is concerned. My colleague [Mr. Hayes], the ranking Republican member of the Committee on Banking and Currency, in his able address pointed out a number of serious defects in the conference measure. Other Members have pointed out other defects; it is not necessary to repeat them at this time. I believe that the earning capacity of the smaller national banks will be seriously curtailed under some of the provisions of this bill, and that in consequence a great many of these small banks will re-

turn to the State bank systems.

But it is undoubtedly a work of supererogation to point out the defects of the proposed legislation. This bill is not a financial plan. It is a makeshift that will disappoint even its own sponsors. But, of course, nothing that we who are opposed to this measure in its present form can say or do will deter you of the majority from enacting it into law. The edict has gone forth that it must be passed. The ukase of your leader in the White House has been issued and you will obey the demand. But you will find that this gilded product of the Democratic majority will prove to be Dead Sea fruit. It will not create confidence in your ability to originate constructive legislation. It will not restore the business prosperity of this country which your tariff law has shattered, and it will prove a sore disappointment and an unhappy delusion to the ex-pectant farming, mining, manufacturing, and industrial interests of the United States,

Mr. GLASS. Mr. Speaker, I yield to my colleague from Ala-

bama [Mr. Heflin]. [Applause.]
The SPEAKER. The gentlemen from Alabama [Mr. Heflin]

is recognized. [Applause.]

Mr. HEFLIN. Mr. Speaker, this is a time for rejoicing. In the outset I want to pay a tribute to the great Democrat who sits in the White House at this time. [Applause on the Democratic side.] Controlled by no power and intimidated by no class, he is bending his energies and employing his great talent to enforce the laws of justice and do that which will bring about the greatest good to the greatest number. [Applause on the Democratic side.] Since he took the oath of office in March he has been at his post of duty laboring in the interest of his people; and, Mr. Speaker, no President in my day has devoted himself so earnestly to the public duty and given himself up so completely to the demands of his high office as has this great Democrat, Woodrow Wilson. [Applause on the Democratic

He has wrought mightily for the American people. Under the masterful leadership of Oscar W. Underwood he has reduced the tariff tax and revised the most obnoxions tariff system that ever burdened a free people. [Applause on the Democratic side.] Under the splendid leadership of that genius from Virginia, Carter Glass, chairman of the Committee on Banking and Currency, he has secured the passage of a banking and currency law that will wonderfully bless and benefit the American people. [Applause on the Democratic side.]

The big bosses of monopoly have been unable to terrorize or

intimidate this great leader of our party. They have even, in their madness and desperation, threatened to produce a panic, and those who represent them on that side of the House have traveled the country over like a sleuthhound trying to scent a

[Laughter.]

Mr. Speaker, just when the shackles of burdensome taxation are stricken from the limbs of the masses, and just when the avil genius of an oppressive banking system is driven from the temple of American finance, these dethroned and mutilated old leaders of the Republican Party are growling in concert around the Nation's Capital in an effort to produce a panic. They would sacrifice the prosperity of their country upon the altar of political necessity. [Applause on the Democratic side.] They would barter the welfare of the Nation for the return of political power. [Applause on the Democratic side.] For patriotism, pluck, intelligence, and industry and for boundless wealth America is unparalleled among the nations of the earth. ances like dewdrops from a lion's mane. And let me say to the gentlemen on the other side who are trying to scare up a panic no committee of dethroned bosses, no conspiring coterie of calamity howlers, can impede the progress of this Democratic administration, as it bears a liberated people to the mountain summit of the new freedom. [Applause on the Democratic Away with these prophets of evil!

Mr. Speaker, a little lull or temporary pause in the business activity of America is but a bubble on the surface when you consider the industry, enterprise, and boundless wealth of these United States. If there has been a ripple upon the surface of business activity, it has been caused by those who do not wish to relinquish their power to pillage and plunder the American people. [Applause on the Democratic side.]

I have faith in American institutions. I believe in the American people. And, Mr. Speaker, I predict that, following the passage of the tariff law and the banking and currency I believe in the law, we will enter upon an era of prosperity the like of which this country has never seen before. [Applause on the Demo-cratic side.] When the newspapers are carrying the news of business activity, of good crops, and general prosperity, the gentleman from Illinois [Mr. Mann] blinks his eyes and murmurs mournfully of an imaginary panic. But, Mr. Speaker, in all the length and breadth of our country there is no panic. [Applause on the Democratic side.] The gentleman from Illinois scans the newspapers day after day with the hope of finding signs of a panic. Instead of calling the attention of the House to what the New York Commercial has said about dry-House to what the New York Commercial has said about dry-goods houses in the Middle West doing more business than ever before, that the American shoe trade is breaking all previous records, and that the export of American cotton goods gained over last year's trade by over 2,000,000 yards, and that the textile trade of America is better than last year; and, Mr. Speaker, instead of reading to the House what the Philadel-phia Record of December 17 said about the monthly statements of grass earnings of railroads showing an increase over last of gross earnings of railroads, showing an increase over last year in every month from February up to and including November this year, he is hunting out the prepared specials of calamity howlers, and he howls and howls over these.

He reminds me of the fellow that Senator James told about. He had lost an eye and he said to the surgeon, "Doc, I have just naturally got to have another eye, and I don't want any glass eye. I want a flesh eye." The doctor said. "I can put a cat's eye in for you." The man said, "All right, just so I can see with it." So the surgeon very skillfully transplanted the cat's eye in the place of the one the man had lost. In about three months the surgeon saw his patient and said, "Bill, how is your eye?" Bill replied, "Well, Doc, it is all right, I guess. The only objection I have got to it is, the darned thing is always looking for crickets and mice." [Laughter and applause

on the Democratic side.]

The gentleman from Illinois refuses to be comforted. He is exceedingly hard to please. With the American crop worth \$200,000,000 more than last year, with the noise of ceaseless business activity all around him, with the hum of wheels and the roar of industry all about him, and evidences of prosperity confronting him wherever he goes, the gentleman from Illinois sounds a discordant note and refuses to join in the jubilee of American progress, and refuses to partake of the feast of American prosperity.

Mr. Speaker, he reminds me of another story: On one occasion a dyspeptic preacher went home with a member of his sion a dyspeptic preacher went nome with a member of his church for dinner. The good wife had prepared a feast fit for the gods. There was fried chicken, round robust biscuits, red ham swimming in red gravy, and the finest coffee that ever flowed from a spout. The good lady was justly proud of what she had spread before the parson. Bud, the 9-year-old son, with fork in hand, was just ready to do battle with the good things before him, when his mother said, "Parson, won't you have some of the chicken?" to their surprise and the utter bewilder-ment of Bud, the parson said, "No; I never eat chicken." The good lady said, "Parson, have a piece of ham." But the parson said, "No; I dare not eat ham." Bud dropped his fork. The good lady said, "Won't you have a biscuit?" and the parson said, "Did you use soda in the composition of those biscuits?" She said, "Yes." Then the parson said, "I can not eat biscuits made with soda." Bud, in wide-eyed astonishment, looked at his mother and said, with anger and earnestness, "Ma, maybe the darned old fool would suck a raw egg." [Prolonged laughter and applause.]

Mr. Speaker, let the calamity howlers howl. Let the croakers triotism, pluck, intelligence, and industry and for boundless wealth America is unparalleled among the nations of the earth. With a treasure house of inexhaustible resources and untiring energy, this Republic can shake off temporary business disturblic. [Applause on the Democratic side.] With the passage of this legislation American industry and enterprise will take on new life. Men in all the walks of life will have a chance in the struggle for existence. Bossism, ring rule, and special privi-lege are stricken down in the temple of the people. Let the American people, in the dawning of this new day, with heads erect and light on all their faces, rejoice and exclaim:

The pale horse and his rider are cast into the sea. All praise to Democracy, the people are free!

[Applause on the Democratic side.]

The SPEAKER. The gentleman has used eight minutes, and yields back two.

Mr. HAYES. Mr. Speaker, I yield to the gentleman from

Oklahoma [Mr. Morgan]. [Applause on the Republican side.]
Mr. MORGAN of Oklahoma. Mr. Speaker, we are about to
take a final vote on House bill 7837—the new banking and
currency measure. I have concluded that I shall not vote for I want to give some of the reasons why I shall not this bill.

do so.

This bill was introduced in the House August 29, 1913. passed the House September 18, 1913. The House had it under consideration just 20 days. The bill went to the Senate, where it was under consideration for more than three months. The Senate amended the House bill in many important particulars.
When the bill came back to the House, by an overwhelming vote the House refused to concur in the Senate amendments. A conference committee was appointed, composed of conferees from both the Senate and the House. That committee has agreed upon a report, and that report is now before this House, and if agreed to will settle for many years to come what shall be the banking and currency systems of this country.

1. NO PROTECTION TO DEPOSITORS.

My first objection to this bill is that it contains no provision for the protection of the depositors in the national After four months of consideration a Democratic administration and a Democratic Congress enacts a measure to reform our banking and currency system, with no provision whatever to safeguard the thousands of millions of dollars, which the people, under our system of business, are compelled to deposit in these banks. To my mind this is a fatal defect in the pro-

When this bill first came before the House the provisions relating to the division of the profits of the reserve banks were as follows: First, the member banks were allowed 5 per cent cumulative dividends on their stock in these reserve banks; second, the reserve banks were allowed to accumulate a surplus of 20 per cent on their capital stock; third, 60 per cent of the remaining profits went to the Government to pay off the bonded debt and 40 per cent to the member banks, according to their

average deposits in the reserve banks.

was not satisfied with these provisions for the disposition of the earnings of these reserve banks. I concluded that after allowing for reasonable dividends to the bankers who furnish the capital and for the accumulation of a reasonable surplus to add to the financial strength of the reserve banks that all additional earnings of the banks should be devoted to some great national purpose, which would confer benefits and advantages upon the great masses of the people, whose wealth after all was the main capital of the banks and whose contributions in the way of interest and other charges constituted all the earnings of these banks.

To show what I said relative to the distribution of the earnings of the reserve banks I quote from the Congressional

RECORD of September 15, 1913, as follows:

RECORD of September 15, 1913, as follows:

Mr. Morgan of Oklahoma, Mr. Chairman, I would ask the chairman of the Banking and Currency Committee how much profit in the 20 years during the existence of these banks he estimates will come to the Government of the United States?

Mr. Glass, Mr. Chairman, in answer to that inquiry, of course I would simply be giving the conjecture of the chairman. I would state that the report of the Monetary Commission estimated that the Government's share of the earnings of the proposed banking institutions would be from five and a half to seven millions of dollars.

Mr. Morgan of Oklahoma. For the 20 years?

Mr. Glass. Per annum.

Mr. Morgan of Oklahoma. Five million dollars per annum for 20 years would make \$100,000,000.

Mr. Chairman, I do not think that the bonded indebtedness of the United States is so large as to be any burden upon this great Government. If my memory is correct, the entire national debt amounts to only about two and a half billions of dollars. That is less than the national debt of any other great country in the world.

Mr. Murddock, I think that the national debt is less than a billion.

Mr. Murddock, I think that the national debt is less than a billion.

Mr. Morgan of Oklahoma, I included the entire public debt. The interest-bearing debt is less than a billion dollars. It is very small compared with what other nations owe. It is not a burden; it is a plaything, because under the splendid financial control of Republican rule for the last 25 years (applause) we have so managed affairs of this country that our national debt is comparatively nothing. Now, it seems to me in all candor that this great fund ought to be appropriated to some great national purpose. Where do the profits come from? They all come from the great mass of the people. These banks

will make nething only so far as they get the money through interest and other charges from the great mass of the people. It seems to me that when you shall inaugurate this great measure, designed to give a better currency and a better banking system, that the profits therefrom ought to be rolled back to the people from whom the profits were

Mr. LINDBERGH. Will the gentleman yield for a question?
Mr. Morgan of Oklahoma. I will.
Mr. LINDBERGH. Why collect an unjust tax at all?
Mr. Morgan of Oklahoma well, I am not in favor of collecting an unjust tax, but if the Government is to derive a direct profit—amounting to from five to seven millions of dollars annually—a profit that must come through interest paid by the people it would seem almost a crime to use this money to pay our national debt. Money to pay the national debt should come through the regular channels of taxation, and I solemily protest against the National Government using any of the profits derived from the Federal reserve banks to pay the public debt. If the Government proposes to appropriate any of the profits of the Federal reserve banks, let the money be solemnly dedicated to some great national purpose that will contribute to the general welfare of the country.

I then offered an amendment to provide a fund to protect depositors in the member banks, and to show what my amendment was and the discussion thereon, I quote from the same page of the Congressional Record, as follows:

ment was and the discussion thereon, I quote from the same page of the Congressional Record, as follows:

Mr. Morgan of Oklahoma. Mr. Chairman, I offer another amendment.

The Clerk read as follows:

"Amend, on page 14, by striking out all in line 2 after the word bank' and by striking out all of lines 3, 4, 5, and 6, and inserting in lieu thereof the following: "All earnings derived by the United States from Federal reserve banks shall constitute a fund to protect the depositors from loss from the failure of any member bank, under such provisions as Congress may hereafter enact." as you do not want to give this money for public highways and other great purposes, I thought perhaps you might use it for another purpose. I find in the Democratic platform of 1908 these words:

"We pledge ourselves to legislation under which national banks shall be required to establish a guaranty fund for the prompt payment of the depositors of any insolvent national bank under an equitable system which shall be available to all State banking institutions wishing to use it.

Now these are the words in the Democratic platform. I do not see has been affirmed.

Mr. Stoan. Will the gentleman yield for a question?

Mr. Morgan of Oklahoma. I yield to the gentleman.

Mr. Stoan. Will the stitunor platform.

Mr. Morgan of Oklahoma. I yield to the gentleman.

Mr. Stoan. Will saltimore platform.

Mr. Morgan of Oklahoma. Well, I will have to leave that to some not included in the Baitimore platform.

Mr. Morgan of Oklahoma. Well, I will have to leave that to some body better posted than I am on that subject. In so far as I am individually concerned, long before Oklahoma and the system of guarantee in the principle of guaranteeing bank deposits. The 15.000.000 depositors in the banks are certainly as much entitled to protection as a few owners. There have been considerable criticisms of the system of bank deposits should be made and entered the theory of the system of bank deposits of the people of Oklahoma. People of Oklahoma are thoroughly co

Under the rule of the House under which the bill was then being considered I had but five minutes to present the matter. But even if I had had unlimited time my amendment would have been defeated, because the Democratic membership of this House were bound by caucus rule to vote down all amendments offered. But I feel that my efforts were not in vain. My amendment suggested an idea; it served to call the attention of Members of the House and Senate to the proposition. When the bill went to the Senate the matter was discussed before the Senate Committee on Banking and Currency. This committee divided in its report to the Senate on the House bill. The section of the committee consisting of Senator Hirchcock (Democrat) and Senators Nelson, Bristow, Crawford, McLean, and Weeks (Republicans) reported a bill which contains a splendid provision relating to the guaranty of bank deposits. This provision is as follows:

DIVISION OF EARNINGS.

SEC. 7. That after the payment of all necessary expenses and taxes, including its share of the expenses of the Federal reserve board, the stockholders of each Federal reserve bank shall be entitled to receive an annual dividend of 5 per cent on the paid-in capital stock, which dividend shall be cumulative. Net earnings over and above expenses and the aforesaid dividend shall be applied as follows: Twenty-five per cent of such net earnings to be carried to a surplus fund until such fund shall amount to 20 per cent of the paid-in capital stock of such reserve bank, and 37½ per cent of said net earnings shall be set aside in a trust fund to be known as the depositors' insurance fund and shall be used for the payment of the depositors of insolvent member banks under rules and regulations made by the board.

Later, the Democratic Senators held a caucus and, according to press reports, agreed to report a similar provision. This was done, and so section 7 of the bill as it comes from a Democratic Senate contains the following provision:

DIVISION OF EARNINGS.

After all necessary expenses of a Federal reserve bank have been paid or provided for, the stockholders shall be entitled to receive an annual dividend of 6 per cent on the paid-in capital stock, which dividend shall be cumulative. One-half of the net earnings, after the aforesaid dividend claims have been fully met, shall be paid into a surplus fund until such fund shall amount to 40 per cent of the paid-in capital stock of such bank, and of the remaining one-half, 50 per cent shall be paid to the United States as a franchise tax, and 50 per cent shall be paid to the United States as a trustee for the benefit of depositors in all failed member banks in the United States and failed member trust companies in the District of Columbia, the money to be kept in and losses from failures to be paid from it as a depositors insurance fund under a division of the Treasury to be constituted and managed under such regulations as may be prescribed by the Secretary of the Treasury. Treasury.

2. DISCRIMINATION AGAINST THE PUBLIC.

The provision regulating the ownership of the stock in the reserve banks discriminates in favor of the banks and against

This bill creates not less than 8 and not more than 12 reserve banks, as shall be decided by the organization committee. country is to be divided into as many districts as there shall be reserve banks. There will be one of these banks located in each district. These reserve banks are, generally speaking, banker's banks, as individuals are not allowed to deposit money therein or borrow money therefrom. Every reserve bank must have at least \$4,000,000 capital. The first question arises is, Who shall be allowed to own stock in these banks? As the bill was introduced in the House it provided that only banks should be allowed to own the stock therein. It at once occurred to me that this was granting a special privilege to the banks, which I did this was granting a special privilege to the banks, which I did not approve, and that the people generally should be allowed the privilege to subscribe to this bank stock. I, therefor, offered an amendment giving individuals in each district the right to become the owner of this stock. To show my effort to prevent what I regarded as an injustice to the people I will quote from the Congressional Record just what took place. The Congressional Record plate the following. SIONAL RECORD of September 15, 1913, shows the following:

SIONAL RECORD of September 15, 1913, shows the following:

Mr. Morgan of Oklahoma. I offer an amendment.

The Chairman. The gentleman from Oklahoma [Mr. Morgan] offers an amendment, which the Clerk will report.

The Clerk read as follows:

"On page 3, after the word 'Provided,' in line 10, amend by inserting a new paragraph as follows:

"'Any person residing within a given district may subscribe to the capital stock of the Federal reserve bank of that district at any time under such rules and regulations as shall be prescribed by the Federal reserve board, and said board shall have the power to prescribe the terms and conditions upon which such stock may be surrendered for cancellation and to determine the amount of stock that will be subject to individual subscription."

Mr. Morgan of Oklahoma. Mr. Chairman, of course I do not profess to be an expert upon banking and currency; but, so far as I can see, there is no reason why an individual should not be allowed, if he desires, to subscribe to this stock. Under the provisions of this bill every national bank is required to subscribe to this stock, and State banks may, by the consent of the reserve board, subscribe. I notice in the report of the bankers' conference recently held in Chicago that the bankers apparently do not desire to subscribe, at least to the extent required in this bill, because they ask that the bill be amended so that they be required to subscribe only 10 per cent instead of 20 per cent of their unimpaired capital. I think the committee in its report estimates that under the provisions of this bill there will be about \$100,000,000 of capital subscribed. In other words, even the national banks, many of them, may not accept the provisions of this bill and may change to State banks. There is some question, as I understand it, as to whether or not there will be a sufficient number of banks subscribe to get the required capital.

If the Federal reserve bank is a bad thing, I do not believe we ought

there will be a sufficient number of banks subscribe to get the required capital.

If the Federal reserve bank is a bad thing, I do not believe we ought to compel the national banks to subscribe to the stock. On the other hand, if it is a good thing, I do not believe we should allow the national banks to monopolize the stock in these Federal reserve banks.

We have heard much and very often from the other side of the House about equal opportunities to all and special privileges to none. Under the provisions of this bill, in allowing no one except banks to subscribe to this stock, are you not giving them a special privilege that is granted only to the bankers of the United States?

Mr. Chairman, I believe in most localities there is some prejudice against banking institutions. Banks are to a large extent monopolies. They have special privileges, and they thrive off the people's money.

They control the interest rates to a large extent and can make their profits largely what they desire. Now, as I have said, in the minds of many people there is a prejudice against banks. A large part of this grows out of the fact that bankers are so few in number and that they have these special privileges. So I think there would be at least two benefits from this amendment. It would strengthen the system by enlarging the capital. It would give these banks more financial strength, more capital.

Second, I think another benefit would be that it would popularize this system with the great masses of the people. I believe one of the defects in all our great corporations in this country, including the banks, is that there are so few people interested in them.

The CHAIRMAN. The time of the gentleman has expired.

Mr. Morgan of Oklahoma. Mr. Chairman, I ask for five minutes

The CHAIRMAN. The time of the gentleman has expired.

Mr. Morgan of Oklahoma. Mr. Chairman, I ask for five minutes more.

The CHAIRMAN. The gentleman from Oklahoma asks unanimous consent that he may proceed for five minutes. Is there objection?

There was no objection.

Mr. Morgan of Oklahoma. Mr. Chairman, I believe it would be a wise policy hereafter, when banks are organized, to compel the organizers to open their books to popular subscription, so that the great masses of the people with small means might be allowed to take stock in the bank and receive some of the profits, instead of allowing one, two, three, four, or five men in a community to organize the bank, receive the deposits of the people, and add to their dividends and their profits until their stock becomes worth two or three times the amount they have invested in it, largely derived from profits on the money of the people. So I say it would popularize banks if you would allow the people to subscribe to this stock.

Mr. Murdock. Will the gentleman yield?

Mr. Murdock. Has the gentleman looked into this situation enough to know whether the investment would not be. under the provisions of the bill, a very profitable one?

Mr. Morgan of Oklahoma. Yes; that is what I was coming to. Under this bill the banks are allowed 5 per cent dividend upon the stock subscribed, and in addition to that, after the 20 per cent surplus is allowed, the bankers get 40 per cent of the balance, and this stock is exempted from all National, State, and local taxation.

We organized postal savings banks, and we allow the poor people 2 per cent interest on their deposits. I think we have \$25,000,000 of their money in the postal savings banks, and we allow the provisional postal savings banks, and we allow the report I have, there are \$4,500,000,000 in the savings banks of this country. I presume the depositors do not get on an average over 3 per cent on those savings. Why not allow men who have money in our savings banks—the 10,000,000 persons who have \$4.500,000,000 in the

As the Congressional Record shows, my amendment was voted down, but my effort was not entirely in vain, for the Senate took the question up, and after careful consideration of the matter one-half of the members of the Senate Committee on Banking and Currency, including Senator HITCHCOCK, Democrat, and all the Republican Senators on the committee, reported in favor of an amendment to the House bill allowing the public to subscribe to capital of the reserve banks. The amendment reported by Senator HITCHCOCK and the Republican Senators was as follows:

There shall be allotted to every national bank within a Federal reserve district, of the capital stock of the Federal reserve bank of such district, a sum equal to 6 per cent of the fully paid-up capital stock and surplus of such national bank, which stock so allotted shall be underwritten by said bank and for a period of 60 days after allotment be offered for subscription at par to the public at large, but no more than 100 shares shall be allowed to be subscribed for or held by any person, firm, or corporation, and all of the allotted stock not subscribed for and taken by the public shall immediately be subscribed for and taken by the national bank to which the same was in the first instance allotted. The preparation, allotment, subscription to, and sale of stock shall be under the control of the board, which in case of oversubscription shall give preference to the smaller subscriptions.

This is not all. The bill as it comes to us to-day in the form that it will become a law contains a provision, which in a limited and restricted way recognizes the policy I advocated in the House of public ownership of stock in the reserve banks, and I was the only one in the House who proposed such a proposition. The provision in the bill is as follows:

Should the subscriptions by banks to the stock of said Federal reserve banks, or any one or more of them, be, in the judgment of the organization committee, insufficient to provide the amount of capital required therefor, then and in that event the said organization committee may, under conditions and regulations to be prescribed by it, offer to public subscription at par such an amount of stock in said Federal reserve banks, or any one or more of them, as said committee shall determine, subject to the same conditions as to payment and stock liability as provided for member banks.

This provision is not what it should be, but it is an indorsement of the principle embodied in the amendment I offered in the House. It is not giving the people what they should have, but it recognizes the soundness of the proposition which I was the first to advocate.

3. NO FARM-CREDIT PROVISION.

There is no provision in the bill authorizing the formation of farm-credit associations to insure the farmers more available

capital and lower interest.

When this bill first came before the House I was disappointed that no provision was incorporated in the bill to authorize the formation of farm-credit associations to insure lower interest to the farmers and more available capital for the development of agriculture.

I made an effort to secure a proper amendment along this line. To show what I did and what I said I again refer to the CONGRESSIONAL RECORD of September 17, 1913.

Mr. Morgan of Oklahoma. Mr. Chairman, I offer the following amend

ment.
The Chairman. The Clerk will report the amendment.
The Clerk read as follows:
"Amend, on page 48, by adding after the word 'years,' in line 25, the following as a new section:
"NATIONAL RUBAL BANKS.

"Sec, 27a. That the reserve-bank organization committee mentioned in section 2 of this act is hereby authorized and directed to organize a system of national rural banks, to include local and State rural banks, and this national rural banks of the United States, under the laws pertaining to the organization of national banks in so far as they may be applicable, and until further legislation by Congress the said organization committee, with the approval of the President, is authorized to make all necessary rules and regulations for the organization, control, and management of said banks, having in view that the purpose of organizing a system of rural national banks is to provide the farmers of the United States with better credit, cheaper interest, and larger capital with which to develop the agriculture of the United States."

Mr. Glass. Mr. Chairman, I ask unanimous consent that all debate on this section and all amendments thereto close in five minutes.

The Chairman, The gentleman from Virginia asks unanimous consent that all debate on this section and all amendments thereto close in five minutes. Is there objection?

Mr. Mann, The gentleman from North Dakota [Mr. Young] desires to offer an amendment.

The Chairman, Is there objection? [After a pause.] The Chair hears none.

Mr. Glass, I will say in 10 minutes.

The Chairman, Is there objection? [After a pause.] The Chair hears none.

Mr. Morgan of Oklahoma. Mr. Chairman, I have offered this amendment with a view to emphasizing my interest in establishing a better system of rural credits in the United States. Perhaps four-fifths of my constituents are farmers, and the State which I have the honor in part to represent largely consists of farmers. Perhaps 1,100,000 of our people reside upon the farm, but it is not simply in the interest of the farmers and the people of Oklahoma but in the interest of all the people of the United States that I am anxious, and at the very earliest time possible, that we shall have a better system of rural credits for the farmers of the United States. It is said that the farmers of the United States we something like \$5,000,000,000 and pay something like \$500,000,000 and pay something like \$500,000,000 and pay something like \$500,000,000 and pay non-half of all the wealth produced in the United States very year is produced by the farmer. While manufacturing products amount in one year to about twenty-one billion, the manufacturers use about \$12,000,000,000 worth of material, and the net wealth added by all our manufacturing would be only equal to the net wealth added to the Nation by the farmers of this country. If I had any criticism to offer, which I shall not offer, upon the majority of this House it would be this, that when you enact a reform in a currency system and banking system of this country you should have taken along with it a system of rural credits.

In my indyment there is more of an emercency for a better rural

that when you enact a reform in a currency system and banking system of this country you should have taken along with it a system of rural credits.

In my judgment there is more of an emergency for a better rural credit in this country than there is for a better system of banking or better system of currency. The very strength and greatness in this country depend upon agriculture. You are providing a currency for merchants, for manufacturers, for business men, for bankers, for speculators, for capitalists, taking care of this great class and letting the farmers go. It seems to me you are putting the cart before the horse, and that the first thing you should care for would be the great agricultural interests of this country.

I do not care to detain the committee. Here is a great bill prepared with great ability, upon which you have put great thought and great learning. You had the assistance of experts. It might be likened to and said to be a great edifice, a great financial structure, a magnificent building of finance and money and currency, but it seems to me, then, that when you get through with that you will undertake rural credits; you must make the rural credit system a mere "lean-to" to this magnificent structure that you have erected for the benefit of the manufacturing, commercial, and banking interests of the country. On the other hand, the rural credit system, the banks for the farmers of this country, the banks to promote the agricultural interests of this country, ought to be the very corner stone of our financial structure. [Applause on the Republican side.]

The Chairman, The question is on the amendment offered by the gentleman from Oklahoma [Mr. Morgan].

The committee divided; and there were—ayes 22, noes 97.

So the amendment was rejected.

I am especially grateful that in line with my suggestion for

I am especially grateful that in line with my suggestion for a better system of rural credit the Senate amended the House bill, and the amendment is included in the report of the conference committee now before us, permitting national banks to make loans on farm lands for a period five years to an amount equal to 25 per cent of their capital, or equal to one-third of their time deposits. I gladly give credit to the party in power for even this slight recognition of the claims of 6,500,000 farmers. But all farmers will recognize that this provision will be of only insignificant assistance to the farmers, because for long-time loans farmers can not afford to pay the interest rates which the average national bank must have for short-time

4. DISCRIMINATION AGAINST THE PUBLIC.

This conference report, which is the final form in which this bill is to become a law, retains Senate amendments favorable to the bankers, but excludes amendments favorable to the public.

Under the provisions of the House bill the banks were allowed only 5 per cent cumulative dividends on the stock they own in the reserve banks. But the bill now allows the banks 6 per cent. If the total capital stock of these reserve banks shall aggregate \$100,000,000, 1 per cent added to the annual dividends will make the banks \$1,000,000 additional profit every year. More than this, the House bill permitted the reserve banks to accumulate a surplus of 20 per cent, but the bill as it now stands allows the reserve banks to retain a 40 per cent surplus before any profits go to the Government. You have added 20 per cent to the dividends of the member banks and 100 per cent to the amount of surplus the reserve banks are allowed to appropriate from the earnings of these banks. By this change in the House bill you have added probably a million of dollars annually to the dividends of our national banks and other member banks, but you have stricken out from the Senate amendments the provision which set aside a portion of the profits of these great reserve banks as a fund to insure the deposits which the people place in these banks. Again, the House bill required the national banks to subscribe 20 per cent of their capital to the newly created reserve banks. But under the provisions of the bill as it comes from the conference committee the national banks are required to subscribe only 6 per cent of their capital stock and surplus to the reserve banks, half of which is to be paid within six months and the balance not until called for by the central board at Washington.

In other words, this bill now is far more favorable to the banks than the House bill and less favorable to the poeple.

CONCLUSION.

Now, Mr. Speaker, I have made proper effort to perfect this bill along lines which I regarded as important to the people. But my amendments have been voted down, my suggestions have not been heeded. The majority in this House has turned a deaf ear to my warnings. But the voters of this country will hold the majority responsible for its acts. The people, who pass judgment upon all we do here, will at the first opportunity condemn you for not adequately protecting their rights and punish you to the extent of their power for betraying their interests.

Mr. MURDOCK. Mr. Speaker, the gentleman from Minnesota [Mr. Lindbergh] is momentarily absent, and I ask leave to yield to the gentleman from Pennsylvania [Mr. TEMPLE].

[Applause.

Mr. TEMPLE. Mr. Speaker, three months ago, when the currency bill passed the House, I did not vote for it. I said at the time that there were grave defects in the bill which threatened to interfere with the safe working of a plan which, in many respects, was in harmony at once with sound economic theory and with the banking experience of the world. I expressed the hope that after the bill had passed through the other House and had been reported from the conferees I might then be able to vote for it. I now find that the bill, which was materially amended in the Senate and still further modified in conference. is in many respects a new bill. It has, of course, a great deal of the old material in it, as the old bill contained a great deal of the material furnished by the report of the Monetary Commission. I find it arranged in what I believe to be a better I find some of the dangers of the old bill eliminated. order. If I had time I should like to analyze it in detail, but I shall not undertake to do so at any considerable length. I should like, however, to call attention very briefly to the more important changes, which, in my judgment, will greatly improve the banking and currency system proposed in the original bill.
